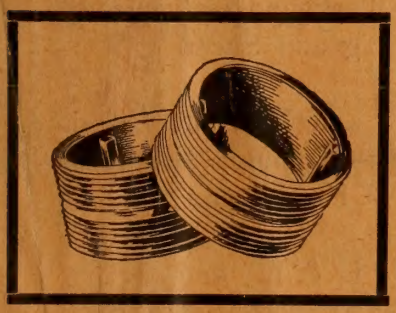
"That Made the Hit"



This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time— easy to handle for the contractor.

BOARDS OF TRADE AND LABOR TROUBLES.

THE successful manner in which the representatives of the Toronto Board of Trade carried on the negotiations which brought about a settlement of the street railway strike in Toronto, has emphasized the importance of the Toronto Board of Trade as a medium of conciliation in labor disputes.

The Toronto Board of Trade, as all other boards of trade, is essentially a representative business body, and no one knows better than its members the evil effects of strikes, for no one certainly suffers more, next to the families of the strikers, than the business interests of a community in which there is an open rupture between capital and labor.

Some years ago the Toronto Board of Trade obtained certain powers to enable it to act as a board of conciliation in regard to disputes of various kinds, but hitherto its work in this direction has been of little importance, and certainly has never attracted as much attention as its recent successful efforts in regard to the street railway strike in Toronto.

The London Chamber of Commerce has for some years done a great deal of good work in the way of conciliation, and there is no reason why such important boards of trade as those of Toronto and Montreal should not be as useful.

No one is certainly more competent than business men to adjudicate upon such questions as are embraced in disputes between capital and labor. They do not look at the questions in dispute from a technical standpoint, nor are they influenced by fine points of law. They look at it from a business and common-sense standpoint and act accordingly.

It is to be hoped that the experience of the Toronto Board of Trade will inspire other boards of trade throughout the country to emulate its example in the matter of local disputes between capital and labor.

IT IS A TAX ON PEDDLERS.

It has been said in some of the newspapers that the city of Quebec proposed to place a tax on commercial travellers. It turns out, however, according to an explanation which has been furnished by the authorities of that city, that the tax is not aimed against the regular commercial traveller, but is to apply to what are commonly called peddlers.

Peddlers, as we all know, contribute very little towards the support of the municipality, while they frequently do a great deal to disturb trade and the profits of the legitimate merchant. While the Quebec tax of $300 may be excessive, it is obvious to everyone in business that the ordinary peddler should be made to pay at least a fair tax.

THE RIGHT VOCATION.

NEXT to the possession of enterprise and energy that will not be balked by obstacles, there is nothing more necessary to success in life than the choice of vocation.

Unless there is adaptibility there can scarcely be success. It is better to be a first-class bootblack than a poor lawyer. One of the evidences of this is to be seen in the experience of a certain New York bootblack.

Eighteen years ago he began business in that city. His outfit consisted of the usual bootblacking kit slung across his shoulder. He was industrious as well as ambitious, and he finally secured a stand in the Produce Exchange building, and became known as "Tony, the Bootblack." Eventually he had stands in other buildings throughout the city besides, and it came out in court the other day that he was now worth $1,000,000.

It should be stated that all this million dollars was not made by blacking boots, but he saved a large sum of money from his work, and with the money thus saved he did some speculating, and with successful results.

Possibly, if Tony had gone into any other vocation than blackening boots he would have been a failure rather than a success.

PIG IRON SITUATION IN CANADA.

PIG IRON in Canada is still in a pretty strong position. The condition of stocks throughout the country necessitates steady buying. Representatives of the furnaces report that they are taking a large number of orders for delivery for the first half of next year, and, from what we can gather, a larger quantity of pig iron has been already sold for 1903 than there was up to February last for 1902.

A new feature in the pig iron situation in Canada is the demand which has arisen for iron on steel-rail-making account. The Clergue works, at Sault Ste. Marie, since they began operations, have turned out steel rails at the rate of 500 tons per day. Before the rail mills were started, the company bought from one blast furnace alone 30,000 tons of pig iron, and it has since repeated the order.

It is the general opinion among authorities that the consumption of pig iron in Canada to-day, since the starting-up of the Clergue steel-rail mills a couple of months ago, is in excess of the quantity that is being turned out by the home furnaces. This, however, is only a temporary matter, as, when all the furnaces are in blast, the quantity will, of course, be more than sufficient to supply the home market.

Since beginning operations the Sydney furnaces have, as our readers are aware, exported over 50,000 tons to Great Britain alone. The official returns show that from the whole of Canada during the first ten months of the present fiscal year, ending April last, the total quantity exported to all countries was 92,571 tons, valued at $902,492. Of this quantity 87,000 tons went to Great Britain alone. For the whole twelve months of the fiscal year 1901 the total quantity of pig iron exported from Canada only amounted to 5,623 tons, of which but 1,603 tons went to Great Britain. It will thus be seen at a glance how enormous is the increase this year over its predecessor.

That the steel works at Sault Ste. Marie will be a large consumer of pig iron for some time to come is evident from the fact that it already has on its books orders for about 100,000 tons of steel rails.

In the United States the pig iron situation has not materially changed. Business at the moment is not as active as it was, which is, of course, to be expected at this time of the year. Another two months, however, is likely to see a revival of the demand. Quite a few orders, however, are being taken for next year's delivery, and prices in some instances are even higher than they were a week or two ago. It is significant that some of the Southern furnaces are doing business on a basis of $19 at the furnaces for No. 2 foundry, which is $2.50 per ton above the figures at which contracts were made only a month ago. The Philadelphia correspondent of The New York Metal Exchange says that the scarcity of pig iron is greater than ever, and that there are no prospects of easier condition in the near future, although the midsummer holidays may cause a slight gain in the supply.

THE STEEL TRUST'S BIG PROFITS

ATTENTION has again been drawn to what is commonly called The United States Steel Trust, on account of the enormous profits which it has been making during the last three months. These profits amount to over $37,500,000 and break all former records since the United States Steel Corporation was organized.

It will be remembered that when the Trust was formed a good many were skeptical as to its permanency on account of its heavy capitalization. The conditions ever since the corporation was organized have been in its favor, and while the test of hard times is yet to come, it is evident from the results of the past that confidence in the permanency of the corporation is stronger than it ever was.

A statement has recently been published showing the large profits which some of the individual members of the Trust have made. Mr. Henry Phipps has an annual income from the shares he holds of $1,149,000; Mr. H. C. Frick follows with $900,000; then comes Mr. Henry W. Oliver, $490,000; Charles M. Schwab, $370,000, and Alex. R. Peacock, $249,373. Besides these, a number of the stockholders receive as their share of the profits sums ranging from $200,000 to $50,000 per annum. In these sums it should be remembered no account is taken of the large income which some of these gentlemen receive in their capacity as officers of the steel corporation.

THE TOURIST ASSOCIATION MOVEMENT.

CANADIANS feel a national pride in their country, a pride increasing with wider information and a more thorough knowledge of its boundless resources. The strenuous activity of its industrial enterprises throbs with a quickened pulsation under the vitalizing influence of a limitless supply. Broad harvest fields, ever extending their boundaries, flout at famine or at want. But even we Canadians are just awakening to the capabilities of the land we own.

In no country can the realization of the adage "All work and no play makes Jack a dull boy" be better attained. Canada can supply the means for rest, for recreation, as well as for work. Nature laughs in the ripples of sparkling rivers, and frowns with the grandeur of towering mountains, and teems with the life of fine old forests. Island homes give a charm and a repose to refreshing holidays.

When these advantages are seized by us, it means a vitalized energy and a freshened zeal which represents great capital when we resume work. When these advantages are seized by strangers, it means expenditure for our good, the development of great pleasure places, and profit for the country.

The only way to attract others is to extend our reputation, to let people know about us, to acquaint them with the fact that Canada is, par excellence, the place for tourists. Tourists' associations effect the required advertising better than all other means. In previous numbers the commendable zeal of associations already formed has been noted.

Victoria has taken the lead on the Canadian Pacific Coast, but others have been formed at Nelson and New Denver, and Vancouver is agitating for one.

The formation of tourist associations diverts from other quarters to our own districts much of the summer expenditure of wealthy outsiders.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

PARIS GREEN EASIER IN THE UNITED STATES

DURING the past week there has been a noticeable falling off in the demand for paris green, resulting in a weaker market. The stocks in manufacturers' hands are not large, and some makers are only accepting orders from their regular customers. The season continues cool in the eastern section of the country and vegetation consequently backward. With the event of continued hot weather the bugs may become more troublesome and an urgent demand may be experienced. —Iron Age, June 26.

CUT AND WIRE NAILS IN THE UNITED STATES.

The scarcity in cut nails continues in a modified degree and less trouble is experienced in getting prompt shipments than for some time. Iron cut nails are still difficult to obtain.

Stocks of wire nails are beginning to accumulate at the mills, owing to the decrease in demand. Many mills will take advantage of this condition to close in July for the annual repair and clean up, which is required after a year of continuous operation.—Iron Age, June 25.

LINSEED OIL IN CHICAGO.

The market continues firm at 64c. for carload lots raw. Crushers do not claim to be selling any great amount of oil at that figure, but they all say that prices are not shaded to make sales. The situation seems to be strong enough to justify the quotation and a firm market. In common with the general demand for paints the demand for oil also holds good and sales are reported larger than last year at this time. Consumers have been holding off for lower prices and may have to come into the market in July and August at higher figures. Sales of oil for fall delivery are not reported. Neither crushers nor buyers are in the mood for these transactions. Present demands are sufficient to keep the market fairly active. We quote 64c. on carload lots raw.—Paint, Oil and Drug Review, June 25.

THE PIG TIN SITUATION.

The downward movement in pig tin received fresh impetus to-day on the publication of the monthly statistics, which, as expected, were unfavorable for bull interests. As indicated by previous advices, shipments from the Straits during June were heavy, amounting to 4,970 tons, compared with 4,330 tons for the corresponding period last year. While the deliveries for the month were liberal, the arrivals were on an equally large scale, the former amounting to 3 300 tons and the latter to 3,744 tons. The spot stock in store and landing on June 30 was 3,036 tons, while the stock afloat at that date amounted to 3,388 tons. For the first time this year the total visible supply showed a large increase, the figures being 15,897 tons, against 14,766 tons at the same time in 1901. The tone of the market today was weak, very little interest being shown by buyers and no business of consequence being accomplished. Spot further declined 25 points, being offered at 27.75c., with 27.25c. bid. For July 27.32½c. was asked and 27.15c. bid, while on August the bid and asked prices were 26.75 to 27.25c., on September 26.50 to 27c., and on October 26.25 to 26.75c. In London the market was quiet and easy, closing at a further decline of £1 on spot and of 2s. 6d. on futures. The Singapore quotation declined 5s. to £121 5s.—New York Journal of Commerce, July 2.

SITUATION IN COPPER.

There was no business of consequence in this metal to-day and the market was easy, prices showing a further slight decline. For delivery spot to October Lake was offered 12.25c. with 11.87½c. bid; electrolytic was quoted at 12c. asked and 11.85c. bid, casting at 11.75 and 12c., and standard at 11.37½ and 11.75c. Exports for June, according to figures compiled for the Metal Exchange, show a very considerable decrease compared with those of preceding months this year, being but 12,560 tons, against 15,493 tons in May, 16,400 tons in April, 20,015 tons in March, 14,001 tons in February and 15,474 tons in January. The total shipments for the six months were 93,943 tons, compared with 49,325 tons for the corresponding time in 1901 and 85,322 tons in 1900. The London market to-day showed little change. There was an earlier decline of 1s. 3d. in spot, which was recovered after noon, while futures advanced 2s. 6d. for the day, increasing the premium to 7s. 6d.—N.Y. Journal of Commerce, July 2.

LEAD AND SPELTER IN NEW YORK.

PIG LEAD—A steady feeling characterized the market, though there was not much business. Prices are still based on 4.12½c. in lots of 50 tons or more. St. Louis was firm, with 3.97½c. bid. Late yesterday 200 tons chemical hard sold at that figure. The London market was unchanged.

SPELTER—The market remains very firm, but in the absence of important supplies the quotation of 5c. is somewhat nominal. St. Louis was stronger. After sales of 50 tons at 4.85c. that market advanced to 5c. In London there was no change.—New York Journal of Commerce, July 2.

IRON AND STEEL IN THE STATES.

PIG IRON—Sales of pig iron have been mainly of foundry for next year's delivery. and for deliveries beginning late this year and running into next year. On business where there are any deliveries called for this year, furnacemen claim to have gotten $22 to $22.50 for No. 2, while for small lots for early shipment $23 could probably be secured, In bessemer there have been only a few thousand tons sold. The price is very firm at $21, valley, for fourth quarter, and for earlier delivery a variety of prices has been made on small lots. Gray forge has become quite strong and there has been some selling for the late months of the year at $20.50 on up to $21.25 for quick delivery. Southern forge is lower than northern, and is selling at $20.25 to $20.75, according to delivery. There is a pronounced scarcity in pig iron, accentuated by the continued curtailment of production in southern Ohio and eastern Pennsylvania respectively, due to the anthracite strike and the West Virginia strikes respectively.

STEEL—Domestic steel continues on a lower level than formerly, and, while there is a fair inquiry, it does not lead to much business, as prices are higher than finishing mills can take chances on. Nearly all sales are of small lots for early shipment, and as high as $34 at mill is occasionally being paid for Bessemer billets. For extended delivery, mills do not seem to be ready to pay over $32 or $33. Sheet bars are relatively lower than billets, and the market is about $33, but even at this figure sheet mills are not very ready to take hold. Wire rods remain firm at $36.50 to $37.—The American Metal Market, July 1.

PERSONAL MENTION.

Mr. C. M. Irvine, hardware merchant, of Arthur, Ont., was in Toronto this week on a business trip and called on HARDWARE AND METAL. Mr. Irvine also has a store at Grand Valley.

TRADE CHAT.

The Halifax agency of The E. B. Eddy Co., Limited, has been elevated to the dignity of a branch. John Peters, who has for a number of years looked after the interests of this firm in that city with marked success is retiring owing to poor health. J. T. Sheriff, who has been connected with The Eddy Co. for some years, has been placed in charge of the branch there as manager.

HOW A BUSY YOUNG MILLIONAIRE EMPLOYS HIS TIME.

JOHN D. ROCKEFELLER., JR., son of the richest man in the world, has a remarkable mission—a task which he is making the supreme purpose of his life, according to a New York paper.

It is, as all philosophers will agree, no trivial thing that this young Croesus has undertaken. Even the Scriptures (see Luke xviii., 25) have intimated, through the parable of the rich man, the camel and the needle's eye, that it is next to impossible. But Mr. John D. Rockefeller, jr., perseveres in his noble mission, which is, in plain words, to square business with Christianity, to Christianize commerce, and, strange as it may seem to the layman, is absolutely encouraged by the results which he has obtained.

In a speech which he delivered a short time ago before the Y. M. C. A. of Brown University on the topic, "Business as a Life Work," John D. Rockefeller, jr., made plain his mission as he understands it.

"Many men of to-day," said he, "think that business and Christianity are diametrically opposed to each other. We have come here for the purpose of expressing the belief that they may go hand in hand, and that the most successful business men can be, should be and are the most successful Christian men.

"There are three chief requisites for a successful business man. The first is honesty—absolute honesty; the second is industry and the third is perseverance.

"We must not be quitters. A fourth point to be considered is justice."

Here John D. Rockefeller, jr., interjected a plausible if not profound defence of trusts, in which, it being one of his few "flowery" speeches, he compared them to American Beauty roses.

"Large concerns," said he, "often shut out smaller men who cannot compete. Oftentimes we cannot reconcile this fact. It seems to us contrary to the Golden Rule.

"Let us go back and examine the true causes. The big businesses increase because they can by advanced methods and appliances place their goods on the market cheaper than can the smaller concerns.

"Modern methods should be employed even at the expense of the few.

"The American Beauty rose can be produced in the splendor and fragrance which brings cheer to its beholder only by sacrificing the early buds which grow up around it. This is not an evil tendency in business. It is merely the working out of a law of nature and a law of God."

Among young John D. Rockefeller's aphorisms are several that sum up his brief philosophy:

"The chief thing in life is to do something—to work."

"I know what it is to cut wood and to crush stone roads at 15c. an hour."

"It is by doing the work that is at hand that we become useful and successful."

"Success comes by doing the common, everyday things of life uncommonly well."

SOME OF HIS MAXIMS.

The most successful business men can be, should be and are the most successful Christian men.

There are three chief requisites for a successful business man. The first is honesty—absolute honesty; the second is industry and the third is perseverance.

Modern methods should be employed even at the expense of the few.

The chief thing in life is to do something—to work.

The growth of a big business is merely a survival of the fittest.

Do the little every-day duties of life without a murmur. Do them well. That is success.

Thirty cents is all I ever spend for luncheon. It's enough for any man on a salary.

Success comes by doing the common, everyday things of life uncommonly well.

"Do the little everyday duties of life without a murmur. Do them well. That is success."

"A war may cost many lives, but it is for the good of the country at large. The growth of a big business is merely a survival of the fittest."

John D. Rockefeller, jr., began to work and to earn money when he was six years old.

His first hard day's work netted him 13c. His father offered him a fee of 1c. for every fence post in need of repair that the boy could find on the big country place near Cleveland, O.

Young Rockefeller tramped miles, and in 12 hours hustling he earned the 13c.

Another time he lived up to his work maxim by working out his father's road tax and collecting the wages from Rockefeller, sr.

It is doubtful if he ever really wasted a penny.

"Thirty cents is all I ever spend for luncheon," he remarked one day. "It's enough for any man on a salary. Sweetmeats ruin the digestion, anyhow,"

He never touches wine. He never smokes. Wine, at his request, was left off the menu at his wedding breakfast, when he married Miss Abby Aldrich last fall.

He gave his first society entertainment in a dinner-dance at the Waldorf-Astoria recently. There was no wine on the supper cards.

When he was a student at Brown University he was talking one day with a fellow-student who worked his way through college.

"A man who works and is exposed to all kinds of weather has to be mighty careful about taking cold," said the first student. "I always wear three weights of underwear in winter."

"Three weights of underwear! Great Scott! I can't afford to wear more than two myself! It's reckless extravagance," said John D. Rockefeller, jr.

Work, the necessity of religion and the righteousness of making money and getting on in the world are the three pegs upon which Rockefeller, jr., invariably hangs his speeches.

He talks without gestures and usually without raising his eyes from the desk or from the notes that he has in hand.

Of medium height, rather thick-set, pale, weak-eyed, spectacled and serious, dressed faultlessly in black, with a shiny black tile, the richest young man in the world looks nothing so much as a promising divinity student.

He once made a speech to the students

Limited
HAMILTON, ONT.

of Tuskegee Institute, Booker Washington's school.

A sea of black faces looked up curiously at the pale, mild-mannered young fellow who looked down at them over a big white puff tie.

"My friends," he said, "do not be ashamed to do any kind of work that falls into your hands. When I went into my father's office I was willing to do any sort of work they wanted me to do, even if it were putting on my father's shoes. I did not care how humble it was. I wanted to begin at the bottom and learn. Do not be afraid to make a lowly beginning.

"I once assisted a young man to get a position. He remained in it two days, and when I asked him why he had left he said: 'They put me to sweeping the floor and I quit. I am too old to be sweeping the floor.'

"I am delighted with your school. I am going to prove that by coming back in nine months. I have a reason for returning. As I was visiting the night class I came across a young man who was exercising for his class on the blackboard. He had written: 'Nine months after date I promise to pay to John D. Rockefeller, jr., $650, with interest from date, for value received.'

"I asked the teacher to have him sign it, and he did. I am coming back in nine months to see that young man."

If John D. Rockefeller, jr., had gone more into details as to his own business career he might have brought out these facts:

About four years ago he began as a clerk on small wages in his father's New York office. He learned the routine of the business, and he is to-day his father's private secretary. He rise at 6.20 a.m. and rides or drives, or, if he is stopping at the Tarrytown place he chops wood until 7 o'clock.

After breakfast he starts down town and reaches his office at 9.30. He works till 3.30 p.m., when he knocks off and goes over to a Broad street restaurant, where he gets his 30c. lunch.

From that time until dinner at 6 he amuses himself, usually in works for the Fifth Avenue Baptist Church or Sunday-school, or in reading, violin playing or walking through the park. His dinner consists of soup, meat and one simple dessert, with never any wine. He is not a member of any club, and spends his evenings at home with his wife, his father and his mother.

In his few independent business ventures John D. Rockefeller, jr., has always acted upon the theory of the survival of the fittest.

He made his first million in a speculation in leather, in which a good many men went to the wall. He engineered a copper and transportation deal which largely advanced freight rates and gave the Rockefellers control of the shipping industry of the Great Lakes.

It is in addresses to his Bible class in the Sunday-school of the Fifth Avenue Baptist Church that young Rockefeller has trained himself as a lay preacher.

"I am more than a Baptist," he remarked one Sunday; "I am a Christian."

In a talk one day on the Belshazzar feast, the most famous orgy in Bible history, and the handwriting, "Mene, mene. Tekel upharsin," traced upon the wall, the millionaire lay preacher said:

"The reading of this Belshazzar lesson has always inspired me with solemn thoughts. I have often asked myself whether I would be found wanting in the balance when the time came to weigh me.

"I trust that when we stand before the great white throne we shall not be told that we have been weighed in that awful balance and found wanting."

At another time the question of evil communications and the corrupting of good manners thereby came up in young Rockefeller's Sunday-school class.

"Well," said he, "when I was at Brown University, though I did not smoke myself, I did not object to any one else smoking in my room. I had a reason for seeming thus to countenance the use of tobacco.

"My grandmother thought that I was wrong in allowing those about me to do things of which I myself did not approve. But I said to her, 'Were I to raise an objection to their smoking they would go away from me and I could not approach them on drinking, gambling and other sins.'"

That John D. Rockefeller, jr., has a sense of humor and knows how to tell a good story is proved by the mother-in-law joke which he made famous. It happened to be all the funnier to his hearers as the occasion was shortly after the lay preacher became a benedict.

"This story," began Mr. Rockefeller, "has no relevancy to the occasion, but I will not let that deter me. A young man and his wife had lived for years, and not always pleasantly, with the wife's mother. At last the old lady died—or at least they thought she had died.

"The pall-bearers carried her coffin down the front steps, and one of them slipped. The coffin struck a tree, the lid came off and then it was found that the mother-in-law had not died at all, but was only in a trance.

"Well, she lived for some years after that, and then she died again—this time permanently. And as the pall-bearers approached the same tree at the foot of the steps the young man stopped weeping, turned to the man who had slipped and whispered, 'Be careful, Sam, don't slip this time.'"

CURRENCY IN THE YUKON.

UNITED STATES CONSUL H. D. SAYLOR reports from Dawson City, April 29, 1902, that a recent Order-in-Council changes the rate of royalty on the gold output of the Yukon Territory. The present rate is 5 per cent. on all the gold produced by any individual, exceeding a gross output of $5,000 per year. It is now intended to reduce the royalty to 2½ per cent. with no exemption. The consul explains that gold dust is generally used in that section to liquidate debts, and merchantable gold dust, or dust thoroughly cleaned, is worth on an average $16 per ounce. Commercial dust is understood to mean a mixed dust of different creeks, adulterated with black sand or crushed white quartz, which is worth from $14 to $15 per ounce. Every practical miner will, if his dust be above the average in value, sell it to the bank, buy commercial dust at an average of $15 per oz., and pay his creditors with it at the rate of $16 per oz. The merchant, on the other hand, receives for the dust, on exchanging it for currency, only about $14.75 per oz. As the large commercial houses are mainly American and buy their goods in the United States, they will be obliged, under the new order, to lose not only the discount of $1.25 on the dust, but pay the export tax as well; hence, they are endeavoring to force the dust out of circulation. Already, the mechanics in many trades have refused to accept gold dust for wages, and are now paid in currency. In order to put the Territory on a currency basis, if possible, the merchants have decided to accept, after May 1, 1902, merchantable dust at $15 per oz., the merchant to pay the 1½ per cent. export tax.

ORDERS FOR SHELVING AND BOXES.

Mr. Humphrey, 364 Queen street west, Toronto, is putting in a stock of hardware, and has purchased the necessary shelving from J. S. Bennett. Mr. Bennett is also in receipt of an order from Cote, Boivin & Cie, Chicoutimi, who had previously purchased screw-cases and shelf-boxes from him, for a large bolt-case; from Rogers Hardware Co., Toronto Junction, for bolt and screw cases, and from C. R. Hoben & Co., Halifax, for a section of shelving complete with boxes.

M. Perry, general merchant, Kirkfield, Ont., is advertising his business for sale.

Charles Echlen, general merchant, Cedar Springs, Ont., has sold out to E. G. Hocker.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

BALL BEARINGS IN COMMON ARTICLES.

A BALL BEARING wheelbarrow is now on the American market. The ball cups are of 13 gauge cold rolled steel, stamped in one piece, and are referred to as being indestructible. Each one contains 12 bicycle balls, and also forms a clamp or metal band surrounding three sides of the handles, to which they are bolted to form a strong wheel attachment. The tray is alluded to as being much larger than commonly used, and as being hung on scientific principles, to throw much of the load directly over the wheel. It is so equalized and balanced, it is stated, that 4½ cubic feet of earth may be wheeled on the barrow with less effort than is required to handle half that quantity on ordinary dump barrows; also that all friction is removed and that the effort of pushing is lessened 50 per cent. The wheel is of steel, 16 inches in diameter, with 1½-inch flat tire and ⅝-inch spokes shouldered and riveted. The hub is chilled and concaved on the ends where the balls race.

The "Acme" ball-bearing castor is a bedpost castor made in brass, and nickel finish, to fit in a bed with 1, 1½ and 2 in. post. Besides being non-corrossive it is dust-prof, and practically indestructible. It is easily attached, and once on the post remains there. The weight falling directly over the centre of gravity, there is no chance of it breaking or getting out of order. The surface of the ball revolves upon the smaller balls, and moves in any direction with the slightest pressure. Either solid or hollow balls are supplied. The firm also make castors for all kinds of furniture, and, in fact, for anything and everything that moves on rollers.

Roller-bearing truck and furniture castors are being introduced. The castors are either in polished brass for furniture and bedsteads, or in bronzed iron for bedsteads, trucks and similar purposes. It will be understood that the castor revolves upon a series of steel rollers or discs placed in an annular chamber, and carries the weight outside the centre of the main wheel. This gives an even bearing upon the circle of discs, and relieves all friction upon the pivot or strain upon the fastening screws. The parts are riveted together firmly, and free access is given to the screws through an opening in the plate. They have been thoroughly tested in past years on all classes of work, and are pronounced by the leading manufacturers of fine furniture, shopfitters, makers of warehouse trucks, and all who use castors to be the most satisfactory made. The iron castors can be obtained with either iron, lignum vitæ or brass wheels.

A DIVIDEND OF FOUR PER CENT.

At the annual meeting of the Ottawa Electric Light Company last week it was decided to declare a dividend of not less than four per cent. Mr. Thomas Workman was elected to the board of directors in place of the late Senator Clemow.

LEASE THE HULL ELECTRIC ROAD

It is stated on good authority that the Ottawa Electric Railway Company will lease the Hull Electric Railway for a term of five years. When the company secures control of the Quebec line the question of establishing a loop line and double track in Hull will be taken up. The facilities of the road will thus be greatly increased.

A DELIVERY OF MACHINERY.

Monday, June 23, 1902, was the occasion of the delivery of a car of farm machinery at St. Jerome from the Frost & Wood Co., Limited, of Smith's Falls, Ont. A tour of the principal streets was made. The procession was made up of private carriages, binders, reapers, mowers and rakes, which made a procession of about half a mile in length. The farmers were banqueted and photographed.

A REPORT ON FIRE ENGINES.

At a meeting of the Montreal Fire Committee, to decide upon the purchase of fire engines, on July 1, the report of the testing committee was received. The committee has tested the Waterous engine twice, and upon both occasions it was found to be satisfactory. Reports of these tests will be submitted by the experts at the next meeting of the committee on July 10. The committee also went to London to examine a Ronald engine, but it is said that no representative specimen of that make could be obtained for exhibition purposes. The committee, Ald. Richardson thinks, has thus no recourse but to purchase one at least of the Waterous engines.

HINTS REGARDING ELECTRIC PLANTS.

THE handling of electric light and power apparatus and line wires is always fraught with considerable danger. Rules will never remove the danger, but they often insure care. HARDWARE AND METAL is indebted to President Morton, of Stevens' Institute of Technology, for the following suggestions and comments:

1. Do not touch or handle any electric wire or apparatus of any sort while standing on the ground, or while in contact with any iron work, gas or water pipe, or stone or brick work, unless your hands are covered with rubber gloves, and you are provided with such properly insulated tools as have been declared to be safe and in good order by the electrician or other competent officer of this company.

2. If it is at any time necessary to stand on the ground, or on any surface not insulated from the ground, while handling electric wires or apparatus, rubber boots or an insulated stool should be used.

3. In moving wires, hanging on or lying over electric light wires, lamps or fixtures, use a dry hand line.

4. Never handle any electric wire or apparatus with both hands at once when this can be avoided, and if it is necessary to do so be sure that no current is present, or that one or both hands are protected by rubber gloves or other efficient insulation.

5. When handling line wires, treat each and every wire as if it carried a dangerous current, and under no circum tances allow yourself to make contact between two or more wires at the same time.

6. Never open a circuit which has been in use without giving notice to the superintendent, or whoever is in charge, of your intention to do so, and at the same time request that the same line be opened at the main station and kept open until you have given notice that your work on that line has been completed.

7. In the dynamo-room, never go near the belts or dynamos, nor touch any apparatus, unless you are fully informed and instructed how to do so.

8. Tools used by linemen should be provided with insulated handles of hard rubber or other equally good insulator. It is the duty of each lineman to look after his own tools and see that they are in good order, especially as to their insulation.

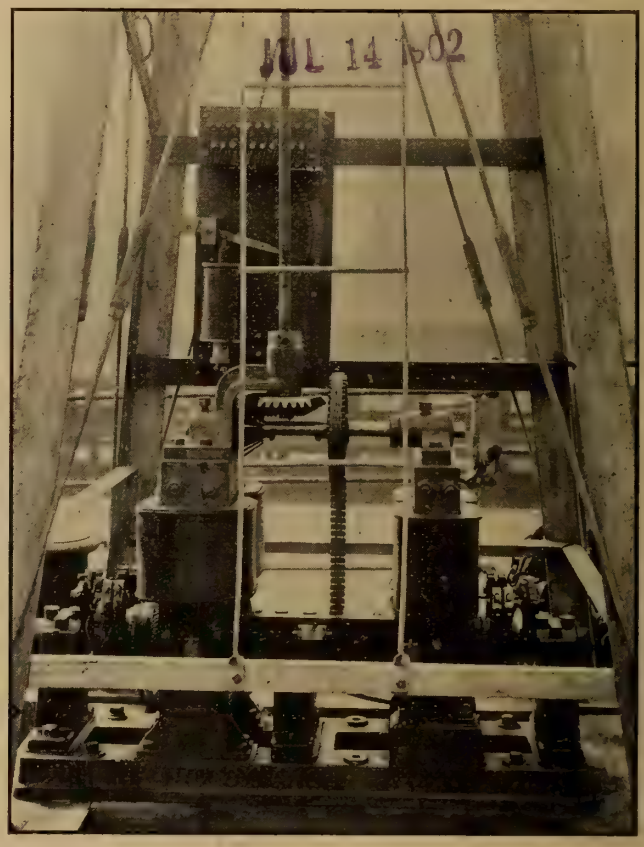
CANADIAN AIR MOTOR FOR SOUTH POLE.

A COUPLE of novel illustrations on this page show the latest use to which a wind-mill has been put. The Ontario Wind Engine and Pump Co., of Toronto, have recently supplied one of their air motors to be erected on the deck of the steamship Discovery, bound on an exploration expedition to the South Pole. The air motor is to be used for furnishing light to the ship by driving the dynamo, thereby saving fuel and labor, and enabling the vessel to stay among the dreary waste of icebergs longer than any previous attempt. The promotors of this expedition figure that the wind engine will pay for itself during the trip.

Air Motor on Board Ship.



Air Motor on Board Ship—A Close View.

The Ontario Wind Engine and Pump Co. have receptly completed a large addition to their building in Toronto, to meet the demands of their increasing business. Their galvanizing department, in which hardware merchants are interested, is splendidly equipped and has radidly sprung into popular favor.

NOT ONE WILL BE TAKEN BACK.

Hon. Wm. Harty, president of The Canadian Locomotive Company, which has recently had a strike by its machinists, said on June 29: "Not one of the machinists who are now on strike will ever be taken back by the company. You can say that I am the authority for that statement. In a few days the places of the strikers will be filled, and everything in the shops will be booming. We have a lot of work ahead, and as soon as we can secure enough machinists we can turn out the engines very rapidly."

DIED FOR HIS COMPANION.

On Tuesday, July 1, Dexter Griffiths was instantly killed by coming in contact with a live wire at the Cataract Power Co.'s works, about three miles from St. Catharines. Mr. Griffiths was killed in an attempt to rescue his companion, Mr. Higgins. Mr. Higgins escaped with a severe shock.

MACHINERY AND ELECTRICAL NOTES.

A complete sawmill outfit was shipped on June 30 to Samuel Hausuld & Co., Temiscaming, Ont., by H. W. Petrie, Toronto.

A No. 7 Jewel automatic engine and 50-h. p. fire-box boiler, also a double cylinder hoisting engine and boiler, were installed in the cement plant of the estate of John Battle at Thorold, Ont., by H. W. Petrie, Toronto. The Battle Co. express themselves as highly pleased with the operation of the machinery.

A number of screw-cutting engine lathes, also a number of portable forges, with the accesssries for a manual training department, will be furnished to the McMaster University, Woodstock, Ont., by H. W. Petrie, Toronto, who has secured the contract.

The McLachlan Gasoline Engine Co., Limited, 201 Queen street east, Toronto, have just completed a beautiful 5 H P. gasoline engine for D. D. Woods, of New Orleans, to be used on Sparrow Lake. This company will ship on July 10 an engine to be exhibited at the Manitoba Exhibition in connection with a portable grain elevator. They will also ship on July 5 one 5 h.p. engine for Mr. Krebs, vice-president of the W. A. Stickney Cigar Co., St. Louis, Mo. This will be used at Collingwood, Ont.

MARITIME BOARD OF TRADE.

At a council of the Maritime Board of Trade held at Truro on June 19, it was decided to recommend the appointment of a permanent secretary of the board. The matter of freight and passenger traffic on the Bay of Fundy shore was discussed. It was decided to make shipping a prominent feature of discussion at the annual meeting. The annual meeting of the Maritime Board of Trade will be held at Sydney.

INDUSTRIAL GOSSIP.

A NEW CANADIAN INDUSTRY.

Calcium carbide will shortly be manufactured on a large scale at Shawinigan Falls, Que., where conditions are said to be better than any available place elsewhere in Canada. The use of this compound for the generation of acetylene gas, and many other purposes, is increasing rapidly, and a strong company has been organized to manufacture it on a large sale at the above place. The new enterprise is called The Shawinigan Carbide Co., and it will shortly issue 7 per cent. bonds to the extent of $300,000. A successful future for the company is looked for, and these bonds are expected to be readily subscribed. The issue of bonds will be offered through The National Trust Co., Limited, and amongst the directorate of the company are Walter Barwick and H. C. Osborne, both of Toronto.

STARTING ON THE NEW N.S. RAILWAY.

Work is being commenced by Messrs. Wm. Mackenzie and D. D. Mann on the new railway they are to build between Halifax and Yarmouth, N.S. Work will be started at Mahone Bay, and the section between that place and Halifax, 60 miles in length, will be the first built.

Mr. Mann is accountable for the statement that passenger trains in a couple of weeks will be running over the Canadian Northern from Port Arthur to Winnipeg. All the cars and equipment for that section of the line have been completed and 250 miles more will be built this season. The Saskatchewan is not expected to be reached before 1903.

Ten thousand tons of steel rails have been purchased by Messrs. Mackenzie & Mann from James Cooper, of Montreal, and the same quantity from the Clergue works at Sault Ste. Marie. These, in all, would lay 200 miles.

TO MAKE SILICATE BRICK.

The Montreal Silicate Brick Co. has been granted letters patent to manufacture building and paving brick in that city. At a meeting of shareholders last week the officers were elected for the ensuing year. They are: President, David Robertson; vice-president and managing director, Geo. J. Sheppard; directors, Hon. Senator Kirchhoffer, Brandon, Man.; Alfred Joyce, Chas. W. Trenholm and John McLean.

A factory will be built shortly in Montreal. The owners of the patent rights of this brick are some Montreal capitalists. Companies have already been formed at Toronto, Vancouver, St. John's, Nfld., and in Nova Scotia and Cape Breton; and it is expected that, on account of the simplicity of the process of manufacturing this brick, and its fine appearance and wearing qualities, it will become an important factor in the building trades.

GODDESS TO GRACE A POPCORN STAND.

The Chicago House Wrecking Co. are tearing down the buildings of the Pan-American Exposition. The Government, the Agricultural, the Manufactures and the Horticultural buildings are practically demolished. Work is now proceeding rapidly on the Machinery Building and the Electric Tower. "The Goddess of Light" is to come down from the tower shortly as the purchasers are anxious to get her to grace a popcorn stand in Cleveland, Ohio.

CATALOGUES, BOOKLETS, ETC.

THE Canada Hardware Co., Limited, have issued a catalogue and price list of their spring and summer goods, including wringers, pumps, shovels, spades, picks, wire rope, etc. It is handsomely bound in heavy cover paper. It is fully illustrated with large, clearly-printed cuts of the different goods. Below each is the description and price. The names of the articles are given in both French and English. This is likely the only catalogue of its kind in Canada in which both languages are used, and it speaks well for the pains the company has gone to in order to produce a catalogue, perfect in all particulars. The first part of the catalogue is devoted to harvest tools, garden and lawn tools, grindstones, etc., and an immense assortment of all these goods is shown. Screen doors, window screens, screen-door catches, pulls and spring hinges, of all descriptions and at all prices, follow. Then come ice cream freezers, ice tongs, etc. Some very fine adjustable chairs, folding cots, hammocks, etc., are shown. A good portion of the catalogue is devoted to washing machines, wringers, churns, pumps and such articles, and the last part deals with spades and shovels of all kinds, wheelbarrows and jacks. This catalogue should be in every dealer's hands. All will find it useful.

AN AXE FIRM'S CATALOGUE.

The Dundas Axe Works, Dundas, Ont., have just issued a catalogue of their axes that is handsomely illustrated with the different styles made by the firm. These axes have been on the market for over sixty years, and are made to stand the test of use in Canadian winters. The firm makes many styles of axes, and is prepared to make a sample to suit any market.

BUSINESS AND HOME LIFE.

By Col. George Rathbone Dwyer.

NO business man likes worry, but it is an inseparable part of his existence. He need not look for worry; it inevitably comes to him. To worry about one's business, and then in a moment forget it all, is absolutely impossible. It is not in human nature to be able to do so. The average busy man assuredly wishes it were.

A man's home is what he lives and works for, and the greatest pleasure he has in life is to go home and forget the worries, great or small, which are the heritage of the business man.

A man's business is his own and that of his business associates, and though he cannot help thinking, he can certainly help talking.

It is a breach of confidence for a man to discuss his business affairs with anyone, save only those who are personally interested.

He goes to his office in the morning and transacts his business throughout the day, and as soon as the office door closes behind him he ceases, theoretically speaking, to be a business man.

His uptown life and his downtown life are quite distinct. He does not permit the former to interfere with the latter, and what is sauce for the goose should be sauce for the gander.

In my opinion, a man has no right at all to discuss business matters at home.

A business man has quite sufficient to think about during the day and quite enough matters to discuss without doing so all the evening as well.

Besides, the strain of business in these days of competition and hustle is so severe that it would be highly detrimental to him physically were he not to enjoy the relaxation which his home affords. He goes home to rest, not to work; and though the impressions left upon his mind by the events of the day cannot be entirely obliterated at home, yet they can be so associated with other more pleasant thoughts that they cease to worry.

Office life is one phase of a man's existence and home life is another; each has its own sphere, from which it should never be permitted to stray.

THE GURNEY CO.'S EXCURSION.

The annual excursion of the employes of The Gurney Foundry Co., Limited, Toronto, will be held on Friday next, July 11, to Niagara Falls. The steamer Garden City, carrying the excursionists, will leave the Yonge street wharf at 8 a.m.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, July 4, 1902.

HARDWARE.

OWING to the holidays, observed and postponed, business has been somewhat upset. Apart from the increased business of one or two days, on account of the holiday on July 1, trade throughout the week has been somewhat quiet. In accordance with the advance in builders' hardware, which we reported some time ago, local firms have advanced the prices on Yale night latches, and for No. 12 are now quoting $17.45 per dozen. Barn door tracks have taken a further advance, the price now being $3.90 instead of $3.50, per 100 feet. The strike of the moulders in the United States has made itself felt in some lines of hardware here. Cast iron hollow ware, for instance, has become quite scarce on the market for the present. Cordage was reduced another ½c. on Wednesday.

SCYTHES.—There is no particularly striking feature to this market this week. Trade moves along at a fair pace, and the prices quoted remain unchanged, as follows : Lance, No. 80, $5.50 ; Hurd's Clipper, $6.50 ; concave, $7.50 ; Sibley, $8.50 ; Cradle scythes, cast steel, $8.50 ; silver steel, $9.50 ; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—The inquiry is light, most of the business doing being for sorting purposes. The price is $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—The demand for this article has not improved, and the week's trade has been quiet. We quote : Nos. 6, 7 and 8 gauge, $3.45 ; No. 9, $2.80 ; No. 10, $3.55 ; No. 11, $3.65 ; No. 12, $2.95 ; No. 13, $3.05 ; No. 14, $4.05 ; No. 15, $4.55 ; No. 16, $4.80 ; No. 17, $5.20 ; No. 18, $5.45.

SMOOTH STEEL WIRE.—The market is not active. No quotable change has occurred. We quote as follows : Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows : Coppered wire, 60c.; tinned wire, $2 ; oiling, 10c.; spring wire, $1.25 ; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—This is moving out slowly at unchanged prices. The discount remains at 22½ per cent.

BRASS AND COPPER WIRE.—There has been nothing of importance in this market during the week, and trade continues quiet at unchanged prices. The discount is 60 per cent.

FENCE STAPLES.—No change has occurred. The demand for staples is over for the season, and except for sorting purposes there is very little business being done. We quote as follows : $2.90 per 100-lb. keg for bright, and $3.25 for galvanized. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—There is a good steady demand for wire nails at unchanged prices. In small lots $2.55 is charged, and in carlots, the price is $2.50, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The market is steady under an active inquiry. The price of cut nails, in carlots, is $2.37½ per keg, and in small lots, $2.45 per keg. The discount on flour barrel and coopers' nails is 40 per cent.

HORSE NAILS.—The market is in about the same condition. Only a light inquiry is experienced, and trade, generally, is quiet. The discounts are as follows: "C" brand, 50 and 7½ per cent. off ; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—Nothing new has occurred in this market. There is little demand for horseshoes. The prices are unchanged. We quote as follows : Iron shoes, light and medium pattern, No. 2 and larger, $3.50 ; No. 1 and smaller,

MIDLAND, ONT. Limited

$3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There has been no abatement in the demand for screws, which are still moving out rapidly at steady prices. No change in the discounts has been made. We quote them as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—The market for bolts is quite satisfactory. Jobbers report an active demand, and no change in the prices has occurred, and the discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Considerable activity prevails in the market for building paper, all classes moving out well. The market is firm, and prices are well maintained all round. Quotations follow: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Another reduction has been made this week, manila, British manila, sisal, and lathyarn each being quoted ½c. lower. The demand is small. In binder twine prices are quite firm, and it is reported that stocks are now pretty well sold up. Our quotations are now as follows: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—In this line everything has been quiet and unchanged. Our quotations are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is a moderate inquiry for this, and business is still being done at $1.37½ per 100 square feet.

POULTRY NETTING.—Trade in poultry netting is of a very active character. The demand, however, such as it is, is steady, and a fair trade is doing with

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

A great deal could be written about "Ark Brand" Paint, but it would all boil down to the following facts that

"Ark Brand" Paint

is the choice of the Canadian trade because:

It is a sure seller.

The dealer knows he is giving value.

Nothing is said by us but what is backed by a guarantee.

Its good points have gained for it a reputation which sells it where honest paint is wanted.

Write to-day and arrange for the agency if we have not a representative in your town.

THE **FRANCIS-FROST Co.** Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

some houses. Canadian or English netting is discounted as follows: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—These continue to move out rapidly. The discount is unchanged from 60 per cent.

FIREBRICKS.—The quiet season is now on and but a small demand is experienced. The price of English firebricks is $16 to $22 per 1,000, and of Scotch, $17 to $22 per 1,000.

CEMENT.—This market moves along quietly and at unchanged prices. Our quotations are: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The demand for metals has kept up remarkably well, and although the furnaces and mills are working their hardest, there is no accumulation of stocks. Structural steel is in excellent demand. The demand for pig iron is also as great as ever, stove manufacturers, machinists, manufacturers of agricultural implements, etc., being unable to obtain their necessary supplies.

PIG IRON. This is in great demand, but the difficulty of obtaining anything like immediate deliveries continues very marked. Canadian sells at $18.50 to $19, and Summerlee, at $21.50 to $22.

BAR IRON.—There is a good steady demand for bar iron, though no quotable change has occurred. Horseshoe iron sells for $2.20, and merchants' bar, for $2.

BLACK SHEETS.—This line is still quiet and at unchanged prices, and we quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There has been no important change in this market, and we quote as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There is not much doing, and the price remains at 14c.

INGOT TIN.—There is a firmer feeling reported in pig tin, but no advance has been made. Some delaers, however, are looking for higher prices. Straits is quoted at 33½c.

PIG LEAD.—Business in pig lead is quiet, and the price remains at $3.25.

LEAD PIPE.—There is a moderate inquiry for lead pipe. The price of composition and waste is 8c., and of ordinary, 7c. The discount is 37½ per cent.

IRON PIPE.—No quotable change has occurred during the week, but business is still brisk, and our quotations are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There is a fair demand this week for tinplates. The market has been steady. Charcoals sell for $4.75 to $5.25 per box, and cokes at $4.25 per box.

CANADA PLATES.—A good business is doing in Canada plates at the prices we quote. Galvanized plates continue to move exceptionally well. No important change has taken place in the market. Our quotations are as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—The demand for steel keeps up, and a good business is reported. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—This article moves out somewhat slowly. No quotable changes have occurred. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—This market shows signs of improvement. Several fairly good orders were received during the week. Prices are steady and unchanged. We quote as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—Nothing of importance is to be reported in this market. Trade is quiet, and the price is $7.50.

COIL CHAIN.—The activity in this market still continues at unchanged prices. Our quotations are as fol-

lows: No. 6, 12½c.; No. 5, 10½c.; No. 1, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The price of this remains at $5.85 to $6.25. Trade, however, is quiet.

ANTIMONY.—There has been no improvement in the demand for antimony. The price is still 10c.

ZINC SPELTER.—Business is quiet. The price of spelter is 5c.

SOLDER.—The market continues fairly active, and a satisfactory trade is doing in both bar and wire solder. The former sells for 18c., and wire solder, for 20c.

PAINTS AND OILS.

The feature of the week in this line is the decline of 2c. in linseed oil, raw being now quoted at 82c., and boiled at 85c. The arrivals of oil from abroad were the cause of the easing off of the market. Still, it must not be inferred that there is any great excess of stock, for the demand is still very heavy, and as quickly as it arrives it finds purchasers. The market in the general list of paint materials is somewhat quieter this week, and the manufacturers are not working as hard as they were a few weeks ago. Turpentine has been steady, and the price has not been changed. Yellow ochres are reported to be much firmer, and one brand, the "J.C.", French ochre, is practically out of the market, owing to the keen advance at the source of supply. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼.; No. 2, 5¼c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 82c.; boiled, 85c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

Both Ornamental and Practical.

WE MAKE ALL KINDS OF ARCHITECTURAL SHEET METAL WORK.

Fanciful designs for effective finish in any desired style, as well as every variety of fireproof metal covering, suited to old and new buildings of any and every description.

The Metallic Roofing Co., Limited,

Wholesale Manufacturers. **TORONTO, MONTREAL, WINNIPEG.**

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

This market has been quiet and featureless during the week. On account of the holidays some decrease in the volume of business is reported. No quotable change has occurred with the exception of rubbers, which are a shade lower this week. Our quotations are as follows: Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6 to 6¼c. per lb.

GLASS.

There is nothing new to report. Trade is very quiet as is usual at this season. We quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The market has been fairly steady throughout the week. A good demand continues at unchanged prices. We now quote as follows: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. No. 1 calfskins, 12c.; sheepskins, 70c.; lambskins, 25c. per lb.

MONTREAL NOTES.

Linseed oil is 2c. lower.

Cordage has been reduced another ½c.

Barn door tracks have risen 40c. per 100 feet.

Yale night latches have been advanced in price to $17.45 per dozen for No. 42.

ONTARIO MARKETS

Toronto, July 4, 1902.

HARDWARE.

BUSINESS in general for this time of the year continues active, and what now is doing is principally of a sorting-up nature. There is a good movement in harvest tools, and in the small sizes of ropes is displayed some activity. The prices of rope have declined ½c. all round during the week. The only other change is in copper rivets, which have advanced, the extra discount of 10 per cent. being now withdrawn. The demand for lawn mowers is smaller than it was, but the movement in guns and ammunition has increased. The cement market remains firm at the advance of last week, but the movement has not been so free as heretofore.

BARB WIRE.—Trade is keeping up well and the prices are steady. We quote $2.77½ for less than carlots f.o.b. Cleveland, and $2.65 for carlots. From stock, Toronto, $3.00.

GALVANIZED WIRE.—There continues to be a fair sorting-up trade doing in this line. Quotations are: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The business doing keeps up fairly well. We quote the base price as follows: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—This line continues moderately active. The discount remains steady at 22½ per cent.

WIRE NAILS.—Trade in this line remains fairly good with prices steady. Our quotations are as follows: $2.55 for

less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque, and Montreal.

CUT NAILS.—The demand for these continues light. The base price is quoted at $2.45 per keg, and $2.37½ for carlots.

HORSE NAILS.—There is a fair trade being done in this line at unchanged prices, and the discounts are quoted as follows : "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—In this line the demand still keeps fair. Quotations are : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—Trade in screws is being well sustained and there is some difficulty in obtaining supplies from the factories. The discounts are : Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—Trade in this line still keeps up well, and the stocks on hand are not large. The price of copper rivets with burrs has been advanced. The discounts formerly were 45 and 10 per cent., but this has been changed to 45 per cent. only, the extra 10 per cent. being withdrawn. The discounts are now as follows : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The factories are making fair deliveries, and the stocks that were low are now being replenished. Our quotations follow : Carriage bolts, common ($1.00 list), 50 per cent. ; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—Trade is still active and a number of sorting-up orders continue to come in. No changes have occurred in the prices. Quotations are : Common doors, two or three panel, f.o.b. factory points as follows : Walnut, stained, 3-inch style, $6.80 per dozen ; stained, yellow, $7 ; natural color, oil finish, $8.15 ; 4-inch style, 20c. extra per dozen. Windows : No. 0, $1.60 ; No. 1, $1.70 ; No. 2, $1.95 ; No. 3, $2.10 ; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Quite a business is being done in this line at steady prices. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—These are still scarce and the demand for them is good. Prices are unchanged, and the discount is 40 and 5 per cent.

ROPE.—There is quite a trade doing in the harvest sizes of rope. Following the decline in pure and British manila, sisal and lathyarn have each gone down ½c. We quote : Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—Business in binder twine has not yet become active, though quite a few orders have been booked for future delivery. Quotations are : "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

HARVEST TOOLS.—Business in harvest tools continues fair, and a number of sorting-up orders are coming in. The demand for beet hoes continues large. The discount is 60 per cent.

EAVETROUGH, ETC.—The trade in this line is still moderately large, and the prices are steady. Our quotations are as follows : Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—In this line the demand continues fair with no particular features to report. Our quotations are as follows : Dry sheathing, grey or straw, 35c. per roll ; tar sheathing, grey or straw, 45c. per roll ; dry fibre, 50c. per roll ; tarred fibre, 60c. per roll.

LAWN MOWERS.—The biggest part of the season's trade is over, but there is still quite a business being done in this line. We quote the discounts as follows : 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-inch wheels, $2.25 to $3 ; "Daisy" mowers, 17-inch wheels, $2.25 to $2.50.

HARVEST WHIPS.—There has not yet been much call for harvest whips.

POULTRY NETTING.—This line continues unchanged with some demand from outside points.

TINWARE AND ENAMELLED WARE.—In tinware, trade, which usually slackens off at this time of the year, continues brisk. The trade in enamelled ware has shown no signs of slackening off as yet, although it usually does so during June and July.

SPORTING GOODS.—In this line things continue as they were last week, the features being the number of guns, rifles and ammunition which are being sent to various parts of the country.

CEMENT.—The market continues strong at the advance of last week, but trade has not been so active, a few of the smaller dealers holding off on account of the appreciation. The inquiry continues active and trade is expected to assume its normal activity in the course of a few days. Our quotations are : Canadian Portland, $2.25 to $2.85, and Canadian hydraulic, $1.35 to $1.60 per bbl.

METALS.

In metals, the buying movement this week has not been large though business cannot be said to be dull ; but it is feeling the effects of the holiday season. The prices remain steady, and the stocks are well assorted. The dullness of the outside tin and copper markets is pronounced. Tin is weak, as is also copper, on the New York market, but the London, Eng., copper market gained strength. The United States iron market is lifeless, but this has had no effect on prices, which remain strong, and the general outlook is very bright.

PIG IRON.—The demand for pig iron is very good, and a number of orders are now being placed for delivery the first half of next year. The market in the United States is inactive but strong. We quote on track, Toronto, as follows : No. 1 foundry, $21, and No. 2, $20.50.

STEEL BOILER PLATES.—The outside markets continue strong. The local demand is steady and stocks are light.

Prices Consistent With Quality.

For sale by all prominent Hardware and Mill Supply Merchants throughout the Dominion.

Dominion Works, - - PORT HOPE, CANADA.

We quote : Steel boiler plates, $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—A fair business at unchanged prices continues. We quote : Steel beams, from stock, $2.75, and in carloads, on track, $2 per 100 lb.

STEEL RAILS.—The Clergue Works are quoting steel rails for railways at $30 per ton, and rails for electric roads, $35 per ton. Orders for about 100,000 tons are said to be on the books of the company.

TOOL STEEL.—The market continues steady. We quote as follows : "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, " Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's " Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The prices of this line are steady.

SPRING STEEL.—The activity in this line is a feature.

BOILER TUBES.—There has been no change in these.

BAR IRON.—The bar iron market is very stiff and the prices are nominal, with the demand exceeding the supply. One large concern which had contracted with a buyer on the market for 100 tons has been unable to fill the order. The scarcest sizes are those in general use. The United States market continues strong and without any new features. Our quotations are as follows : $1.95 to $2.05 base. Extras cut to length while rolling : 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

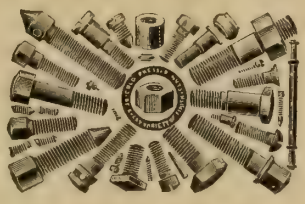
BLACK SHEETS.—The demand has improved during the week and the prices are holding steady. We quote : Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—The condition of the market has not altered since last week. We quote : All dull, $3 ; half polished, $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—These are still in good demand. We quote in case-lots, as follows : Queen's Head, $4.50 for 28 gauge ; American, $4.40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

TIN.—There was a firmer feeling early in the week in the outside markets, and this had a tendency to improve the local demand. Locally, the quotatians are $32 to $33 per 100 lb.

TINPLATES.—In this line the business has been brisk. We quote : Charcoal, $4.75 to $5 per box, and cokes, $4.25 per box.



THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

COPPER.—The demand for ingot copper has eased off somewhat. The outside markets are steady and inactive. We quote : Ingot, $14 per 100 lb., and sheet copper, $22 to $23.

BRASS.—The demand for brass continues moderate, and the market is steady. The discounts remain unchanged at 15 per cent.

PIG LEAD.—There has been more activity in this line this week. We quote pig lead, $3.50 to $3.75, and bar $5.

IRON PIPE.—The market is characterized by no new features. Many shipments are being made to outside points, but the local trade continues inactive, and our quotations are now as follows per 100 ft. : ¼-in., $2.40 ; ⅜-in., $2.65 ; ½-in., $2.85 ; ¾-in., $3.65 ; 1-in., $5.20 ; 1¼-in., $7.35 ; 1½-in., $8.95 ; 2-in., $12.55 ; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER.—This line is quiet and the prices are unchanged. We quote $5.50 to $6.

ZINC SHEETS.—These continue in steady demand. We quote : Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER.—The demand for solder is still active, and the prices are unchanged.

ANTIMONY.—Trade in this line continues quiet. We quote $19.50 per 100 lb.

PAINTS AND OILS.

Trade in paints and oils generally is lighter than it was, and few new features there are to report. There does not seem to be the scarcity of raw and boiled linseed oil there was a few weeks ago, the stocks now on hand being sufficient to supply current demands. The prices of this oil weakened early in the week, but later advices from London, Eng., caused them to stiffen up again. Turpentine in the South is lower, and this is causing the market here to weaken, so that, if present conditions continue, a slight decline is not impossible. But that product is very uncertain, the prices, without warning, being at any time liable to advance or decline. There are a few orders coming in for ready-mixed paints. White leads ground in pure linseed oil are quiet. Paris green is inactive, but the prices thereof in the United States have advanced until now the base price is over 20c. per lb. at the factories. Dry colors are slow, but a fair movement continues in red leads for outside work. We quote :

WHITE LEAD—Ex Toronto, pure white lead, $5 87½ ; No. 1, $5.50 ; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards ; ½c. per lb. extra will be charged for 12½ lb. packages ; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6 25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls.,

$2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25 ; bladders, in 100 lb. kegs, $2 40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 84c.; boiled, 87c.; 3 to 5 barrels, raw, 83c.; boiled, 86c.; 6 to 9 barrels, raw, 79c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 73c.; 2 to 4 barrels, 72c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The market here has been quite active. Local jobbers report quite a demand for cathedral glass. Stocks in some lines of window glass are becoming low, and this scarcity is becoming more acutely felt by reason of the slow arrivals of importations from Europe. Quotations follow : Under 26 in., $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There has been a fairly active business in brass and copper materials in this line. The prices continue steady, We quote as follows : Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton ; No. 2 wrought, $6 ; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—There are no new features in this market to report. Quotations are as follows: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8 to 8¼c.

SKINS—A change in the method of buying calfskins has been inaugurated amongst the local dealers owing to the poor condition of some of the skins arriving. We quote : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; sheepskins, 80c. to $1 ; shearlings, 20c.

WOOL—The wool business continues very dull and the prices are very weak at 13c. for fleece wool and 7c. per lb. for unwashed.

TALLOW—The scarcity of this article is still a feature. Quotations are 6¼ to 6½c. per lb.

COAL.

There has been no change in the situation at the mines, and no hard coal is yet coming forward. On account of its scarcity the summer demand for hard coal locally is light. Soft coal continues to be imported, the mines of that product not sharing in the dissatisfaction of the miners of hard coal. Quotations at international bridges are unchanged at $3 to $4 per ton for soft coal.

PETROLEUM.

Trade continues fair and the market is steady. We quote : Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

An advance has taken place in some lines of axe handles.

There has been a decline of ½c. per lb. in the prices of pure and British manila, sisal and lathyarn rope.

There has been a change in the discount of copper rivets and burrs, the extra 10 per cent. being withdrawn.

NOVA SCOTIA MARKETS.

Halifax, July 1, 1902.

THE hardware business for the last week has not been a very active one, but still there is considerable business being done in small orders. This is the commencement of the slack season, which will continue as usual for a month or two before the fall trade opens up. The business for the six months of the year up to date has been extremely good, and many of the dealers have done a larger volume of business than in previous years. The financial conditions also have been favorable. Payments have been made extremely well in all parts of the Province, and renewals and extensions have been less frequent than formerly. This gives a healthy tone to business, which would even compensate for a much smaller volume of business than usual. The indications are that these conditions will continue for the balance of the season.

* * *

As noted last week, there was a report of a reduction in cordage. This has taken place to the extent of ½c. per lb. on manila, which is now quoted at 15½c. British manila has declined 1c. per lb. There has been no change in sisal, but as the price of this depends largely on manila, a decline is also expected. The reduction amounts to considerable, but it will be of little value just now to consumers, as the heaviest contracts for the season have long since been filled. The bulk of the manila supply comes from the Philippines, and on account of the war and the general devastation of the country, the price has been high for a year or two. With a more settled state of affairs in that country price conditions, dependent largely on the crops, will be much easier.

* * *

Building materials are still in considerable demand, both in the city and through the country. Prices in this line remain very firm. With the large reduction in glass stocks, prices have become more settled, and the business is on a better basis. Linseed oil and turpentine still remain firm, and there is only a limited demand where new building or repairing contracts have opened up. Everything in the building line is very brisk in Halifax, and the retailers get a good share of the trade. As previously noted, however, no retailer in Halifax could do business alone on shelf and general hardware, as nearly all the wholesalers do a retail trade. This compels the regular retailer to go into odd lines, such as sporting goods, kitchen utensils and other goods which naturally belong to some other line of business. This condition prevails more largely in Halifax, probably, than any place else.

* * *

The export business of Halifax was not so large last week as for the week previous. The amount was $188,456, apportioned as follows : To Great Britain, $26,234 ; West Indies, $37,591 ; Newfoundland and St. Pierre, $17,092 ; United States, $7,539. The shipments of lumber to Great Britain amounted to 3,367,719 ft., valued at $34,047. The exports to that country also included large quantities of canned lobsters, the season for which will shortly close, having been extended 10 days on account of the late prevailing bad weather.

* * *

Among the imports last week from New York may be mentioned 100 tons of molding sand for Hillis & Son, Richmond, and 300 bbls. brimstone, 2,000 bags nitre and 100 bbls. pitch for The Acadia Powder Co.

* * *

The advertisement of one of the largest hardware firms in the city contains the following : "All quotations for soil pipe and soil-pipe fittings are withdrawn." New quotations have not yet been given out.

* * *

Messrs. Crowell Bros., lately burned out, are rapidly getting their building renovated and fitted up in modern style. When completed they will have much better accommodations than formerly. In the meantime their business is conducted in an adjoining building.

NEW CATALOGUE JUST ISSUED—WRITE FOR IT.

HEATING AND PLUMBING

JUDGMENT AGAINST A HEATING FIRM.

JUDGMENT has just been handed out by Mr. Justice Curran, of the Superior Court, in the case of Larue vs. Marier et al. The plaintiff, proprietor of the Hotel Cecil, St. Gabriel street, Montreal, in January, 1900, awarded a contract to the defendants, who carried on business as plumbers and steamfitters. They undertook for a sum of $950 to do certain works, amongst others, to put in the heating apparatus. They agreed to examine and put into good working order the old furnace, then in the building; they were to put in certain steam pipes and radiators, giving the agreed quantity of heat. All their work was to be satisfactory to the architect and proprietor. Fifteen per cent. of the contract price was to be retained by plaintiff, until the works were satisfactorily completed. Defendants did all their work in the building satisfactorily, with the exception of the heating.

Plaintiff's tenants held plaintiff responsible in damages due to insufficient heating. When the defendants began their work they suggested to plaintiff that the old furnace, which was a No. 5, would perhaps be insufficient, and that it would be preferable to put in a No. 6. Plaintiff acquiesced and agreed to pay $150 for No. 6, but defendants agreed to put up the old furnace in one of their stores in Notre Dame street. When the apparatus was put in, the furnace No. 6 proved unequal to heating the building, and defendant suggested a No. 7. Plaintiff also agreed to this and to the payment of an extra $63 to cover the cost. Defendants, instead of putting in the No. 7, substituted a 6½, which gave less trouble in the fitting, but failed to give the necessary result. This substitution they concealed from plaintiff and his architect. Plaintiff protested defendants when the tenant protested him. Defendant at first seemed prepared to make the necessary changes, but finally dropped the matter altogether, and plaintiff had to get another contractor to put matters right. This cost $392, and plaintiff brings action for that amount. Defendants plead substantially that they were not obliged to heat the house, that this was a job of repairs, and that they had nothing to do but follow the plans and specifications, which were insufficient.

Mr. Justice Curran's judgment was: - Defendants' pretensions are unfounded. This was no mere job of repairs, it was an undertaking to provide a heating apparatus for the house. Defendants, as skilled mechanics, were presumed to understand their business and to know what size of furnace and what quantity of pipes and number of radiators were necessary. They should have pointed out to the proprietor the insufficiency of the provisions made and that the furnace would not furnish the necessary heat for the quantity of surface to be supplied. Plaintiff was anxious to help them out all he could, but he must not be made to suffer for his leniency and generosity. He supplied a new furnace at considerable cost to himself, was even willing to pay more for a No. 7, which defendants said was unnecessary, but which they failed to supply, endeavoring to tinker up a 6½ to meet the requirements. Plaintiff had to get another contractor, and after the notification given to defendants, he was justified in doing so and making defendants pay. But the charges must be reasonable. The court finds that the new contractor has been exhorbitant in his charges for men and materials, and that he has gone beyond what was required in the heating surface supplied. The parties have submitted to the court a general statement of their respective accounts, involving other matters outside of the hotel heating, and agreeing that one judgment should cover all their difficulties and disputes. The court has arrived at the conclusion that defendants are indebted to plaintiff in the sum of $177.77, for which judgment with costs of action of that class.

COMBINATION PIPE AND MONKEY WRENCH AND PIPE CUTTER.

There is being placed on the market a new combination pipe and monkey wrench and pipe cutter. It is provided with a toggle jaw to make a sure grip and secure instant release. By withdrawing the pin and reversing the toggle jaw the tool is in shape for use as a pipe cutter, which reversal can be made in a few seconds. By throwing the toggle up at right angles with the wrench, the pipe can be lifted out of the V without running the jaw back, which is referred to as a great saving of time. This feature is also applicable to the use on different sizes of pipe, whereby 1 or 2-in. pipe can be handled with little change in the position of the jaws. The tool is furnished in black or bright finish, with long or short nut, and in sizes that will take pipe from ⅛ to 3 inches in diameter. The head and bar of the wrench are alluded to as a one-piece forging, made from the best material, and all parts are interchangeable.

It is claimed that the wrench not only combines the superior qualities of a gas pipe wrench, but also the exquisite combinations of a regular nut wrench and pipe cutter.

"BRILLIANT" ALUMINUM GAS TIPS.

Guest & Co., 86 Church street, have secured the sole Canadian agency for the "Brilliant" aluminum gas tips, manufactured by The Gas Tip and Self Lighter Co. A beautiful and bright gas light is produced from the aluminum gas-tip burner. It is claimed for them that they will last forever. They are warranted not to rust, corrode, clog or smoke. Gregory's governor burner with the aluminum tips, it is claimed, saves from 10 to 50 per cent. on gas bills, and gives a perfect flame. Cotton batting is used under every tip to mix the gas before burning, and can be seen by looking in the under side of the burner. They are sold at 10c. each, or $1 per dozen. It is believed that they completely obviate the difficulty experienced in cracking globes.

BUILDING PERMITS IN OTTAWA.

IN Ottawa seventeen building permits were taken out during the week, as follows: F. H. Webb for a solid brick house on McLeod street, for $2,500; George W. McDonald for a solid brick house on Kent street, for $2,000; Fred. Schroeder for a frame house on Mutchmore street, for $350; George Tomlinson for four vencered dwellings on Elgin street, for $5,000; John McKanney for three brick-vencered dwellings on Gilmore street, for $3,500; Wm. Richards for a solid brick house on Albert street, for $3,500; A. H. Awrey for two semi-detached dwellings on Fourth avenue, for $3,000; H. G. Stanley for addition to store on Elgin street, for $250; Consumers' Electric Co. for a solid brick distributing station on Maria street, for $12,000; Church of England School for a solid brick addition at the corner of McLaren and Kent streets, for $1,200; Wilson Southam for a solid brick dwelling on Stewart street, for $7,000; W. Beardsley for a solid brick addition to dwelling on Wilbrod street, for $175; Joseph Gagnon for an iron-covered dwelling on McGee street, for $900; Alfred Bernard for a frame dwelling on Poplar street, for $400; Robert Kerr, for a frame dwelling on Division street, for $700; Mrs. Violetta Kerr for a frame dwelling on Division street, for $700, and Andrew Kerr, for three brick-veneered dwellings on Maple street, for $5,100.

PLUMBING AND HEATING CONTRACTS.

Guest & Co., Church street, Toronto, have secured the contract for the gas-fitting of Bishop Sweetnam's house on the island. They also have a further contract for additional overhauling and heating of the house of Frank Smith, Bloor street.

BUILDING PERMITS IN TORONTO.

UP to the end of June this year the building permits taken out in Toronto amount to $746,879 more than those granted during the same period last year. The permits issued up to June 30, 1902, total $1,901,141, as against $1,154,265 for the same period last year. Included in the permits issued this year are an addition to the new hotel on King street for $225,000, and the new Exhibition Buildings, amounting to $133,500. The building permits for June aggregated $400,176, an increase of $162,100 over June, 1901.

Building permits were granted during the week in Toronto as follows: G. W. Howland for a 2½-storey brick dwelling on Roxborough avenue, for $3,200; Charles Wray for a two-storey and attic brick and stone dwelling on Dovercourt Road, for $2,000; W. and F. Elliott for a pair of two-storey semi-detached brick and roughcast dwellings on Pendrith street, for $1,600; Jno. Smith for a two-storey brick dwelling at 183 Arthur street, for $1,800; Bank of Ontario for a three-storey and basement stone and brick addition on the south-east corner of Yonge and Carlton, for $4,000; Geo. Beardmore for a brick foundation glass greenhouse on Beverley street, corner of St. Patrick, for $600; A. B. Ord for a two-storey and attic brick dwelling on South Drive, for $4,000; R. G. Kennedy for a one-storey brick dwelling, Parkham avenue, for $1,600; O. H. Walker for rebuilding frame and lumber house, 275 Dupont street, for $275; Henry Ward for a two-storey brick residence on Kippendavie avenue, near Queen street, for $2,000; H. Swackhamer for a one-storey roughcast dwelling on Hogarth avenue, for $300; S. F. Aberdeen for a two-storey and attic brick dwelling on Gladstone avenue, for $2,200; J. Wheeler for two pairs of two-storey semi-detached dwellings on Givens street, for $5,600; T. N. Sampson for a three-storey brick store and dwelling on the corner of Dundas and Dufferin streets, for $5,000; Joseph Reading for a 2½-storey brick residence on Rusholme Road, near Bloor street, for $2,500; David R. Carothers for a pair of two-storey brick and roughcast dwellings at 632-634 Gerrard street east, for $1,000; Jno. Morrison for a two-storey brick foundation and roughcast walls dwelling on Crawford street, for $700; L. E. Graham for a two-storey and attic brick dwelling on Delaware avenue, for $2,500; The Polson Iron Works for a two-storey blacksmith shop, covered with galvanized corrugated iron, on Esplanade street, for $3,200; W. G. Smith for a two-storey brick dwelling on Albany ave., for $1,800; Jos. McCausland for a two-storey brick addition on Wood street, for $400; Trustees of the University of Toronto for a three-storey medical school, brick and terra cotta, in Queen's Park, for $125,000.

TO PREVENT GAS PIPES FREEZING.

A simple but effective device for preventing the freezing of gas pipes is described in The Zeitung fur Blechindustrie, consisting merely in the insertion of a wider piece of pipe just where the conduit issues from the ground or wall. For a conduit of a diameter from ⅜ to ½ of an inch a length of from 20 centimeters to 30 centimeters of a pipe 1 inch in diameter suffices. The deposition of the water particles contained in the gas, which on leaving the works have a temperature af about 10 degrees C., naturally takes place just where the gas is subjected to the most abrupt change of temperature, i.e., on its issue from the ground. If the external temperature is sufficiently low, the deposed water immediately congeals and clogs the conduit. As soon as the gas has acquired the temperature of the conduit the deposition of water and congealing cease, and this is said to be the case a short distance beyond the first cooling point. Therefore there should be no congealing beyond the inserted wider pipe, and this piece is wide enough to accommodate a thick ice-crust and to still leave a free passage for the gas. As a matter of fact, the principle of this new method is already employed in street lamps, and with success.

TORONTO PLUMBERS' STRIKE.

Plumbers who are on strike in Toronto are leaving that city daily. Most of them are going across the line. The master plumbers seem to have plenty of work on hand, but their disposition at present is to hold out. The plumbers must accept the same or less wages than they formerly earned before the master plumbers move. The plumbers claim they can earn $3 per day and in some places $3.50 where they will go across the line.

The following official statement was handed out a few days ago: "The plumbers say that in their dispute with their employers they have been unfairly criticized. The employers' only ground for refusing their request has been that they were breaking the agreement made between the parties, and had given no notice of such intention. As a matter of fact, they were given three full months' notice, and positively refused to make the slightest concession. As to breaking the agreement, even legal minds differ, and is it wonderful that we should hold the opinion that in giving three months' notice, we have kept strictly within the agreement in the courses we have taken? Even were it not so, there have been so many violations of the agreement by various members of the Master Plumbers' Association, that our members feel they were quite justified in taking the course they have pursued."

THE VIEW OF THE MASTERS.

In view of the official statement of the plumbers that the agreement entered into by the journeymen and the Master Plumbers, Steam and Gasfitters' Association, of the city of Toronto, on March 19, 1901, permitted of a lapse of the agreement after a three months' notice for its termination by either side, it will be interesting to quote clause 11 of that agreement:

Clause 11—That the time for the enforcement of this agreement takes effect from the 1st day of April, 1901, and to stay in force until the 1st day of January, 1904. And should either party to this agreement wish to change, add, or amend the above, they shall give at least three months' notice in writing prior to the termination of this agreement.

To the journeymen plumbers the last sentence means: "But should either party to this agreement wish to change, add, or amend the above, they shall give at least three months' notice in writing prior to such time as the termination of this agreement shall take effect."

That this is not the intention, the master plumbers, it is believed, rightly contend. The master plumbers claim that the journeymen themselves did not so interpret it at the time when the agreement was made, and when other strikes were on evinced their satisfaction that it was not necessary for them to strike. The master plumbers will adhere rigidly to their determination to stick by the agreement, and any advance must come from the men.

A master plumber was asked by "Hardware and Metal" what were the changed conditions which the men claim justify the course which they have adopted. He replied that the only change in conditions was the scarcity of men to be attributed to the steady employment caused by good times.

Meanwhile the plumbers can carry out the work they have on hand. The plumbing business is, without doubt, dull, as the master plumbers will not book heavy contracts.

INCREASE IN THE DIRECTORATE.

Under the provisions of the Companies' Act, The Dominion Radiator Company, Limited, has given public notice that it has sanctioned a by-law for the purpose of increasing the number of directors of the company from five to seven.

A CONTRACT FOR FIXTURES.

R. H. Lear & Co., 21 Richmond street west, Toronto, have secured the contract for fixtures for lighting the Sydenham street Methodist Church, Kingston, Ont.; also the Anglican church, St. John the Evangelist, at Thorold, and the Bond street Congregational church, Toronto.

CORNWALL WATERWORKS SYSTEM.

The ratepayers of Cornwall, Ont., have recently voted on and carried by-laws to abolish the existing board of water commissioners and have the waterworks managed by the town council, and to raise $11,000 to put in a new hydraulic plant instead of the steam plant now used at the waterworks pump house, and to provide for the raising of $10,000 to cover existing overdrafts and the cost of the proposed extensions to the waterworks.

MANITOBA MARKETS.

Winnipeg, June 30, 1902.

BUSINESS is active in every line and collections are reported better by the trade. The only change in price for the week has been the decline of ½c. per lb. on manila twine of all grades.

Paints, oils and glass are all in fair demand. There is no advance in glass, but there may be within the next week owing to the advance on the American market.

Binder twine shipments are going forward with fair regularity, but will not be active until the middle of July.

Extensive preparations are being made for exhibiting implements and machinery in motion at the Industrial Exhibition in July.

The price list for the week is as follows :

FIRES.

A. T. Button, sr., general merchant, Uxbridge, Ont., has sustained loss by fire ; insured.

The mill of the Parrsboro' Lumber Co., Notre Dame, N.S., was burned ; the loss is $4.000, and there was no insurance.

LAKE SUPERIOR COPPER OUTPUT.

The Boston News Bureau gives the following figures of the copper production in the Lake Superior district in lb., for the calendar year 1901, together with comparisons with 1900 and 1899 :

	1901.	1900.	1899.
Calumet	74,510,557	77,761,382	89,610,963
Tamarack	18,000 852	19,182,502	18,565,602
Quincy	20,540,720	14,116,551	14,301,432
Osceola	15,723,541	12,566,471	11,358,019
Wolverine	5,360 000	4,789 829	4,500,373
Centennial	950,000	892,500	730,240
Franklin	2,757,419	3,663,7.0	1,230,000
Isle Royale	2,171,955	.....	.....
Atlantic	4,666,889	4,930,149	4,675,832
Baltic	2,641,432	1,735,060	621,336
Bass	950,000	122,239	42,800
Phoenix	93 613	88,206	.....
Adventure	20,361	23,572	.....
Arcadian	800,000	1,350,000	500,000
Arnold	.. ..	856,000	763,911
Miscellaneous	150,000	73,400	50,000
Total	148,286,369	142,151,571	146,950,338

The same paper gives the world's production of copper for a series of years as follows :

Amer. Prod'ct'n,	C'ns'mpt'n.	Exports.	Imports.
1901.. .594,171,200	448,000,000	213,619,840	170,659,977
1900. 60),832,605	347,579,484	352,731,143	103,805,793
1899....581,319,091	391,602,111	249,923,941	94,568,050
1898....535,900,232	274,135,139	239,765,054	43,479,288
1897....501,370,295	274,400,166	283,626,240	26,938,254
European—	Production.		Consumption.
1901	224,539,840		601,600,000
1900	205,121,280		717,814,720
1899	210,844,480		624,715,840
1898	198,517,760		674 269,120
1897	204,409,600		678,227,040

FOUNDRYMEN SETTLE.

The threatened strike among the iron-founders of Montreal was averted on Friday, June 27, by the men accepting a compromise on the wages they asked for. The demand was for $2.50 per day, and they agreed to take $2 40.

Both the Ironmoulders' Union and the Foundrymen's Association were represented at the conference by officials from Canada and the United States ; and some difficulty was reported at the meeting of the moulders to get a majority of the members to agree to the compromise. As it was, the motion passed with a majority of two.

APOLLO BEST BLOOM
GALVANIZED IRON

Whatever advantage belongs to galvanized iron and liberal dealing goes with Apollo.

Costs not a cent, and relieves you of much anxiety.

CURRENT MARKET QUOTATIONS.

July 4, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Wire-Edged Ready Roofing

The above Roofing is fast becoming the popular substitute for Shingles, because it is **Durable, Economical** and **Fire-proof.** We wish to supply customers through the Retail Hardware Merchants, and, with that object in view, we are spending thousands of dollars in advertising our goods. It will be your fault, not ours, if we are forced to sell direct to the user.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

RETURNED JUL 16 1902

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

BUNGLING ALDERMEN.

HARDWARE AND METAL has time and again pointed out the necessity of electing business men to the different municipal councils throughout the country, as well as to the Provincial and Dominion Parliaments.

The necessity of such business men is again being evidenced in Toronto at the present time. Six months ago the ratepayers of that city voted a large sum of money for the erection of new buildings for the Industrial Exhibition. Since then the matter has been dilly-dallied with. The contract for the ironwork for the main building was not signed until well into May, and now The Canada Foundry Company, who secured the tender, has notified the city authorities that they cannot complete the work in time.

This is just what might have been expected after the unnecessary delay of four months, especially in view of the well-known scarcity of pig iron, which has handicapped every user of that material in this country, as well as in the United States for some time.

To have deferred signing the contract until well into May, while the buildings were to be ready for the Exhibition, which opens in the latter part of August, was simply absurd. If the matter had been left in the hands of half a dozen business men, it is altogether likely that the contract would have been signed months before it was, and the work would have been by this time nearly completed.

Time and time again we have have been taught at heavy cost lessons regarding the folly of sending undesirable men to represent us in municipal and parliamentary bodies, but still we keep along in much about the same old rut, and the result is the natural bungling, which is only to be expected. Grapes cannot be gathered from thistles.

A physical culture teacher says the proper way to go up stairs is to hold the head erect and expand the chest. Most of us still believe that the proper way is to go up by the elevator.

STEEL IS RATHER EASIER.

A RATHER easier tone has developed in the steel market during the last week or two. This is particularly true in regard to bars and in the lighter gauges of steel sheets. This weakness does not appear to have affected the other lines of steel, and it is expected that when the midsummer quietude is over there will be a reaction in favor of firmer prices. This, in view of the strong situation in pig iron, is a natural consequence. Another factor which will tend to bring about firmer prices is the fact that a number of the steel mills are closing down for the usual midsummer repairs, and for the purpose of giving the employes holidays. The American Sheet Co. alone has closed down over 100 of its mills.

As an indication of the strong position of the pig iron market in the United States, it is only necessary to note that, although the production in June was about 200,000 tons greater than in January last, the demand still exceeds the supply. Besides this there is to be taken into consideration the coal strike, which naturally increases the scarcity of fuel. The shortage of coke, for example, last week was even more pronounced than it has been for some time.

Compared with the average price of last year the United States No. 1 foundry pig iron is at present over $6.50 per ton higher and steel billets approximately $9 per ton higher.

In Canada the situation remains much the same as it has been for some weeks past, particularly in regard to pig iron, which is still scarce and in good demand.

WANT GRAIN AND LUMBER ON THE FREE LIST.

RECIPROCITY with Canadais a question that is likely to receive some attention at the next session of the United States Congress. At any rate, the Minnesota delegation in the House of Representatives seem bent on seeing that it does receive attention. It was intimated a few days prior to the adjournment of the House that a Bill would be introduced in favor of reciprocity and putting Canadian lumber, wood pulp and grain on the free list. It was, however, finally deemed advisable to leave the question in abeyance until next session, as it was felt that no good would be done to the cause by any such formal action at present. In the meanwhile, it is proposed to prepare plans and inaugurate a vigorous campaign next season in favor of reciprocity with Canada. In order to overcome the difficulties and delay entailed in an ordinary reciprocity treaty, the proposal appears to be to call upon the Joint High Commission to look into the question and recommend some satisfactory arrangement.

Hitherto the centre of the movement for reciprocity with Canada has been in the New England States with the business interests in New York a strong supporter of the idea. It is, therefore, significant to see the movement obtaining such headway in the Northwest. The motive, however, is not the same in the west as it is in the east. The advocates of reciprocity in the west want Canadian lumber, wood pulp and grain, the last named for grinding into flour in the mills at Minneapolis. They are not much concerned about the question of protection to the manufacturing industries of the country. The manufacturers in the east, however, are very much interested in this particular. They want protection and want it just as high as ever, but they want the Canadian market as well. They are extremely generous in regard to the shadow, but the substance they grapple to their breast with zealous hands.

Even in the west, where the reciprocity idea is said by the Washington correspondent of The Journal of Commerce, New York, to be growing, the farmers are likely to set their faces against the proposal to admit Canadian lumber and grain at lower rates of duty.

Canada's export of wheat to the United States last year was only 53,186 bushels. Of grain of all kinds, except beans, the quantity was only 463,233 bushels, while the total to all countries was 25,282,512 bushels, of which 9,738,758 bushels were wheat.

Taking lumber and manufactures thereof the value of the exports to the United States in 1901 was $13,176,717, which was about $3,000,000 less than five years before. The total value of our exports to all countries last year was about $33,000,000, and our best customer is Great Britain, which in 1901 took $17,301,960 worth, an increase during the five years of almost the same amount as the decrease during that period on United States account.

At present the United States Customs duties on grain, pulp and lumber are as follows: Barley, 30c. per bushel; buckwheat, 15c. per bushel; oats, 15c. per bushel; rye, 10c. per bushel; wheat, 25c. per bushel; mechanically ground wood pulp, one-twelfth of one cent per lb.; chemical wood pulp, unbleached, one-sixth of one cent per lb.; ditto, bleached, one-fourth of one cent per lb.; sawed boards, planks, deals, etc., $1 to $2 per 1,000 feet.

With a material reduction in the United States duty on those articles our exports to that country would undoubtedly increase. But we see nothing to anticipate in the near future any such reduction. No matter how earnest the Minnesota delegation in the House of Representatives may be, there are contending forces in the United States which are stronger than they.

Economically closer trade relations between Canada and the United States are desirable. But, unfortunately, political exigencies transcend economical requirements.

HOLIDAYING IN THE MARITIME PROVINCES.

IT is gratifying for HARDWARE AND METAL to note that business men in Ontario are taking more interest in the Maritime Provinces as a summer resort.

There is undoubtedly no part of this continent which affords greater attraction for tired business men who are seeking a holiday. The scenery is grand and the climate delightful and bracing, and there is a variety of sport for those who are fond of the rod or gun.

The tourist associations, such as those at St. John and Halifax, as well as the Intercolonial Railway, are doing a good work in acquainting the west with the attractions which the Maritime Provinces afford as a summer resort. There is still, however, a great deal to be done in this respect, for we find in conversing with business men in the west, who are thinking of taking trips to the Maritime Provinces during the summer months, that they have very little definite information as to routes, hotels, etc.

AN UNJUST INSINUATION.

IN his address of welcome to the convention of the ironmoulders in Toronto on Monday, Mayor Howland insinuated that President Ames, of the Toronto Board of Trade, and his fellow associates who were instrumental in securing a settlement of the street railway strike, were merely a committee representing the Street Railway Co. This was a most unfortunate statement for His Worship to have made, as it is well known that but for the business-like way and untiring zeal of the representatives of the Board of Trade the strike would not have been settled when it was. And this would not have been the worst feature of the situation, for after the rioting which had taken place on the Sunday previous to the settlement of the strike, it is no telling what might have happened, as there were undoubtedly a large number of hoodlums, sympathizing with the strikers, who were ready to do almost anything to prevent the cars being run by any other than union employes. Besides this, there was the great inconvenience which the public would have suffered from long stoppage of the street car service.

His Worship has heretofore not resorted to the methods of the ward politician in public affairs. If there has ever been a gentleman occupying the position of chief magistrate in Toronto it is Mayor Howland, but one cannot think otherwise than that in the present instance he has dropped what has hitherto been his practice, and followed a course more akin to that of the professional or ward politician.

It may not have been that he was talking for votes, but it looks extremely like it indeed, and we very much regret that he has tried to belittle the successful efforts of a body of business men whose sole object was the public good.

THE BINDER TWINE SITUATION.

THE VIEWS OF A MANUFACTURER.

WE have more than once reported a growing scarcity in binder twine; and the subject has recently been attracting the attention of those interested in agriculture throughout the country, more particularly in the West, where another heavy wheat crop is expected.

It is, no doubt, a puzzle to many why it is that a shortage in the supply so frequently occurs; and the manufacturer is usually blamed, without being given a hearing.

The representative of a Winnipeg agricultural manufacturing concern said recently to a newspaper reporter that a great scarcity of binder twine was expected during the coming season, as the crops would be unusually large; and he added: "Of course, this is a source of trouble that is as certain as the seasons, but is becoming a more serious factor with Canadian farmers annually, because of the increased quantity of twine consumed, as a result of the increased wheat acreage."

If it were true that the scarcity of binder twine were an annual occurrence, it certainly would seem that manufacturers were to blame. But this is not so. The largest manufacturers state that there has frequently been a surplus stock on the market, which they have had to carry over for a year, entailing a considerable expense. And as the margin on binder twine, for manufacturers as well as jobbers, is a small one, it takes a comparatively small expense of this kind to offset the profits.

In discussing the subject with a representative of HARDWARE AND METAL, a prominent Canadian manufacturer of cordage and binder twine said that, as the demand for the latter was put off until the latest time possible and its extent depended wholly upon the size of the crops, the business of manufacturing binder twine was of the most speculative character.

"We must make the twine," he continued, "long before any idea of what the crops will be like, and we can form no idea whatever as to how much will be used. Both the wholesale and retail trades buy to a great extent from hand to mouth, and the big demand for binder twine comes in a rush just before the harvesting. We ship practically all the twine in June and July. Last year there was a shortage, and we had to start in at the eleventh hour to manufacture again. The farmer won't buy his twine till he actually needs it, with the result that the retailer does not do so either. He prefers the jobber to carry the stock, who, in his turn, allows the manufacturer to carry it. If it were for only a short time we could do so. But we must manufacture in the fall; then we cannot ship till next summer and do not receive payments until the following October. At the close price we have to sell it is impossible to do that.

"The trouble is that the United States manufacturers have us and the Canadian farmer at their mercy. Fully 75 per cent. of the binder twine used in this country comes from the United States. There is no duty on it, though the United States Government imposes a duty on binder twine going from Canada into that country. The result has been that Canadian manufacturers can only dispose of about 25 per cent.—or, at the outside, 30 per cent.—of what they used to sell. The harvesting season in the United States comes earlier than in Canada, and manufacturers in that country can turn out considerably more than they can sell there, and count on dumping their surplus stock in this country. The worst feature of that is that much of the United States twine sent to this country is made by manufacturers of agricultural implements, with whom binder-twine manufacturing is only a side issue, so to speak, and they are willing to sell it at absolutely unremunerative prices, in order to forward their business in their principal lines.

"Now, when the crops in the United States are small, their manufacturers have a lot of twine for disposal in Canada. There is no shortage there. But when the crops are larger than usual, sufficient twine is needed to take up what American manufacturers have made, then there is none left for Canada, and a scarcity occurs—for which the Canadian manufacturer is blamed. If this is to be stopped, it is to the interest of the consumer as well as the manufacturer to have a duty placed on United States twine, which will keep these manufacturers out of this market; or, at least, to protect the home manufacturer so that he can do business on an equal footing with the American. At present this is not the case, for, while no duty is charged on foreign twine coming into Canada, we have to pay more for our raw material.

"In March last the American Government placed an export duty on all manila hemp (which is the chief item in making binder twine), going out of the Philippines. This is about ⅜c. per lb. But when the hemp was brought to the United States for consumption there the duty was refunded to the purchasers. So that the American manufacturer can buy his hemp for ⅜c. per lb. less than we can. This gives him a direct advantage over Canadian manufacturers in our own market, since he doesn't pay a cent of duty to this country.

"That is the state of things to-day. There is no monopoly of the binder twine business here, and no danger of one, with the different farmers' cooperative companies in the business as well as the products of the penitentiaries. So that the fear of high prices, if any exists, is groundless. But the frequent shortages in the supply of binder twine must continue as long as the Canadian farmer depends on the surplus stock of American factories and on the size of the crops in the United States."

THE INVERNESS (N.S.) RAILWAY.

MR. WILLIAM MACKENZIE, in an interview the other day spoke as follows of The Inverness Railway and Coal Company, in which Mackenzie & Mann are interested: We have been developing the mines for two years and for the last year have been shipping 300 tons daily. The coal is similar to that mined by the Dominion Coal Company, whose mines are close to ours. We employ 200 men at present, but this number will be gradually increased from now on. By next spring we confidently expect to ship one thousand tons daily. We are now busy erecting a shipping pier, and by August will be ready to ship coal to Montreal and local points. We will then have a railway 61 miles long built, which will greatly facilitate our business. We have commenced the construction of the Halifax South-Western Railway from Halifax to Yarmouth. In connection with it we the other day took over the Nova Scotia Central, running from Lunenburg to the Dominion Atlantic at Middleton. This embraces 74 miles of railway, and we closed the deal for it last Saturday. This road will become part of the Halifax South-Western.

Mr. Mackenzie said his company had been locating the above line for the past year. Five gangs of engineers were now at work on this job, and construction work would be commenced at once. When finished the new line will be 170 miles long.

BOWSER OIL TANK IN EUROPE.

Mr. Rosser McClure, who has been Canadian manager for S. F. Bowser & Co. for the past three years, leaves next month to introduce the Bowser oil tank in Great Britain and Ireland.

There have been numerous inquiries from the Old Country, and Mr. McClure is confident of doing a large volume of business over there. It is more than likely he will also open up trade in Russia. He will leave matters in the Toronto office in competent hands during his absence.

PIPE FOUNDRY BURNED.

ON Monday evening, July 7, the entire plant and buildings of the Montreal Pipe Foundry Co., Londonderry, N.S., were destroyed by fire, which started from the rolling mills and spread quickly over the remainder of the plant. These mills were bought by the Montreal Pipe Foundry Company about three years ago, and have been operated continuously ever since. Last spring a great deal of new machinery was installed, for turning out some large contracts for pipe.

More than 100 men have been employed recently by the mills, which were running on full time, and a very large business has been done by the company. The works were the largest of their kind east of Montreal, and the only ones in the Maritime Provinces.

Some of the stock was saved from the fire, but it will be a long time before the mills can be built and put into operation again. Besides the plant and buildings of the mills, several houses in the village caught fire, and much damage was caused.

SHERWIN-WILLIAMS WON.

Judge Morgan gave judgment in favor of the Sherwin-Williams Co. for $77 in the case of Sherwin-Williams Co. vs. E. L. Sawyer Co., on July 4th. Mr. Benson, city agent for the Sherwin-Williams Co., whose headquarters are at Montreal, claimed that he sold a quantity of paint, valued at $148 to what he believed to be E. L. Sawyer & Co., brokers in the Canada Life Building. The paint was to be used for painting the steamer Queen City, then at Port Dalhousie. Mr. Benson received his first order, he stated, from a Mr. Hicks, and afterwards telephoned the Sawyer Co., who he believed, confirmed it. The "Queen City" was controlled last year by the Toronto Navigation Company, and was to be used to catch Pan-American excursions. The company subsequently went into liquidation, and Mr. Sawyer claims that the paint bill should be paid by them, and not by him, as it was a syndicate that controlled the boat, and that he was not mixed up in the syndicate. The paint was ordered and sent in April, 1901, and has not been paid for since.

A NEW PATENT DIE.

Messrs. Decatur, Bull & Co., Montreal, have been appointed sole agents in Canada for the "Economy" die, manufactured by F. E. Wells & Son, Greenfield, Mass. This is the first appearance of this die on the Canadian market, although in the United States it has had an immense sale for the past two years. It is different from the solid die, in that, to a certain extent, it is hollowed out, thus requiring less steel in the construction, so that not only can better steel be used than in the ordinary die, but it can be sold at a lower price. They are said to be the most accurate and the fastest cutting die on the market; and they are fully guaranteed. The handles are of knurled steel pipe, beautifully finished. This is the only die of its kind in the world and it is bound to be an immense success on this market.

CUTLERY FOR BENEDICT MORRISON.

Daniel Morrison, traveller for Rice Lewis & Son, Limited, was presented by the employes of the firm with a fine cutlery cabinet on the occasion of his marriage.

NEW HARDWARE STORE.

E. Cameron & Co. will open early in July their new hardware store on the London House corner, Charlottetown, P.E.I. Mr. Cameron has been in business with a leading firm of that city for the past 13 years and is accordingly well acquainted with the trade.

ELECTRICALLY PRODUCED LEAD.

A consignment of the first pig lead produced in Canada on a commercial scale by electricity was made to Winnipeg recently by the Trail smelter, and shipments of pig lead will be continued regularly to eastern Canada. This process in which electricity is used in place of fire methods will, it it claimed, as completely replace the old fire methods in lead refining as has been the case in copper refining.

The success of this plant insures the construction of a large refinery by the Trail people, and it is understood that plans are being prepared for a plant which will turn out 50 or 60 tons of pig lead daily.

CATALOGUES, BOOKLETS, ETC.

A STRIKING IDEA.

A striking idea in advertising is shown in the card just issued by The Burrow, Stewart & Milne Co., Limited, of Hamilton, manufacturers of the Imperial Standard scales. A card, not too large to be sent by mail, has the representation of balances astride a hole in the top, through which to insert a pin. The receivers of the card read beneath the balances the following: "In justice to yourself, hang this card in your office as a reminder that the supreme degree in the building of scales of all capacities is attained in Hamilton by The Burrow, Stewart & Milne Co., Limited, the manufacturers of Imperial Standard scales. Ask for prices and descriptive catalogue."

SILVERWARE FOR LONG BAY POINT HOTEL.

The silverware for the "Bay Cliff" hotel, the new and magnificently furnished hotel at Long Bay Point, Port Rowan, was manufactured specially to order by The Toronto Silver Plate Co., Limited, and was supplied through F. A. Carpenter, the enterprising hardware merchant of Hamilton.

MARRIED AT LOUISVILLE.

A pretty wedding took place on Saturday, July 5, in St. John's Evangelical church, Louisville, Ky., when Mr. Theodore Korb, of Lewis Bros. & Co., Montreal, was married to Miss Julia Mansfield, daughter of Robert Mansfield, of Louisville. Miss Mansfield is an accomplished young woman, and a graduate of the Frese music school. Mr. Korb is well known as the advertising manager of Lewis Bros. & Co. The young couple have taken up their residence at 425 St. Urbain street, Montreal.

TRADE CHAT.

The charter of the Robson Elevator Co., of Ayr, has been cancelled.

Kingston has made her first shipment of zinc ore. On July 5, 175 tons, mined in North Frontenac County, were shipped to Montreal.

The present dock at Collingwood is being lengthened to 530 feet. Several important alterations are being made on the water front. The railway track is being moved further south.

The Hamilton Bridge Company has been given the contract for the steel work, trusses, etc., of The Deering Harvester Company's factory at Hamilton at between $12,000 and $13,000.

The structural steel work of Hotel Astor (Muscherheims) is being protected with Dixon's silica-graphite paint, in colors red and green, This paint is manufactured by The Joseph Dixon Crucible Co., Jersey City, N.J.

F.C. Duncan, general merchant, Estevan, N.W.T., has sold out to J. G. Hastings.

IRON MOULDERS' CONVENTION.

ABOUT 540 delegates, representing a membership of 50,000 moulders in the United States and Canada are in attendance in Toronto at the twenty-second session of the Iron Moulders' International Union of North America.

The officers of the organization are: President, Martin Fox; secretary, E. J. Denney; assistant-secretary, John G. Weaver; financier, R. H. Metcalf; editor of journal, David Black (formerly of Toronto); members of the board, M. P. Murphy, James Flanagan, M. B. Lavery, James H. O'Neil, John Recktenwald, W. J. Phillips, and Geo. W. Greig.

The convention is expected to last from 15 to 20 days. The principal business before the convention will hinge upon the reports of the committee on constitution, which is always amended more or less at these gatherings, and of the committees on petitions, claims, and grievances.

The increase in membership during the last three years has been 20,000, and during this time 158 new charters were granted, while 31 had lapsed.

President Fox showed that in this same period moulders' wages had advanced from 18 to 20 per cent., and that moulders were now enjoying better conditions than they had done at any time during the past 25 years. His observations and experiences confirmed him in the belief that wage agreements covering a specified time were desirable. They insured a period of peace for the prosecution of the work of the union and introduced an element of certainty into the industry which was of positive value to both the moulder and his employer.

President Fox, in reference to agreements said in part: "I desire to impress it deeply upon the minds of the assembled delegates that no labor organization of any standing can afford to wilfully violate agreements or undertakings to which it has become a party. If it does so, it loses materially both in prestige and in the estimation of the public, and cannot expect to be regarded as a responsible party with whom to make agreements in the future. The only safe policy, the only honorable one, is to faithfully carry out all agreements regularly entered into, until they expire by time limitation or are abrogated."

President Fox thought it wiser to endorse the nine-hour movement than to jump from a ten-hour to an eight-hour system. In his opinion a reduction in the hours would be a more substantial gain than an equivalent advance in wages. Wage advances would be subject to future trade fluctuations, whereas the shorter workday would be a permanent gain.

Regarding the moulding machine, the president made the plain confession: "Our original attitude towards the machine was a short-sighted and mistaken one; and the resulting injury to our own interests cannot be removed by a perpetuation of the early prejudice. The foundry industry is developing, and our union must adapt its policy to the changing conditions or fall into decay."

In dealing with finances, the president recommended no change in the weekly dues, 25 cents. The total income for the three-year term was $595,262, and the total disbursements, $532,101, leaving a balance of $63,160. The receipts of the death and disability fund were $111,916, and the disbursements $75,631, leaving a balance of $36,285. The strike in Cleveland cost the union $104,360. The total receipts of the strike fund were $314,763, and expenditures from it $327,961, creating a deficit of $13,198.

Plain Facts.

The following extract form a letter from Carter Bros., Picton, Ont., tells the story in a nutshell:

"In 1895 we were a very bad third in the paint business in Picton; to-day we sell more prepared paint than all the other dealers combined.

"In 1895 we were selling a paint that could be bought in every little hole and corner grocery store throughout the country; to-day we enjoy the sole control of **S.W.P.** and are protected in its sale by the largest paint and color house in the world.

"In 1895 we were doing business in a rut; **S.W.P.** woke us up, put new life into us, made us see what good advertising placed in the right manner would accomplish. We are now doing $10,000 more business a year, and do not hesitate to say that to **S.W.P.** belongs the credit of helping us to do the greater portion of it."

Our B-13 booklet tells how we helped Carter Bros. succeed. Write for copy to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY

WATERBURY BRASS COMPANY.

THE Waterbury Brass Co., whose general offices, mills and factories are at Waterbury, Conn., and stores at New York City and Providence, R.I., is one of the most progressive companies in the United States. They were organized in 1845 and received a special charter in 1881. Their New York warehouse was established in 1846. Owing to increased business, they have recently opened their new warehouse at 122-130 Centre street, New York City, corner of Centre and White streets. They are carrying upwards of a million pounds of brass and copper in sheets, rods, wire and tubing, which is classified in a stock sheet sent to the trade for the asking, and would suggest that you get on their mailing list, as they issue a stock sheet once a month.

It is said to be the largest stock carried in America of high brass, low brass, gilding, oreide and bronze metal in rolls; high brass in 24 x 48 sheets, sawed and hoop brass, seamless drawn brass and copper tubing, including iron pipe sizes, plain and nickel plated; brazed tubing, brass rods and sheet copper. They are now carrying a complete stock of soldering coppers.

The feature of this mammoth stock is immediate shipment the same day order is received, and the buyer has really two sources of supply in trading with The Waterbury Brass Co.—their New York warehouse and their mills. They have their own telephone service between warehouse and mills, and their facilities indicate the best efficiency for handling business.

The Canadian buyer will no doubt have the same satisfactory experience as the buyer in the States. The firm's motto is under three headings: Good goods, prompt attention to orders and correspondence, and in step with improvements and betterments. Their spring brass wire stands for the best with the hardware trade. Get to know them

THE FERNIE COAL STRIKE.

Mr. Elias Rogers, managing director of the Crow's Nest Mines, has denied the statement of The Boundary Creek Times, of Greenwood, B.C., in its issue of June 27. The Times says: "When a very large increase was made to the company's coke ovens long-time contracts were made with Montana works to insure a full and regular market for their coke. These contracts must be observed by the coal company, with the result that the Boundary smelters are unable to get a supply. The Granby smelter and the mines at Phoenix are compelled to close down on this account this week. The Greenwood smelters are still running, but unless a fresh supply of coke arrives early in July they will be forced to follow suit."

Mr. Rogers has issued the following statement: "Since the shortage arose as a result of the accident, and the more recent strike, not a pound of coke was being sent to Montana, and the whole output was going to Canadian smelters. They had been urged to lay in reserve supplies, but without success, and now all was being done that was possible to supply them."

NOVA SCOTIA MARKETS.

Halifax, July 8, 1902.

THE hardware trade for the last week has been good; in fact, it appears to be more active comparatively than the other wholesale lines. At the same time the volume of business done is not so large as during previous weeks, as the time for the mid-summer dullness has about arrived. Up to date the season's trade shows an increase over previous years, and appearances indicate now that this lead will be strongly maintained for the balance of the year.

* * *

The healthy tone of business still continues. The dealers have nothing to complain of with reference to payments, and the reports from all parts of the Province are encouraging. The fact that good crops are now generally assured will have a tendency to stimulate business, especially in the building line, as the farmers feel certain that they will be able to pay for any outlay they may make—and the farmer and his crops are the backbone of business generally.

* * *

There is general complaint that the manufacturers are slow in filling orders in nearly every line of the trade. Orders placed six months ago are only arriving, and some orders have not even yet been filled. This is a very great inconvenience, as the jobbers do not usually carry heavy stocks, their orders largely depending on the prevailing business being done. Some months it is largely in one line, while in others it may be another line altogether. The jobbers cannot place their orders so far ahead, and the wholesalers can only distribute goods as they are able to obtain them from the manufacturers.

* * *

As a general rule hardwaremen are not strong advertisers—unless they have opposition. This is largely the case in Halifax, though many firms handle special lines and have for years maintained in these lines the bulk of the trade; and they are all good advertisers. An idea of the business doing just now, or being looked for, may be gleaned from a review of the local advertising running. 1. "Wire doors, window screens, green wire cloth"; 2. "Paris green, galvanized and black sheet iron"; 3. "Haying tools and farming implements"; 4. "Tinware, enamelware, zinc, lead, and glass"; 5. "Creamers, straining pails, galvanized pails"; 6. "Paris green and shipping supplies"; 7. "Builders' hardware"; 8. "Steel and wire fencing"; 9. "Engines, boilers, and machinery"; 10. "Oils, paints, glass and putty." These are taken from actual advertisements before us and illustrate that all lines are being presented, and as "Advertising pays," business is being done in each line.

* * *

Cordage is firm at prices last noted. There is an advance in the primary market in linseed oil, but no change has yet been made in this market. All lines of iron and steel are firm. There is quite a business still doing in builders' materials of all vinds, but orders are on a smaller scale than in the early part of the season.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

UTILITY OF THE STORAGE BATTERY.

THE storage battery or accumulator as it is sometimes called is coming to the front very rapidly, and the time is not very far distant when the storage battery will be used for many purpores that have been thought impracticable. It is not so very long ago since the storage battery was discovered, and, of course, it was in a very crude state at that time.

A cell without a substance designed to absorb the hydrogen is said to polarize when the collecting hydrogen stops its action and the substance used to absorb the hydrogen is called a de-polarizer. There are many of those familiar with the storage battery who have seen that all decomposition cells give back transient current after the action is stopped. This effect was first studied by Ritter, and he found that lead plates in a solution of sulphuric acid gave back current for much longer time than other combinations. This discovery was no doubt the foundation of the modern accumulator, or storage cells.

Plante found that by repeatedly decomposing the water and taking off the current the plate took up more and more energy, and by repeating the changing and discharging and reversing the current many times he found plates would take up a large quantity of energy, and, consequently, give back current for a long time. He found that one plate, the anode, became oxidized into peroxide by taking up oxygen liberated on it by the charging current. The other plate became spongy, and, on discharging, the spongy cathode is acted upon by oxygen and sulphuric acid, forming sulphates and low oxides. On charging again, the anode is reoxidized and the cathode reduced again to pure spongy lead.

The Plante plate, the peroxidized one, is still used in modern cells. Mr. Faure discovered that by pasting a mixture of oxide of lead and sulphuric acid on the plates, their capacity for energy became at once much greater. Later on it was found better to punch holes in the plates and fill them with the lead oxide paste, and then grids and corrugated plates were used, all designed to carry as much lead oxide as possible, in contact with the lead as a conductor. There have been many forms of grids made, and as yet it cannot be said that they are a success. However, there are some batteries on the market that have given fairly good results. The principal difficulty with the accumulator is the buckling of the plates, which is caused by unequal expansion. The electic light being a much better conductor at the bottom of the cell than at the top, this constant buckling causes the active material or lead oxide to become loose in the plates, and if the battery is subjected to any vibration, these oxide pieces sometimes fall out and make a connection between the positive and negative plates of the battery. This is called a short circuit, and as soon as this occurs the current passing through the other batteries that are in circuit with it is reversed, and if such a thing should happen many times the batteries would soon become useless.

Another drawback to the storage battery is its excessive weight, especially where they are used for automobile work. However, the accumulator has come to stay, and all their weaknesses will soon be overcome.

Thos. L. Kay, of The Kay Electric Dynamo and Motor Co., Limited, Toronto, has recently designed a new storage battery in which he claims a short circuit, the buckling of plates and the falling-out of the active material are absolutely impossible. He also claims that his new battery will not weigh more than one-half as much as any battery now on the market of the same capacity. In other words, the weight of the battery will not exceed 150 lb. to the kilowatt hour. This will bring the storage battery into direct touch with the automobile.

There are many other things that the accumulator can be advantageously used for. For instance, in central stations where the load is irregular, smaller units of power can be used, thus reducing the cost of operation. For the lighting and furnishing the power on a farm the dynamo can be attached to a windmill, and when there is enough wind to cause the windmill to revolve the dynamo will be set in motion and will start immediately to generate currents of electricity which will be taken in by the storage batteries or accumulutors and held there until such time as it may be necessary to use it for light or power.

The storage battery will also be found useful for utilizing natural powers, such as small and large water powers. There are many small creeks running through farms and other properties that could in many cases be dammed up and converted into useful energy. In many cases the water may not be of sufficient volume to operate a dynamo for any great length of time and maintain a constant electro-motor force or voltage. However, all the water there is can be used to its full capacity charging accumulators for 24 hours per day. This stored energy can be used at will for either lighting or power at a constant pressure up to the capacity of the batteries. Many other natural powers may be used throughout the storage batteries. The wave on our lakes may yet be transmitted into electrical and mechanical energy.

GEE ELECTRICAL CO.

The Gee Electrical Co., Colborne street, report business to be brisk in all departments. In their wiring department new work this week has been done for Thos. Horn; Burke & Howard; Fox Bras.; The McLean Co.; Mr. Saunders; St. Mary's Church; Dr. McLaughlin, College street; Mr. Henderson, Glen Road; Mr. Rawlinson, Maple avenue; also extension of the Sunlight Soap Co. In their machine department they are extremely busy. During the week they have sold one 30-h.p. machine to Major Tassie; one 10-h.p. to The A. R. Williams Co.; one 5-h.p. to H. W. Petrie; one 60-light dynamo to H. W. Petrie. They have as well secured contracts for work in The Confederation Life Building; for The Gowans, Kent Co.; for The Larkin Tea Co.; for the Collingwood Corporation; for the G. N. Western Co.; Henry Barber and others. This company reports the outlook to be exceptionally bright.

Mr. Gee has secured a first class mechanical engineer of 15 years' technical and practical experience in machine construction in the person of Mr. James L. Campbell, of Glasgow, Scotland. Mr. Campbell will take entire charge of the factory and manufacturing departments, thus leaving Mr. Gee to deal entirely with the electrical side of the business.

ELECTRICAL AND MACHINERY NOTES.

THE Cornwall Town Council awarded on the 7th the contract for the new hydraulic pumping plant to The Goulds Manufacturing Co., of New York and Boston. The company will furnish a pump with a capacity of 500,000 gals. per day and a Jenckes water-wheel set up for $7,490. Williams & Fallow, of Cornwall, obtained the contract for the masonry for $2,671.

A 38 x 32 in. 8-ft iron planer was delivered to The Gee Electrical Engineering Co., Colborne street, Toronto, by H. W. Petrie, 141-5 Front street west, Toronto.

A No. 3 Jewel automatic engine has been installed in the plant of Hoffman & Gateman, brewers, Berlin, Ont., by H. W. Petrie, 141-5 Front street west, Toronto,

C. L. Vickery, proprietor of a lumber and planing mill at Port Perry, Ont.. has purchased a No. 6 Jewel automatic engine of H. W. Petrie, 141-5 Front street west, Toronto.

It is understood that the Grand Valley Electric Railway, which is now building a road to Paris, has purchased the Brantford Street Railway and will run it in conjunction with their road to Paris.

Breck & Halliday, Kingston, have placed a new electrical plant, engines and generator, in the summer residence of W. H. Nichol at the foot of Howe Island. The firm has received the contract for wiring and placing electrical fixtures in Mr. Batterman's summer home below Gananoque.

Jones & Moore, Adelaide street, west, Toronto, have closed the following contracts during the week : One motor to Mr. L. Allcocks, Sault Ste. Marie ; a plating dynamo to The A. R. Williams Company ; one 10 h.p. motor to The A. R. Williams Company ; one 150 light dynamo to The Oshawa Tannery ; one motor to Mr. T. Tunstead., Toronto ; one motor to The Toronto Roller Bearing Co. Besides, The Jones & Moore Company have taken contracts for the electrical fixtures for 10 dwellings and two warehouses.

The following orders have recently been filled by M. Beatty & Sons, of Welland, Ont.: One hoisting engine, B. H. Appleby, St. John, N.B.; one special erecting engine, Canadian Bridge Co., Walkerville ; two hoisting engines, two swingers, two sets derrick irons, North Shore Power, Rail and Navigation Co., Levis, Que.; one one-yard clam derrick, with steel frame and boom, to Sun Portland Cement Co., Owen Sound; two additional drums for hoisting engines, Yukon Sawmill Co., Dawson ; duplicate of above, by express, Yukon Sawmill Co., Dawson ; two hoisting engines, Armstrong, Morrison & Balfour, Vancouver ; two hoisting engines and one centrifugal sand pump with direct connected engine, Armstrong, Morrison & Balfour, Vancouver ; two hoisting engines with swinging attachments, two clam buckets, Armstrong, Morrison & Balfour, Vancouver ; one hoisting engine, Capt. W. H. Soule, Vancouver ; one double-drum h.p. hoister, Mt. Johnson Quarrles Co., St. Gregorie, Que.; three swinging drum attachments, Dawson & Riley, Niugara Falls, Ont.; one hoisting engine, Dawson & Riley, Niagara Falls, Gnt.; one swinging drum attachment, M. P. Davis, Quebec.

A 375-FOOT CARRIER.

The Collingwood Dry Dock Co. has secured a contract for the construction of a huge carrier about 375 feet long from Hagarty & Co., Toronto. This company has also taken off The Bertram Shipbuilding Co.'s hands the contract for a large freighter for The Playfair Co., of Midland. Both these vessels will be completed by June 1 next.

TWO NEW TURBINE WHEELS.

H. A. Connell, of Woodstock, N.B., is placing a turbine wheel in position at the Davis Mill property. The wheel will give him 150 horse-power, and another one under way will give him 250 additional horse power. With a dynamo run by water and placed below the grist mill, Mr. Connell will supply power to his foundry and run his large electric lighting system. Mr. Connell, by the use of the water power of the Meduxnakeag, will effect a saving in fuel of over $3,000 per year.

DEVELOPING MORE POWER.

Mr. J. Alex. Culverwell, of Peterboro', has purchased the greater portion of a survey at Healey's Falls, also half of the Crow Bay Falls adjoining the corporation of Campbellford. These two powers have a minimum power development in a dry season of some 15,000 horse-power. Mr. Culverwell, who is managing-director of the Central Ontario Power Company, owning Burleigh Falls, also purchased a couple of months ago the Buckhorn Falls, both being within 20 miles of Peterboro'. He states he has arranged a deal in New York to complete the development of the last two properties.

A HANDSOME STEAM LAUNCH.

Watson & Rutherford, Simcoe, Ont., made their first run on their trim little launch the "Vera," July 4, with Commodore Ellis in command. The boat is replete with all modern improvements. She is a staunch craft, strong and seaworthy, with graceful lines and answers her machinery like a thing of life. She has accommodation for 16 passengers. Mr. Rutherford, who is only a young man 21 years of age, is responsible for the perfect working of the boat which was constructed under his supervision. The boiler is an original idea of his own, and the mechanical work was done by himself.

MORE HORSE-POWER AT NIAGARA.

THE manufacturing world that centres at Niagara will ultimately have for its use 400,000 more horse-power. The Ontario Power Company, of which John J. Albright, of Buffalo, is president, is the company that will develop this power. Briefly, the Ontario Company has obtained from the Queen Victoria Niagara Falls Park Commissioners rights and privileges which enable the company to develop 400,000 horse-power. That is a doubling of the capacity of the company.

The most important part of the new right allows the company to tap the Niagara at the Dufferin Islands. Water sufficient to develop 200,000 horse-power can be got by the company at the point. By a short tunnel through the hill, which is made by the old bank of the Niagara, and a canal through the Canadian park, an easy and cheap means of developing power is at hand.

An immense pipe lying close to the surface of the ground, instead of an open canal, will be used to carray the water through the park.

It is known that a contract for the installment of machinery to develop 50,000 horse-power has been let, and also, as an earnest of the company's ability to fulfil its part of the contract, that $30,000 was paid to the park commissioners on June 28 to bind the bargain. That $30,000 represents the rental due to the park for two years' development of 10,000 horse-power. The fact that new rights have been acquired and two years' rental has been paid in advance, means that the Ontario Power Company is now successfully financed.

TO BUILD LOCOMOTIVES AND MACHINERY.

To engage in and carry on the work and business of a foundry, machine shop, boat and bridge-building establishment, and to manufacture, construct, and deal in generally, tools, machines, vessels, conveyances, including locomotive engines, railway cars, vessels of all sizes and descriptions and all parts of the same, has The Locomotive and Machine Co., of Montreal, Limited, been incorporated. The capital stock of this concern is $1,000,000, which is divided into 10,000 shares of $100 each. The incorporators are as follows : Michael John Haney, contractor, Toronto; James Thomas Davis, contractor, Montreal ; Michael Connolly, contractor, Quebec ; George Patrick Brophy, civil engineer, Ottawa, and Roger Miller, contractor, Ingersoll, Ont.

Next week's issue

will be a Special Number dealing with

"Stoves and Heaters"

We expect to furnish readers with 80 or 100 pages of matter about Stoves, Heaters and Furnaces—illustrating and describing all that is new this season.

Manufacturers, Wholesalers and Jobbers who have a business story to tell of Stoves, Furnaces, Stove Parts, Stove Furniture, Stove Polish, Pipes or any other accessories are welcome to use this issue for their advertising.

Dealers will want details about certain lines which the manufacturers alone can give them, and for a straight talk to interested people, the **"Stove and Heating"** Number is right in line.

Rates for space gladly furnished. Copy cannot be taken after July 16.

THE UTILIZATION OF WASTE.

By H. D. O.

"WASTE not, want not," is out of date. Too negative. More modern, more positive is the adage, "Convert wastes, grow rich." The transformation of energy and power with a minimum of loss is the wide-awake business man's desideratum.

Far-reaching methods utilize each by-product. Not yet, however, has been reached the highest degree of attainment in the profitable employment of wastes in manufacture. The Census Bureau of the United States of June 17 predicts further development even to the extent of converting by-products into the main products of an industry. In the United States from $3,000,000 to $4,000,000 worth of wool fat and potash are run down the streams. A Canadian firm is erecting a six-storey building out of the proceeds obtained from the utilization of wastes on a contract for the South-African War.

Among the benefactors of mankind, prominent places may be claimed for those who utilize what is or has been considered a waste. A man or woman who reclaims what is unused, converts to good purposes that which is unproductive or brings value to that which is esteemed worthless, benefits mankind and adds to the material wealth of the world.

What is the waste or refuse of one industry may be and often is the raw material of another, but the extent to which such waste can be used is influenced by local conditions. It is comparatively easy to point out waste in nearly every process of manufacture, in our homes and in our methods of living, but to correct this is, in many cases, impracticable.

We recognize how great the waste is in all departments of industries, and few recognize how much is being done towards utilizing this refuse material. But with all that is accomplished there is a wide field to be covered before we reach the Utopian condition where a useful purpose is found for all that is now waste or considered as such. The many scavengers who extract value from the proceeds of the city dump heap in waste paper, rags, old leather, coal, bottles or old metal probably represent the most popular notion of the utilization of waste products, a utilization more important than is ordinarily appreciated, and representing gross money value which would appear fabulous. The army engaged in this reclamation is large and its scouts appear at every dump, upon the scene of every fire before the embers are cooled, or assail our homes to collect whatever of apparent value may be obtained.

The refuse from a city of 50,000 inhabitants possesses sufficient commercial value for the municipality to derive revenue from the sale of the privilege of collecting it. The fact that old rags and paper enter into the production of other paper; that scrap iron and other metals are transformed by the cupola or furnace into new forms; that leather scraps are useful in chemical manufacture and apparently cover the extent of popular knowledge, unless the legend is accepted that old paper, tin cans and bottles are the most nutritious food for goats.

In a large button works in Connecticut 90 tons of buttons were made in one month. It is impossible to suggest the number of buttons represented by 90 tons, or to imagine the multitude of stitches required to fasten them to clothing, or even to guess at the number of "swears" which were encouraged by the failure of individual buttons to maintain their responsibility. The material used to produce those buttons was the remnants of the sheets of tinplates from which the buttons and caps of cans for blacking and other boxes had been cut. After the button blanks had been punched from this tinplate, the small triangle of metals connected by iron threads was compressed in a form under a drop-hammer and subsequently shipped away to be made into sash-weights.

Some of the prominent utilizations of waste products that are well-known to-day are in connection with the fuel supply. In the production of charcoal from wood there are large volumes of acetic vapors which when condensed are of considerable value. By charring the wood in ovens or retorts and conveying the vapors to condensers and stills, the products are charcoal, pyroligneous acid, tar and uncondensable gases of considerable thermic value. These goods are used as fuel, the tar is merchantable and from the pyroligneous acid methyl alcohol, acetic acid and various commercial acetates are produced.

Throughout the cotton belt of the United States numerous mills are operated which convert the cotton seed formerly left in piles to rot or to be burned when sufficiently dry into oil and food for cattle. What was garbage in 1860 was a fertilizer in 1870, was cattle food in 1880, and table food and many things else in 1890.

In the iron industry there are are numerous applications in utilizing waste or refuse, including the production of cement, mineral wool, paving blocks, or monolithic paving from blast furnace cinders; the remelting or converting the unmerchantable masses of metal, ladle sculls, crop ends, shearings, punchings, filings, etc.; the utilization of blast furnace gas to heat air, produce steam, etc.; the restoring of the exterior heat of an ingot by means of a soaking pot and the sinking of scrap in forges and furnaces; the almost universal generation of steam by waste heat, etc., in mills, etc.

Instances of utilization might be multiplied, but those mentioned may suggest various means employed in special industries to convert to a useful purpose what was refuse. The admission that in the steam-engine only a modicum of the calorific energy stored in the fuel is used shows that a wide field is still before us in reducing waste. The water-powers which are being utilized demonstrate how great is the power which has been permitted to go to waste, and which, in many cases, may be conserved. Enough has been said to suggest how numerous are the utilizations of refuse and how many are the opportunities for future advances. That there is a use for everything we all admit. That practical use can be made of everything will depend largely upon local conditions. But it is evident that the industry which is able to obtain the greatest value from what, under normal circumstances, is wasted, nearly approaches the ideal.

This brief statement of what is being done to-day with articles that were going to waste a generation ago must lead industrial men to ask: "Are there not other waste products that will be used a generation hence?" and thus not only increase the comfort of living, but also decrease the expense.

NEXT!

Mr. B. S. Leak and Mr. W. R. Tait, both representatives of Lewis Bros & Co., in the northern territory, have just returned from their wedding trips. This makes three of Lewis Bros'. men who have joined the ranks of the benedicts within a week or two. Next?

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, July 11, 1902.

HARDWARE.

MUCH improvement is to be noted in the market this week. Jobbers report a material increase in the number of orders and a brisk trade generally. The advance cards of nearly all the American travellers who come to this market have been received, and these visitors are expected during the coming week. There is a good demand for scythes, hay forks and all harvest tools. Plaster of paris has been advanced and is now quoted at 60c. per barrel. Manufacturers have also reduced the discount on standard scales, it being now only 40 per cent. instead of 45 per cent. as formerly. An advance is also reported in malleable pound fittings, including tees, couplings, elbows and caps, and the discount is now 23 3-10 per cent. instead of 29 per cent. Copper rivets and burrs, assorted, are now discounted at 45 per cent. off only, instead of 45 and 10 per cent. Among the rapidly moving lines of the week are axes, many large orders for which have been received. The hot weather has stimulated the demand for screen windows and doors, which are now in brisk demand.

SCYTHES.—The demand for scythes shows no signs of decreasing, and the market this week has been quite active. The demand was larger than the previous week. There has been no quotable change and our quotations are as follows : Lance, No. 80, $5.50 ; Hurd's Clipper, $6.50 ; concave, $7.50 ; Sibley, $8.50 ; Cradle scythes, cast steel, $8.50 ; silver steel, $9.50 ; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—Business continues rather quiet, and the price is unchanged from $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—Trade is quiet this week. Quotations are as follows : Nos. 6, 7 and 8 gauge, $3.45 ; No. 9, $2.80 ; No. 10, $3.55 ; No. 11, $3.65 ; No. 12, $2.95 ; No. 13, $3.05 ; No. 14, $4.05 ; No. 15, $4.55 ; No. 16, $4.80 ; No. 17, $5.20 ; No. 18, $5.45.

SMOOTH STEEL WIRE.—There has been no change in the condition of this market. Business is still quiet. We quote: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows : Coppered wire, 60c.; tinned wire, $2 ; oiling, 10c.; spring wire, $1.25 ; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The demand is still small and no change is reported in the price. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—This is moving slowly. Discount, 60 per cent.

FENCE STAPLES.—A slight improvement is noted in the demand this week, but business is still quiet. Bright staples sell for $2.90 per 100-lb. keg, and galvanized at $3.25, with an extra of 25c. for 25 and 50-lb. packages.

WIRE NAILS.—The inquiry for these keeps up fairly well and the market continues active. The price, in small lots, is $2.55, and in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—A fairly good trade is doing in cut nails. In carlots the price is $2.37½ per keg ; small lots, $2.45 per keg.

HORSE NAILS.—There is only a small demand for horse nails, and the market is still quiet. Discounts are as follows: "C" brand, 50 and 7½ per cent. off ; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—There is not much doing. Our quotations follow : Iron shoes, light and medium pattern, No. 2 and larger, $3.50 ; No. 1 and smaller, $3.75 ; snow shoes, No. 2 and larger, $3.75 ; No. 1 and smaller, $4.00 ; X L

MIDLAND, ONT. Limited

steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—Business in screws is active at unchanged prices. The discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—A fairly good demand for bolts continues. Prices and discounts are unchanged, and our quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The inquiry for building paper is still satisfactory, and a good business is being done. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—No further change in price is reported this week. Business in rope is not active but the demand for binder twine is good and stocks are becoming exhausted. We quote: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—A change has been made in the discount of copper rivets and burrs, assorted, and it is now 45 per cent. instead of 15 and 10 per cent. Burrs alone are still discounted at 30 and 10 per cent. Trade is quiet. We quote: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—Trade has much improved of late and a good business is doing this week. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—The demand is only moderate. The discounts on Canadian and English netting are: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—The market is active all round. The discount is 60 per cent.

FIREBRICKS.—There is no change. Trade is quiet and prices are $16 to $22

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

per 1,000 for English, and $17 to $22 per 1,000 for Scotch.

CEMENT.—Trade is quiet, and our quotations are: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The market in most lines is active. Black sheets have been advanced by some dealers by 10c. The prices on coil chain are also quoted considerably higher by one or two dealers.

PIG IRON.—Pig iron deliveries are falling behind further and further. Canadian makers are reported to be working on orders for the second quarter of next year. The price of Canadian is $18.50 to $19, and of Summerlee, $21.50 to $22.

BAR IRON.—This is in good demand still. Horseshoe iron is quoted at $2.20 and merchants' bar at $2.

BLACK SHEETS.—The market is not active, but prices are well maintained and an advance of 10c. is quoted by some houses. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 21 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This is in only moderate demand, and our quotations are now as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—Trade is quiet and the price is 14c.

INGOT TIN.—The market is steady under a fair demand. Straits is worth 33½c.

PIG LEAD.—Business is quiet. The price remains at $3.25.

LEAD PIPE.—A fair trade is doing. Composition and waste sell at 8c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—The demand for iron pipe keeps up well. Our quotations are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—The market is active and prices are unchanged. Charcoals are quoted at $4.75 to $5.25 per box, and cokes, $4.25.

CANADA PLATES.—Trade continues fairly satisfactory. We now quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—There is a good demand. No quotable change has occurred. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—Business in sheet steel is not active and prices are unchanged. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—Trade has not been of a very brisk nature during the week. We quote as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—These are moving slowly, and the price remains at $7.50.

COIL CHAIN.—The demand is not as great this week as last. Prices were advanced by some firms, but others are quoting: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is not much doing. The price is $5.85 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—Trade is quiet. We quote 5c.

SOLDER.—A good steady demand keeps up for solder. Bar solder is quoted at 18c., and wire solder at 20c.

PAINTS AND OILS.

A fair amount of business is being done, though the factories are not as busy as they were a month ago. There is still a remarkably good output of liquid paints, and it looks as if the demand was to continue through the summer. Dry white lead is hard to get at the corroding centres, and grinders are hampered by a lack of suppfies which were contracted for last year but are slow in coming to hand. Varnishes are still strong and competition is as keen as ever. The extremely warm weather has materially increased the demand for paris

green, and heavy orders have been received from the Maritime Provinces as well as from some portions of Quebec. Painters' supplies, in general, are firm. Linseed oil and turpentine are unchanged in price. The demand is good, and as fast as supplies arrive they are disposed of. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 82c.; boiled, 85c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

No further change in prices of scrap materials has been reported. The market continues quiet and featureless in all lines, and our quotations are as follows : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, [illegible] to 6¼c. per lb.

GLASS.

The market is quiet and the demand is very light. Our quotations are now as follows : First break, 50 ft., $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

Nothing of importance has occurred on this market, and the prices are unchanged. We quote : No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. No. 1 calfskins, 12c. ; sheepskins, 70c.; lambskins, 25c. per lb.

Builders value the time saved by using EASTLAKE Shingles

Their Patent Telescope Side Lock, imitated but never yet equalled, makes them quicker and easier to lay than any other shingle in the market.

DEALERS VALUE the perfect satisfaction of all customers who choose these reliable lightning, fire and rust-proof shingles—they are a line you can't afford to leave out of stock. Fullest particulars in our catalogue.

The Metallic Roofing Co., Limited,

TORONTO, MONTREAL, WINNIPEG.

—

MONTREAL NOTES.

Standard scales are higher and are now discounted at 40 per cent.

Malleable pound fittings are higher, the discount now being 23 3-10 per cent.

Copper rivets and burrs, assorted, have advanced and are now at 45 per cent.

ONTARIO MARKETS

Toronto, July 11, 1902.

HARDWARE.

BUSINESS in hardware keeps up well and the sorting-up orders in harvest tools are becoming quite heavy. The prices for rope remain as fixed last week. The demand for lawn mowers is about over, but the movement in guns and ammunition of all kinds is on the increase. Trade in building paper and in all lines of building material is heavy, and much comes possibly from the north. The general movement in both shelf and heavy hardware continues good and quite a few orders are being received for lumbermen's supplies. Many cross-cut saws, chains, axes, etc., are being sent forward. Eavetroughing is now just in season and a lot of it is going out, but there is considerable difficulty being experienced in obtaining supplies from the makers thereof. The advent of the preserving season is causing activity in some lines of enamelled ware.

BARB WIRE.—The demand for this line keeps fair and prices are unchanged. Barb wire, in carlots, is quoted at $2.65. and for less than carlots, $2.77½ f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—A moderate business continues in this line, and our quotations are as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There is a fair amount of trade still doing in this line. We quote base price : $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—The prices remain unchanged with a fair demand. The discount is 22½ per cent.

WIRE NAILS.—These continue moderately active and unchanged. We quote $2.55 for less than carlots and $2.50 for carlots. Toronto, Hamilton, London, Gananoque and Montreal are the delivery points.

CUT NAILS.—No special trade is doing in these. We quote the base price at $2.45 per keg, and $2.37½ for carlots.

HORSE NAILS.—Business in horse nails is steady and the market is firm. Discounts are : "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—The amount of business in these continues fair. We quote : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—The feature of this market is the active demand and lightness of stocks in the hands of jobbers. The prices remain unchanged, and the discounts are as follows : Flat head bright. 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The tone of this market is strong and the demand

is larger than the supplies. The advance of last week in copper rivets and burrs has been maintained. The discounts are now as follows : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Trade continues quite active, and there are freer deliveries from the factories. Our quotations are now as follows : Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—The movement in these continues about the same as a week ago, and prices are unchanged. They are: Common doors, two or three panel, f.o.b. factory points as follows : Walnut, stained, 3-inch style, $6.80 per dozen ; stained, yellow, $7 ; natural color, oil finish, $8.15 ; 4-inch style, 20c. extra per dozen. Windows : No. 0, $1.60 ; No. 1, $1.70 ; No. 2, $1.95 ; No. 3, $2.10 ; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Some sorting-up orders keep this line active. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—Quite a trade is being done in these. The discount is 40 and 5 per cent.

ROPE.—The activity in the harvest sizes of rope continues. The other lines are quiet, and the declines of last week have been maintained. Our quotations are as follows : Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—A few early orders are being received for early shipment, and the prices here are firm in sympathy with the advance recently made by large Western manufacturers in the United States, who were looking for a shortage in the supply of twine this season. Our quotations are now as follows : "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

HARVEST TOOLS.—These are active, and the sorting-up orders have increased. The discount is 60 per cent.

EAVETROUGH, ETC.—Trade has improved with the advancement of the season and the demand now is about at its height. Stocks on hand are light and jobbers are experiencing some difficulty in getting sufficiently large supplies from the manufacturers to supply their current wants, and our quotations are as follows : Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—Business in this line has increased and a good demand is coming in from all parts of the country, principally from the north. The prices are unchanged. Our quotations are as follows : Dry sheathing, grey or straw, 35c. per roll ; tar sheathing, grey or straw, 45c. per roll ; dry fibre, 50c. per roll ; tarred fibre, 60c. per roll.

LAWN MOWERS.—The season for these is about over and business is quiet, and we quote the discounts as follows : 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3 ; "Daisy" mowers, 7-in. wheels, $2.25 to $2.50.

HARVEST WHIPS.—The demand for harvest whips is fair.

POULTRY NETTING.—There is a moderate amount of business doing at unchanged prices.

TINWARE AND ENAMELLED WARE.—Tinware continues active and steady, and the preserving season being now at hand is creating quite a demand for some lines of enamelled ware.

SPORTING GOODS.—There has been an improvement in the demand for guns and ammunition at unchanged prices.

CEMENT.—The market continues strong but there are not many sales being made although quite a number of inquiries are being received. The buyers are holding off as their immediate wants are not pressing, and the manufacturers are not particularly anxious to sell. We quote : Canadian Portland, $2.25 to $2.85, and Canadian hydraulic, $1.35 to $1.60 per bbl.

METALS.

The demand for metals from stock continues good and although there is no very large buying movement, this condition of affairs is always expected in July. There has been little buying on the outside tin market, but latest advices tell of a sharp advance therein, both on the London and New York markets. The copper market outside is steady, but no business is being done. The pig iron market continues along the lines previously followed, and spot iron is much wanted but scarce.

PIG IRON.—The market continues strong and the demand is good. In the United States there has been an urgent demand for pig iron, but very little is offering. We quote on track, Toronto : No. 1 foundry, $21 and No. 2, $20.50.

STEEL BOILER PLATES.—The demand for these is still good and the market is strong. The outside markets show an inordinate demand and values are very strong. We quote $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—The volume of business doing is fair and prices are firmly maintained. We quote $2.75 for steel beams, from stock, and $2 per 100 lb. for carloads on track.

STEEL RAILS.—The quotations for steel rails remain unchanged at $30 per ton for rails for steam railways, and $35 for rails for electric railways.

TOOL STEEL.—The values in this market are steadily maintained, and our quotations are as follows : "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—This is steady and unchanged.

SPRING STEEL.—The demand for this line is fairly maintained.

BOILER TUBES.—The market for these is steady.

BAR IRON.—This market is still bare of this product and values are held firmly. The outside market is strong and unchanged. Our quotations are: $1.95 to $2.05 base. Extras cut to length while rolling : 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

RASPS

Nicholson File Co.,

LARGEST FILE MAKERS IN THE WORLD

Seven Factories—manufacturing all shapes, sizes and cuts.

Nicholson's Increment Cut Files and Rasps represent a combination of skilled labor and the best material necessary for the production of a good article. The result of many years' experience.

Prices Consistent With Quality.

For sale by all prominent Hardware and Mill Supply Merchants throughout the Dominion.

Dominion Works, - - PORT HOPE, CANADA.

BLACK SHEETS.—The volume of trade in this line continues good and the prices are unchanged. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is an active demand for these. We quote: All dull, $3; half-polished, $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—Business in this line is still good. We quote in case-lots, as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

TIN.—The amount of business doing in tin continues large. We quote $32 to $33 per 100 lb.

TINPLATES.—Business continues brisk at unchanged prices. We quote: Charcoal, $4.75 to $5 per box, and cokes, $4.25 per box.

COPPER.—Ingot copper is quiet. The outside markets are lifeless and values are easy. Ingot copper is quoted at $14 per 100 lb. and sheet copper, $22 to $23.

BRASS.—This metal is in good demand at unchanged prices. The discount is 15 per cent.

PIG LEAD.—The activity in this line continues. The outside markets are steady with a light demand. We quote pig lead, $3.50 to $3.75, and bar, $5.

IRON PIPE.—There is a fair amount of business being done in iron pipe, and the market is unchanged. Quotations are per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER.—The movement in this line is freer. We quote $5.50 to $6.

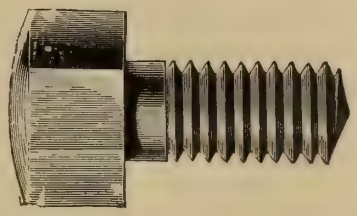
ZINC SHEETS.—A steady demand for these continues. We quote: Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER.—There is a good business doing in solder.

ANTIMONY.—There has been some improvement in the demand for antimony during the week. Quotations remain steady at $19.50 per 100 lb.

PAINTS AND OILS.

The features of this week's market are the declines of 2c. in raw and boiled linseed oil and 2c. in turpentine. The drop in linseed oil was owing to purely local conditions, for the outside markets are steady and unchanged. The demand for oil lately has been easy, and buyers keep holding off from purchasing for the fall requirements. This caused the manufacturers to lower the prices a little, to create a more active business at the present time. In turpentine the reduction was owing purely to the lower tone of the Southern market. The stocks of that product on hand here are very light, and only small quantities of one or two barrels are offering, at very high prices, the figures which are now quoted by us being merely nominal. The Southern market has fairly steadied itself during the week, after a considerable decline and surplus receipts have been readily absorbed at current quotations, keeping the demand in pace with the supply. There has been only a moderate amount of business transacted in white leads ground in oil, dry colors and zinc whites. The activity mentioned last week in mixed paints continues. The glue market is easy this spring, but trade has been active. An advance in glue some time ago has not been maintained, and there is a practically unlimited supply thereof on the market at the present time. We quote as follows:



THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 82c.; boiled, 85c.; 3 to 5 barrels, raw, 81c.; boiled, 84c.; 6 to 9 barrels, raw, 77c.; boiled, 82c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto,

Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The demand locally is fair and stocks are light, the complaint being the slowness of the glassmakers in Europe in fillling their import orders.. Quotations follow: Under 26 in., $4.45; 26 to 40 in., $4 65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There is a moderate volume of business doing in this line, but the weakness of the copper market has somewhat quieted the trade in that metal. Quotations are as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The market for hides continues quiet and unchanged. We quote as follows: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8 to 8¼c.

SKINS — Little trade is doing in these and the prices are steady. We quote: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2 8c; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; sheepskins, 80c. to $1; shearlings, 20c.

WOOL—The wool market is still inactive and weak. We quote: 13c. for fleece wool and 7c. per lb. for unwashed.

TALLOW — The offerings of tallow continue light and prices are unchanged at 6¼ to 6½c. per lb.

COAL.

The situation is little changed from what it was a week ago in hard coal. Reports come to hand that the strike amongst the miners is on the point of being settled, but as yet nothing definite has been done to end the troubles, either by the men or their employers. The quotations on soft coal are nominal at $3 to $4 per ton at the international bridges.

PETROLEUM.

There is a moderate volume of business doing with a steady market. Our quotations are now as follows: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Spirits of turpentine have been reduced 2c. per gallon.

The decline in raw and boiled linseed oil is 1c. per gallon.

MANUFACTURERS' CONVENTION.

The Canadian Manufacturers' Association will hold their next annual meeting in Halifax on August 13 and 14. As the membership of the association, which has now reached 1,000, will be representative of the great business interests of Canada, this will probably be the most important convention of business men ever held in Canada. Beside the importance of the questions to be discussed the trip itself offers one of the finest excursions on the continent. The secretary of the association, Mr. R. J. Younge, should be notified by members of any question or resolution which it is desirable to discuss at the convention, or of any change desired in the constitution and by-laws of the association.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading, 2c. a word each insertion; cash in advance. Letters, figures, and abbreviations each count as one word in estimating cost.

HEATING AND PLUMBING

END OF THE STRIKE.

A SETTLEMENT of the plumbers' strike in Toronto has been reached. The strike was declared on Tuesday, June 17, the men demanding a flat rate of 37½c. an hour, an increase of from 5 to 10c. The employers refused to consider the demand because the men had made a binding agreement last year, which, the employers claimed, could not be altered without breach of faith until its expiry on January 1, 1904, and under which the wage rate was placed on a sliding scale from 27½ to 32c. an hour, according to the skill of the workmen.

The disagreement was definitely settled on Monday, July 7 at a conference between the grievance committees of the masters and of the union at W. J. McGuire's, King street west. By this settlement the men, whose wage scale ranged from 27½ to 32c. an hour, get an increase of 2½c. an hour on the minimum wage, thus bringing it up from 27½ to 30c. an hour, this rate to go into effect at once. On January 1, 1903, the men will receive another advance of 2½c. an hour, bringing the minimum rate to 32½c.

Another clause which was included in the agreement is one by which the statutory holidays in the year are all designated. The men have always received these holidays, but they have never been definitely allowed as such by the masters. Easter Day has been included in these holidays. This last has always been a source of dispute between the two interests in the trade.

The agreement also provides that men working in the country may be required to work ten hours a day, receiving the ordinary rate of pay. In the city pay and a half is allowed to men working over eight hours a day.

The plumbers resumed work on Tuesday, and many of the old contracts which had been suspended by reason of the strike are now being finished. It is believed that the great amount of business to be done inclined the bosses to compromise despite their emphatic protestations of the last three weeks to give way.

Although the striking plumbers were not allowed the full advance asked for, the compromise effected, may, in the main, be looked upon as a victory for the strikers. Monday's conference was held in good feeling on both sides. The men did not desire to jubilate on the result. They think, however, that they have done pretty well and have been treated very fairly.

A KINETIC HEAT CONCERN.

To manufacture and dispose of electric apparatus for the development of kinetic heat in connection with furnaces, locomotives and steam boilers has The Kinetic Heat Co., of Canada, Limited, been granted incorporation. This company has also obtained the power to acquire any patents now existing or which may hereafter exist relating to kinetic heat or the exclusive license to use within the Dominion of Canada all rights covered by such patents and trade marks. The total capital stock of this company is $50,000 divided into 500 shares of $100. The incorporators are Allen G. Ingalls, Laprairie, Quebec, advocate; James C. King, manufacturer, John McKergow, merchant, Frederick E. Nelson, gentleman, William J. Giles, dentist, and Chas. W. Brown, manager, Montreal.

BUILDING PERMITS IN OTTAWA.

Building has been fairly active in Ottawa during the last week. Nine permits were issued, aggregating in value $32,650. They were: Richard Brady, repairing dwelling, Stewart street, $1,200; D. Skuce, brick-veneered dwelling, Maria street, $700; The Russell House Company, alterations to hotel building for a cafe, $5,000; P. J. B. Belanger, four dwellings, Besserer street, $3,600; David MacLaren, solid brick addition to house and stable, Frank street, $2,000; Herman Schultz, alterations to dwelling, Creighton street, $250; Alfred Day, brick-veneered dwelling, Fourth Avenue, $1,200; Mrs. Annie Clarke, solid brick house, Lisgar street, $3,700. The wardens of Christ Church Cathedral have also taken out a permit for a new Sunday school room, which will be built on lots 21 and 22 Queen street. The building will be stone, 65 x 78 feet, and will cost about $15,000. Mr. A. Garvock has the contract.

BUILDING NOTES.

The Ogilvie Milling Co., of Manor, N. W. T., have just completed an elevator with a capacity of 40,000 bushels.

The Brantford Starch Co., whose factory was destroyed by fire on May 29, is now taking steps to rebuild. The new premises will consist of a wheat starch factory 100 x 70 feet, three storeys high, and a cornstarch factory 132 x 90 feet and three storeys high.

Mr. David Chalmers, contractor, Owen Sound, Ont., has been awarded the contract for erecting the new Baptist church, corner of Division and Murdoch streets, at that place. It will cost $12,207, exclusive of stained-glass windows, seats and gas fixtures, which, in all, will run the cost up to $14,000.

BUILDING PERMITS IN TORONTO.

During the last week the following permits were taken out in Toronto: Jno. Harden, two-storey and attic pair of semi-detached brick dwellings on Spadina avenue, for $6,500; Rev. Septimus Jones, alterations to dwelling, brick and stone, 18 Prince Arthur ave., for $500; trustees of Baptist Mission for a one-storey roughcast mission on Christie street, for $1,500; J. B. Reid for two-storey brick addition to dwelling at 172 Bloor street, for $1,200; Thos. Bryce, for pair two-storey semi-detached brick and stone dwellings, 10-12 Isabella street, for $5,000; Jno. Ham, for frame and stone addition, 190 Givens street, for $220; Geo. Coles, for one-storey brick addition to bakery, 723 Yonge street, for $4,000; Robt. F. Easson, for brick cellars and fronts to dwellings, 20-24 Wood street, for $2,500; Jas. D. Young, for a two-storey and a half semi-detached brick dwelling, 339 Markham street, for $2,250; M. H. Fli[illegible], for two-storey and attic semi-detached brick dwelling, 337 Markham street, for $2,250; F. J. German, for two pairs of two-storey and attic semi-detached brick dwellings, 57-63 Howland ave., for $18,000; Geo. Marshall, for alterations to brick dwelling, 310 Queen street east, for $1,000; Salvation Army, for additional storey to Temple, James and Albert streets, for $1,000; William Dackwith, for 2½-storey brick dwelling, 37 Phoebe street, for $2,500; Humphrey and Webber, for two pairs semi-detached two-storey brick dwellings, Perth ave., for $6,000; Mrs. Eliza Stump, for pair 2½-storey semi-detached brick dwellings, 28 30 Orde street, for $2,800.

GOVERNMENT OF HEAT AND AIR SUPPLY.

WE hear a great deal about proper ventilation, and heating of shops, foundries and factories in these days, remarks an exchange. It is with the physical properties of air rather than with its chemical composition, that the ventilating engineer has to deal. It is a property of air that it expands about 1500th part of its volume at 32 deg. for each degree of increase in temperature. If, then, we take 100 cubic feet of air at 32 deg. F., and raise the temperature 50 deg. we shall have about 110 cubic feet at 82 deg. This heated air, being lighter than the surrounding air at 32 deg., tends to rise by the same law by which a cork rises from the bottom af a vessel of water. To this property of air we owe all ventilation, natural or artificial. Now, then, in giving general directions for heating and ventilating your shop or foundry by either hot air furnaces or indirect steam, I would say: Make your outside inlet of fresh air large—at least six feet square for each room. Admit the air through these inlets to a fresh air chamber. Take the air to the furnace or steam coils as directly as possible from this chamber without ducts. If a furnace is used, set it over a pit at least two feet deep, and admit the air to this pit in such a way that it will pass up on all sides of the fireproof. If you heat by cast iron radiators, do not double-bank them, and in any case spread your radiators so that the area of air space between them may be equal to that of the ducts leading to the rooms. Make your warm air supply ducts large—at least five feet cross sectional area or one square foot for each ten workmen. If you heat by steam, place a coil of steam pipe, 15 to 25 square feet, in each ventiduct just above the opening for the air.

PLUMBING AND HEATING NOTES.

Mr. William Pulkingham, a plumber, till lately employed at Burrow, Stewart & Milne's foundry, Hamilton, was run over by a G.T.R. train on July 4. Deceased was about 40 years of age, and single. It is thought that he committed suicide through despondency at his mother's death.

WINDOW GLASS

We have good stocks on hand, all in prime condition, Window Glass, Picture Glass, Double Glass, 26-oz., 32-oz. Rolled Glass, Ornamental Glass, Stained, Enamelled and Embossed Glass. Send us your specification for Star and other Glass.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

SIMARD & TREMBLY, general merchants, Copper Cliff, Ont., have assigned to James A. Mulligan, Sudbury, and their creditors meet July 11.

T. Hunter, painter, Ottawa, is seeking an extension.

A. Clouter, general merchant, St. Fabien, Que., has assigned.

Joseph Bourque, general merchant, St. Gertrude, Que., has compromised.

E. S. Sweet, general merchant, County Harbor, N.S., is asking for an extension.

A demand of assignment has been made on The Standard Tinware Co., Montreal.

The assets of E. G. Barnes & Co., bicycles, etc., Ottawa, were seized by bailiff.

C. T. Bailey & Co., general merchants, Qu'Appelle, N.W.T., have assigned to H. F. Horner.

A. Prevost & Co., general merchants, St. Agathe De Monts, Que., are offering to compromise.

V. E. Paradis has been appointed curator of Leger Lemelin, general merchant, St. Raphael, Que.

Two demands of assignment have been made on W. P. Scott, painter and decorator, Montreal.

A. Curtis & Son, general merchants, Macdonald, Man., have been granted a partial extension.

Lucas & Co., harnessmakers, Port Perry, Ont., have assigned to James Lucas, and their creditors meet on July 14.

Gorman & McDonnell, general merchants, Douglas, Ont., have assigned to Robert C. McNab, and a meeting of creditors will be held on July 15.

PARTNERSHIPS FORMED AND DISSOLVED.

Gingras & Cie, painters, Montreal, have dissolved.

Pauli Bros., harnessmakers, Stratford, Ont., have dissolved; F. Pauli continues.

H. Colan & Co., general merchants, Kazubazua, Que., are dissolving partnership.

Phillip & McAdam, agricultural implement agents, Indian Head, N.W.T., have dissolved.

H. Bolan & Co., general merchants, Kazubazua, Que., have dissolved; the business is continued by Bell Bros.

The Sherbrooke Iron and Metal Co., Sherbrooke, Que., has dissolved, and Isaac Smith is now registered as proprietor.

Lemmon & Lawrenson, tinsmiths, Kingston, Ont., have admitted Matthew H. Claxton; and their style now is Lemmon, Claxton & Lawrenson.

SALES MADE AND PENDING.

Geo. Dunn, saw, shingle and planing miller, Warkworth, Ont., is advertising his business for sale.

The stock of Jos. Poirier, general merchant, Avignan, Que., has been sold at 68c. on the dollar.

The assets of J. B. Donville & Co., general merchants, St. Stanislas de B., Que., have been sold.

The stock of the estate of D. M. Kinzie, general merchant, Dutton, Ont., is advertised for sale by tender.

The stock of Thomas Oullet, general merchant, St. Moise Station, Que., has been sold at 60¼c. on the dollar.

CHANGES.

Dini & Cozzolino, railway contractors, Montreal, have registered.

G. Herschorn & Sons, scrap iron dealers, Montreal, have registered.

Roy, Ulric & Co., carriagemakers, Delorimer, Que., have registered.

John Mitchell, sawmiller, etc., River John, N.S., is succeeded by Mitchell & Blair.

C. E. McConnell, general merchant, Elphin, Ont., has sold out to John Buttrell.

The Killarney Trading Co., Limited, Killarney, Man., has sold out to Marquis & McCullough.

Erant & Weidenhammer, hardware merchants, Grand View, Man., are succeeded by Alliss & Weidenhammer.

W. F. Puffer, agricultural implement agent, Lacombe, N.W.T., has sold his lumber business to J. W. Johnston.

Shaw & Whitlam, agricultural implement agents and grain merchants, Morden, Man., have sold their elevator to C. McKay.

FIRES.

J. F. Alcorn & Co., sawmillers, Upper Brighton, N.B., were burned out; partially insured.

The shingle mill of the Metis Lumber Co., Limited, Price's Village, Que., was destroyed by fire; there was no insurance.

IRON FOUNDRY BURNED.

A large irom foundry, owned by Mr. Pascal Amesse, at 60 Nazareth street, Montreal, was totally destroyed by fire on Saturday morning, July 5. The cause of the fire is not known, Mr. Amesse having gone over the building the evening before with the watchman, when nothing whatever that could likely cause a blaze was discovered. The total loss is estimated at about $10,000. The insurance is about $5,000. The foundry will be rebuilt immediately, and business resumed at the earliest possible time.

The P. R. Cumming Manufacturing Co., Limited, TORONTO

We beg to advise the trade that we have purchased a large factory in Clarksburg, where we are installing a complete outfit of new automatic machinery for the manufacture of all kinds of **Enamelled Wood Turnings;** and that we have also acquired the business of **The Dominion Skewer Co.,** so that we now possess facilities unequalled in Canada for the production of curtain poles, rings, broom handles, enamelled knobs and handles, skewers, flagstaffs, etc., in addition to our present lines of kitchen specialties, such as can openers, mincing knives, mouse traps, etc.

Yours truly,

The P. R. Cumming Manufacturing Co.,

LIMITED,

90 Richmond Street East, TORONTO.

MANITOBA MARKETS.

Winnipeg, July 5, 1902.

IN all lines of hardware trade is excellent, jobbing houses having difficulty in keeping pace with orders. Money is a little more plentiful, and the whole tone of the market has improved. No changes in price are worthy of record for the week, but jobbers report a growing tendency to advance. Paints, oils and glass are in good demand and at steady prices.

The movement in binder twine is steady, and it now looks as if there would be no reduction in price, as there has been a larger demand for the south than was anticipated. In implements, trade has improved, and there is a good demand for mowers. There has been a more continuous demand for ploughs this season, owing to the enormous amount of breaking being done by new settlers. Inquiry is increasing for threshing outfits, and very considerable business has been done.

NOTES.

The large addition to the George D. Wood & Co. building is making good progress. That of the J. H. Ashdown Co. is up to the third floor.

Lawns have grown so luxuriantly this season that there has been a good demand for lawn mowers, and jobbers have had difficulty in supplying their orders.

CURRENT MARKET QUOTATIONS

July 11, 1902

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Wire-Edged Ready Roofing

The above Roofing is fast becoming the popular substitute for Shingles, because it is **Durable, Economical** and **Fire-proof.** We wish to supply customers through the Retail Hardware Merchants, and, with that object in view, we are spending thousands of dollars in advertising our goods. It will be your fault, not ours, if we are forced to sell direct to the user.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

KEMP MANUFACTURING CO., TORONTO, CAN.

PROFITS IN THE RETAIL STOVE TRADE.

A General Complaint Regarding Their Inadequacy

IN CONNECTION with the growing sentiment among retail stove dealers that sufficient profits were not realized by retailers, HARDWARE AND METAL obtained the opinions of the following representative retail dealers of Toronto :

HANDLING EXPENSES.

Mr. McDonald, of McDonald & Willson, 187 Yonge street, said : "In the stove business I find the expense of handling stoves out of proportion to the volume of business to be done. For handling, at least two men and one horse are required. The ratio of profit is not sufficient to carry on a stove business by itself. We have here a satisfactory business ; but I can assure you we couldn't do business on Yonge street with a business handling stoves exclusively. To my knowledge, this is a condition of affairs that obtains everywhere in Canada and the United States. Stoves are usually sold in conjunction with other lines of goods. I think this is a necessity. At the same time. so far as I can learn, the ratio of profit is not so good here as in other lines. In my opinion the retailers don't get the fair proportion of the profit on a stove. As I said, the cost of handling is excessive. No, I could not suggest a remedy off-hand."

COMPLAINTS ABOUT THE MANUFACTURERS.

Mr. Scott, of Milne's Jewel Stove Store, 4 Queen street east, when visited by HARDWARE AND METAL made this statement : "Unless we carried on another business here in connection with the stove business, we would have to close up shop. In fact, the profits are so small in that line, it simply would not pay us to continue. I find that the manufacturer will sell stoves to private parties for less than we can secure them from the wholesale manufacturer. If the manufacturer would not sell, the retail store would be able to make a fair profit. Two cases of this kind, both in connection with personal friends of my own, came under my notice within the last week. The men are getting more money per week to-day than the owners of small retail stores.

"I firmly believe that if the retail men would amalgamate and refuse to take old stoves in exchange, in the same way that departmental stores do, our profits would be better. They get full profits for their wares ; we suffer loss on the old stoves."

AMISS IN THEIR FIGURING.

Mr. David Millar, manager of The Gurney Oxford Stove and Furnace Co., 231 Yonge street, thus expressed himself : "There is positively no doubt of this. The profits to be realized handling stoves are certainly very discouraging. No, I can't exactly tell the cause of this, unless it be keenness of competition. What I believe to be an important factor in the unsatisfactory business of stoves is that dealers do not, in figuring on the price for sale, take into consideration all the elements of the cost. Thus, when they get their stove they figure on 25 per cent., but fail to reckon on the important feature of the cost of delivery or setting up. I'll show you an average case. Suppose I pay $19 for a stove. I'll reckon on 25 per cent. profit. Then I'll mark the price $23 75. But I have yet to pay for taper pipe 8c.; cartage, 75c.; fitting up, 90c. Mind you, I haven't considered the time spent by the boy in fixing mica, or the cost of storing the stove in my shop. My profit is about $2.50 or $3. But that isn't the worst of the case. The departmental store will step in and sell this stove for $21.50, while we are making little enough by selling at $23.50. Our profits range from 12½ to 15 per cent. instead of from 20 to 25 per cent. at least.

OLD STOVES.

"No, I don't object to handling second-hand stoves. If we get a poor second-hand stove, and they generally are poor, we just hand them over to the junk men for old iron and no great trouble is occasioned us. If we get a good one we can make twice as much on it as we can on regular stoves, at the same time giving our customers first-class goods. We know that profit on ranges and heating stoves is not sufficient. It wouldn't pay us to handle them outside of jobbing work and other lines. Yet, I feel that ranges and heating stoves furnish us with a bulky system of expensive advertising.

"We must also compete with shops where the dealer lets his boy or wife look after the business, and he does the jobbing or fitting up. They are often content, and are often under the necessity of getting rid of stock, and they sell at a very narrow margin. Again, their expenses are very low. We must be very careful or this will give our place the name of selling high-priced articles.

THE REMEDY.

"There is, so far as I can see, only one remedy. There should be an association of stove dealers to set the price. The dealer should calculate on all the factors that go to make up the cost, the expenses of delivering and setting up as well as the money consideration paid for the stove itself. After that he should reckon on a good margin of 25 per cent. I think it will ultimately come to this, but every person is afraid to take the initiative."

DEPARTMENTAL STORE COMPETITION.

Mr. S. J. Greer, of 108 Queen street east, when seen by HARDWARE AND METAL, said in part : "Yes, we have some things to complain about. The departmental stores very often sell at too low a margin. I know cases where they sell gas stoves which cost $13 for $14. A great deal of our profit is minimized by the expense of setting up and delivery. I am informed, and I think the sources of my information are quite reliable, that the departmental stores often have their stoves shipped directly from the manufacturer, and do not need to have them set up. As to second-hand stoves, the poorer class we sell to the junkmen ; the rest are all right, and can be handled with advantage. I believe it is impossible for any man alive to pay rent and expenses and make a living by handling stoves alone. All of us are compelled to do jobbing work. The remedy for the present difficulties I think is, briefly, this : The association of stove dealers will have to advocate positively to refuse to buy from any manufacturer who sells retail."

A DISCORDANT NOTE.

To all the harmony of these utterances HARDWARE AND METAL heard one discordant note. It was from a gentleman in charge of a large stove business on Queen street. The gentleman wished his name withheld, but his sentiments were given with considerable emphasis:

"Such nonsense ! I don't believe a word of it. Certainly it is not true. If the deal-

ers are not making a profit, they had better quit the business. Carry it on with other lines! Well, any kind of business that will not stand on its own ground you had better get out of as soon as possible. I firmly believe that stove dealers make a fair rate of profit, and while we carry other lines it is not because we do not make our stoves pay and give our customers satisfaction too. That is what I think of it, but don't you dare use my name."

HARDWARE STORE STOVE RELIGION.

A small hardware store and tinshop in Central Ohio displays this sign :

We set up
STOVES AND STOVEPIPES
with Expedition, Neatness, Dispatch, and the proper tools, and
WITHOUT PROFANITY.
Patronize your tinner
And don't be a sinner.

AN AMATEUR who sets up a stove will swear even if he has been a deacon for fifteen years.

"Thou Shalt Not Swear."

A NEW COOK STOVE.

The accompanying cut shows the Coronation Wood Cook Stove just put on the market by The Ottawa Furnace and Foundry Co., Limited, who claim that it is one of the most perfect cook stoves ever produced, having all the latest improvements, with an entirely new and beautiful design. The Coronation is made in three sizes, Nos. 9 21, 9-23, 9-25, with either cast or steel ovens.

The Ottawa Furnace Co.'s New Stove.

The Ottawa Furnace and Foundry Co., Limited, have just completed the patterns of a new wood furnace of the most approved style, and with this, in addition to their already well-known line of National Furnaces, they expect to do a large business this season. Catalogues and price lists will be sent to the trade on application.

WESTERN STOVE PRICES ADVANCE.

The Western Association of Stove Manufacturers, of the United States, met in Chicago on July 8, the result of the conference being an advance of 5 per cent. in the prices of all stoves. The reason assigned for the advance is the sharp advance in the prices of pig iron and other raw material. There was a strong disposition, according to The Metal Worker, to advance prices 10 per cent., but it was thought best to pursue a conservative course, especially as the crop outlook is as yet uncertain. In view of the further advance in pig iron during the past few days, however, it would not be surprising if another 5 per cent. advance were made within the near future.

WHEELER & BAIN'S FURNACES.

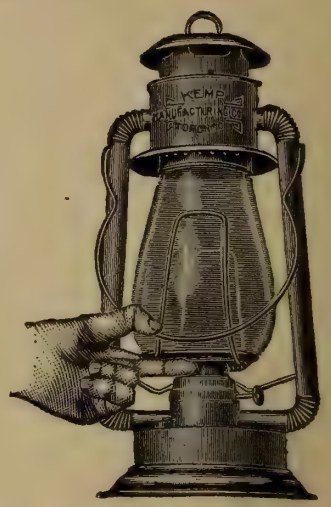
Wheeler & Bain, one of Toronto's old established firms, manufacture a full line of "Success" warm air furnaces; and their aim is to make a first-class article in the furnace line rather than a low-priced flimsy affair that will be dear at any price. Some of their furnaces have been in constant use for 18 years, and are still in good condition. These furnaces are made very heavy in the firepots, and with heavy sheet steel dome and radiators. From their peculiar construction they give the maximum of heat with the minimum consumption of fuel, and will soon pay for themselves by the saving effected in fuel.

This firm also manufacture the "Success" feed cooker, something that every farmer should have, as with it he can cook all his food for cattle, hogs, chickens, etc., and effect a great saving of feed. It is made in five sizes, 50, 75, 100, 125 and 150 gallons capacity. As these feed cookers are sold at reasonable prices to the trade you can handle them to good advantage and have a quick sale.

Wheeler & Bain also manufacture a full line of galvanized iron eavetroughs, corrugated and round conductor pipes, corrugated galvanized sheets, skylights, cornices, etc. Cuts of their furnace and feed cooker will be found on another page.

COLD BLAST LANTERN.

AN excellent article is being placed on the market by The Kemp Manufacturing Co. in the shape of a cold blast lantern. It is made combination, either lift or hinge. Its perfect



safety is insured by a broad base which renders the lantern solid and not easily upset. The oil well is a special feature, made as it is of extra heavy material and with a concave bottom to greatly increase its capacity. The tubes are made in one piece with seams on the inside, thus making the lantern present a neat appearance. The globe is fully protected. The tubes on either side combine with the wires that surround it to place it out of danger. A simple device is used to hold up the globe. By dropping the handle underneath it is held in place. All the lanterns are made with the greatest care and in the strongest manner possible. Each lantern has a guarantee placed on it in a most conspicuous place.

AN ENGLISH METHOD OF HEATING CARS.

The Northwestern Railway Co. of England, says The Scientific American, have equipped some of their trains with a system of heating to which the much abused term "unique" may well be applied. Two concentric cylinders are employed, the annular space between which communicates with a steam pipe extending from the locomotive boiler. The inner cylinder contains acetate of soda—a compound remarkable for its property of liquifying when heated and of cooling very slowly. The radiators thus constituted are incased in asbestos lined boxes having hinged doors. By opening or closing the door of a box the heat is turned on or off.

DOUBLE-HEATING AIR-TIGHT STOVE.

THE attention of the many readers of HARDWARE AND METAL is directed to the announcement of The D. Moore Company, Limited, Hamilton, manufacturers of "Treasure" Stoves and Ranges, (page 19). This company, in anticipation of their usual annual increase in output, have this Spring made further extensive warehouse additions to their plant, thus placing them in a position to handle promptly all orders for their popular line of "Treasure" stoves and ranges. The stock carried by this company is larger than in any previous season and includes many new and exclusive patterns which should materially assist to increase the coming

Air-Tight Stove.—Patent applied for.

season's business of handlers of this company's many lines. The "Art Treasure" double-heating base burner, advertised in this issue, is this company's latest production in the line of high-class heaters. Its construction introduces many new and original features with the idea of producing the greatest possible quantity of heat with the least consumption of fuel. They have also added some desirable goods to their "Air Tight" and "Hot Blast" lines, noticeably a double-heating air-tight, with cast iron top, construction of which has been patented. This stove was being tested at the time of writing. It takes its cold air from the floor and is a wonder in heat production. Their new "Hot Blast" for 1902 is a handsome and substantial structure, with a heavy cast iron bottom. This stove is built with an air blast, and completely consumes all gases which in ordinary hot blasts escape into the chimney. This construction adds at least one-half to its heating capacity.

This company's lines of ranges, coal cooks, wood cooks and "Oaks" are always leaders in their class. This company issue handsome descriptive booklets and printed matter of all their principal lines, which they are pleased to mail to dealers or their friends on application.

HEATING A RESIDENCE WITH STEAM.

In solving the problem of heating, the question of ventilation has also received the attention to which it is entitled, and the most modern systems provide a pure atmosphere, as well as a comfortable temperature, says Metal Worker. Favor is shown those systems which supply continuously an inflow of pure, warm air, and their use has revealed the necessity of providing some method of exhausting the air in a building to make room for it. The open fireplaces, which have been regarded as luxurious for a number of years, are now being used to create an outflow or exhaust current by means of heat supplied from a fire or otherwise. By removing the foul air the efficiency of the heating system is increased by facilitating the inflow of fresh, pure air.

MAXIMUM FURNACE PRICES.

Furnaces are used in houses in Canada up to value of $2,000, $3 000 and $5,000; in United States houses worth even $25,000 have furnaces.

IRON WORKS CHANGE HANDS.

J. J. Cunningham and four other gentlemen of Toronto have purchased the iron works at Wingham for $8,530. The new company will manufacture a full line of furnaces, stoves and ranges. Mr. Cunningham has been mechanical superintendent of the Gurney stove works for the past ten years.

STOVE BOARDS.

The Kemp Manufacturing Company are handling a splendid line of stove boards. They are made in one piece and are lined with wood. The two thicknesses of lumber are arranged crosswise, thus preventing the boards from shrinking or the tin from bulging. A special excellence to be noted is that the tin is put on the wood lining in such a manner as not to require nails or tacks. In this way the boards are left perfectly smooth and can be easily cleaned. They can also be shifted on the carpet without catching. These stove boards are made in six handsome colors of mosaic tile design.

James Bremner, general merchant, Hartsmere and McArthurr's Mills, Ont., has sold out at McArthur's Mills to W. L. Wannamaker.

GAS AND OIL STOVE TRADE IN THE STATES.

OBSERVERS have been impressed with the increase in the demand for gas and oil stoves since the inauguration of the coal strike. The rise in the price of coal has prepared the minds of the public in general to receive with more interest information about other kinds of cooking apparatus than the universally used coal stove. Many of the older and more conservative citizens, who have heretofore shown little or no interest in the new-fangled cooking devices used by their neighbors, are now inclined to listen attentively to the explanations of a gas range, a gasoline stove or a blue flame oil cooking apparatus given at the store which they have taken the trouble to visit for the purpose of securing information. Those dealers who for a number of years have carried such goods in stock are now reaping the reward of their enterprise. This should suggest to all dealers in stoves and house-furnishing goods that something more than a mere display of gas and oil stoves in the store is necessary to reap the full benefit of the conditions which the coal strike has brought about. Most of the manufacturers of what has heretofore been termed "summer cooking apparatus" are willing to furnish circulars explaining the advantages possessed by their goods. The dealer who takes advantage of this opportunity to secure circulars and have them distributed at the houses of prospective purchasers will be making an effort that should materially increase his sales.

If the distribution is made by someone who can intelligently explain the goods, and particularly if the visits are made in the forenoon, when the kitchen is in use, the effect will be greater, and it is also possible that orders for repairs for the coal stoves in use could be secured, which would help to defray the expenses of the canvass. A special effort to increase their trade in the line indicated has evidently been made by dealers in different sections, and as a result the manufacturers and jobbers of gas, gasoline and oil stoves have been well occupied.—The Metal Worker.

HANDY FURNACE RULES AND CALCULATIONS.

HARDWARE AND METAL is indebted to Mr. Jas. A. Harding for furnace rules and calculations. He says that in making the calculation for the sizes of warm air pipes it is unavoidable that two of the factors employed be assumed, viz., the maximum temperature of the heated air and the maximum velocity of air through the pipes.

"As the lesser is always contained within the greater, in all conditions of weather less severe than the said extreme, the fire will be regulated to provide for the desired temperature in the house with a lower temperature of the heated air, and, consequently, less velocity of air through the pipes.

"From a hygienic standpoint, I think it desirable that the temperature of the heated air should not exceed 140 deg. F. at the register, and at this temperature the net working velocity for the whole calibre of a warm-air pipe, allowance being made for friction, will not exceed an average of 3 ft. per second—equal to 10,800 ft. per hour—which figure I will use for convenience.

"For establishing a general rule, it is necessary to deal with averages in this matter, inasmuch as a positive and constant flow of warm air through pipes, induced by force of gravity and unaided by mechanical means, is menaced by an endless variety of conditions inherent in a dwelling house, any one of which is sufficient to seriously retard or entirely prevent circulation.

"What these conditions are and how to provide for them constitute the elements of furnace heating which are solvable by experience only, and not susceptible of being reduced to formulæ. This latter statement does not imply that a rule for determining the size of suitable warm air pipes cannot be evolved. It simply means that after the machine is well built and entirely completed a furnace doctor may be required to set it going as intended.

"In pipes leading to rooms where suitable provisions for ventilation have been made the flow of air will be generally constant. But as the majority of rooms in dwelling houses are not provided with means of ventilation, and many such rooms are isolated, their space confined by closing the doors and the rooms subject to wind pressure from exposure to high winds, it is obvious that the size of the warm air pipe becomes, in many cases, the least important detail of the provisions for heating.

"For example, the dining-room: Its glass surface is 96 sq. ft.; exposed wall surface, 184 sq. ft.; cubic space, 2,933 ft. I compute the incidental ingress of cold air to a first-storey room of an ordinary dwelling to be twice its contents per hour. In the present case it will equal $2,933 \times 2 = 5,866$ cubic ft. The total equivalent glass surface of this room, or heat units required to warm it to 70 deg. F. in zero weather, will be $96 + \frac{184}{4} + \frac{5866}{55} \times 70$ deg. $= 17\,430$. These 17,430 heat units are to be supplied to the room by means of heated air introduced at a temperature of 140 deg. F.

"The outdoor temperature being 0 deg. F., each cubic foot of air at 140 deg. will contain $\frac{140}{55} = 2\,5$ heat units; and the total volume of air at 140 deg. required per hour will be $\frac{17,430}{2.5} = 6,972$ cubic feet. The velocity of air in the pipe being 10,800 ft. per hour, the calibre or cross-sectional area of the pipe should be $\frac{6,972}{10,800}$ square feet, which equals 93 square inches, or a pipe of 11 in. in diameter.

"We thus establish a rule for determining the size of a warm air pipe as follows, viz.: Multiply the total glass surface equivalent of the room by the difference in temperature (indoors and out) and divide the product by 2.5. Divide the quotient thus obtained by 10,800, and the result will be the area of the warm air pipe in square feet or fractional parts thereof.

"With regard to the size of register, it is simply neccessary to provide for a free area of opening a trifle in excess of the pipe area, in order to make due allowance for the friction incident to the passage of air through it. The free area of a register will average two-thirds its dimensions, and if the full area of its opening is one-half larger than the area of the pipe, it is sufficient."

A Money-Making Specialty.

THE SHERWIN-WILLIAMS BUGGY PAINT for painting and varnishing at one operation Carriages, Wagons, Sleighs, Carts, Porch, Lawn and Kitchen Furniture, Farm Implements, Boats, Machinery, etc., is a good money-maker.

It pleases the user and does good work every time. It comes in eight splendid shades, and is one of the best selling paint specialties a dealer could have on his shelves. Write to-day for prices and further information.

STOVE LININGS.

Jones Bros., the well-known manufacturers of stove linings, at Bracondale, near Toronto, are actively preparing for the Fall campaign by strengthening their stock in all lines. These include stove linings, open-grate backs, furnace bricks, range bricks, fire clay, stove cement, etc. This firm's linings are known as the "Maple Leaf" brand, and only goods of first-class quality are allowed to go out from their kilns. In addition to a large stock of standard lines ready for immediate shipment, they are in a position to manufacture any special patterns desired on the shortest possible notice. Stove dealers will do well to look over their stock of linings preparatory to the fall trade, as this is the time for filling up the gap. A post card addressed to Jones Bros., Bracondale P.O., will bring their new fall catalogue, just issued, to you.

CONSOLIDATION VS. SURVIVAL OF THE FITTEST.

IF, in fine residences, the steam and hot water installations were designed and executed with the average intelligence which dominates the ordinary setter of the average hot air furnace, their glory would soon depart, writes W. R. M. in Metal Worker. No other system could survive the general treatment administered to the hot air furnace system by manifold joints between combustion chamber and hot air chamber; by overestimating the capacity by the dealer; by hasty and careless packing of joints by the setter and by the fervent ejaculations of disapproval by the householders, with other happenings and incidentals too numerous to mention, all of which contribute to bring the present system of furnace work into disrepute. The very fact that under these conditions the furnace survives at all marks the "survival of the fittest."

Of course there are furnaces and furnaces. Many of them are installed with the rare skill and painstaking effort only acquired by years of practical experience and the results of this experience are shown in the successive improvements made in some heaters by the progressive manufacturers. But the mass of the furnace trade may be assumed to pass through less careful, less skillful hands, and in the deal and shuffle the prestige of the "Ichabod No. 80," the salvation of the corporal of industry who sells it, and the reputation of the manufacturer are in danger.

How are we to remedy this state of anarchy and meet the condition squarely? Coming down to fixed principles it would seem that consolidation of interests would prove for the economical inauguration of systematic reform, as well as for the economical administration of affairs. The furnishing of uniform patterns at small cost to individual manufacturers would be of immense advantage. The ideal furnace should be uniform and interchangeable in its parts; and, like the telephone, for instance, it should be distributed to agents from a central point. Or, duplicate iron patterns could be awarded to those entitled to use them.

The ideal furnace of the twentieth century should be practically a new creation, one avoiding the joints between the combustion and air chambers, and so complete in its details that the heating surface for each room may be determined separately, and allotted and operated with the same exactness, as are the radiators of direct and indirect steam and hot water installations.

It should also operate separate air circuits and through every room.

McCLARY'S NEW STOVES AND FURNACES.

THE McClary Manufacturing Co., of London, Ont., report that they have made a number of changes in their last year's stoves, ranges and furnaces, and and have also added several entirely new lines.

THE "CORNWALL'S" SUCCESS.

Last year, The McClary Co. made a number of changes in the "Cornwall," and brought it out as their leading steel range. Since then, they have advertised it very extensively with the most gratifying results, and report that its sales this year are greatly in excess of last year of even date.

"KOOTENAY" STEEL RANGE.

The "Kootenay" has always been one of the best-selling steel ranges made by The McClary Co., and to make it a still better seller they have given it an entirely new dress, including nickel edges, nickel teapot shelves, medallions, shakers, knobs, etc. The "Kootenay" is built on nearly the same lines as the "Cornwall," and embodies all of its best features, such as the ventilated oven, deep firebox fitted with clinkerless duplex grates and heavy sectional cast-iron linings, asbestos-lined oven, sectional top, etc., but is made of lighter steel, and is therefore cheaper.

CAST IRON LEADER.

The "Famous Active" range needs no introduction, it being well known to the trade that this range is McClary's leader. The "Famous Active" is one of the most widely advertised ranges in Canada, and is, therefore, well known to the Canadian people. Since it was first put on the market the sales of the "Famous Active" have each year trebled those of the preceding year.

"LE ROY" STEEL RANGE.

This range was brought out two years ago to fill a long-standing need in the more unsettled parts of Canada for a light cooking range that will stand a lot of rough usage, do good work and sell at a reasonable price. And its success, which was assured from its introduction, was so pronounced last year that the McClary people decided to add another size, No. 9, to this line. No. 9 differs from Nos. 7 and 8 in having a hearth-plate and being a larger size.

A NEW HOT BLAST HEATER.

The "Excelsior" is another line of hot blast heaters which the McClary Co. are showing this year. A rich nickel dress, combined with an extra fine finish, makes the "Excelsior" one of the most handsome heaters in its class. It has a centre down draft with register in top and is especially made for coal or coke. Although only placed on the market this year by the McClary Co., this heater has already shown itself to be a good seller.

A NEW BOX STOVE.

The "Beechwood" is a new box stove, this being its first year on the market. It has a large feed door and swing top which will admit rough chunks of wood. The design is handsome, while the carving is especially rich.

"TORTOISE"—NEW HEATER.

This also is a new line and is described as being a "slow but sure" heater. It has a firebrick lining on bottom and sides while the body is made of heavy steel plate and the top and bottom are cast iron. It is a direct draft surface burner, and made in four sizes for hard coal only.

A NEW HEATER.

The "Belle Oak" is another new heater which the McClary Co. have brought out this year. It has an artistic design, a polished sheet steel body, rich nickel dress, screw drafts, is made in four sizes, burns coal or wood, and is sold at a very moderate price.

A NEW COOK STOVE.

The "Defiant" is an entirely new line made to take the place of the "Sergeant," which stove the McClary people have ceased to make. This new cook stove has a roomy fire box, with heavy sectional cast iron linings and flat-shaking grate, and the ash pan is very large. Although a cheap stove, it has a handsome design, and is well ornamented.

In addition to those already mentioned, The McClary Manufacturing Company have several other new lines this year, and also report changes in a number of last year's, among the latter being the "Boss" cone heater, in which the feed door has been considerably enlarged. The "Famous" gas range has come in for several improvements, and two additional sizes, Nos. 500 and 600, have been added to their No. 100 series of air-tight heaters, while the bodies of all their air-tights have been made deeper.

The "Farmers' Boiler" is an entirely new line of cookers. Is made of steel plate, in three sizes, and can be supplied with or without cover. The "Excelsior" is also a new line of feed cookers which the McClary Company are showing this year. This cooker is made in one size, and is similar in design to their "Famous Evaporator."

THE "SUNSHINE'S" SUCCESS.

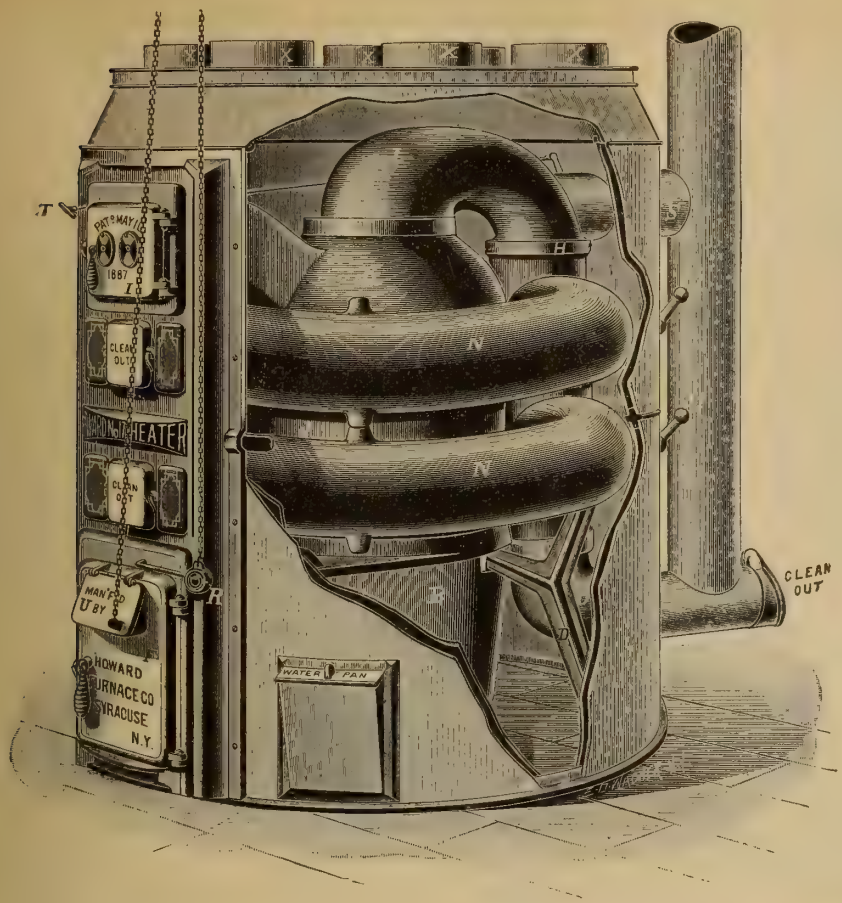
Last year this furnace was quite new on the market, having been put out for the first time in the fall of 1900. But, although a new heater, the McClary Co. soon demonstrated that it was no experiment, but rather the result of a level-headed use of the experience gained from over 50 years of furnace-building. This year No. 600 has been added, which is a larger size than those of last year. This additional size makes the "Sunshine" line complete, and provides a size for any building, large or small. Since its introduction the "Sunshine" has been extensively advertised in all parts of Canada, and this, together with the excellent satisfaction reported from all those in use, has made it one of the best known and most successful warm-air furnaces on the market, and should result in an enormous sale this year.

"MAGNET" WOOD FURNACE.

The "Magnet" has come in for several changes this year, among them being the enlargement of the fire box in a number of sizes and also an improvement in the construction of the radiator. This furnace has always enjoyed a good reputation and a large sale and is considered by the trade to be second to none as a wood furnace. It is a well-known fact that the McClary Manufacturing Company, of London, were obliged to cancel many thousands of dollars worth of orders last year, owing to the unusually heavy demand for their "Famous" lines. Being asked if they will be able to meet the demand this year the answer comes that the present indications point to a much heavier business than in 1901, and that they are operating both their Hamilton (late Copp stove works) and London foundries to their full capacities with the hope of being able to fill all orders, but state that they cannot give very strong assurances of filling all orders unless placed for early date shipment.

ADJUSTABLE STOVE TOP.

A Chicago woman has patented an adjustable stove top to put a sad iron in and heat it at a moment's notice. The new top guarantees against draughts, the bane of the laundress who has to melt behind closed windows to keep her irons at the proper temperature. The top is of sheet iron. It fits over an ordinary gas stove burner, and it has a sliding cover to fit around the flat iron handles, leaving them out in the cool air while the body of the iron is sizzling underneath. The top not only heats irons, but it bakes potatoes, cooks squash to a turn, and browns biscuits. In fact, it does all the cooking that any one indulging in light housekeeping could desire. All this is accomplished by means of asbestos plates over the blaze, the number of plates employed being according to the amount of heat required for the different materials.



The Improved Celebrated

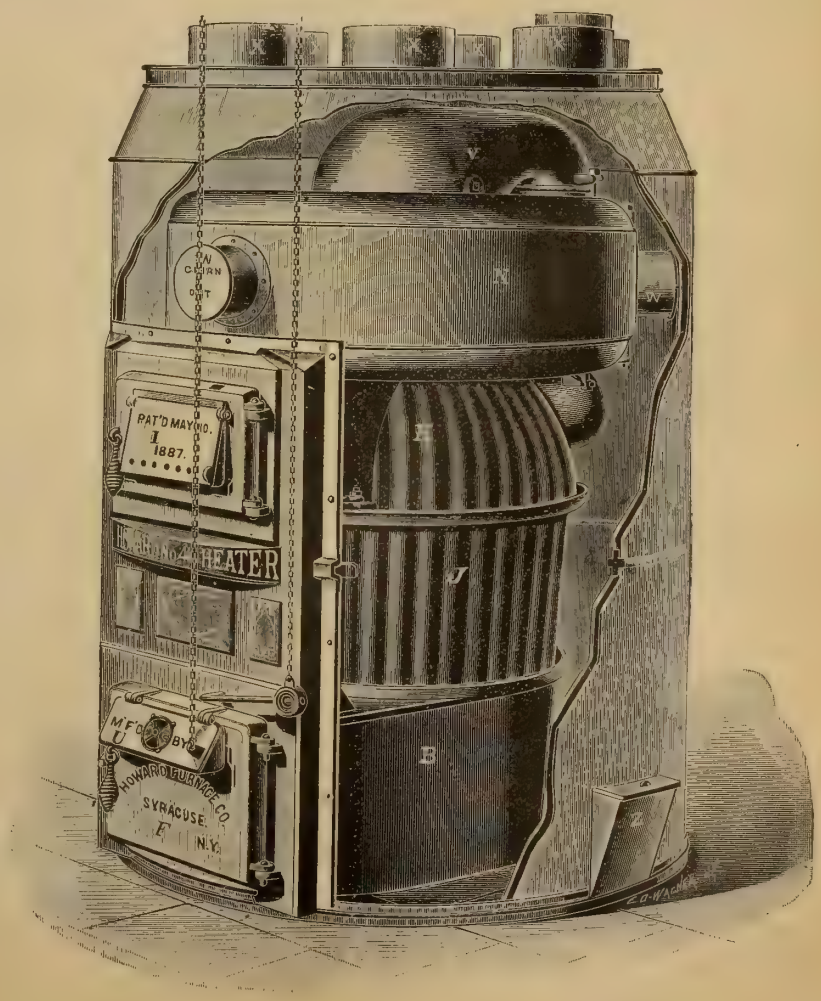
Howard

Warm Air and Combination Heaters.

Noted for long fire travel and perfect combustion. . .

Will give more heat with a given amount of coal than any heater on the market. . . . . .

Handle the best and save trouble.



Manufactured by

I.E. Shantz & Co.

BERLIN.

Features and Facts Regarding the Stove and Furnace Trade.

TO be able to meet the special needs of individual localities and of particular persons demands a heavy and varied stock ; but it also commands success. The Dominion of Canada will no longer be satisfied with one or two lines of heating or cooking stoves. Conditions and circumstances vary in sections closely situated. The demand of particular regions is governed and created by the quantity and nature of fuel in the district, by the character of the climate, and, more than anything beside, by the financial condition of the people. Each apparatus must have some distinct feature adapted to the prevailing conditions of a district. Manufacturers must supply innumerable styles and sizes of stoves and cooking and heating apparatus to suit every variation in climate, every kind of fuel, every size of house, and at prices to meet the purchasing power of every class of people.

Quoth a large wholesaler to HARDWARE AND METAL : "The retail man who carries the largest display and the best variety will get the largest percentage of business. What applies to other lines applies to stoves. Stoves need to be kept clean and attractive. Some dealers don't seem to think it necessary to dust off stoves. This I consider a great mistake."

TASTE IN THE STOVE TRADE.

Even with stoves taste is necessary. The very difficulty of making an attractive display is the very reason for the success of the dealer whose wares present a bright, inviting appearance. Always have the stoves neat and shining, with a specially good one in the window. Furniture and fixtures show the stove to good advantage. Colored mica with a lamp inside or a gas jet, if obtainable, will give a splendid representation of a stove in operation. The cheery, bright aspect will command inspection. Inspection is potential sale.

A BUSY SEASON.

This season will be an exceptionally good one. Manufacturers will sell more stoves than they will be able to supply. Increases in trade are largely due to the development and prosperity of New Ontario and the Northwest. It is safe to say that most of the manufacturers will sell 100 per cent. more goods in the Northwest than were sold two years ago. The vice-president of one of the largest Canadian firms says that his firm could sell the entire output in the Northwest. There is every indication that the demand will grow each year as the country prospers.

"What is your policy in the matter of advertising?" was the question put to a prominent wholesaler and a successful retailer. Replied the wholesaler : "To reach the general public the best way is to advertise heavily in newspapers ; to secure the retailers, trade journals are the best." The retailer replied : "Sell good goods ; keep your word; live up to your guarantee."

STEEL RANGES.

Ranges are becoming more popular ; steel ranges are growing in favor. Their peculiar features are the facts that they confine the heat through the use of asbestos sheets and are less liable to breakage. The difference in expense is not so great as it was a few years ago.

Furnaces have displaced hase burners in towns and cities. Even among farmers they are becoming more popular ; they are more economical. Their convenience and the possibility of heating the house all over are largely increasing their sales.

There is a growing feeling in the trade that the furnace business is done

TOO CHEAP

in Canada. The keen competition among manufacturers resu'ts in inferior jobs being put in at inferior prices. In United States cities there is a growing demand for first class warm-air furnace work. The jobs command good prices and the results obtained are first class. In Canada there doesn't seem to be an appreciation for really first-class work. In the United States houses worth $10,000 to $25,000 are putting in warm-air furnaces. Manufacturers should struggle to raise quality of work, not to cut prices down. Larger profits would accrue and results would be more satisfactory to the manufacturer, dealer and user. An increased sale of a superior article would follow. The tendency in cheap work is to put in small furnaces and overcrowd them with work.

The hot-water combination trade is growing for buildings of scattered construction.

A NEAT DISPLAY.

I noticed a neat display of stoves on Queen street, Toronto, last week. A large handsome stove occupied the centre of a large window ; while around it were placed such articles of interest as a radiator, gas water-heater, gasoline stoves, stove polish and stove brushes. The whole was mounted on neat oilcloth, while bright display cards announced, "Gas water-heater ; enough water for a bath in 15 minutes." Another showcard, leaning against the radiator, proclaimed in words of neat design, "We give estimates for hot-air combination and hot-air heating." Still another card drew attention, "A bargain ; 3-burner gas stove $7.50." Business means money, and a proper display of goods produces the required business.

A LARGE NEW MOULDING SHOP.

The McClary Manufacturing Co., London, have purchased in that city the whole block of land inclosed by William, Nelson and Adelaide streets and the river, and a large parcel of land east of Adelaide. Within the block mentioned they will construct a series of buildings, wherein something over 400 men will be employed. This will rival in extent their immense establishment on King, Wellington and York streets.

To carry out the proposed arrangements Trafalgar street will be closed. The plant will comprise a moulding shop, mounting shop, power house and storage, a polishing shop and other smaller buildings. The fonndry will be about the largest in Canada —200 x 230 ft. The mounting shop will be 75 x 300 ft., and the other buildings will be of proportionate dimensions. The plans have already been prepared, and the buildings will be thoroughly modern in construction and equipment.

The new plant is directly across the road from the rolling mills that are to be erected by John White & Sons, and both places will be on the new belt line that is to connect with the London and Port Stanley Railroad, by means of which the new enterprise will be brought into close touch with outside markets. The McClary Co. intend to build also a sub-switch that will run from the belt line right into the heart of their new establishment.

The Best Selling Range Ever Made.

Popular with dealers in every part of the country because it is so enthusiastically praised by every buyer.

Our Imperial Oxford

has won its laurels—it is the favorite range of Canada—widely advertised and everywhere appreciated for its practical superiority.

LAMP GOODS FOR FALL OF 1902

FOR GAS.

We have something new in our **Rochester Cluster Gas Light,** consisting of four incandescent gas burners. This light will give a greater brilliancy than the electric arc light at half the cost. It is made for both inside and outside lighting, and is unsurpassed for use in the store or public building.

We are still agents for the famous **Leader Incandescent Lamps and Mantles.** These goods are equal to, if not better than, any upon the market, and we can sell them at manufacturers' prices. All grades of Mantles kept in stock.

FOR OIL.

We have some very dainty and beautifully-decorated designs in Parlor Lamps suitable for Christmas trade.

The famous **Rochester Lamp** can only be purchased in Canada from us. This light needs no comment as it is universally acknowledged to be far superior to any other lamp for public buildings or private use.

We have also a full assortment of bedroom, kitchen and general purpose lamps, etc.

ASK FOR PRICES. WE HAVE EVERYTHING IN LAMP GOODS.

TRIUMPH STEAM HEATER.

THE accompanying engravings represent the "Triumph" steam heater manufactured by The Dominion Radiator Co., Limited, Toronto. In presenting this sectional steam heater to the trade The Dominion Radiator Co. claim that the best construction that can be devised by competent engineering and mechanical ability has been combined in same, and that it will be found to possess more practical and desirable features than any other boiler now upon the market, and they ask a thorough examination with reference to construction, economy and capacity.

The "Triumph" heater is made in three series, viz., No. 300, No. 500 and No. 700, representing a capacity of from 200 to 4,000 sq. ft. when used separately, and they can be twined together for larger work.

One of the chief features in the construction of this heater is the application of the screw joint, which made a world-wide reputation for the Safford radiator, manufactured by the same company. The sections are made of the best cast iron, and are connected to cast iron drums by wrought iron nipples. The construction is such that it admits of 90 per cent. direct fire surface, and only enough flue surface to absorb the heat from the waste gases and smoke before passing off into the chimney.

Special attention is also directed to the rocking grate which is shaken by a lever, and can be operated with perfect ease. All ashes and clinkers are ground up and removed from the fire, so that the grate need never be dumped to clear out the clinkers. Any grate bar can be removed through the fire door and another one readily substituted.

Provision is also made for a positive interior circulation in each section independently, making it a complete heating apparatus in itself, and rendering it impossible to fluctuate, prime or foam, no matter how carelessly the piping of the apparatus may be installed. Perfect circulation at any pressure is insured by the arrangement and size of the water and steam passages. The fire box is large and roomy, and the large feed door will be found very satisfactory in operation. The heater has a large amount of fire surface, and more effective fire travel than is usually found in boilers of this construction, and it will also operate successfully with either coal or wood.

The manufacturers claim that the "Triumph" is the only boiler made for house heating which adds flue surface and fire surface in exact proportion to grate surface, when the size of the boiler is increased.

The gases and particles of combustion pass from the rear to the front of the boiler through the lower tier of flues, and then to the rear through the upper tier, thus sufficiently heating every part of each section. Then they are carried by means of a smoke box, bolted on the back down to the bottom of the boiler, and thence to the smoke pipe connection. The value and economy of the down draft principle will be readily appreciated. The hot gases impinging upon all the surfaces add greatly to the available heating power of the boiler, and the flues are so constructed that every inch is efficient and all the effective heat of the gases is absorbed.

The construction of the "Triumph" heater is absolutely correct from a mechanical standpoint, adapted for all low pressure warming purposes, and possessing every improvement and attachment which insures absolute safety, perfect reliability, and economy in the consumption of fuel.

DIED OF HEART FAILURE.

Mr. P. J. Murphy, representative for the Fairbanks' Co. in the Maritime Provinces, died suddenly of heart failure at Lunenburg, N.S., on Tuesday, July 8.

The deceased gentleman had been connected for some time with the above firm, and was one of the most valued members of the travelling staff. Mr. Murphy had not been feeling quite himself for some days, and had been under the doctor's care.

Immediately upon the receipt of the news at the Montreal office, Mr. John E. Botterell left for Lunenburg to bring the remains back to Orillia. Mr. Murphy leaves an aged mother, three brothers and one sister.

TIMELY HARDWARE TOPICS.

The Hardware Section of the Toronto Branch of the Retail Merchants' Association of Canada held a meeting in their rooms on Bay street, Toronto, on Thursday evening, July 17, and selected a number of topics for discussion at the convention of the Association to be held in Toronto, September 9 and 10. Some of these subjects will be: "What Profit Shall the Retailer Place on His Goods?" "What Percentage Shall be Added to the Cost to Cover Expense?" and "The Unsatisfactory Condition of the Graniteware Business."

BROWN, BOGGS & CO., HAMILTON, ONT.

THE GURNEY FOUNDRY CO.'S PICNIC.

THERE is a tradition that when the annual excursion of The Gurney Foundry Co., Limited, is held the Fates always smile upon it, and that the Weather Clerk is always generous. At any rate, good weather is commonly known as "Gurney weather" around the establishment of The Gurney Foundry Co.

On Friday, July 11, the company's annual excursion was held to Niagara Falls, and the weather was of the "Gurney" brand, sure enough. There was just sufficient ripple on Lake Ontario to make the water dance and glisten in the sunshine, and the air was balmy and bracing. It was, in fact, an ideal day for an excursion of the kind.

The steamer Garden City had nearly 700 people on board when she left the Yonge street wharf shortly after 8 o'clock. These were all made up of the members of the firm, its employes and their friends. Mr. Edward Gurney was on board and took a fatherly interest in everything and everybody. And as he had given even more supervision of the arrangements for the excursion his concern for the welfare of his employes and their friends was even keener than usual. He had able lieutenants in his son, Mr. Cromwell Gurney, and Mr. T. B. Alcock, the secretary of the company, to say nothing of the heads of the various departments.

The excursionists were landed at Port Dalhousie after a pleasant sail of two hours and a half. There electric cars were in waiting and the Falls were reached about noon, after a most delightful ride through that part of the country which is so famous for its orchards and gardens and its historical recollections.

Luncheon over, the excursionists were soon scattered abroad visiting the many points of interest which are to be found at the famous resort. The homeward journey began at 5.30 p.m., and Toronto was reached shortly after 9.30 o'clock.

Everybody voted that it was the most successful of the many excursions the Gurney Company have held. And when the boat touched the wharf the excursionists expressed their satsifaction by crowding around Mr. Gurney and singing "He's a Jolly Good Fellow," and finishing up with loud and prolonged cheers.

PERSONAL MENTION.

Mr. E. C. S. Hunt, of The Hoyt Metal Co., of St. Louis, Mo., was in Toronto on July 12 making arrangements for the erection of a factory. The company has already factories at St. Petersburg, Russia ; Arlington, N.J., as well as St. Louis, and is now recognizing the importance of the Canadian trade.

Mr. George Morrisette, a well-known hardwareman, of Three Rivers, Que., paid a business visit to Toronto this week and was registered at the Queen's.

Messrs. S. R. Kennedy, Chas. Smallpiece, W. R. Tait and M. Morrell, western representatives of Lewis Bros. & Co., are spending a few days in Montreal.

Mr. J. D. H. Brown, of Moore & Brown, hardware dealers, Sault Ste. Marie, Ont., has been visiting in Toronto and London during the past week, attending the funeral of his father-in-law at the latter city.

Mr. Wm. Vallance, of Wood, Vallance & Co., wholesale hardware merchants, Hamilton, Ont., has left for the Old Country on a business trip. He is not expected back until about September.

Mr. Briggs, of The Hart Emery Wheel Co., Limited, Hamilton, is to take up his residence in London, Eng., where he will manage the branch of their business, which has grown much beyond expectations.

THE CANADIAN MANUFACTURERS' ASSOCIATION.

AT the annual meeting of the Canadian Manufacturers' Association, Toronto branch, July 15, it was shown that the branch had achieved all the ends aimed at except the attempt to get the city council to pay the estimates of the Technical School Board in full. The manufacturers discussed a scheme to educate Canadians to the importance of using goods "made in Canada."

The report of the retiring chairman, Mr. J. O. Thorn, showed that the Toronto branch had increased to 272 members and had during the year dealt with questions which included the Royal arch, Technical School representation, inspection of elevators, Exhibition buildings, beautifying the city, exemptions on plant, electric power from Niagara, Temiscamingue Railway and removal of garbage from factories.

The chairman viewed with regret the dilatory and unbusinesslike action of the authorities having in hand the new Exhibition buildings.

The most important part of the report of the representatives on the Technical School Board, presented by Mr. A. W. Thomas, in the absence of Mr. Harold Van der Linde, was that referring to the lack of knowledge of the most elementary subjects in pupils coming to the Technical School. The report on education also stated in part :

"At present there is no kind of cooperation between the Public and High Schools, on the one hand, and the Toronto Technical School on the other. It appears to your representatives that a rational scheme for the amalgamation of the educational boards of the city is worthy your best consideration. It appears to be only an ordinary commonsense business proposition that the conduct of these three grades of schools by one board instead of three would not only conduce to continuity, which is a prime necessity in education, but would also greatly increase the efficiency of the schools regarded as working machines, and might also effect great economies both in cash and energy."

The action of the city council in cutting down the grant to the school 25 per cent. met with severe criticism.

The election of officers resulted as follows.

Chairman, W. P. Gundy, W. J. Gage & Co.; vice-chairman, C. N. Candee, Gutta Percha and Rubber Co.

Executive Committee — R. J. Christie, Christie, Brown & Co.; J. H. Paterson, Toronto Hardware Manufacturing Co.; J. T. Sheridan, Pease Furnace Co.; D. T. McIntosh, McIntosh Granite and Marble Co.; Robert Crean, Robert Crean & Co.; F. B. Fetherstonhaugh, F. B. Fetherstonhaugh & Co.; J P. Murray, Toronto Carpet Manufacturing Co.; Wm. Stone, Toronto Lithographing Co.; J. H. Housser, Massey-Harris Co.; A. W. Thomas, Copp, Clark Co.

Past presidents of the Association and past chairmen of the local branch are also members ex-officio.

Representatives to the Techinal School Board—Harold Van der Linde, A. W. Thomas, Gerhard Heintzman, F. J. Small.

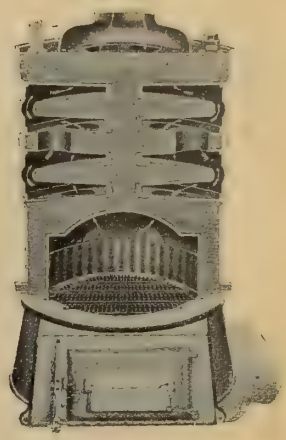
Representatives on Industrial Exhibition Board, to be elected at Halifax—W. K. McNaught, W. K. George, George Booth, J. O. Thorn, H. G. Nicholls, J. R. Shaw, W. B. Rogers, T. C. Moffatt, jr., J. T. Sheridan, T. A. Russell, R. B. Andrew and F. Stanley.

The following were nominated for members of the council of the Canadian Manufacturers' Association to be balloted for at the annual meeting at Halifax — J. P. Murray, Wm. Stone, J. O. Thorn, R. J. Christie, J. H. Housser, T. A. Russell, C. N. Candee, W. P. Gundy, Frederic Nicholls, S. M. Wickett, Thomas Roden, J. H. Paterson, A. W. Thomas, Geo. H. Hees, P. H. Burton, Gerhard Heintzman, R. Millichamp, Frederick A Ritchie.

SITUATION WANTED.

EXPERIENCED YOUNG MAN, STRICTLY temperate, desires position with Hardware or Sporting Goods house. Box 95, HARDWARE AND METAL, Toronto. (29)

Thoroughly Reliable.



These two words state briefly
our claim in regard to the

Pease "Economy"

line of Heating Apparatus. The full measure of this claim has been proved by the testimony of many years of eminently successful results.

The "Economy" line of Heaters covers the whole range of heating requirements as does no other line. Every improvement that ingenuity can suggest or experience has evolved has been embodied in them. They are to-day the Standard of Excellence in high-grade Heating Apparatus.

No dealer who has taken the agency for these Heaters has ever been known to regret his choice, or has failed to satisfy his customers. First-class Heaters will not only increase your profits, but will also bring you profitable business in other lines.

We have unexcelled facilities for making prompt shipments, and we are sure that we can help you to increase your business.

Why not write for prices to-day ?

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

THE creditors of Gorman & McDonnell, general merchants, Douglas, Ont., held a meeting on July 15.

Omer Beaulieu, general merchant, New Carlisle, Que., has assigned.

Goulet & Co., sawmillers, etc., Shawenegan Falls, Que., have assigned.

A. H. Pare, general merchant, Point De Maskinonge, Que., has assigned.

The Dominion Sporting Goods Co., Montreal, has filed an assignment.

A sheriff is in possession of the premises of J. T. Orr, tinware dealer, Victoria, B.C.

V. E. Paradis has been appointed curator of A. Cloutier, general merchant, St. Fabien, Que.

R. T. Stone & Co., general merchants, Melancthon, Ont., have assigned to Wm. Gray.

Riordan Bros., traders, Montreal, have filed an assignment, and their creditors met on July 17.

P. Boucher, general merchant, St. Damase, Que., has compromised at 55c. on the dollar, cash.

The creditors of George Scully, harnessmaker, Ingersoll, Ont., had a meeting on July 15 ; they meet again on July 22.

Achille Gagnon & Co., manufacturers of electric light, tinners, etc., Victoriaville, Que., have as their curator Alex. Desmarteau.

PARTNERSHIPS FORMED AND DISSOLVED.

Fieldman & Milmet, hardware and furniture dealers, Winnipeg, have admitted as partner F. Huffman.

H. Lovell & Sons, lumber merchants and sawmillers, Coaticook, Que., have dissolved, and a new partnership has been registered.

Johnston & Stewart, manufacturers' agents, Winnipeg, have dissolved ; W. Johnston continues with L. J. Ostrander under the style of W. Johnston & Co.

SALES MADE AND PENDING.

The assets of A. Prevost & Co., general merchant, St. Agathe Des Monts, Que., have been sold.

There will be a sheriff's sale of the property of G. F. Fenton, grocer, etc., Halifax, N.S., on July 29.

The stock of (the estate of) Wm. Coxall, hardware merchant, grocer and dry goods dealer, Colborne, Ont., is advertised for sale by tender.

CHANGES.

Echenberg Bros. junk dealers, Sherbrooke, Que., have registered.

J. Henry, harnessmaker, etc., Vancouver, is succeeded by Carl & Glover.

Ringwood & Wilson, lumber merchants, Lenore, Man., are commencing.

A. Desmarais & Fils, tanners, St. Joseph De St. Hyacinthe, Que., have registered.

Woodley & Sharpe, lumber merchants, Moose Jaw, N.W.T., have opened a branch at Caron.

The book debts of Smith & Lariviere, lumber merchants, St. Anne Du Sault, Que., have been sold.

FIRES.

Thomas Craig, blacksmith, Extension, B.C., has sustained loss by fire.

E. B. Salyerds, manufacturer of brushes, Preston, Ont., was burned out ; insured.

John Hallam, hides and wool merchant, Toronto, has sustained damage by fire and water ; insured.

DEATHS.

D. C. Corbitt, of D. C. Corbitt & Son, general merchants, Didsbury, N.W.T., is dead.

James P. Mitchell, of J. P. Mitchell & Co., general and lumber merchants, Mill Village, N.S., is dead.

NEW ADVERTISING NOVELTIES.

Some attractive advertising is now circulated in Canada by the "Globe" metal polish people, Raimes & Co., of No. 164 Duane street, New York. Their goods have a large sale throughout the world. It is put up in attractive tins, and the popular sizes for retailers are the 5 and 10c. tins. It will keep good in any climate, is always clean to handle, and is a remarkably good seller when once introduced. This polish has met with a large sale here during the short time it has been on the Canadian market, and the company are glad to forward a supply of advertising matter to all retailers on application.

PAINT FACTORY BURNED.

The paint factory established in a building on Wellington street, Montreal, by Henderson & Potts, proprietors of The Nova Scotia Paint Works, was destroyed by fire on Friday morning, July 11, to the extent of $25,000, which, however, was fully covered by insurance.

It is thought that the fire was due to spontaneous combustion, occurring in the department where the putty was manufactured. On this floor were stored dry powders and other materials for mixing paints. A certain quantity of oil was also placed here, though the big tanks were in the celler, which, fortunitely the fire did not reach. The fire worked up through the various floors, and finally broke out on the roof, and being fed by the oils and paints threatened to spread to the other buildings, of which there are a number in the district.

After half an hour's hard work the firemen succeeded in getting the flames under control. The firm are insured for the following amounts, in the companies named :

Liverpool and London and Globe	$5,000
National	5,000
Northern	5,000
Western	5,000
Royal	2,500
British America	2,500
Caledonia	2,500
Guardian	2,500
Ætna	2,500
Hartford	2,500
Phœnix of Hartford	2,000
Norwich Union	1,000
Total	$38,000

ELECTRIC RAILWAY TO BE BUILT.

An electric railway may shortly be built between Windsor and St. Thomas. An American civil engineer is inspecting the topography of the country for a syndicate. It is proposed to have the line parallel the system of the Michigan Central and the Lake Erie & Detroit Railway, through a rich and populous district, the residents of which have now to haul their produce a long way to the railway stations. Just who is behind the movement for the new road the civil engineer refuses to say.

FEATURES OF THE COPPER MARKET.

QUITE a little interest is being taken in the copper market these days. This is due largely to the fact that there is a good deal of speculation as to the future. The market, while dull, is fairly steady as to price.

One of the principal features of the market is the large increase in the exports of copper from the United States. During the month of June they were 14,027 tons against 9,842 for the same month a year ago. For the six months the exports from the United States aggregated 97,960 tons compared with 50,027 tons, during the same period in 1901. This shows an increase of 95 per cent. The production, on the other hand, according to the latest figures, also shows an increase, the quantity in the United States and other countries being 24,942 tons in June, compared with 30,923 tons the same month a year ago. The production for the six months was 192,984 tons, an increase of 8 per cent., compared with the same period last year. It is perhaps worthy of note that the increase in the stock of copper last year amounted to nearly 70,000 tons.

While the market is quiet at the moment the consumption is comparatively large. In the United States it is exceedingly so, and on this account a steady upward movement is eventually anticipated. At present the coal miners' strike is somewhat of a disturbing element on account of the threatened scarcity of coal, and particularly for the mines on Lake Superior. Besides this, there is undoubtedly two opposing parties contending for the control of the market in the United States, and this is naturally giving some uncertainty to the situation.

MOULDING MACHINES AND THE UNION.

ONE of the most important items of business transacted by the International Iron Moulders' Union, which has been in session in Toronto during the past two weeks, was that in regard to moulding machines. As our readers are doubtless aware, the union has hitherto set its face against these machines, notwithstanding the light of history showing the futility of such action.

The first inkling of the turn in the tide in the attitude of the union was given early last week when the president said it was time the union men withdrew their opposition to these machines. These remarks of the president were afterwards considered by a committee, and on Wednesday last a report was submitted to the Convention dealing with this question. The report recommended that it be an instruction to the incoming officers to proceed to organize wherever possible all competent machine operators, radiator moulders, and all other classified specialist moulders, granting them a separate charter or affiliating them with local unions already in existence. The report was adopted by a large majority.

It is evident that what brought the union around to its present attitude was more a sense of self preservation than a lessening in the opposition to the machines, realizing that in their opposition to the machines they were creating a strong and dangerous opposition to their own welfare among the men who operate the machines.

It is, however, a matter for congratulation that the opposition from such an important body as the International Union has been discontinued. It will certainly be more satisfactory to the men themselves, to say nothing of the interests of their employers.

THE STEEL TRUST'S FINANCES.

THE suit which has been brought in the United States against the Steel Corporation to prevent the proposed $200,000,000 bond conversion, has brought out information which enables one to gain a clearer idea of the financial strength of this, the greatest of all commercial organizations. The information comes through an answer which President Schwab has filed in the suit in question.

The plaintiffs in the case claim that the corporation's assets do not equal the amount of its preferred stock.

In his answer President Schwab says that the assets will amount to more than the entire stock, bonds, common and preferred, or more than $1,400,000,000, while the earnings for the fiscal year he places at the enormous sum of $140,000,000.

THREATENED TINPLATE STRIKE.

There is some danger that the amicable relations which have existed for some time between the tinplate mills in Wales and their employes will be broken on account of the question of wages.

The men demand that in "Canadas" all plates up to 29 gauge shall be paid for on the basis of 112 lb., and those on and above 30 gauge on the area of 31,500. The employers at a recent meeting accepted the suggestion as to "Canadas," but refused to entertain the other proposals.

In addition to these, there are a number of other points at issue. A rather ill-advised action on the part of the men has not at all helped matters. Some three years ago a conciliation board was formed whereby the question of wages was dealt with annually. This conciliation board appears to have worked well up to the present, but recently the men of one of the mills presented notices for an increase in wages without having consulted the board, which was contrary to custom.

The Welsh tinplate industry has had so many ups and downs during the last few years that it is to be hoped the present difficulty will not result in an open rupture.

BUSINESS MEN AND THE PUBLIC SCHOOLS.

AT the annual meeting of the Toronto branch of the Canadian Manufacturers' Association, on Tuesday last, the subject of writing, arithmetic and spelling in the public schools of Toronto came in for discussion. The subject was introduced by one of the reports, which adversely criticized the public school system in these particulars.

This is not a new question to the business men of Toronto. For a long time it has been recognized that the pupils from the public schools were decidedly inefficient in the three essentials to education.

Wholesale men have time and again informed us that they could very rarely secure a boy from the public schools who was proficient enough, particularly in writing, to be taken into the office. It is evident, therefore, that the Manufacturers' Association has not taken the subject in hand any too soon, and it is to be hoped that good results will soon be apparent. The trouble appears to be not really the inefficiency of the teachers, but the system, which endeavors to crowd too much into the young minds of pupils. If the real purpose of the public school system is anything, it is to ground children in such essentials as writing, reading and arithmetic, but, as conditions exist to-day, these are not obtained. The pupils are given a smattering of many subjects, but are really proficient in none.

A good many, tired of this condition of affairs, are sending their children to voluntary schools, over which they have more direct control and in which the essentials to education are more thoroughly taught. While these voluntary schools are increasing, our public school population is, on the other hand, decreasing. This is shown by the Government returns.

But it is the few and not the many who can afford to send their children to the voluntary schools. And it is obvious that those who cannot are compelled to send their offsprings out into the world lacking in those qualifications which are so essential to success in life.

In Toronto one fourth of the ordinary tax rate is on public school account. It is obvious, therefore, with this high proportion, that inefficiency is being bought at a pretty high price.

It is time that business men took a more practical and live interest in the public school affairs, and it is to be hoped the action of the Canadian Manufacturers' Association will induce them to do so.

SUPREMACY IN THE IRON INDUSTRY.

THE Board of Commissioners sent to the United States last year by the British Iron Trade Association has just issued its report. This statement of opinion from British manufacturers has been awaited with great interest, especially because of the enormous increase in the production of United States iron and steel, which has been going on contemporaneously with a decrease in the output of both the British and German iron industries. A few figures will sufficiently demonstrate this condition of the rival nations.

Pig iron was produced in Britain to the amount of 7,761,830 gross tons in 1901, a decrease of 1,197,861 tons compared with the production of the preceding year. Bessemer steel ingots showed a loss of 138,751 tons over the same period, while open-hearth steel ingots alone witnessed an increase of 141,741 tons over the 3,156,050 tons produced in 1900. German reports on the production of pig-iron show a decrease from 8,520,541 metric tons in 1900 to 7,860,893 metric tons in 1901. Steel ingots and castings witnessed a loss of 251,647 tons, from the 6,645,869 tons of 1900. The combined output of pig iron of the two countries falls 379,861 tons short of the 15,878,354 tons produced by the United States in 1901.

United States statistics covering the ten years from 1890 to 1900 bear witness to an enormous increase in every line of iron and steel production. The capital vested in the industries was only $405,771,786 in 1890. In 1900 it had reached nearly $600,000,000. But it must be remembered that the present steel combine had not then been formed. Its capital alone stands at a billion dollars.

The value of the products has increased during the 10 years by over 74 per cent., and in 1900 it stood at $835,759,034. The number of blast furnaces and forges both show decreases, but in the case of the former the value of the product witnesses a decided increase. Rolling mills and steel works have increased in number from 395 438, and capital and production have almost doubled. A notable increase is to be found in the iron and steel shipbuilding industry. Only 17 institutions were in operation in 1890, compared with 44 in 1900. A capital of slightly over $7,000,000 has been raised to $60 000,000, and the value of the product has been increased by nearly 290 per cent. over its value of $12,929 953 in 1890.

These are wonderful figures to be confronted with, but the British commission's report is optimistic. The gist of it is that, while it recognizes the great advances in the United States, it yet believes that the remedy for the ills of the British iron industry lies with the British manufacturers themselves. That is, United States supremacy will only be inevitable if they fail to take immediate advantage of the modern processes which will enable them to keep up an effective competition.

GOOD OUTLOOK FOR STOVE TRADE

The Gurney Foundry Co , Limited, is so well represented through Canada and by its corresponding company in the United States that it is perhaps as well qualified to speak of the present status of business as any concern in Canada. Its officers speak in qualified terms of the present and future of business in Canada and the United States. They seem to hold the opinion that there is a prospect of good times lasting longer in Canada than the United States, as, although in the past, conditions here have been dependent on the United States, there are at present relations in Canada which did not exist before this year. The enormous emigration from the United States into Canada is spoken of as one of these factors, while the growth in Canada of Clergue and Sydney enterprises suggests another factor.

The Gurney Company contemplate building immediately another foundry with double the output of the present one. Toronto Junction has been chosen as the site, and seven or eight acres will be required for the purpose. The building will be of the most modern foundry construction, the idea being to move heavy material and goods by machinery, and all upon one level. The officers of the company feel sure that for the next three or four years the demand will meet the supply in all branches of manufacture.

THE PREFERENTIAL TARIFF QUESTION.

By ROBERT MUNRO, President of the Canadian Manufacturers' Association.

THERE is much more general agreement on this subject than we are apt to infer from the varied opinions expressed in its discussion. It is no question of party politics. There can be no doubt that the people of Canada, as a whole, are favorable to giving British possessions every tariff advantage that is possible, consistent with our general financial system and the maintenance of our industries.

There is a remnant of our people who would refuse to consider our industries in the question at all. These do not consider that the investment of Canadian capital in manufacturing industries amounts to probably $500,000,000, and that at least one-third of our population is dependent on these. There is also a further consideration. These industries were largely induced by the measure of protection the tariff incidentally afforded, and, as a community, we cannot afford to so alter our fiscal conditions as to prevent this enormous investment yielding some return, nor can we afford to materially reduce the number for which these industries find employment.

The Pro-British view of the tariff looks to increased trade between Canada and other British possessions. Of this view Canada is the author. Its development will probably be intercolonial before it becomes Imperial. We may expect a return of preferences from the other colonies before reciprocal preferential trade is adopted by Great Britain. Our fellow-Britons in Australia, New Zealand, South Africa, West Indies, etc., are thinking hard on the question. We may surely arrange to help out the discussion with them in detail, and it cannot prove fruitless. A general agreement among the colonies is the great lever which will move Great Britain. This intercolonial agreement is just what many of our British people would delight to see in operation. The discussion of the principle will help to bring the financial systems of the colonies into similar lines, and as one colony gradually increases its consumption of the products of the other, the preferential tariff will be a matter of less and less difficulty.

But the Pro-British view has another very important feature. It seeks to retain British trade for Britons. In carrying out this view it has no favors to confer on foreign nations. Nor has it any prejudice against dealing with them on a fair "tariff for tariff" basis. While one part of our creed is to give a preference to British possessions, another is to give to every other country as fair terms as they give us, but we object to give more than this. If they tax our farm products and our manufactures we also tax theirs. We want to trade with the wide world on a business basis. We want to trade with our fellow Britons on a preferential basis, and we expect them to recognize us as Britons also.

This view is worthy of Canada. There is nothing in it that is not businesslike, straightforward, fair and just.

Now, what would be the outcome of this Pro-British policy if carried out from these two viewpoints?

Based on the existing tariffs of Germany, United States and other countries, the principle of tariff for tariff would so restrict our trade with these countries that a large additional volume of trade would be available between us and Great Britain and her colonies. One effect would be a higher Canadian tariff on a large number of items, which is not, in itself, desirable, but it would be necessary to equalize with foreign tariffs. The other effects would be that not only would a larger amount of trade be available between us and Britain, but that a greater percentage of preference could be given to Britain.

I am not forgetful that some few industries have suffered severely from the preference now given. These industries were established on a tariff which appeared to offer a return on their investment, but the abatement of one-third upset their calculations, and in some cases changed profit into loss. These are the exception, however, and call to be dealt with exceptionally, but generally the increased aggregate business that would result from fair trade with foreign nations and the special increases incident thereto would adjust matters. I have tried to deal with principles. Let me give only one illustration in detail.

Our agriculturists are very heavy sufferers in this regard. There is approximately $20,000,000 lost to Canada every year to pay United States farmers for produce for which they will not take produce in return, but are paid in gold. Every dollar of this is lost to our Canadian farmers.

The pro-British principle of "tariff for tariff" to foreigners and reciprocal preferential between British possessions is the principle that will do justice to Canada and her people.

SCHOOL OF MINES FOR NOVA SCOTIA.

Under a recent date Mr. R. Drummond, M.L.C., of The Maritime Mining Record, writes: "The Province is now ripe and ready for a school of mines or some such institution which will supply the hundreds of young men and middle-aged—who have secured certificates of competency as managers, underground managers, and overseers at the excellent schools of their kind—established by the local Government, more advanced technical instruction than comes within the scope properly of the schools now established. Many mining men recognize that the time has come when the instruction given at our mining schools must be supplemented by something higher if our young men who have chosen mining as a profession are to hold their own with the men of Germany or the United States. Those interested in mining pursuits and the development of the vast mineral wealth of this Province, are, I am inclined to believe, desirous that a school of mines be established.

"If the school is to be for all the people, and not a favored section, some scheme should be hinted at whereby part, at least, of the expense of attendance in Halifax be remitted—or, as in the case of the Agricultural School, pupils should, in some way, be given opportunity to earn their board. I have also an idea that every candidate who secures a certificate as manager from the mining examiners, should have his expenses in Halifax paid—call it a scholarship. The Government ought to provide these scholarships or bursaries."

MIDSUMMER 1902

To the . . .

Hardware Trade:

The index of our business barometer has for the last five months pointed to **STEADY PRESSURE.**

The volume of business done is unprecedented in the history of our Company, and we desire to thank our clients most heartily for their increased support.

We have all felt the growing time. Our belief is that Canada will have a long lease of it, and our factory arrangements will be based on this belief.

Our 1902 Specialties have been found just what were wanted.

For the Summer and Fall trade we have made arrangements to increase the supply of **PAINTERS' PERFECT WHITE LEAD,** which has had an excellent run ever since its introduction.

The **MAGNETIC OIL** sold faster than we could tank and strain it, but from this forward there will not be any complaints of shortage. It has become a favorite in all parts of the Dominion.

Our **PERMANENT REDS** are prepared from first to last in our own factory—no middle profit is given away—we are that much ahead of all competitors. You are buying from first hands.

Our **VARNISH DEPARTMENT** grows most rapidly, partly from the expansion in other manufacturing industries. Our test system gives absolute security, and we guarantee every sealed can bearing our name.

You must all have been pleased and helped by our 1902 Catalogue. We commend its continued study as an educator. The men who are expert in our business study it most.

Yours, very truly,

THE **CANADA PAINT COMPANY,** LIMITED

MONTREAL, CANADA. *Robt. Munro, Managing Director.*

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, July 18, 1902.

HARDWARE.

A GOOD demand during the past week has been experienced for the general list of hardware articles, this trade being less affected by the change in seasons, and in weather, than is usually the case, and much less than in other classes of trade. All building materials and harvest tools have been moving briskly. Common wrenches, it is expected, will be advanced in price within the next few days, owing to the scarcity of the raw material, which has been making itself felt more keenly during the past week or so. Curry combs have been advanced 10 per cent., and are now from 30 and 10 per cent. to 35 per cent. off.

SCYTHES.—In this line the business done during the past season has been remarkably good, and at the present there is still a brisk movement. Prices have not been altered. Quotations are as follows : Lance, No. 80, $5.50 ; Hurd's Clipper, $6.50 ; concave, $7.50 ; Sibley, $8.50 ; Cradle scythes, cast steel, $8.50 ; silver steel, $9.50 ; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—There has been no improvement in this market, and trade continues somewhat quiet. The price of barb wire is $3 per 100-lb. keg, f.o.b. Montreal.

GALVANIZED WIRE.—A few good orders are reported this week, but business, generally, is very quiet. We quote : Nos. 6, 7 and 8 gauge, $3.45 ; No. 9, $2.80 ; No. 10, $3.55 ; No. 11, $3.65 ; No. 12, $2.95 ; No. 13, $3.05 ; No. 14, $4.05 ; No. 15, $4.55 ; No. 16, $4.80 ; No. 17, $5.20 ; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is a moderate inquiry but nothing special is doing. No quotable change has been made, bright and annealed still selling on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows : Coppered wire, 60c.; tinned wire, $2 ; oiling, 10c.; spring wire, $1.25 ; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—We have still to report a quiet market in fine wire. The discount remains at 22½ per cent.

BRASS AND COPPER WIRE. Little improvement is shown in this trade. The market is quiet and discount unchanged at 60 per cent.

FENCE STAPLES.—There is a fair inquiry for staples. The price of galvanized is $3.25 per 100-lb. keg, and of bright staples, $2.90 per 100-lb. keg ; 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—Business is fairly good in this line. Nothing of importance has occurred, and the price is unchanged, small lots selling at $2.55 and carlots at $2.50, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Trade continues along about as usual with nothing special to report. The price is $2.45 per keg, in small lots, and in carlots, $2.37½ per keg.

HORSE NAILS.—The market is not active. The discounts are unchanged as follows: "C" brand, 50 and 7½ per cent. off ; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—Business is quiet, and our quotations are as follows : Iron shoes, light and medium pattern, No. 2 and larger, $3.50 ; No. 1 and smaller, $3.75 ; snow shoes, No. 2 and larger, $3.75 ; No. 1 and smaller, $4.00 ; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60 ; No. 1 and smaller, $3.85 ; feather-weight, all sizes, $4.85 ; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal ; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The demand for screws is keeping up very well, and there is a fairly active market this week. Discounts are : Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There is no quotable change to report this week. The market is rather quiet, except in hayfork rope, which is moving out well. Our quotations are as follows : Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows : Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c. ; Tiger, 550 feet to the pound, 13c. ; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—No further change has been made in the discounts of rivets and burrs. The market is not particularly active. Quotations follow : Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off ; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—Business continues fairly satisfactory. No quotable change has occurred, and we quote the discounts as follows : Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent. ; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list ; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Jobbers report a good demand for all lines of building paper, and the volume of business doing is large. Our qdotations are as follows : Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll ; 3- ply, $1.10 per roll ; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll ; tar sheathing, 45c. per roll ; dry fibre, 50c. per roll; tarred fibre, 60c. per roll ; O K and I X L, 65c. per roll ; heavy straw sheathing, $30 per ton ; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—The demand for this is very good and the price remains at $1.37½ per 100 square feet.

POULTRY NETTING.—A fair business is doing, but the demand is falling off. Canadian or English netting is discounted as follows : 2 x 2 mesh, 19 wire, 50 and 10 per cent. ; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—Trade continues brisk on all lines. Discount, 60 per cent.

FIREBRICKS.—There is not much doing in firebricks. English sell at $16 to $22 per 1,000, and Scotch at $17 to $22 per 1,000.

CEMENT.—The market is quiet. Our quotations are : Canadian cement, $1.90 to $2.25 ; German, $2.20 to $2.30 ; English, $2.15 to $2.25 ; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The volume of business in metals keeps up well, considering the falling off in other lines. Should the cargo of the wrecked steamer Monteagle prove to be too badly damaged for use, there will likely be considerable shortage in supplies felt for a while. This will particularly affect Canada plates, black sheet iron, galvanized iron and tinplates. But even with the further supplies which are now on the way here some scarcity is bound to be felt in the heavier metals for fall. The hardware trade are not too heavily stocked with these goods and were awaiting the arrival of the wrecked steamer for some time, as the goods were wanted immediately. It is stated that it will be impossible to repeat some orders at the same figures and that better prices will be asked for goods arriving later. At present it is not possible to tell to what extent the cargo is damaged, but it is feared, to judge by the condition of the vessel, that the loss will be considerable. The prices of metals on the local market have been steady during the week. Old Country reports state that Canada plates are dearer.

PIG IRON.—There is no change in this market. Canadian pig iron is quoted at $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—Business continues fairly active. Merchants' bar is worth $2 and horseshoe iron, $2.20.

BLACK SHEETS.—The demand is fair and improving. We quote: 28 gauge, $2.65;

Canada Iron Furnace Co. Limited
MIDLAND, ONT.

26 gauge, $2.60 ; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Trade is growing more active in this line. Prices have not changed. We quote: No. 28, Queen's Head, $4.40 ; Apollo, 10¾ oz., $4.40 ; Fleur de Lis, $4.15 ; Comet, $4.25 ; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—We quote 14c.

INGOT TIN.—Straits sell at, 33½c., with a moderate inquiry.

PIG LEAD.—There has been no improvement in the market. The price is $3.25.

LEAD PIPE.—Business in lead pipe has been somewhat better than last week, but the market is not particularly active. The price of composition and waste is 8c. and of ordinary, 7c. The discount is still 37½ per cent.

IRON PIPE.—An active trade is still done in this market. No quotable change has been made, and we quote as follows: Black pipe, ⅛, $3 ; ¼, $2.40 ; ⅜, $2.65 ; ½, $3 ; ¾, $3.70 ; 1-in., $5.25 ; 1¼, $7.40 ; 1½, $8.90 ; 2-in., $12.40. Galvanized, ¼, $3.20 ; ⅜, $3.45 ; ½, $4 ; ¾, $5.05 ; 1-in., $7.25 ; 1¼, $10.10 ; 1½, $12.15 ; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35 ; ¾, $5.30 ; 1-in., $7.60 ; 1¼, $10.60 ; 1½, $12.70 ; 2-in., $17.45. Galvanized, ½, $5.35 ; ¾, $6.70 ; 1-in., $9.60 ; 1¼, $13.30 ; 1½, $15.95 ; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There is a good demand. Charcoals sell at $4.75 to $5.25 per box ; cokes, at $4.25 per box.

CANADA PLATES.—The inquiry for Canada plates is very good, but stocks in jobbers' hands are diminishing rapidly and some scarcity is expected for a while. Quotations are as follows: 52's, $2.70 to $2.80 ; 60's, $2.85 to $2.90 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35 ; galvanized, 60's, $4.45 to $4.55.

STEEL.—There is no change. The market is active. We quote as follows: Sleighshoe, $2.10 ; tire, $2.20 ; bar, $2.05; spring, $2.85 ; reeled machinery, $2.75 ; toecalk, $2.70.

SHEET STEEL.—The demand for this has not materially improved and the volume of business is small. We quote Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—A small amount of business has been done during the week at unchanged prices. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Clover's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—The market for terne plates is quiet and featureless. We quote $7.50.

COIL CHAIN.—In this line trade is not very active though there is a firm tone to the market and higher prices have been quoted by some dealers. We quote as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.95 ; 9-16, $3.85 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The market is still quiet and the price unchanged from $5.85 to $6.25.

THE FRANCIS-FROST CO. Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

ANTIMONY.—There is little doing. The price remains at 10c.

ZINC SPELTER.—This is quoted at 5c. Trade is still very quiet.

SOLDER.—There is no change in this market, which continues active. Bar solder sells for 18c. and wire solder, 20c.

PAINTS AND OILS.

The feature of the paint and oil market during the past week has been the further decline in linseed oil of 2c. and the drop of 2c. in turpentine. The reason in both cases is on account of the larger supplies, more than sufficient for the demand. The market is fairly well supplied now and the inquiry is not as active as it was a few weeks ago. There is also a falling off in orders for the general list of painters' materials, and though manufacturers do not appear to be at all slack, yet the usual quiet time is setting in. Stocks of dry white lead and zinc and paris green are reported very light. Varnishes are still moving well. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100 lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The market this week is quiet and without feature. All lines of metals are dull. There has, however, been no quotable change, and prices are as follows : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6 to 6¼c. per lb.

GLASS.

There is little demand for glass on this market, and trade continues quiet. We now quote : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

The only change to report in this market is in lambskins, which are quoted at an advance of 5c. Other lines are steady. We quote : No. 1 hides, 10c. ; No. 2, 9c.; No. 3, 8c. Calfskins, 12c. ; lambskins, 30c.

MONTREAL NOTES

No. 1 lambskins are 5c. higher.

Currycombs have advanced 10 per cent.

ONTARIO MARKETS

Toronto, July 18, 1902.

HARDWARE.

FOR JULY the hardware business is being well sustained. The rains in June of this year seem to have kept back the crops and retarded trade, leaving some of the business that last year was done in June to be done in July this season. Harvest tools are meeting with a good sorting-up demand, and the trade in builders' hardware this year is heavier than last year. Inquiries and encouraging reports keep coming in from the lumber regions, specifications are being forwarded, and some contracts already have been closed. There is a better demand for eavetroughing this year than last, and quite a few orders in stoves and ranges are being booked for shipment in the fall. Jobbers claim that this fall there will be a scarcity of stoves, as the factories have not yet been able to make their output equal to the demand. The prices of currycombs have been advanced 10 per cent. The manufacturers claim that they had to make these changes on account of the increased cost of labor and material.

BARB WIRE.—There is a fair demand for barb wire, and as there is a scarcity of stocks on hand, jobbers can hardly wait for their supplies to be shipped from Cleveland to fill their orders. Barb wire, in carlots, is quoted at $2.65, and for less than carlots, $2.77½ f.o.b. Cleveland. From stock, Toronto, the price is $3.00.

GALVANIZED WIRE.—There are a number of small orders being received in this line. Quotations are: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The volume of trade in this line continues fair and prices are unchanged. We quote the base price as follows: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—The demand continues fair and prices are steady. The discount remains unchanged at 22½ per cent.

WIRE NAILS.—The demand for these continues to be well sustained, and some of the manufacturers are unable to fill their orders. The smaller sizes are the scarcest. We quote $2.55 for less than carlots and $2.50 for carlots. The delivery points are: Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—The situation in cut nails is unchanged. The base price is quoted at $2.45 per keg and $2.37½ for carlots.

HORSE NAILS.—The steadiness in these noted last week continues. The discounts are: "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—There is a fair trade in these being done at unchanged prices: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws is keeping up very well, and, if anything, is better than last week. The difficulty experienced in having the orders filled by the manufacturers is as great as ever. The discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—There continues to be a scarcity of these in the hands of the jobbers and the demand is about the same as last week. The discounts are now as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Jobbers in this line are busy, but they find it difficult to replenish their stocks. Manufacturers claim they are much put about for want of workmen. We quote: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—There is a good demand for screen doors and windows, and stocks are well assorted. Quotations are: Common doors, two or three panel, f.o.b. factory points as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—There keeps up quite a sorting-up trade in this line. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—There is a fair amount of business doing in spades and shovels. Discount, 40 and 5 per cent.

ROPE.—There is the usual amount of trade doing in this line at unchanged prices. We quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—There have been no changes in prices as yet, and the demand is commencing to improve. We quote: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—Trade in this line is without new features, and the amount of business doing is fair. Discount, 60 per cent.

EAVETROUGH, ETC.—The busy season in this line is now on and jobbers say the volume of trade doing this season is in excess of that of the same period last year. The prices are firm and unchanged. We quote: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—Business in this line keeps up well. Quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—The season for these is nearly over. A few orders are still being given to manufacturers for small lots, and the discounts are as follows: 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 7-in. wheels, $2.25 to $2.50.

HARVEST WHIPS.—A fair amount of business is doing in harvest whips.

POULTRY NETTING.—This line is meeting with a moderate demand at unchanged prices.

IMPROVED BUILDING MATERIALS.

All the newest and most effective ideas are embodied in our metallic goods.

The points that make for convenience in handling—for long duration—for most efficient service.

The points that make fully satisfied customers. Isn't it to your own interest to sell the goods that never require an after apology or explanation? Consult our catalogue for full information about our metallic

And other goods for all kinds of architectural purposes.

The Metallic Roofing Co., Limited,

Wholesale Manufacturers,

TORONTO, MONTREAL, WINNIPEG.

TINWARE AND ENAMELLED WARE.—The amount of business doing in tinware is somewhat less than it was. In enamelled ware there is a great call for preserving kettles.

SPORTING GOODS.—Quite a few guns are being forwarded to different points in the Province. Loaded shells are also active.

CEMENT.—Trade is a little quieter this week than before in cement, but the market continues strong with no further advance. Buyers are holding back a little, owing to this firmness and the fact that at present they are provided with sufficient stocks of cement to supply their wants for some time to come.. We quote: Canadian Portland, $2.25 to $2.85, and Canadian hydraulic, $1.35 to $1.60 per bbl.

METALS.

Business in metals continues steady without any large buying movement, and the market conditions are similar to those of last week. In the United States copper was slightly depressed, and as many consumers are expecting the prices to ease off, they seem to be acting on this belief and restricting purchases. Tin, both in London, Eng., and the Republic, is firm. The United States pig iron market is quiet and strong, and production is going on at a rapid rate.

PIG IRON.—In the United States pig iron is quiet and firm, with a small amount of trade doing. The local market continues strong. We quote on track, Toronto: No. 1 foundry, $21, and No. 2, $20.50.

STEEL BOILER PLATES.—These continue strong and active. We quote $1.80 for carload lots, on track, Toronto.

STEEL BEAMS.—A fair amount of business continues at unchanged prices. We quote $2.75 for steel beams, from stock, and $2 per 100 lb. for carload lots on track.

STEEL RAILS.—Our quotations for steel rails are $30 per ton for steam railway rails, and $35 per ton for electric railway rails.

TOOL STEEL.—A steady market continues locally in tool steel, and our quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—This continues in fair demand.

SPRING STEEL.—A fair amount of business continues to be done locally in spring steel.

BOILER TUBES.—The values of these are steadily maintained on the local market.

BAR IRON.—There is a scarcity of bar iron on the local market with a good demand. The United States markets are firmer and quiet, with some business doing for the last half of this and the first quarter of next year, but sellers are not seeking business. We quote: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—The demand is still active and the prices are unchanged. We quote: Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is at present a good demand for these. We quote: All dull, $3; half-polished, $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—The local market continues in about the same condition as last week. We quote in casiots, as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge, Bell brand, $4.20 for 28 gauge.

TIN.—The outside markets for tin are firm. The local demand has dropped off. We quote $32 to $33 per 100 lb.

TINPLATES.—A fair amount of business is being done. We quote: Charcoal, $4.75 to $5 per box, and cokes, $4.25 per box.

COPPER.—Some inquiry has been made for ingot copper. We quote: Ingot copper, $14 per 100 lb., and sheet copper, $22 to $23.

BRASS.—This metal continues unchanged with a good demand. The discount is 15 per cent.

PIG LEAD.—This metal has become quiet on the local market during the week. Pig lead is quoted at $3.50 to $3.75, and bar, $5.

IRON PIPE.—The local trade has improved with the settlement of the plumbers' strike, and a large amount of business is now doing. Quotations are per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-in., $7.20. Trade discount 4 per cent.

ZINC SPELTER.—This line continues in fair demand. We quote $5 to $6.

ZINC SHEETS.—Trade is steady. We quote: Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER.—Trade in solder continues brisk, and prices are unchanged.

ANTIMONY.—There is some local business doing in antimony. We quote $19.50 per 100 lb.

PAINTS AND OILS.

The market this week is without new features. The declines in linseed oil and turpentine have been maintained. The stocks of the latter on hand are light, and fancy prices are being paid for small lots of one or two barrels. The market for spirits of turpentine in the South continues to weaken and prices have declined some since last week. The weakness there was caused by unexpectedly large receipts of spirits at various ports in the South. On the local market there is not much demand for raw and boiled linseed oil, owing to the buyers refusing to purchase ahead. Trade in red leads and white leads ground in pure linseed oil shows a slight falling off. A number of sorting up orders keep the ready-mixed paints active. The trade in zinc whites this season is exceptionally good. Putty is commencing to move nicely and castor oil is quiet. We quote as follows:

WHITE LEAD—Ex Toronto, pure white lead, $5 87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6 25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100 lb. kegs, $2 40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 2 barrels, 82c.; boiled, 85c.; 3 to 5 barrels, raw, 81c.; boiled, 84c.; 6 to 9 barrels, raw, 77c.; boiled, 82c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a fair demand for glass, but a scarcity in some sizes. We quote: Under 26 in., $4.45; 26 to 40 in., $4 65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5 75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

Trade in old material, though not so heavy as it was, is still fairly well maintained. Prices are unchanged. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—In hides little business is being done and the prices are steady. We quote: No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8 to 8¼c.

SKINS—The prices of shearlings have advanced 5c. Other lines are unchanged. Our quotations are now as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; lambskins, 30c.; shearlings, 25c.

WOOL — The market continues dull and featureless. The prices are weak at 13c. for fleece wool and 7c. per lb. for unwashed.

TALLOW — The demand is good and prices are firm and unchanged. We quote: 6¼ to 6½c. per lb. for tallow.

COAL.

Nothing new has come to light in the coal market, and no settlement has yet apparently been arrived at by the striking men and their employers. Should this condition of affairs continue much longer very high prices will have to be paid for coal during the winter. At International bridges our quotations are as follows: Soft coal, $3 to $4 per ton.

PETROLEUM.

There is a fair demand for petroleum and the market continues unchanged. We quote as follows: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Currycombs have been advanced 10 per cent.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

THE following permits were taken out during the last week in Toronto: G. McKenzie, for one-storey addition on Walmer Road, near Lowther, for $150; Edward Blake, for one-storey frame and roughcast dwelling at 169 Hamilton street, for $200; Hooper and Becket, two wooden verandahs at 520-522 Ontario street, for $250; Massey-Harris Co., for one-storey brick addition for bolt and nut department, King street west, near Strachan avenue, for $1,100; Jas. T. Ardell, for two-storey brick front and foundation, roughcast sides and back, at 328 Carlton street, for $1,200; Gilbert Sanders, for two-storey addition to dwelling at 31-33 Wood street, for $450; Mrs. Clarkson and Mrs. Millichamp, for two-storey and attic pair semi-detached brick dwellings, Barton avenue, near Howland avenue, for $5,000; Thos. Swanton, for two-storey detached brick-veneered dwelling, 45 Lewis street, for $1,250; Alexander Brown Milling and Elevator Co., Limited, for repairs to building, Esplanade street east, near Princess street, for $420; Maxwell Drury, for brick dwelling at 81 Simpson ave., for $1,800; J. Casey, verandah at 207 Jarvis street, for $200; Stewart Hartshorn & Co., for addition to factory at 131 Eastern ave., for $300; J. J. Settell, for new store front at 629 Spadina ave., for $150; Alex. McCurdy, for two-storey and attic brick and stone dwelling, detached, for $2,000; Menzie Manufacturing Co., for three-storey brick factory and smoke stack, 75 feet high, 28 ft. base, at 41-43 Pacific ave., for $7,000; Sanderson Pearcy, for one-storey brick varnish factory, Booth ave., near Eastern ave., for $5,000; Leonard Geo. Cross, for pair two storey brick cellar roughcast dwellings at 612-614 Gerrard street east, for $700; H. M. Deeth, for pair semi-detached brick dwellings, Concord ave., for $4,300; Thos. Robinson, for two-storey dwelling, brick front, roughcast sides and back, 558 Delaware ave., for $1,600; The Ramage Process Co., Limited, for alterations to factory, brick, at 12-14 Alice street, for $500; Thos. McIlwain, for two-storey and attic pair of semi-detached dwellings, Close ave., for $6,000; Macpherson estate, for two storey and attic brick dwelling, Cluny ave., near Rosedale Road, for $5,000; Macpherson estate, for two-storey brick dwelling at 23 Crescent Road, for $1,000

BUILDING IN WINNIPEG.

Winnipeg will bid fair to realize the prediction of J. W. Wheeler, vice-president of the Minnesota State Bankers' Association, that Winnipeg in a few years will have a population of 100,000 if building operations can furnish us with a fair criterion. Building Inspector Rogers makes the statement: "Our resources are simply surprising, considering the wet weather we have experienced. The permits for building to date are $222,000 in excess of those of last year to July 1. In other words we have issued permits for $1,328,350 for the period January 1 to July 1.

"The month of June has been an exceptionally busy one for builders, for we issued permits for $542,700. One good feature of the building operations this year is the fact that in nearly every instance in which a permit has been taken out the contractors have commenced work shortly afterwards. With a short spell of good clear weather we look for a big increase in the number of permits issued—77."

REPORTS OF THE ONTARIO CONVENTION.

Secretary W. H. Meredith, of the Provincial Association, is distributing printed reports of the formation convention of the Ontario Association. He reports that a great number of local associations are affiliating themselves with the Provincial Association. The secretary hopes to have a complete report ready for the national convention to be held in Halifax, beginning August 13.

PLUMBING AND HEATING CONTRACTS.

Purdy, Mansell & Co., 46 Adelaide street west, Toronto, have taken during the week contracts for plumbing for the residence of Mr. H. H. Cook, Downing avenue; for the Star Theatre, and also for the Ontario Bank, corner of Yonge and Carlton streets.

J. B. Reeves, 783 Queen street east, Toronto, reports the following contracts: Overhauling and repairing 720-722 Gerrard street east for Gooderham estate; plumbing and lighting a new house on Gerrard street east for T. Bedley; also plumbing and lighting a new house on Simpson avenue for P. C. Drury.

PLUMBING AND HEATING NOTES.

Breton & Presseau, plumbers, Montreal, have dissolved.

Jos. Labell & Cie, plumbers, Montreal, have registered.

H. A. Despocas is curator of Joseph A. Giroux, St. Henri de Montreal.

V. E. Paradis has been appointed curator of Wm. Ford, plumber, Montreal.

The journeymen plumbers and steamfitters, of Montreal, held their annual picnic at Otterburn Park on July 15.

Guest & Co., 86 Church street, Toronto, have placed a 3-inch hydraulic water motor in The Waterous Engine Works, Brantford.

Edward St. George, of St. George, Guilbout, Ouellette & Desjardins, plumbers, Montreal, declares he is no longer a partner, and that the business is continued by the remaining partners.

A contract involving about $50,000 for the construction of a waterworks system in Levis, Que., has been awarded to J. A. Laforest, for some time superintendent of the Montreal waterworks system.

BUILDING PERMITS IN MONTREAL.

BUILDING permits were granted during the week to the following: W. Daniels, for a two-storey dwelling on St. Hubert street, for $1,000; Edwin Hanson, for alterations to dwelling at 1152 Dorchester street, for $1,000; J. Marchand, 92 Sanguinet street, for alterations to house on River Lane, for $1,500; E. Major, for one house, one store and one warehouse, five storeys, on St. Catherine street, for $16,000; Camille Poirier, for one house of three dwellings, three storeys, 27 and 29 St. Adolphus street, for $1,500; Bernier & Freres, 117 and 119 Sanguinet street, one house, two dwellings, two storeys, on Morreau street, for $1,250; F. Fleury, 96 Desey street, one house, three dwellings, on St. Catherine street, for $2,500; Beardmore & Co., 26 St. Peter street, for one warehouse, seven storeys, at 57 St. Peter street, for $30,000; Wire and Cable Co. Guy street, cistern, for $3,550; George W. Stevens, 18 St. Alexis street, alterations at 82-84 St. Francis Xavier street, for $4,000; George R. Hooper, 21 St. Mark street, alterations to three-storey dwelling at corner of Boyle and St. Mark street, for $3,500.

A USEFUL HANDBOOK.

Montreal's inspector of buildings, Alcide Chausse, is compiling a handbook which will be of great value to those engaged in the building industries and kindred industries in Montreal. The work is a volume of 350 pages, printed in English and French, and will contain: The building laws and ordinances, plumbing and sanitary laws, rules and regulations, drainage, and sewerage laws of Montreal; engineers' rules and regulations, and steam boiler inspection laws and ordinances; building and electric glossary of technical terms, and electrical rules and information. A list of the municipal officers and their office hours. Many tables of daily use and application in the trades. It is proposed to have the publication ready for distribution to the trade in about six weeks.

BUILDING PERMITS IN OTTAWA.

During the past week only nine permits were granted at Ottawa, the aggregate value of which was $14,250. The majority of permits were for extensions to residences. The following is the list: D. Skuce, brick-veneered dwelling on Maria street, $800; F. McCullough, addition to brick dwelling, Waller street, $350; R. Strothers, solid brick dwelling, Cambridge street, $3,500; W. C. Hughson, solid brick stables and coach house, Sparks street, $1,500; Charles Living, brick-veneered dwelling, Peter street, for $2,500; J. Wilson, for brick addition to dwelling, Lisgar street, $400; J. Gormully, solid brick addition to dwelling, Daly avenue, $1,200; John Kehoe, solid brick shops, Besscerer street, $2,000; David MacLaren, solid brick addition to house and also stable, Frank street, for $2,000.

REED'S PIPE STOCKS AND DIES.

OCT 17 1902 RETURNED

OCT 17 1902 RETURNED

The Reed Pipe Dies embody all the good features of any Solid Dies. The sections or cutting bits are made of high-grade **English Steel** that is particularly adopted to thread-cutting purposes. Anyone who has had experience in tempering steel will understand the advantage in making the cutting bits separate, as shown in the accompanying illustration, and thereby insuring more even and durable cutting qualities than is possible in a Solid Block Die.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

NEW TYPE OF STORAGE BATTERY.

IN an article entitled "The Storage Battery and the Motor Car," Thomas A. Edison gives further information as to the new type of storage battery upon which he is working. The tests applied point to the new nickel-iron battery as being in fact the only real storage battery known. A real storage battery must be reversible, lake a dynamo, which converts power into electricity, and vice versa. A storage battery, to deserve the name, should be a perfectly reversible instrument, receiving and giving out power like a dynamo motor, without any deterioration of the mechanism of conversion. The present lead battery in an automobile, Mr. Edison alleges, does not meet this condition. It gradually becomes less and less efficient, and in a few months wholly inoperative. The acid environment prevents a proper mechanical construction, its chemical reactions are of the most capricious character; it must be watched and treated with great care—so great care, indeed, as to make it impracticable for general use. It can be made, as far as mere weight is concerned, of sufficient lightness to meet all the wants of commerce and pleasure; but if made light it rapidly becomes useless.

On the other hand, the nickel-iron storage cell has an ideal environment. Being in an alkaline solution, none of the ingredients is attacked by the solution in any degree. The chemical reactions are also of the most simple and stable character. The conditions permit of a perfect mechanical construction, and, finally, it remains uninjured under any condition which one could imagine, when in the hands of an inexpert. The weight can be made to meet every exigency of commercial vehicle traction, and up to the present time there are no signs of chemical deterioration, even in a battery which has been charged and discharged over 700 times.

Mr. Edison says he has been working for some years on the problem of a true storage battery. The experiments have been continuous for the past three years. The above may be considered the first stage.

Tests on the battery have been going on for over a year and a half; this was the second stage. The construction of chemical works and a manufacturing plant for the cells was the third stage. The manufacture of standard cells from the tools is the fourth stage.

Twenty-one cells made in the factories, weighing 332 lb., were placed in a Baker automobile, the total weight with two men in the vehicle being 1,075 lb. The vehicle made a run, on one charge, of 62 miles over country roads, containing many grades, some as steep as 12 ft. in 100. At the end of this run the vehicle was making 83 per cent. of the original speed. The average speed over the entire distance was 11.2 miles per hour. On a comparatively level country road, a little heavy from recent rain, the same vehicle, on one charge, came to a stop at the 85th mile.

The fifth endurance test of the nickel-iron battery, which is demonstrating that the storage battery is indeed an accomplished act, is now being made with five different models of automobiles, in each of which the new cells have been installed. They are of various weights and construction, and each of them is being run 5,000 miles over country roads, at an average distance of 100 miles per day. If these tests shall show no loss of capacity and no mechanical defect in the battery, and that it is in all respects exactly the same at the end as at the commencement, we can be reasonably assured that at last we have a real storage battery.

Mr. Edison expresses the conviction that the storage battery carriage, by the aid of the new battery, will come ultimately within the reach of the man of moderate means. Driving through the many miles of streets in the suburbs of New York, he has been impressed with the fact that something like 80 per cent. of the residences have no carriage houses. The storage battery carriage, with the new battery, should enable the owners of 40 per cent. of these residences to have a serviceable pleasure vehicle at their beck and call, without hiring a coachman to keep it clean and run it, with no horses to eat their heads off, and no oats and hay to buy. With an initial outlay of from $700 and upward, the storage battery automobile can be used once a week at the cost of a 50c. charge, or twice for $1, and so on, the cost of use being met as it is incurred, and so ceasing to be the bugbear that fixed charges must always be to the householder of moderate income. For safe and successful use the automobile must, however, be made with heavier running gear, on the lines of the later French automobiles. Especially should stability be secured in the wheels and frame; the superstructure may be made gauzy. It seems likely that two general types of electric carriage will be developed, a light buggy type and a heavier touring carriage, the battery varying accordingly. The question of types of automobiles is further discussed, and the conclusion arrived at that the electric carriage of the future, and of the near future, will not only supersede other types of automobiles, but it will be built and run on such practical lines that accidents will soon become things of the past.

THE CONTRACTS ARE AWARDED.

The following contracts were awarded this week for the factory building that is to be erected for The Deering Harvester Co., of Chicago, in Hamilton: Mr. George F. Webb, brickwork; Mr. James Findlay, roofing; Stamp & Co., painting. The contract price amounts to a little over $100,000. A couple of days ago the Hamilton Bridge Company was given the contract for the steel work in connection with the building, the price being between $12,000 and $13 000.

AUTOMOBILE FIRE ENGINE.

An automobile fire engine is being brought out, in which the power that drives the pumps can alternatively be applied to propel the engine through the streets to the place where its services are required. A machine of this type has been in successful use for some two years in Mauritius; but in the present instance a further advance has been made by the adoption of liquid fuel, which seems to present distinct advantages for this kind of work, not only on account of the ease with which it can be manipulated, but also because the amount that can be stored in a given space will yield considerably more power than the same amount of coal. Steam can be raised from cold water in a very few minutes, and if, as is

frequently done, the water in the boiler is kept warm while the engine is standing in the fire station by means of a ring of gas jets, the petroleum burner can get up a full head of steam (120 lb. per square inch) in one minute. The vehicle is controlled from the front by a throttle valve, reversing lever, and foot brake, and, although its 30 horse-power engines enable it to attain a high speed and its weight complete approaches three tons, it can be stopped dead in a few yards.

DO NOT OVERWORK A BATTERY.

The life of the storage battery depends on the amount of work it is required to do within a given time, and the cost of maintenance is governed greatly by the rate of discharge at which it is operated. When the rate of discharge exceeds a given amount for a cell of certain size the chemical action is so great that the plates are soon destroyed or so rapidly deteriorated that they waste away in such a manner that the loose particles and the pieces which break off soon cause a short circuit between the plates that ruins the cell for use until it is removed.

These things are the source of dissatifaction in the use of cells in the hands of those who are not fully informed as to their characteristics, or who think that the rated discharge can be exceeded with impunity, thereby endeavoring to get out of the cell more than it was ever intended to stand. Such reckless usage soon ruins the cell, as the same kind of practice would soon destroy any kind of machinery or any device of mechanical or chemical construction.

MACHINERY AND ELECTRICAL NOTES.

It is reported that 35 machinists are on the way from Scotland to take the places of strikers in the Kingston Locomotive Works.

The McLachlan Gasoline Engine Co., Limited, 201 Queen street, east, Toronto, are sending a 22-ft. boat, fully equipped with canopy, cushions and curtains, to Bay St. Louis, Miss.

The Toronto Electrical Works Company, Adelaide west, Toronto, have sold one of their ¼ horse power machines of their new design to the J. F. Brown Company. The machine will be used to run a sewing machine.

The C.P.R. took formal control of the Hull Electric Railway last Friday. The purchase of the Hull electric line is really a part of the acquisition by the C.P.R. of the Gatineau and Pontiac Railways, which were amalgamated with the electric line. The three lines cost the C.P.R. in the neighborhood of $700,000.

A POWERFUL ENGINE.

ONE of the most powerful engines ever built for driving a dynamo has been completed by an engineering firm of Leeds, Eng., and is to be utilized in connection with the municipal electric lighting plant of that city. It is, as described by Scientific American, of the vertical double-acting triple-expansion type, and every part is inclosed. The three cylinders are at the top of the structure and have respectively diameters of 23 in. (high pressure), 35 in. (intermediate) and 55 in. (low pressure). The length of the stroke is 30 in., the shaft on which the cranks are set at 120 deg. is 12 in. in diameter, while the total height from bedplate to top is 22 ft., and it is designed to make from 200 to 250 revolutions of the crankshaft per minute. Some fine castings have been employed in its construction, notably the bedplate, which measures 21 x 8 ft. and weighs 16 tons. The casing is cast in two pieces and weighs 22 tons, while the low-pressure cylinder weighs 9¼ tons. The total weight of the complete engine is 105 tons. The cylinders are fitted with slide valves, and are self-draining. The forced system of lubrication is employed. The oil is supplied to all the working parts by a pump without valves or packing, driven from the crankshaft, which discharges the oil at a pressure of 10 to 25 lb. per square inch through specially designed oil channels. The oil that escapes from the bearings drains into the crankpit, and is used again. The engine is coupled direct to a dynamo with a normal output of 1,400 kilowatts, but capable of generating 1,540 kilowatts. The steam pressure of the engine is 200 lb. maximum per square inch, developing 2,500 indicated horse-power.

A NEW PLANING MACHINE.

A Cincinnati firm has placed on the market a new and improved planing machine with single cylinder. The planes are 24, 27 and 30 in. wide, and 6 in. thick. Feed is driven from cylinders ; is powerful, steady and uniform, and under instant control of friction clutch convenient to operator. They have a patent sectional feeding-in roll in four sections, with each section centre-geared and gear driving downward. Each section independently raises and lowers for variation in thickness of work. This arrangement allows of the working of stock varying ¼ in. in thickness. The planer has as well four powerfully driven feed rolls, upper feeding out one raising parallel for different thicknesses. Rolls have sectional weights, insuring at all times perfect pressure on material. The bar before cut is sectional to correspond with feeding-in roll; bar after-cut is adjustable by hand-wheel. Bed is substantial and easily raises and lowers. Cylinder is of improved construction for assuring smooth and even work. All adjustments are easily, quickly and accurately made.

MACHINE FOR LAYING BRICK.

F. S. S. Johnson, of Stanbridge, Que., reports a recent invention, which consists of bricklaying by machinery instead of by hand. He says: "The machine, worked by two men and a lad, will lay 400 to 600 bricks per hour. Door and window spaces cause only a slight delay. The machine is suited for all plain work, such as walls, sheds, mills, factories, rows of cottages, piers of bridges, etc. Considerable pressure is put on the bricks, and it is claimed that the work is more firmly done than by hand. The invention will do the work of six or seven skilled bricklayers, and it is believed that a machine adapted to build a factory covering about 60 by 40 feet could be put on the market for $500. The apparatus can be readily worked after a fortnight's instruction."

"SLICK" OIL CANS.

IN this number, HARDWARE AND METAL produces a cut of the "Slick" oil can made by The Kemp Manufacturing Co. This oil can possesses some very special advantages. It can fill a lantern or a lamp in the dark much more easily than an ordinary can is able by day. This oil can entirely obviates any difficulties so frequently met with in the case of an ordinary can, filling a lantern or a lamp with a

metal font. It completely removes the risk of spilling oil, or soiling clothes, or dirtying lamps, as it is impossible with the "Slick" oil can to overflow the article when the tubes extend into the opening. The pump is attached in the simplest and strongest manner possible, and is detached by turning half way around. It is well nigh impossible for it to get out of order with ordinary use,

NEW CATALOGUE JUST ISSUED—WRITE FOR IT.

THE TRACTOR IN LUMBERING OPERATIONS.

THE roads in the hill country of California, Oregon and Washington, where are located the principal lumbering camps, are in a very crude condition, most of them having no paved surface, while the grades are extremely steep in many instances. Much of the formation is of a red clay, which in wet weather is turned into liquid mud, through which an ordinary wagon can scarcely be forced, although three or four horses or mules may be attached to it. Loose stones falling from the hill sides increase the difficulty of travel over these mountain highways, so that where animal power is used, double and treble the ordinary number of teams are required to "freight" lumber or other material from the woods to the mills or the railroad stations.

For the purpose of substituting steam power for animals, the Holt Brothers, of Stockton, the inventors of the farm tractors, have designed a powerful engine, which accomplishes remarkable results where it has been placed in service. The sizes range from 40 to 60 horse power. The driving wheels have tires comparatively narrow, from 18 to 24 inches in width with corrugated or roughened surface, in order to give them more traction upon the highways. Power is communicated to the driving wheels by roller chains on each side of the truck, which revolve about an axle which is driven by two sprocket wheels, also connected by roller chains with the engine. The tractor is guided or steered by a smaller front wheel, which is connected with a hand wheel by a sprocket chain, so that the motorman can turn it in any direction desired merely by using the strength of one hand. Most of the engines are provided with a steel drum upon the forward end of the truck frame. Upon this is reeled a wire rope or heavy manila cable, kept for the purpose of hauling when the tractor may be detached from the cars of logs or material to be transported.

On a level surface the motor will readily pull a train of trucks loaded with lumber weighing from 200 to 250 tons without difficulty. On the highway it can attain a speed of from 8 to 10 miles an hour, if desired.

It is used, however, in the forests where no highways exist, for transporting logs from the stump lots to the mills or the railroad stations. In this case the logs are usually chained together, sometimes mounted upon rollers, and then attached to the tractor, which pulls them to their destination by the most convenient route. Such is the strength exerted that it can actually be forced through bushes and over young trees 5 and 6 ft. in height, while being able to turn in a circle of 150 ft., it can be guided in and out among the trees. It will haul in this way a dozen large trunks, a single one of which would require the strength of 10 or 12 horses or mules to move ordinarily.

The ordinary highways have such steep ascents that frequently the tractor can reach the summit only by being separated from the trucks or cars which it is drawing. The drum, or cable, is used to haul its load to the top of the hill. The cable is unwound, fastened to the cars or trucks at the bottom, and the tractor converted into a stationary engine, exerting all its power upon the rope. In this way, trips can be made over routes which are literally impassable for waggons. Another great difficulty encountered, especially in California, is sand. This is partly overcome, also, by the broadness of the tires, which prevent the engine, in spite of its weight, from sinking into the surface of the road to such an extent as to become stalled.

The type of tractor, says The Scientific American, used especially in lumbering and mining operations is what is termed the freighting engine, and weighs from 14 to 21 tons when equipped and ready for service. It will consume about 225 lb. of coal per hour when working at its full capacity, or about one ton daily, while its consumption of water is about 300 gals. per hour.

Since the use of oil in industries on the Pacific Coast has extended into Oregon and Washington, some of the tractors have been fitted with apparatus for burning oil in place of coal. It is calculated that one will utilize about 28 gallons of the ordinary oil hourly when in service. The boilers furnished are of two types—corrugated flue and water-leg. In freighting outfits a smaller force of hands is required than in farming operations with the tractor. The larger types have an engineer and fireman if coal is used. The latter may also act as trainman, coupling and uncoupling the cars when necessary, so that really only two men are required to transport the material. As a substitute for horse drills in planting seed, the motor has been very successful, accomplishing 20 to 30 times as much at a time as two or three teams of the heaviest draught horses.

Calculations made of the economy of operating with the tractor show that it will plow and harrow, seed and harvest a certain area at about one-sixth of what it costs when men and horses are used. Lumbermen who have tested it for freighting purposes estimate that the cost is about one-third of the sum expended when teams are employed. In these estimates the fuel and water and repairs are all carefully estimated and deducted.

WHALEN PLANER TOOL.

A new combination planer tool is being put on the United States market. It is formed with an apron and tool block, and is provided with a turret movement that works in the end of the shank. It will cut in any position desired, across a surface, down the sides, and do right or left undercutting. In order to set the turret, the nut in rear is loosened and the thumb nut at the side screwed down. The latter operation withdraws the locking pin, leaving the turret free to be set in any position. The main object of the tool is to do away with the lifting or dragging of large and heavy tools on the return stroke when planing side work or undercutting. It is particularly useful for planing slots in the side of a piece where a side head cannot be used to good advantage.

A GOLDEN WEDDING.

IT has not fallen to the lot of many of our subscribers to have the privilege or the opportunity of attending golden weddings. Mr. S B. Noble, hardware merchant, St. Catharines; C. E. Noble, hardware merchant, Dundalk, and Rev. S G. Noble, of Rural Valley, Pennsylvania, and Mrs. Marshall (sister), Niagara street, Toronto, started on July 15, via C.P.R., to attend the golden wedding of their parents, Mr. and Mrs. Edward Noble, of Oxbow, Assa., N.W.T.

Mr. and Mrs. Noble, senior, were married in 1852 and made their home near the place where the flourishing town of Dundalk is, but which was at that time a howling wilderness. They spent over 40 years clearing up the farm, going to the West nearly 10 years ago. Like most people in a new country they were blessed with a large family, six sons and six daughters, all living and well but one daughter. Of the 11 children living, 7 are in the West. Messrs. A. B. and C. E. Noble, who have been subscribers to HARDWARE AND METAL for many years, know well the trials and hardships that young people in the early days had to endure. They did not have the privilege and opportunity of receiving even a good common school or business education, but what little they got they made good use of. Mr. A. B. Noble carried on a successful business for 20 years at Shelburne, and has by his energy, push and ambition built up a fine business, and has the best store in the Niagara Peninsula. Mr. C. E. Noble has also made a success, and enjoys the reputation of being a good business man.

MANUFACTURERS' AGENT AND THE JOBBER.*

By Arthur S. Jones, Memphis, Tenn.

MANUFACTURER is defined by Webster as "a person engaged in the business of working raw materials into wares for use."

Agent is defined by the same authority as "one intrusted with the business of another," as an attorney, a minister, a deputy, a factor. In law agent implies a kind of service in which the one serving has some discretion as to the manner of accomplishing the object. Hence the manufacturers' agent is a complex or composite type of representative, and may be either an itinerant salesman or local broker. Now that we have established the character and province of the agent, we must fix his relationship to the manufacturer and the jobber, and the first question we will ask ourselves,

IS HE A NECESSITY?

From the time of the first commercial transaction the travelling man has played an important part in the history of the world, and has been a potent factor in the distribution of manufactured products; first, as the representative of the manufacturer to the jobber, and then the jobber to the retailer, and in Great Britain to-day, under the name or title of factor, he represents the manufacturer direct to the retailer. This condition does not prevail to any extent in this country as yet, but as our country becomes more densely populated, we may expect that it will. You would hardly deny that the manufacturers' agent is a necessity, because the trade conditions prevailing to-day would disprove the assertion. The experiences of the past twenty years have certainly established his value. Throughout this broad land there are distributed manufacturers of more or less importance, each of whom is entitled to certain representation, on the shelves of every jobber engaged in the sale of hardware. In years gone by, when the product of the manufacturer bore to him a profit of from 50 to 75 per cent., and to the jobber of 100 or more per cent., the small manufacturer could well afford to employ his

INDIVIDUAL REPRESENTATIVE

to visit the trade and pay him well for his services; but in the evolution that has taken place in the last decade conditions have so changed and profits have been so reduced that he can no longer afford the necessary outlay of travelling expenses and salary, notwithstanding the fact that the goods he manufactures and offers the trade possess the same merit and are of the same high standard. Naturally, the smaller manufacturer was the first to realize the value of the manufacturers' agent, but it was not long after that the larger and more pretentious ones perceived the necessity of curtailing their expenses, and out of this very necessity, and others equally as important, arose the manufacturers' agent. It is estimated that 65 per cent. of the hardware and other kindred lines manufactured in America is sold through the individual efforts of the

MANUFACTURER' AGENT,

or broker, as he is sometimes called, and, as a further proof of his potency, it is only necessary to assure you that a very considerable proportion of our wares sold in foreign countries are handled through his agency. If these statistics are not misguiding, his worth, then, to the manufacturer is conclusively shown, and it only remains to establish and fix his relation to the jobber.

Our authority defines a jobber as "one who buys of the manufacturer or importer and sells to the retailer."

The success, then, of the jobber is dependent on the amount of profit derived from the sale of his wares. If all manufacturers were in a position to

DICTATE A SCHEDULE

of selling prices, as we find in some lines to-day, the jobber's profit would no longer be governed by his ratio of expenses, but fixed and dictated by a higher power. Many factories now being represented by manufacturers' agents, if they were compelled to pay the travelling expenses and salary of a representative of the same standing, would be forced to either advance prices, reduce the quality of their goods, or, in the extreme, abandon the field entirely. The ultimate result of this would be the pooling of interests. Competition would be strangled—higher prices would prevail—selling schedules be dictated, and the jobber's profit reduced. The manufacturers' agent's success lies in his ability to handle his various accounts and do justice to each.

The successful agent is specially endowed with a knowledge and gift, which not only applies to his salesmanship, but that of his ability to impress those with whom he comes in contact favorably.

In this he is of an advantage to the manufacturer and a convenience to the jobber.

*Paper read before the Southern Hardware Association.

BEGIN AT THE BOTTOM.

A successful business man sent his son to college, and when the young man graduated the father called him into his office, relates Boyce's Hustler, and said: "My son, in a few years I wish you to take my place and continue the business I have established. I think all the world of you, and there is nothing I would not sacrifice for your benefit. The first thing necessary for you in conducting the business is experience. If I could buy experience for you I would gladly pay $100,000. I would not hesitate a minute. But since the world began no man has been entitled to start in at the top. If you are to make a success it is necessary for you to give careful attention to every feature of the business you expect to manage. You must begin at the bottom and spend several weeks in each department of every kind of work so as to learn for yourself how to do the things which you tell others to do. No one is fit to manage until he has himself been managed. Whenever you read about a house continuing in prosperous business through several generations you may be sure that the successive proprietors started in at the bottom and learned how to do the things they afterwards told others to do."

A MERCHANT KNIGHTED.

Sir Robert Boak, as President of the Legislative Council, has done much service for the Province of Nova Scotia, and deserves his knighthood.

Sir Robert was born in Leith, Scotland, on September 19, 1822. His father, Robert Boak, of Shields, in the county of Durham, Eng., on his retirement from the army, became an officer in Her Majesty's Customs in Halifax in 1837, and retained that position until he was superannuated.

The present knight came to Halifax with his father in 1831, and in 1847 became a member of the firm of John Esson & Co., wholesale grocers. In 1854, he retired from that firm and formed the firm of Esson, Boak & Co., and engaged in the West-Indian trade. In 1864 this latter firm was dissolved, and he then continued business in his own name, and under the firm style of Robert Boak & Son, until 1875, when he retired from business. Sir Robert became a member of the Legislative Council in 1872, his commission as M.L.C. being dated February 20; on March 20, 1878, he was appointed president of that body. He was a member of the Government and treasurer of the Province from December 1877 to October 1878.

It will be seen that Sir Robert Boak has been for 30 years a Legislative Councillor, 24 of which he has presided over the second chamber. His services well entitle him to be marked out for the honor of knighthood now conferred.

How to Succeed.

A Business Man's View.

AN address was recently delivered in London, Eng., before a gathering of young men. The speaker was a well-known business man, and his remarks were so interesting and valuable that "Hardware and Metal" takes pleasure in reproducing a few of the most pointed of them:

YOUTH IS YOUR PRESENT GLORIOUS POSSESSION

Value it. It is a time of vision—when we build our castles, and weave our romances, and dream our dreams; but it is also a time of possibility, of special opportunity, of enthusiasm, of quickened and unbounded life, when our characters are formed, and our destinies are determined. For, although I believe "there is a divinity that shapes our ends," I also believe that we ourselves have much to do in shaping our ends and determining our destiny.

And with this consciousness, I want for a few minutes to stand with you upon life's threshold, and to ask the question, "What are you going to make of life? How can you succeed?" For, I take it, we shall be in general agreement when I submit that it should be the resolute determination of every young man to succeed in life. He should early form a lofty and noble purpose, and then pursue it with persevering and courageous tenacity. A drifting, aimless life is a sorry spectacle. A youth without a definite aim is like a ship upon the ocean without rudder or compass, at the mercy of the wild tempestuous sea. It is impossible to overestimate the importance of having

A WELL-DEFINED, NOBLY CONCEIVED AIM

Let our aspirations soar high. We may probably fall short of them, but it is gloriously possible that we may rise above them, and it is absolutely certain that the higher our ideal the higher will be our life.

But supposing we have formed a life purpose, and that it is worthy of our best powers of mind and heart, the question naturally arises: How is success to be attained?

Well, first of all, it is not to be attained by merely desiring it. We do well to fix this in our mind as an unalterable fact. Visions never evolve into fulfillment except as they are translated into the practical details of daily duty. No man ever yet became successful by dreamingly contemplating his ideal.

Nor is success secured by spasmodic effort. Dash and brilliance may captivate and dazzle, and suggest in the minds of some great promise, but observation and experience show that permanent success is not achieved by fitful and capricious endeavor. There is no royal road to success. The road we have to travel is the highway of life, which is the common heritage of all mankind.

So then for our encouragement let us remember that

SUCCESS IS POSSIBLE TO ALL.

There is an open competition for the world's prizes. It is not, however, absolutely certain that we shall attain success. Many worthy and good men fail—we may; but it is nevertheless our duty as well as our right to strive for it, and to do all within our power to secure it.

'Tis not in mortals to command success,
But we'll do more . . . . deserve it.

Let us see that if we do not succeed the fault shall not be ours.

I have closely observed young men for nearly 30 years, and have mixed intimately with them during that period spent in the heart of city life. I have seen men succeed, and I have seen men fail. And in most, if not in all cases, success has been achieved or failure experienced through circumstances largely within the control of the individuals themselves.

First, I would suggest that no man is likely to succeed who does not throw his heart and soul into his work.

HALF-HEARTEDNESS IS FATAL TO SUCCESS.

Said one to me who had attained great proficiency in the art of elocution, "The secret is to lose yourself in the piece that you are rendering." And so it is.

The reason why many young men do not make headway is because they lack spirit and grit. They appear to manifest no interest in what they are doing, and perform their duties in a listless, apathetic way. It is with them, so much work for so much wage. Not how much, but how little they can do. Their thought is rather for the hour of leaving the office or warehouse than to excel in the duties entrusted to them. How can such reasonably expect promotion or advancement? or be surprised when they are passed over and others selected? No, depend upon it, life's prizes are not thus won. We must put our heart and soul into our work if we are to succeed in it.

Self-improvement is another condition of success. We do wisely to acquire all the knowledge we can of the particular work in which we are engaged. There is always room for the man of ideas. So let us cultivate

AN INQUIRING MIND

Be on the alert for information. Not be above being told. Let us take pains, do our best, and be ever seeking to fit ourselves for some higher niche. As a rule, such men are not overlooked. Let us perform our duties faithfully and well, not so much for the purpose of securing success, as for inward satisfaction, and the commendation of our own conscience. The conscientious performance of present duty is a never-failing preparation for some higher sphere.

Further, in the pursuit of success, punctuality must be cultivated and exercised. An unreliable man cannot expect to succeed; he does not deserve to do so. So I would that we should say to one another, "Be punctual. Keep your engagements." It has been well said that "Punctuality is the jewel on which the whole machinery of successful industry may be said to turn." Lord Nelson once remarked that he owed all his success in life to his being ready for every appointment a quarter of an hour beforehand.

But there is a further point I would strongly emphasize, and that is perseverance, without which lasting success is absolutely impossible. Many men of ordinary abilities, by their

PERSEVERING APPLICATION TO DUTY

have risen to honorable and distinguished positions, while others, possessed of exceptional capabilities, through lack of this essential quality have failed to make their mark in life. It is the man who, to use Abraham Lincoln's wise maxim, keeps on "pegging away," that is most likely to achieve success. Do not let us, therefore, be easily discouraged, but rather regard every difficulty as an obstacle to be overcome, and as a stepping-stone to further achievement. Never give up. What appears insurmountable to-day may be comparatively easy to-morrow. Do not make the fatal and disappointing mistake that success is to be attained without effort and difficulty. You cannot pluck the fruit of success without climbing the tree, and the fruit cannot be reached without difficulty oft repeated.

No man can be really successful unless he strives after and cultivates true nobility of character. He may win the world's prizes, and attain brilliant success, according to the world's verdict, but is is the "conscience void of offence toward God and man" that will yield real happiness, and it is the life dominated by Christian principles that is the successful life indeed. My closing word, therefore, is, "Keep your record clean."

Stove Linings.

The Thos. Davidson Mfg. Co., Limited,

MONTREAL.

NOVA SCOTIA MARKETS.

Halifax, July 15, 1902.

DURING the last week there has been considerable falling off in the heavy volume of hardware business which has been done during the former part of the season. A quiet season is not unexpected during July and August, and the hardwaremen are not complaining, though there is only the ordinary light midsummer business to attend to. As in other lines of business the employers and staffs are planning their vacation trips, which will fill in the season until business livens up again.

There has been another reduction of ½c. a lb. on manila and sisal, but as this is the dull season in all kinds of cordage, the change will not be of great benefit, except that the stronger financial firms may do considerable buying. This may not take place yet awhile, as there appears to be a prevailing opinion that there will be still further reductions in the near future.

* * *

The business done in haying tools and farm implements has been excessive this season, but the trade in this line is now about over. Builders' hardware is still in good demand, though a lighter business is being done than a month ago. The hot weather and the approach of flytime induced large sales of wire screens and netting, but the demand is now about supplied. There has also been a good demand in fishing lines, flies, reels and rods, but though the fishing season is only fairly under way, nearly all the sportsmen have renewed their gear for the season and the demand is now only nominal. This has also been a good season for the sale of athletic sporting goods.

* * *

The situation in screws, on account of recent changes, is not quite satisfactory to the hardwaremen. It appears that the Canadian Association, having fixed the price for selling, has called on the Halifax jobbers to add the freight to Halifax. The difference to the trade here will be considerable. For example: A dealer in Amherst buys in Halifax. He has virtually to pay the Montreal price, plus freight to Halifax, and from Halifax to Amherst, whereas formerly he had only the freight of the latter distance to pay. It now appears as if it would be cheaper for him to buy in Montreal, and Halifax will thus be at a disadvantage except in trade east of this point. The situation with reference to horseshoes is somewhat similiar. We understand that the Maritime Association has protested against the changes, but with what result we are unable to learn.

* * *

Linseed oil is somewhat easier, and a reduction of 2c. per gallon is quoted. Turpentine remains firm. There is only a moderate demand for these at present. All kinds of illuminating and machine oils remain unchanged at former quotations.

* * *

A meeting of the Maritime Hardware Association took place at Digby last week when many matters affecting the trade were discussed, only a general statement of which can be obtained for publication. The Maritime Association claims that it is in existence for the purpose of combating the fixing of high prices by the Canadian Association, but they no doubt consider, more or less, the matter of their own selling price. They meet quarterly, and the meetings are generally very largely attended by representative firms in the various Maritime Provinces.

* * *

The exports for last week at this port were very large, and the bulk of value went in a new direction. The amount is $213,858, and is apportioned as follows: France, $139,799; Great Britain, $23,756; United States, $22,367; West Indies, $9,762; Newfoundland, $8,024; Germany, $6,800; Russia, $2,600; Italy, $950. The large amount exported to France is accounted for by a very large shipment of canned lobsters taken by the steamer Manchester Shipper.

R. C. H.

TIN PRODUCTION AND CONSUMPTION.

According to The Engineering and Mining Journal the total world's production of tin in 1901 was 89,878 long tons, as against 80,311 tons in 1900 and 73,886 tons in 1899. As the supply of tin comes chiefly from countries in which no accurate statistics of production are kept, estimates are necessarily based largely upon trade statistics showing the movements and consumption of the metal. The figures below are compiled chiefly from the circular of Messrs. W. T. Sargant & Sons, of London, and from those of Richard & Friewald and of De Monchy & Havelaar, of Rotterdam. These figures give approximately the production of tin for three years past, in long tons of 2,240 lb.:

	1899.	1900	1901.
Straits to Europe and United States	44,501	46,058	50,382
Straits to India and China	1,480	1,800	2,650
Totals, Straits	45,981	47,858	53 032
Australian shipments	3,370	2,975	3,276
Banka, Billiton and Singkep	14 935	18,013	19,400
Bolivian exports	5,000	6,965	9,670
English production	4,500	4 500	4,500
Total production	73,886	80,311	89,878
Estimated deliveries	80,900	79,500	87,700
Surplus	*7,014	811	2,178
Estimated stocks	21,572	21 505	25,620

* Deficit.

In addition to the production given above, there is a small quantity of tin ore found in Germany and a little in the vicinity of Guadalajara in Mexico. In China there is a considerable output, the amount of which cannot be estimated with any accuracy. Although it is not a producer, the United States is the largest consumer of tin. During 1901 the total imports of the metal into this country—which are practically the consumption—were 33,286 long tons, or 37 per cent. of the world's production. The tin which comes here is chiefly Straits tin, part being imported directly, though a considerable share is received by way of British ports. Some Banka tin also comes here, chiefly by way of Holland. Great Britain is the second largest consumer of tin, while Germany is the third. Holland, while it transacts a large trade in tin, consumes only a small quantity, most of the metal received from the East by the Dutch ports being sold and reexported.

HOT AS BLAZES!

That is what our forging room feels like these days. But we have to keep at it, hot or cold, to supply the demand for "C" horse nails

We have completed on the 30th ult., another half-year's business, and we are now in a position to state, larger than the same period last year. The people know a good thing in Canada, and they show their appreciation of our nail by buying more of them every year, and at a better price than any of the other fellows can get. Of course, they say their nails are **"just as good,"** but why don't other folks say so, and pay them the same price?

Our "C" nails are worth more than any other horse nail in Canada—bar none. We intend to keep them in the front—no dropping to the rear rank.

Don't be one of those fellows who buy "cheap" nails, and worst of all those blind "Yankee seconds." Fight shy of any nail offered you on which the maker is ashamed to put his name. **"There's a nigger in the fence"** even although he is a **"Black Prince."** Our name is on every box we sell of "C" brand, and it affords a guarantee to the buyer, backed up by 37 years' experience in making horse nails exclusively, that you are going to have the best. Good day!

CATALOGUES, BOOKLETS, ETC.

GLASS CATALOGUE FOR HARDWAREMEN.

THE Hobbs Manufacturing Co., Limited, of London, Ont., have just issued a new catalogue of all kinds of glass for building purposes, which contains a large number of designs of leaded glass, sandcut, electro-glazed and all other kinds of fancy glass.

This company has recently made conconsiderable changes with the object of increasing its facilities for the manufacture of leaded art and other glass, and is able to offer exceptionally good value, workmanship and prompt delivery. A large and complete stock of all kinds of window and fancy glass will be carried. The new catalogue should be in the hands of every hardwareman.

A WELL DESIGNED CIRCULAR.

The Canada Paint Company have issued a midsummer circular; and, as is usual with the advertising this company produces, it is bright, tasty, and to the point. A thermometer engraved in one corner registers 90 degrees, so there is no need of the heading, "Midsummer." But the headpiece is attractive throughout. It is a lithographed view of Old Windmill point, near Prescott, Ont., which all Canadians know as the place made famous by the fight which took place there during the troublous times of 1837-38. The signature of Mr. Robt. Munro is lithographed at the bottom of the circular. The circular thanks their clients for their support during the first half of the year, and proceeds to give reasons why such support should be continued and increased during the other half. It has all the appearance of a personal letter.

M'CLARY'S CATALOGUE.

The McClary Manufacturing Company have displayed noteworthy marks of genius. They have made a stove catalogue attractive. HARDWARE AND METAL rarely sees more tasteful covers upon any catalogue. The arrangement of contents, the character of paper used, the distinct, clear outlines and bright attractiveness of the cuts in every way are creditable to this enterprising firm.

This illustrated descriptive catalogue of 1902 contains illustrations and detailed descriptions of their "Famous" lines. Steel ranges and heaters, cast iron cooking and heating stoves and ranges, gas and oil and camp stoves, warm air and agricultural furnaces, registers and hollow wares comprise the total of this attractive and useful volume.

Other excellent features of the catalogue are the directions for operating the "Famous" stoves, ranges and furnaces, the works and branch warehouse notes, a review of trade conditions, and their list of telegraphic code words.

Special attention might be drawn to the double-oven ranges.

In every way this catalogue is a most complete production.

ARTISTIC HARDWARE.

An exceedingly handsome catalogue is the Architects' Edition of Artistic Hardware, issued by The Gurney-Tilden, Co., Limited, Hamilton, Ont. This edition, the fifth, contains a comprehensive grouping of the trimmings required for various buildings. A complete list of the finishes most suitable for the various designs is furnished. The catalogue contains many bright, clear cuts of locks, latches, pin butts, catches and pulls, with quotations.

The whole edition is handsomely bound in a neat cover of blue and white. The excellence of the paper is seldom found in many of the best magazines. The catalogue reflects great credit upon this enterprising firm.

"ECONOMIC" STOCKS AND DIES.

Decatur, Bull & Co., Montreal, have been appointed sole Canadian agents for the "Economic" stocks and dies for F. E. Wells & Son, Greenfield, Mass.

In the "Economic" dies you get everything that is to be had in a solid die except unnecessary weight and inferior steel, and you get results that cannot, it is claimed, be had in any solid die sold at a similar price. It is said to be the fastest and cleanest-cutting die in the market, and will wear longer and oil easier and cut truer. It is a perfectly new device made of pressed and corrugated steel, so ingenuously constructed that it leaves no room for the rival competitor in price, weight, speed, or accuracy. Although perfectly new upon this market, it has become a popular die in England, Germany and the United States. They are carried by the leading wholesale houses of Canada who will supply catalogue on application.

THE NEW GEM SAFETY RAZOR.

The many new features and the superior merits of the new "Gem" safety razor have combined to greatly increase its sales in Canada. The trade mark "Well That's Fine" is a fair criticism of the satisfaction evinced by the many who are now employing it. The dealer need have no fear in recommending this article to his customers. The makers are the "Gem" Cutlery Company, with works at 34 Reade street, N.Y.C. In most of the large cities of Canada can be found distributing agents. The manufacturers will send them on a 10 days' trial.

NATIONAL CUTLERY SHEARS.

National Cutlery Co.'s shears have proven a testimonial for themselves. The rapid increase of their sales with some of our leading wholesale firms speaks for their quality and finish.

These shears are laid with special steel of superior quality, tempered by patented method, which process gives uniform results. There are no soft spots, no feather edges. The only shears made with a steel ride, and every shear fully warranted. They are put up in separate pockets. Decatur, Bull & Co., Montreal, are sole Canadian agents.

Apollo galvanized iron is all alike; if not, send back to your jobber at our expense—we shall hear of it.

CURRENT MARKET QUOTATIONS.

July 18, 1902

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Wire-Edged Ready Roofing

The above Roofing is fast becoming the popular substitute for Shingles, because it is **Durable, Economical** and **Fire-proof.** We wish to supply customers through the Retail Hardware Merchants, and, with that object in view, we are spending thousands of dollars in advertising our goods. It will be your fault, not ours, if we are forced to sell direct to the user.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

Cable Address { Adscript, London. / Adscript, Canada.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

MORE BUSINESS MEN WANTED.

THERE is one feature in connection with the retirement of Lord Salisbury from the British Cabinet that has not yet attracted much attention, and that is in regard to the business element in the Government.

As our readers are well aware, there are very few business men in the British Cabinet, and this fact has been the subject of some criticism by the British trade press.

According to a cable despatch received this week, it is evident an effort is to be made to create a stronger representation of business men in the Cabinet, which will necessarily have to be reorganized on account of the retirement of Lord Salisbury. No less an authority than The London Times says that there is a strong feeling developing that now an excellent opportunity is afforded for securing reform in this direction. It is significant that the men in the present British Cabinet who have been most successful are Chamberlain, Ritchie and Arnold-Foster, almost the only commercially-trained men in the Government.

This agitation for a stronger representation of business men in governments is gradually increasing. Strong as may be the feeling in certain quarters in Great Britain that a change is necessary there, it is a great deal more so in Australia, where all the members of the Cabinet of the Commonwealth are lawyers. Our trade paper exchanges from there are very outspoken in regard to this deficiency of business men in the Government of that country. The new tariff has been before the Australian Parliament for about nine months, and it has only so far passed through the Lower House, being still in the Senate. This long delay in dealing with the tariff is doing a great deal of harm to the trade and commerce of the country, and the business men are not only dissatisfied with the delay, but they are awakening to the absence of the business element in the Cabinet.

This is, if it is anything, a commercial age, and it naturally follows that there should be in our parliaments a strong representation of practical business men, if we are to have businesslike legislation.

Great Britain, essentially a commercial nation, is the Mother of Parliaments; it would be a consummation much to be desired if she became the mainspring in the movement for inoculating parliaments and, of course, cabinets with the business element.

When the members of trades unions strike business frequently gets a black eye.

IT PAYS TO BE ALERT.

IT always pays business men to be not only on the alert, but to take active and immediate steps to remedy grievances as far as it lies in their power.

A cable despatch a week or so ago stated that the British Government, in asking for tenders for supplying Bermuda station with flour, specified a brand which was purely a product of United States mills. The matter attracted some attention from the press in Canada at the time, and the comments were not by any means favorable to the action of the War Office, which should have been better informed unless it was really desirous of giving the contract to a foreign country.

Mr. F. W. Thompson, the managing-director of The Ogilvie Milling Co., when he became aware of the condition of affairs, immediately drew the attention of the Dominion Government to the matter. The Government in turn sent a despatch to Lord Strathcona, who brought the matter to the attention of the War Office. The result was that the conditions of the contract were amended, and a Canadian company has received an order for the flour.

CANADA'S PROBABLE LONDON AGENT.

RUMORS current in the daily papers lend plausibility to the general belief that a Canadian trade commissioner will very shortly be appointed to take charge of this country's commercial interests in London. Several names have appeared in print as likely appointees, but so far as we can make out the name of the man who will in all probability get the position has not yet been suggested. Mr. James Cummings, of Lyn, who has been mentioned, and who made an excellent report after conducting investigations as special commissioner to Africa, is indeed a strong man, but his chances for the appointment are considered slim. Another aspirant is Mr. Peter Ball, of Toronto, a nephew of the late Hon. George Brown, who, if he possesses similar abilities to his distinguished relative, would fill the office well.

But we have good authority for saying that neither of these gentlemen will be appointed. The Government's choice is going to fall on Mr. George Anderson, of Toronto. Such is the dictum of a gentleman who is in close touch with the Ottawa authorities and who usually knows whereof he speaks.

True, Mr. Anderson is at present on his way to the Yukon, but this is merely a preliminary canter, for he is working for the Government along trade lines there.

Mr. Anderson has excellent qualifications for the post. Six years ago he was special trade commissioner to Japan. Business men will recall the good work he did there and the splendid report on Japanese conditions which he prepared. Ever since he showed the trade possibilities of the Eastern country, Canadian business has grown in the Orient.

To review the situation, the movement for the appointment of a commissioner began early last year when Mr. George H. Hees, of Toronto, addressed the Manufacturers' Association on the subject. He had experienced the advantages of the presence of Mr. G. S. Larke in Australia and urged that London should be similarly equipped with a commissionership. Since then the press and the Manufacturers' Association have carried on an active campaign to secure an appointment and this paper has not been behind in lending support to the movement. At the last interview between the Government and the Association, it was intimated that an appropriation had been made, which The Globe announced next day amounted to $20,000. At the same time the Hon. G. W. Ross promised assistance to the amount of $5,000. There can be no further doubt that the Government will establish a trade commissioner in a good building in London within the next six weeks.

LINSEED OIL AND TURPENTINE LOWER.

QUITE a marked decline has taken place in Canada this week in the price of both linseed oil and turpentine. In linseed oil the reduction is 3c. and in turpentine 2c. per gal. The decline in both instances appears to be due more to local influences than to outside market conditions.

Turpentine has been weaker in Savannah, but on Tuesday prices were firmer and quotations were advanced ½c. per gal. in New York in sympathy. Since then there has been a further appreciation in the primary market. But while this improvement was taking place in the outside markets the local market was taking an opposite course. Stocks here have been light for some time. Early in the week, however, a small shipment arrived which relieved immediate necessities. And on Tuesday, owing to the near approach of a large shipment, the market broke and prices were marked down 2c. per gal., as already pointed out. The weakness that existed on the Savannah market until a few days ago was due to large receipts at that and other ports in the South.

At the time of writing the tone of the turpentine market is strong. And should it continue so it is quite possible that there will be some recovery in prices in Canada before the week closes.

Competition among the domestic crushers is the cause of the decline in linseed oil, although the fact that some shipments have recently arrived in Montreal from Great Britain has doubtless exercised some influence. Stocks of linseed oil in Toronto are light, and an improvement in the demand might possibly lead to an improvement in prices.

It is perhaps worthy of note that the importation of turpentine into Canada during the 11 months of the fiscal year ending May 31 last is less than during the same period in 1901, the quantity being 670,362 and 701,171 gallons respectively. In the imports of linseed oil, however, the results are the opposite. During the 11 months ending May, 1901, the quantity imported was 33,886 gallons, while for the same period this year the figures were 49,193 gallons. This increase is altogether due to the larger imports from the United States, the quantity from that country being 38,189 gallons in 1902 and 17,714 gallons in 1901. The imports from Great Britain were 15,636 gallons in the the latter year and 11,004 gallons in the former.

MARITIME BOARD OF TRADE.

ACTIVE preparations are being made by the officers of the Maritime Board of Trade for the annual convention, which is to be held in Sydney, Cape Breton, the third week in August. This body, which is composed of leading business men in the Maritime Provinces, is yearly becoming more important, and its influence is necessarily becoming greater in public affairs, particularly in matters appertaining to the commercial welfare of the Maritime Provinces.

The fact that the meeting is to be held in Sydney lends more than usual interest to it. We are not aware what subjects are being prepared for discussion, but we may depend upon it that they will be of the usual interesting character. There is one subject which we would like to see discussed, and that is, Confederation of Canada and Newfoundland. There is no class of business men in Canada more concerned in this question than the business men of the Maritime Provinces, and there are none who are, therefore, in a better position to discuss it in a more intelligent manner. It is to be hoped the officers of the board will see the wisdom of giving some attention to this important subject.

Business men's organizations are gradually extending their influence. And the more this influence is extended the better may we expect to see the affairs of the country administered.

"Firsts" and "Seconds" in Graniteware.

A MANUFACTURER'S EXPLANATION.

THE subject of "firsts" and "seconds" in graniteware, and the desirability of having each class stamped, has engaged the attention of the hardware trade at different times. The trouble arose in the first place with the custom among certain manufacturers of selling a second class of goods, chipped or disfigured in some other way, to department stores, which took, frequently, the whole of a manufacturer's stock, buying them at very low prices and selling them at a very small margin. This hurt the trade of the regular hardware dealer, who handled nothing but "firsts," and could not compete, as regards price, in any way with the dealer in "seconds." Customers, however, knowing nothing of the difference between the two classes of goods, paid little attention to a rough edge or other defacement, and thought they were getting a very great bargain.

When the dealer in "firsts" quoted his prices, he was met with, "But I can get this at ———'s at half that price." He then had to explain that the goods offered at half the price must have been a poorer quality, but such an explanation to one who could not recognize the difference in value had only very little effect. Had he been able to say to the customer, "If you look at this cheap graniteware of ———'s you will see the word 'seconds' or 'second grade' stamped on it," his remarks would have carried more weight. But there was no stamp to refer to. The only way to distinguish was that the first grades were stamped, while the second had no stamp whatever.

Now and then there appears on the market, usually in department stores, some second-grade white enamelware. This is usually imported from Germany. But according to manufacturers there are no "seconds" in graniteware whatever. They are no longer sold on this market and have not been for some time.

In regard to this it might be well to quote the manager of one of the largest Canadian manufacturers of graniteware, with factory at Montreal. He said to a representative of HARDWARE AND METAL:

"If the members of the retail trade believe that the manufacturers are selling 'seconds' to the department stores, or, for that matter, to any other kind of store, they are very much mistaken. No Canadian manufacturer has sold anything but firsts on this market since last year. I am quite positive of that. We used to do it, but came to the conclusion that it would be to our own advantage, as well as to the advantage of the retailer, to stop. Now, all 'seconds' are sold out of the country, and it would be impossible for a retailer to buy any unless he sent to another country for them, which, of course, would be absurd.

"We have often been told that we should not give the department stores better prices than the dealer who bought only in small quantities. That's a subject, of course, which allows of a good many arguments on both sides. The department stores, of course, use these goods a great deal for advertising purposes, and frequently sell them below cost. We do not care to see that any more than the retailer. The department store trade hurts us as well as them. But the fact is, that if we refuse to sell to them, as one or two of our customers have suggested, they would merely get the goods somewhere else, perhaps even import a second grade of goods and sell it at a price that would be even harder on the regular dealer. It is a subject that affects every trade almost—dry goods, groceries, books and others besides hardware—and there is no way out of it that I can see."

RECEIVED THANKS OF KING EDWARD.

Mr. Geo. Stephens, M.P., one of the most prominent hardware merchants of Chatham, is rejoicing over the good fortune which has befallen his elderly colored domestic, Mrs. Gale. This estimable old lady has a high standing in her section of the city as a "vaudoo," and, accordingly, is paid peculiar reverence.

Eighty years or so ago, before being in a position to enjoy British freedom and justice, she purchased a highly ornamented prayer totem, which, lettered on parchment, was held to be extremely efficacious in warding off evil.

As soon as she heard of His Majesty's illness, the loyal old lady sent it to him with instructions for its use, and, as by a peculiar coincidence, it arrived at the most critical period after the operation, she attributes her liege lord's recovery to its powers.

A day or so ago a letter of thanks, signed by the King himself, arrived, and now a keepsake, which is too valuable for common eyes to feast on, is held by her in the highest esteem.

GOOD ADVERTISING POINTERS.

THE prime object of advertising is to create a demand for an article. How many can pick the better of two pianos from which the brand has been removed? Yet men will pay more for an article whose name has become a household word by judicious advertising. Men sometimes say that if they had something new or exclusive they could succeed; but this is a mistake.

The cash register wouldn't go for years; the same way with the typewriters. There is nothing harder to advertise than new commodities. But judicious advertising can create wants and tastes. The consumption of oatmeal in Kansas City has increased six fold in ten years.

H. J. Heinz once told me that a merchant was a man who sold goods at his own price. The test of a real merchant is to create a distinctive demand for his goods, and to compel the people to buy them.

All there is in advertising is in carrying a message to the dealer and consumer. No medium should be used blindly. A great many use newspapers just as the Indian slept on one feather because the white man slept on a feather bed, and he wondered why the feather didn't help him.

The ultimate object of all advertising is the creation of prestige. People accept what a successful man says. Prestige doesn't come to everybody over night. It is acquired by persistent adherence to fundamental principles. It creates a peculiar constituency and as near a monopoly as is possible in these days.—John Lee Mahin, in Michigan Tradesman.

WHERE STOVES ARE NOT USED.

The following is the report, in full, of United States Acting Consul Childs at Zanzibar:

"Zanzibar.—Referring to the instruction to prepare a report on heating and cooking stoves, I beg leave to state that stoves are never used in Zanzibar. This, I think, entirely covers the subject."

RAILWAYS IN THE WEST.

IN his annual report, J. S. Dennis, Deputy Commissioner of Agriculture, deals thoroughly with the Territorial railway question. He says in part: "This question is allied to our road problem because thickly settled districts which now have to deliver their produce to existing railways by long hauls over roads that we are called upon to improve, will abandon such roads the moment they are within reach of the nearer railway facilities which will be provided by branch lines that sooner or later will form a network throughout the Territories. At the present time we have thickly settled districts, which produce large grain crops, situated 30 and 40 miles from the nearest railway station, and labor and hardship consequent upon haulage of grain for that distance to market.

"The situation in this respect throughout the Saskatchewan Valley will be relieved by the extension westward of the Canadian Northern Railway.

"In portions of Eastern Assiniboia, which at present produce the larger portion of the wheat crop of the Territories, the need of branch line railways is very acute.

"Throughout the whole length of Eastern Assiniboia the main line of the Canadian Pacific Railway runs parallel to and some distance south of the Qu'Appelle River, and the thickly-settled districts lying north of the river are cut off from railway communication except by long hauls, including the crossing of the Valley of the Qu'Appelle with its steep hills. This condition has necessitated an attempt on the part of the Department to provide and maintain long main roads north and south across this valley.

"In Southeastern Assiniboia the necessity for further railway extension is also becoming pressing, and as the country between the main line and Soo branch of the Canadian Pacific Railway has developed in the way of settlement in a marked degree during the past year, it is evident that an extension of the Pipestone branch of that railway through this district will become an urgent necessity within the coming year, if these settlers are to be provided with such railway facilities as will obviate a long haul for the large amount of grain that they will probably raise in the near future.

"The construction of the projected branch line of the Canadian Pacific Railway north of and parallel to the valley, which is looked for this year, will at once relieve the residents of the country traversed by this branch line of the present long haul to the main line, and will altogether change the present trend of travel over the roads and bridges we have been striving to provide.

"Anyone who thoroughly studies the question will easily recognize the necessity for immediate railway extension to provide for the great development which had taken place in the past few years."

NOVEL GAS FIRES.

Everyone delights in the log fire of our ancestors. Those hissing and spluttering tree chunks, however, cannot be used in hotels, where labor must necessarily be curtailed to the utmost limit.

Hence, proprietors desirous of pleasing their guests have turned to the log gas

fires, which can be fixed in ordinary grates, or, for better effect, can be stood upon andirons in a beautifully tiled recess. Thus a healthy and warm glow can be promptly obtained with practically no trouble to the maids or attendants. The fire is ready at all times, and all seasons—a great consideration in a variable climate such as ours—and, of course, makes neither ashes nor dust. The logs are made in upwards of 30 designs and patterns, upright for ordinary grates, whilst a large number of designs, including the split stick, the three stick, and the fork stick logs, are prepared for use with the brass and copper dogs and andirons.

"Ye Old Yule Log" is strikingly popular for comfort, cleanliness and convenience.

DEATH OF J. A. CHIPMAN.

The death of J. A. Chipman, of Halifax, occurred Friday, July 18. Deceased was about 55 years of age. He was a native of Annapolis, and resided at 27 Inglis street. He came to Halifax when young, and for years was in the flour business, but latterly was engaged in the commission business. He was a prominent member of the board of trade, and the promoter of the resolution urging that the C.P.R. take over the I.C.R. between St. John and Halifax, which provoked much discussion a few months ago. Mr. Chipman was for years a member of the firm of Chipman & Mutch, which firm did an extensive business. Up to the time of his death he did business under the name of J. A. Chipman & Co. He leaves a widow and a daughter.

PERSONAL MENTION.

The American Hardware Corporation of New Britain, Conn., announce the election of Mr. A. N. Abbe, of New Britain as purchasing agent.

Mr. C. R. Peckover, of Baines & Peckover, dealers in bar iron, bolts, rivets, etc., Bay street, Toronto, is spending his holidays in Northern Ontario.

Mr. C. L. Lightfoot, manager of the Gurney Foundry Company, Vancouver, stated after his return from a four weeks' trip through the Kootenays and Boundary country that business was fairly quiet, though satisfactory in his own line. He said he found a tendency among the up-country merchants to place orders with the Coast firms in preference to eastern houses.

LARGE ORDER FOR STAINED GLASS.

After some years in building, the Jesuits' Memorial Church at Penetanguishene is about completed, and in consequence a large order for decorative and stained glass windows has been placed with the Luxfer Prism Co., of Toronto. It was not before the committee had very carefully looked into the merits of the goods that this was finally decided upon, but after comparing with others, it was decided to give them the orders.

A large portion of the windows are to be installed in August, and the figure windows soon afterwards, as the members of the congregation are anxious to have the church opened early this fall. The outsides of the windows are all guarded with expanded metal.

TRADE CHAT.

The contract for the new public library building, Chatham, was let on Monday to Robertson & McKie, of that place, at $15,589.

Mr. D. Drummond, of the Montreal Pipe Company, stated at St. John the other day in connection with their recent heavy fires at Londonderry that there was a chance for St. John to secure the Acadia Mines Mills if concessions were made. It is stated that the Bank of Montreal wants to have the works rebuilt at Londonderry.

HAMILTON, ONT.

RIVAL COMPANIES FOR NIAGARA POWER.

ON Tuesday, July 22, The Canadian Niagara Power Company interviewed Hon. Messrs. Harcourt, Stratton and Latchford of the Provincial Government in reference to the new agreement with The Ontario Power Company.

The Canadian Power Company asked that before the new agreement with the Ontario Power Company be ratified by the Government they should be heard before the Park Commissioners, and that they should be furnished with full particulars and dimensions of the proposed works of The Ontario Power Company, in order that their engineers may judge if the new works will interfere with the flow of water to the intake of the Canadian company's works.

J. W. Langmuir, representing the Park Commissioners, explained that by the agreement of April, 1899, the monopoly of the Canadian company was done away with. Immediately the Commissioners entered into an agreement with the Ontario company, giving them the right to take water from the Welland River and lead it to the park, where they had a right to develop power immediately under the bank surrounding the park, and then to lead it through the park to Table Rock House, to a power house to be constructed in the gorge below the falls.

In the early part of this year the Ontario Company desired to secure the privilege of taking water from Niagara River at Dufferin Islands in addition to that from the Welland River, leading it across the park to join their canal from the Welland River. The commissioners were willing to grant this privilege on certain conditions to which the company agreed. These were that instead of an open canal through the park the water should be led by underground pipes, that the right to the first development under the bank should be abandoned, and that the Table Rock House should be raised and that crucial part of the park made more in harmony with a state of nature. The company further agreed to pay for the supplementary privilege, the same as if they were granted new rights.

Mr. Rankine, on behalf of the Canadian company, said he simply wished it to be thoroughly examined into whether the granting of such powers as had been conferred by the commissioners would not operate against them in the flow of water into their intake. He asked for a hearing before the Park Commissioners before the Order-in-Council was approved. The company's engineers said the new works might interfere with the Canadian company's intake, but their plans were not sufficiently detailed to enable a positive judgment to be made.

On behalf of the Ontario company, Mr. Z. A. Lash stated that this was an agreement between his company and the commissioners, and that the Canadian company were not interested in this matter. This was the one season when work could be carried on; his company have made their arrangements, and the delay that would be involved by the course suggested was of consequence. The duty of the commissioners towards the Canadian company was a question that might safely be left in the hands of the Government.

Speaking for the Canadian company, Mr. Wallace Nesbitt, K.C., stated that the company's engineers had said that the new intake would interfere with their works, although they could not make a definite statement until they had more detailed maps, showing dimensions and methods of construction. They asked that the matter should be referred back to the commissioners, where they wanted to be heard.

Mr. Harcourt suggested a friendly settlement; the Government were anxious to see both companies prosper and prosecute their works with all speed and diligence, and wanted nothing to happen which would couse delay. He promised to give an answer to the companies in two or three days.

The Value of Quality.

The one thing and the most essential thing in any article that distinguishes it, that makes it better and more satisfactory than other similar articles in quality.

THE SHERWIN-WILLIAMS PAINT

has every essential of quality. It's a well made paint—one that always gives satisfaction to the user and never brings discredit on the dealer. It's a paint that a dealer may pass over the counter and be certain of good results.

In addition to intrinsic worth, it has the selling qualities that build up trade and make money for the dealer. It's well advertised and is known and sold all over Canada.

Our B-13 booklet tells how Sherwin-Williams Quality and Sherwin-Williams Advertising builds up paint business. Write for it to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY

A VISITING HARDWAREMAN.

Mr. Thomas Marshall, of Congdon & Marshall, hardware dealers, Dunnville, Ont., was in Montreal this week, and spent several days visiting his friends among the wholesale trade and taking in the sights generally. Mr. Marshall was much interested in the picturesque features of the city, especially some of the older buildings erected under the French regime, as he is a bit of an antiquary. He was much struck with the establishment of E. Cavanaugh & Co., on Notre Dame street, one of the best equipped hardware stores in the country. Considering that the place was nearly two miles from the real business centre of the city the store was a surprise, both on account of its splendid appearance and the amount of business done. All the staff are in uniform, and the goods in the store and windows are very artistically displayed. The showcases of cutlery, gun materials and other lines were more like an exhibition than an ordinary store display. The lock-room, where the handsomest locks procurable are displayed, received great praise from Mr. Marshall, and he warmly congratulated Mr. Cavanaugh and his able assistant, Mr. Default, on the admirable appearance of the place.

John Fairley, general merchant, Carberry, Man., is succeeded by T. R. Brough.

HARDWARE MERCHANTS MEET.

THE regular monthly meeting of the hardware section of the Retail Merchants' Association of Canada was held in their boardroom, corner Bay and Richmond streets, Toronto, on July 17, 1902, E. R. Rogers in the chair.

The chairman explained to the members the action that had been taken at their last meeting regarding the amalgamation of the Retail Hardware Association, and the formation of the hardware section of the Retail Merchants' Association of Canada, and trusted that it would result in great benefit to hardwaremen, not only in the city, but to those throughout the Province.

The question of holding a Provincial convention on September 9 and 10 was fully concurred in, and the following subjects among others were proposed for discussion, and will be submitted to the various branches throughout the Province:

1st. The best plan of organization, as laid out by the Association, so that direct communication can be obtained between all sections of the hardware trade throughout the Province.

2nd. The best plan to adopt to bring about better conditions for the retailing of hardware.

3rd. What proportion of expense should be added to hardware merchandise so as to ascertain the actual cost?

4th. What should the general profit be on goods sold in everyday business, such as nails and heavy hardware, granite and tinware, paints, oils and glass, poultry netting, stoves, spades and shovels, harvesting tools, etc.?

5th. The injurious effect department store methods have on the retail hardware trade, and the best way to remedy it.

6th. The effect on the retail trade caused by wholesalers and manufacturers selling direct to consumers.

7th. The advisability of holding joint conferences with wholesalers and manufacturers, so as to exchange suggestions for trade improvements.

It is proposed that members from various towns read papers on the above subjects, and all unite upon some common plan for future work.

The question of selling second quality graniteware for first quality was very fully entered upon, and, when the subject comes up at the convention, the question will be considered as to the advisability of having a mark placed upon first and second quality goods, so that the public will be able to discriminate between them.

LONG DISTANCE TELEPHONES.

The entire telephone system throughout Lewis Bros. & Co.'s establishment at Montreal is being converted into a long distance service. This will be a great convenience to customers at outside points, especially in such weather as has prevailed lately, and will doubtless have the effect of increasing the number of orders from the surrounding places to Lewis Bros.

The name **IVER JOHNSON** on a **SINGLE BARREL SHOT GUN** stands for **absolute DEPENDABILITY**

A result which has established for it a world-wide reputation; has caused the trade to prefer it to all others, and the public to demand it.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

A NEW BAG CONVEYING SYSTEM.

A NEW YORK machine company have just completed a conveyor for handling 250 bags per hour, weighing 300 lb. each. The problem in this case was to take the bags from cars on the track at the side of the building to the second floor of a warehouse about 60 feet wide and several hundred feet long. The bags were to be delivered in such a way as to reduce the labor required to stack them in piles to a minimum.

A bag elevator is arranged vertically just outside of the building, carrying the bags on sets of curved projecting arms mounted on an endless chain which runs between guides. This elevator receives the bags directly from the car and discharges them into an inclined chute extending into the building to the centre bin, and lying wholly above the bottom chord of the roof trusses. The chute leads to a conveyor, running the full length of the building and carried by trussed frames resting on the bottom chord of the roof trusses. The conveyor has on top a carrying platform made of wooden strips so as to present a practically continuous floor. At either side of the longitudinal conveyor is a cross conveyor, spanning the space from the centre of the building to the side walls, and having its carrying platform at a lower level than that of the main conveyor. These cross conveyors form each a self-contained structure, running on tracks extending the full length of the building, attached along the side walls and along the centre conveyor trusswork. The system of conveyors thus covers the whole space of the loft and permits transferring bags from the elevator to any desired point.

The operation will be readily understood. The laborers in the car toss the bags into a stationary rack placed in the path of the projecting arms carried by the elevator chain. These projecting arms are so spaced as to pass between the bars of the rack, and they pick up the bag and carry it to the top of the building. Here the bags fall into the chute, down which they slide to the longitudinal conveyor, which carries them along to any desired point. The bags are unloaded from the conveyor by inclined guide boards, which may be fastened at any point, and which shove the bags off on to a short slide leading to the cross conveyor. From the latter they are in turn unloaded by another guide board at the point desired, and by way of a hinged skidboard, they slide to their place in the stack of bags. The only manual labor that remains to be done is to slew them around into proper stacking position.

The feature of difficulty in the design of this plant was to so construct the horizontal conveying platforms that the bags could be successfully slid over the side by the stationary guide boards without risk of catching and tearing. Its successful solution makes the plant of particular interest to engineers having to solve conveying problems in which the handling of material in bags is to be considered. Two light steel truss frames running longitudinally rest on the bottom chord of the roof trusses. Attached to the top longitudinal angle of each of these frames is a Coburn track, in which roll wheels attached by hanger pieces to the conveyor chain. The latter, in turn, carries on malleable iron shelf blocks the wooden strips that compose the platform of the conveyor. Each pair of platform strips also carries horizontal guide wheels, which maintain its alignment by bearing against a longitudinal angle adjacent to the roller track. The carrying wheels of the conveying chain also support the chain on its slack or return side, bearing for this purpose on a longitudinal shelf angle attached to the lower chord of the truss frame.

The guide board is fitted with projecting strips of wood running along the face and pitching slightly upward toward the discharging end of the board, the board itself leaning backward a little. The whole construction is intended, in connection with the smooth horizontal surface of the conveyor platform, to prevent the bags being drawn under the guide board when they strike it, and to discharge them in proper manner upon the skidway. The whole machinery is electrically driven.

DRILLING AND TAPPING MACHINE.

An English firm has just brought out an improved double-geared drilling machine fitted with a tapping arrangement on balanced slide. The tapping arrangement, whilst effecting a great saving in time and labor, does not interfere with the utility of the machine for general drilling. The spindle can be immediately reversed to withdraw the tap. The feed-screw on the spindle can also be quickly disengaged from the nut, thus allowing the spindle to be free for quick and variable adjustment in working the tap or drill. A universal table is carried on a strong bracket working from a large hinged joint, and this also revolves and works on a slide. Universal adjustment is thus afforded, and any part of the table can be brought under the drill-post. An effective arrangement of double gear has been adopted, together with an improved device for changing from single to double gear, which is effected in half the ordinary time. The machine is made in six standard sizes to drill from 8 to 16 inches deep, and varying in price from £38 to £90.

STOCK LIST OF MACHINERY TOOLS.

"Hardware and Metal" is in receipt of H. W. Petrie's monthly stock list of machinery tools and power. The list is a neat booklet of 32 pages, containing machines for immediate delivery. Each machine is designated by an individual number, and the exact size of each article accompanies the number.

ORDERS FOR MACHINERY.

H. W. Petrie, 141-145 Front street west, Toronto, reports the following sales during the week: To Kilmaster & Mabee, of the new Bay Cliffe Hotel, Port Rowan, a large Racine electro-vapor launch; also a gasoline engine and an upright pump; to The Port Rowan Electric Light Company, a new boiler for their plant; to Gagelan, Gamble & Place, Port Rowan, a new sticker cut-off saw, etc., for their planing mill; to E. T. Smith, Concepcion, Chili, a new automatic knife grinder.

ELECTRICAL NOTES.

The Canadian Locomotive Works, Kingston, Ont., have purchased from Jones & Moore, 22 Adelaide street west, Toronto, two 30-kilowatt generators for lighting their premises.

The Cannington Electric Light Company have placed their order with Jones & Moore, 22 Adelaide street west, Toronto, for a 60-kilowatt power generator for supplying current to the several motors throughout the town.

The strike of the Toronto electrical workers is now over. The differences were adjusted July 21, by a settlement, whereby, for the future, the union receives recognition and the minimum wage will be 25 cents an hour for eight hours a day. This agreement will remain in force until March 1, 1904.

The Government is installing electricity in the Orillia Asylum for idiots. At Ragged Rapids, on the Severn River, some 18 miles from the asylum, 1,500 horse-power has been developed, and 2,500 additional is available. The Government will purchase the power at $18 per horse-power, and will use it for lighting, pumping, laundry work, etc.

The Modern Telephone Company, of Hamilton, Limited, has been formed with a share capital of $300,000. The provisional directors are: Oscar Wentworth Rogers, Fritz Loffier, of New York; Staunton King, William Asahel Johnson, Henry Alexander Drummond, Whitford Vandusen, Samuel Clarke Biggs and Joseph Boardman Scovell, all of Toronto.

RULES FOR ELECTRICAL WIRING.

IN DISCUSSING the question of safe rules for electrical work a writer in a recent issue of Electricity presents the following :

A workman should thoroughly familiarize himself with the rules and requirements of the National Board of Fire Underwriters before attempting to do any electrical construction. The rules are all based on good engineering practice, and are a necessity for the prevention of unreliable and dangerous work. A few of the more important suggestions given in the code and applicable to all electric light, heat or power construction are as follows :

In all electric work, conductors, however well insulated, should be treated as bare, to the end that under no conditions, existing or likely to exist, can a grounding or short circuit occur ; and so that all leakage from conductor, or between conductor and ground, may be reduced to the minimum.

In all wiring special attention must be paid to the mechanical execution of the work. Careful and neat running, connecting, soldering, taping of conductors and securing and attaching of fittings, are specially conducive to security and efficiency, and will be strongly insisted upon.

Wires must not be of smaller size than No. 14 B. & S., except when used for wiring fixtures or by special permission. Wires must be separated from contact with walls, floors, timbers, or partitions through which they may pass by non-combustible, non-absorptive insulating tubes, such as glass or porcelain. Bushings must be long enough to bush the entire length of the hole in one continuous piece.

Transformers must not be placed inside of any building, excepting central stations, unless by special permission of the inspection department, having jurisdiction. They must not be attached to the outside walls of buildings, unless separated therefrom by substabtial supports.

Switches must be placed on all service wires, either overhead or underground, in a readily accessible place, as nearly as possible to the point where the wires enter the building, and arranged to cut off the entire current. Knife switches must be so placed that gravity will tend to open rather than close the switch. They must not be single pole, except where the circuits which they control supply not more than six 16 candle-power lamps, or their equivalent.

Automatic fuse cut-outs must be placed on all service wires, either overhead or underground, as nearly as possible to the point where they enter the building and inside the walls, and arranged to cut off the entire current from the building. They must be placed at every point throughout a system, where a change is made in the size of wire (unless the cut-out in the larger wire will protect the smaller). All cut-outs must be in plain sight, or inclosed in an approved box, and readily accessible. They must not be placed in the canopies or shells of fixtures.

Circuits or groups of incandescent lamps requiring more than 660 watts must not be dependent on one cut-out. Special permission may be secured for departure from this rule in case of large chandeliers, stage borders, and illuminated signs.

The following is a table showing the safe carrying capacity of conductors of different sizes in B. & S. gauge as given in the rules :

B & S. gauge.	Rubber covered wires. Amperes.	Weather proof wires. Amperes.	Circular Mils.
18	3	5	1,024
16	6	8	2,583
14	12	16	4,107
12	17	23	6,530
10	24	32	10,380
8	33	46	16,510
6	46	65	26,250
5	54	77	33,100
4	65	92	41,740
3	76	110	52 630
2	90	131	66 370
1	107	156	83,630
0	127	185	105,500
00	150	220	133,100
000	177	262	167 800
0000	210	312	211 600

No fuse must have a rated capacity exceeding the allowable carrying capacity of the wire it protects.

In open-work wiring supports must be placed at no greater distance than 4½ feet apart.

AUXILIARY STEAM PLANT.

Arrangements have been made by The Hamilton Electric Light and Cataract Power Company to manufacture and instal next year a steam plant at the Victoria avenue sub-station, Hamilton. It will have a capacity of 3,500 horse-power, and it is calculated to insure a continuity of service, even under the most unfavorable circumstances, such as damage by storms, etc., to the electrical plant.

MACHINERY FIRM FAILS.

Geo. T. Pendrith & Co., 74 Adelaide street west, Toronto, dealers in machinery, have assigned to E. R. C. Clarkson. Fifty-four creditors have filed claims to the assignee to the amount of nearly $25,000. The amount of the assets is not known, but a statement will probably be presented at a meeting of the creditors, which has been called for August 1. Local firms are in the majority of the creditors, but the heaviest claim is that of the Brodie estate of Guelph, which amounts to $17,874. It is understood that offers of a settlement have been refused.

CHEAP ELECTRIC LIGHT SERVICE.

The New York Edison Company and The United Electric Light and Power Company, which practically control the electric light service of New York and which are working in unison as to a schedule of prices, have decided to make a reduction of 25 per cent. in the price of electric light service, the reduction to take effect September 1.

The circular of The United Electric Light and Power Company is as follows : "We beg to announce that the retail prices for the incandescent service of this company will be reduced on and after September 1, from the present maximum of 20 cents to a maximum of 15 cents a kilowatt hour. The full schedule, after that date, will be, for the first two hours' average daily use of the connected installation, 15 cents a kilowatt hour ; for the third and fourth hours, 10 cents ; for the fifth and sixth hours, 7½c.; and for all over six hours, 5 cents a kilowatt hour. To a large number of the users of electric lights this change will represent a substantial reduction in the cost of current."

One of the officials of The United Light and Power Company, in speaking of the forthcoming cut, said : "Our step will prove of considerable benefit to apartment houses, private residences and small retail stores."

GAS ENGINE TROUBLES.

H. C. MUELLER gives "Hardware and Metal" readers the benefit of his experience with gas and gasoline engines. He gives the following helpful hints : The first thing to do when an engine stops is to look after simple things. Don't look for complications until it is necessary. See that the gasoline tank is not empty, even although you may think it is half full. See that the igniter is in proper working order. See that the exhaust valve opens at the right time and does not leak when closed. Sometimes the air valve will stick or not close properly. Overheating often stops an engine, especially when the piston is worn a little. Many an engine stops for want of lubrication. It may get plenty of oil, but not in the right place, and often the oil is the wrong kind. Oil that will stand the highest possible temperature and make the least smoke and soot is what is wanted. Experiments usually are expensive, and the best is none too good when it comes to cylinder oil.

The "jump spark," if properly understood, is by far the best system of ignition, as it is plain and simple, very reliable, easy to set right when wrong, and a good outfit seldom gets wrong, although it is to be remembered that the points should be close together on the sparking plug, as the spark is much hotter and the strain on the insulation is much less, both on coil and plug.

And another thing is to be remembered: that is, if a coil makes a spark one inch long in the air, it will not spurt one-fourth that distance in a compressed mixture of gas and air, and the higher the compression the more it will affect the spark. The insulation from coil to plug must be the best that can be made, for there is where lots of trouble comes from, and either the engine or the coil should have a vibrator, and if properly made, it will work without fail. An excessively high compression is not desirable, as what is gained in one way is lost in another.

DISSATISFIED ELECTRICAL MEN.

It is said that some dissatisfaction exists among the electrical workers in the employ of The Hamilton Electric Light and Cataract Power Company, Hamilton, because of the lack of progress made in the matter of the selection of a third arbitrator by A. Bruce, K.C., and Rev. C. E. Whitcombe. The latter is the arbitrator chosen by the men, and he has gone on a holiday, under the impression that Mr. Bruce is blocking the selection of a third arbitrator. Another strike is threatening.

CATALOGUES, BOOKLETS, ETC.

PICTURESQUE VICTORIA.

"PICTURESQUE VICTORIA" is a handsome little booklet just issued by the Tourist Association, of Victoria, B.C. This voluntary association, organized by the business men and citizens for the purpose of making known the attractions of Victoria and Vancouver Island as a tourist and health resort, is to be congratulated upon this splendid effort in a most praiseworthy cause. The many unsurpassed attractions offered by Victoria to the summer holiday seeker are presented in a manner which reflects credit upon those who have the work in charge.

Many handsome photographs admirably display the picturesqueness of scenery, and the beauty of places of interest, and go far to substantiate the claim that the combination of bold and picturesque country with old-fashioned English homes, their beautiful gardens and air of comfort and contentment, makes Victoria a delightful residential city.

The general attractiveness of Victoria as the ideal place for salmon and trout fishing, for rifle and shotgun, for excursions and drives, for recreation, together with the excellent railway and steamship connections, is given due prominence. Throughout the booklet we are reminded that in Victoria there are "no mosquitoes," "no malaria," "no fogs." The Tourist Association have a Bureau of Information at 34 Fort street, Victoria, B.C.

CATALOGUE OF MOWERS AND HARVESTERS.

"The Harvest Seasons, Deering Ideals," is the name of an exceedingly handsome catalogue of binders, mowers and harvesters, published by The Deering Harvester Co. The book contains a comprehensive survey of the improvements made from the era of the Marsh Elevator Harvester, 1858, up to the present time. The cuts of numerous medals and awards are produced, and as well each portion of their binder receives a prominence from the neat cut handsomely executed.

Among the machines whose excellences receive due attention are the Deering header and binder, the Deering header, the Deering "Ideal" mower, the Deering "Giant Ideal" mower, the Deering "Ideal" one-horse mower. Reapers and hay rakes and corn binders, huskers and shredders, binder twine, knife grinders, cultivators and seeding machinery are all shown with new and original points specially emphasized. The catalogue contains some very readable matter of interest to the farming community in the shape of articles and treatises on "Improved Wheat—a result of experimental and scientific crossing of Varieties," on "Macaroni Wheat," on the "Rice Industry," and "Corn Culture."

An especially noteworthy feature is the detailed information given about the Hessian fly, the chinch bug. Some valuable hints are given to the farmer to protect the birds who render a wonderful aid by killing destructive worms and bugs.

A DISPLAY CARD.

The Gurney Foundry Co., Limited, Toronto, has just issued to the trade another suitable display card for the Oxford Economy gas range. Its special merits are prominently emphasized. A neat cut clearly shows the peculiar excellences and uses of each section of this "up-to-the-minute" range.

TINNERS' SNIPS.

The celebrated National Cutlery Company's tinners' snips, for which Decatur, Bull & Co. are agents, are forged from one piece of steel, and a shear steel plate of special quality welded on the entire cutting, edge and face, making their tinners' snips the only steel ride snips on the market. Hardened in water, and tempered by a patented method, they make a tinners' snip of excellent quality. Made for right or left hand. Ask for catalogue. See their patent wire-cutting tinners' snips, put up in separate packets each pair.

THE CANADA HARDWARE CO., Limited
MONTREAL.

LIVERPOOL TIMBER TRADE.

IN their wood circular, Liverpool, July 1, 1902, Farnworth & Jardine report arrivals from British North America for the month then past as 14,877 tons register, against 29,812 tons register during the corresponding month last year, and the aggregate tonnage to that date from all places during the years 1900, 1901, 1902, has been 172,988, 169,224 and 172,991 tons respectlvely.

The cessation of hostilities in South Africa has not, so far, created any change in this business, but there has been a quiet, steady trade throughout the month. The arrivals have been on the moderate side, and although a short month, on account of the Coronation holidays, the deliveries have been satisfactory. Stocks, with few exceptions, are not too large, and values generally steady.

Among Canadian woods, in pine timber, the first direct shipment of waney (chiefly on contract), has arrived and goes largely into consumption. Values rule high, and stocks are very light. In square pine, deck wood, also on contract, has been imported more freely, and has gone mostly into consumers' hands. Stocks are fairly moderate and values unchanged. The import of red pine consists of about 5,000 cubic ft. fresh wood. The demand is quiet and stocks appear sufficient for present requirements. Prices are steady. The arrivals of oak have been moderate, chiefly first-class wood for special requirements. Deliveries have not been large, but stocks are light and values very firm. There has recently been more inquiry for later delivery. Elm has been imported more freely, and, consisting generally of fresh rock elm, the deliveries have been fairly satisfactory. Stocks are moderate and prices steady, but soft elm is practically unsaleable. Ash is only in limited demand and stocks are sufficient. The imports of Quebec pine deals have been large and the deliveries show considerable improvement, but stocks all around are heavy. Values are unchanged. Red pine deals are dull of sales and stocks ample.

In New Brunswick and Nova Scotian spruce and pine deals the import of 10,000 standards, although exceeding the previous month, is slightly less than that of the corresponding month last season; the deliveries have fairly kept pace and stocks are still moderate; values have ruled steady. Pine deals are in fair request; the stock is light and prices unchanged.

Of birch logs, the arrivals have been chiefly from Quebec; there has been fair inquiry at firm rates, and stocks are moderate. The imports of planks show a marked falling off, but the deliveries have been very disappointing, and the stock is too large. There is little change in value to report.

The arrivals of pitch pine during the past month have been five vessels, 3,071 tons register, against 14 vessels, 11,973 tons register, during the corresponding period last year. In hewn, the import has been small, and there has been a fair consumption, but stocks are still ample and values low. In sawn, the stock, though considerably reduced, is sufficient, and, though the import has been light, prices show very little improvement. Deals and boards are still coming forward too freely for the requirements of the trade. The consumption has been small, and stocks are much too heavy.

There has been no import of British Columbian and Oregon pine, but the deliveries from recent arrivals have been fairly satisfactory at steady prices. The stock is not too large.

Sequoia is in good demand. There is no stock.

PAINT PEOPLE PICNIC.

The annual picnic of the employes of the Canada Paint Co. takes place to-day (Saturday, July 26) at St. Hilaire. In consequence, all the works, warehouses and office are closed up. The party are spending the day at the Beloeil Mountain and Ottertown Park, near St. Hilaire.

A SUMMER-TIME STOVE.

A wonderful contrivance which turns air of a temperature of 100 degrees in an instant to a temperature which is below the freezing point, and operated by no power save the air itself, stands in a room at the headquarters of the United States Weather Bureau in Washington, writes A. E. Johnson, in Everybody's Magazine. The inventor, Willis L. Moore, Chief of the Weather Bureau, is glad to allow anybody that calls to look at it and feel the delicious cool air it gives off. In a few weeks more the foreign patents that are now pending will have been secured and the public will be welcome to examine the interior as well as the exterior of the machine that promises to become a factor of no mean importance in furnishing not only comfort to humanity in general, but aid to the manufacturing world where room temperature is an item in the protection of goods. The gravity cooler not only puts cool air into a room, but makes it pure and dry. A dust storm may be raging outside and the particles be taken in through the receiving pipe, but the air will come forth perfectly pure. Actual experiments have proved time and again that the air comes out drier than it goes in.

A CLEVER INVENTION.

The "Ideal" boot and shoe polishing rest, which The Canada Hardware Co. have brought out this week, is the invention of a young Canadian, who, to judge by the merits which this, his first invention, possesses, may be heard of at some future time. The contrivance is intended to fasten to the wall or any upright plane. It can be adjusted to fit any sized boot or shoe, and is adjustable to either ladies' shoes or men's boots. It's strong, being made entirely of iron, and is finished in dull nickel. This is one of the best of its kind on the market, and, although only out a few days, has made remarkable progress in the city of Montreal. The trade should inquire for it.

CHANGE IN HARDWARE FIRM.

The firm of Squire, Watson & Co., hardware manufacturers' agents, Montreal, has been dissolved, and the following notice has been sent out by the successors:

"We beg to advise our friends and the trade in general that the firm of Squire, Watson & Co. has this day been dissolved by mutual consent. Mr. E. K. Watson will continue the business in its entirety, under the firm name of E. K. Watson & Co., he having assumed the liabilities of the old firm and to whom all accounts due the old firm are payable. The new firm retains all the agencies of the old firm and takes this opportunity of thanking the trade for their liberal support in the past—and will do all in its power to merit a continuance of the same. We place our personal services at your disposition."

The new firm will have the confidence and good wishes of a large section of the hardware trade.

A NEW AGENCY.

The Canada Hardware Co. have recently been appointed agents for the "Jewel" mixed paints, manufactured by Wadsworth, Howland & Co., Chicago. These paints are well known throughout the United States, and The Canada Hardware Co. are fortunate in being appointed Canadian agents.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, July 25, 1902.

HARDWARE.

BUSINESS, in general, has not been as good as last week; but, in spite of everything, jobbers and manufacturers report an active demand for all seasonable lines. A continuance of the present disagreeable weather may have a bad effect on the hardware trade later on, but, so far, from the wholesalers' point of view, the trade has been comparatively little affected. In the retail business, however, the movement in such lines as paints and oils and building materials has slowed down somewhat, and will continue until the prolonged spell of wet weather is over. Prices have been fairly steady throughout the week. Barn door tracks have been one of the exceptions, and are now up to $3.90 per 100 feet. Galvanized clothesline wire has also advanced, being now quoted at $2.50 for No. 19. Snider ball cartridges are hard to procure, most of the jobbers having sold out those that the Government disposed of some time ago. It will be impossible to obtain any more when this supply is exhausted, and only the shot cartridge can be supplied. Axes are commencing to move for the fall trade, and the demand is growing for horse blankets and halters, sleigh bells, skates, etc. Skates and bells will both be somewhat lower in price for the coming fall and winter seasons. In bells, a few lines are offered at lower prices, which, however, are of inferior grade to those of last year.

SCYTHES.—The movement in scythes is not as brisk this week as it was last week. There is, however, still a fairly active market at unchanged prices. We now quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—A few lots have been sold this week, but the demand is irregular, and the volume of business is not great. The price, f.o.b., Montreal, is $3 per 100-lb. keg.

GALVANIZED WIRE.—Trade is still quiet in this line at unchanged prices all round. Our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—No important change has occurred in this market, which is quiet and steady at the prices here quoted: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is nothing new to report in this market. Trade continues quiet, and the discount is 22½ per cent.

BRASS AND COPPER WIRE.—Like other wires, these are not in very active demand. The market remains quiet, and the discount is 60 per cent.

FENCE STAPLES.—Only a small amount of business has been effected this week. No quotable change is to be reported, and galvanized still sell at $3.25 per 100-lb. keg; bright $2.90 per 100-lb. keg, with an extra of 25c. charged for 25 and 50-lb. packages.

WIRE NAILS.—The demand for wire nails, which has been fairly satisfactory, keeps up well. Prices are unchanged. In small lots, the price is $2.55 and in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a moderate inquiry for cut nails. The price remains at $2.45 per keg, in small lots, and $2.37½ per keg in carlots.

HORSE NAILS.—Trade in this line is showing signs of improvement, the de-

Preserving Season Requirements

mand for fall business having now commenced. The discount on "New Countersunk" heads has been changed to 70 per cent., instead of 66 2-3 per cent. We quote: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 70 per cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—Trade is picking up rapidly for fall. Some cutting is reported among jobbers, No. 2 and larger iron shoes being sold at $3.15, X L steel shoes, No. 2 and larger, at $3.25, and No. 2 and larger snow shoes, at $3.40. The shoes thus sold, however, are said by some jobbers to have been culls. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, 85; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—Some falling off in the demand is reported, but it is expected to pick up again shortly. The market is still fairly active. The discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Trade continues quiet, and prices have not changed since our last report. We quote: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—This market has improved considerably during the past week, and jobbers all report a good business. No change in prices has been made. The discounts are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—There is nothing new to report in this line. Both bolts and nuts are in fairly good demand. Discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is still a good movement, and the market is active and steady all round. No quotable change has been made. We now quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10

per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—Trade has been very quiet this week. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—The demand is very light, but prices are kept up and Canadian or English netting is discounted as follows: 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—There has been a material decrease in sales this week, and the market is becoming quieter. The discount remains at 60 per cent.

FIREBRICKS.—In this line business continues about as usual. The market is still quiet. We quote: English bricks, $16 to $22 per 1,000, and Scotch, $17 to $22 per 1,000.

CEMENT.—No change in this market has occurred, whatever. Trade is fair. We quote as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The iron and steel markets continue active and firm. Furnaces, hampered considerably by the scarcity of fuel must, however, work to their utmost capacity to supply the demand. There is a great demand for all structural material, as well as for all forms of railroad supplies, so much so, that even with the orders on hand now, manufacturers will be busy for the greater part of 1903. Jobbers are short on some lines of goods, such as Canada plates and black sheets, and until further shipments arrive these goods will be very scarce on the local market. It has not yet been determined to what extent the cargo of the wrecked steamer Monteagle has been damaged, but from the appearance of the goods already taken out of the hold, including tinplate, sheet iron, etc., the damage will be considerable.

PIG IRON.—This is as firm as ever, and although every possible facility is made use of, the furnaces are frequently unable to fill contracts on time. Canadian pig iron is quoted at $18.50 to $19; Summerlee, $21.50 to $22.

BAR IRON.—Trade in bar iron continues fairly good. Merchants' bar is quoted at $2 and horseshoe iron, at $2.20.

BLACK SHEETS.—There is some shortage on this market, jobbers not having received the expected supplies. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is a fairly active market this week. No change in prices is reported, and our quotations are now as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There is no change. Trade is quiet. We quote 14c.

INGOT TIN.—There is only a fair demand. The price of Straits is 33½c.

PIG LEAD.—The market for pig lead remains quiet and unchanged. The price is $3.25.

LEAD PIPE.—A small amount of business is doing at 8c. for composition and waste, and 7c. for ordinary. The discount is 37½ per cent.

IRON PIPE.—There is a fairly good demand this week. We quote: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.35; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—These are moving out well. The price of charcoals is $4.75 to $5.25 per box, and of cokes, $4.25 per box.

CANADA PLATES.—These are becoming scarce on the local market. The inquiry keeps up. Quotations follow: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—There is no change to report and the market is rather quiet. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—Business is slow this week. Our quotations are as follows:

Nos. 10 to 20, \$2.50 ; 3-16, \$2.50 ; ¼, 5-16, and ⅜, \$2.40.

TOOL STEEL.—The demand for tool steel has not improved, and the market is still quiet. Prices are unchanged. Our quotations are as follows : Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c. ; "Air Hardening," 30 to 50c.

TERNE PLATES.—There is very little demand for terne plates. The price is \$7.50.

COIL CHAIN.—This is going fairly well. No quotable change is reported. We quote : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, \$5 ; 5-16 exact, \$5.25 ; ⅜, \$4.25 ; 7-16, \$4.05 ; ½, \$3.95 ; 9-16, \$3.85 ; ⅝, \$3.55 ; ¾, \$3.50 ; ⅞, \$3.45 ; 1-inch, \$3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is no material change in this market, which is quiet and steady at \$5.85 to \$6.25.

ANTIMONY.—The demand for antimony has shown no improvement whatever, and trade remains dull at 10c.

ZINC SPELTER.—There is no change. The price remains at 5c., with little doing.

SOLDER.—This moves out steadily. No quotable change is to be reported. The price of bar solder is 18c. and of wire solder, 20c.

PAINTS AND OILS.

Both linseed oil and turpentine have taken further declines, the former being now quoted 3c. below last week's price and the latter, 2c. below it. The cause of the drop was the increased supplies on the market. Arrivals have been frequent, and although the demand is still good, the market is much easier. Back orders are being filled, and at the reduced prices an increased demand has sprung up. The irritation and worry, which was the result of the short receipts, has now disappeared, and business in these two lines runs along much more smoothly. The demand for white lead keeps up well, and already some large orders for putty have been booked for August and September shipment. No change is reported in the price of other lines, and, in a general way, business may be considered satisfactory. We quote :

WHITE LEAD.—Best brands, Government standard, \$5.87½ ; No. 1, \$5.50 ; No. 2, \$5.12½ ; No. 3, \$4.75 ; No. 4, \$4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—\$5.25 in casks ; kegs, \$5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., \$1.90 per 100 lb.; bulk, in less quantity, \$2.05 ; bladders, in bbls., \$2.25 ; bladders, in 100 or 200-lb. kegs or boxes, \$2.40 ; in tins, \$2.55 to \$2.65 ; in less than 100-lb. lots, \$3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, \$4.50 ; in 100-lb. kegs, \$4.75 ; in less quantities, \$5.75 per 100 lb. No. 1 red lead, casks, \$4.25 ; kegs, \$4.50, and smaller quantities, \$5.50.

CEILINGS, CORNICES, LATHING, SHINGLES, SKY LIGHTS, CORRUGATED IRON, SIDINGS, VENTILATORS, FINIALS.

And other goods for all kinds of architectural purposes.

The Metallic Roofing Co., Limited,

Wholesale Manufacturers,

TORONTO, MONTREAL, WINNIPEG.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, \$5.25 ; smalls, \$5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, \$2.35 to \$2.45 ; orange, \$2.25 to \$2.35.

MIXED PAINTS.—\$1.20 to \$1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There has been no important change in the market for scrap materials. Metals are very quiet all round. We quote as follows : Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, \$15 ; No. 2, \$7 per ton ; machinery scrap, \$16 ; stove plate, \$12 ; malleable and steel, \$5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6 to 6¼c. per lb.

GLASS.

This continues quiet and featureless. We now quote: First break, 50 ft., \$2.10 ; second, \$2.20 for 50 feet ; first break, 100 feet, \$4 ; second break, \$4.20 ; third break, \$4.70 ; fourth break, \$4.95.

HIDES.

There has been no change in the market. Prices are fairly steady all round. We quote as follows : No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 12c. ; lambskins, 30c.

MARKET NOTES.

Linseed oil is 3c. lower.

Turpentine has declined 2c.

Galvanized clothesline wire has been advanced to \$2.50 for No. 19.

Barn door tracks have advanced, and are now quoted at \$3.90 per 100 feet.

The discount on "M" brand horse nails, "New Countersunk" heads, is now 70 per cent. instead of 66 2-3 per cent. off.

ONTARIO MARKETS

Toronto, July 25, 1902.

HARDWARE.

TRADE in hardware, which is principally of a sorting-up nature, continues to be well sustained. Mail orders now are quite numerous, as the travellers are either on their vacation, or renewing their samples. A good many small orders for barb wire are being received for immediate shipment from Toronto. There is also a large demand for rope and hay forks. Sporting goods and ammunition continue quite active. Jobbers are evidently laying in a large stock of guns for the sporting season, which begins in about a month's time. Quite a large business is reported in poultry netting for delivery next year, and a shortage in ranges and stoves is anticipated this fall. There have been no changes in any line during the week.

BARB WIRE.—Quite a number of small orders are being received in this line, which have to be shipped promptly from stocks jobbers have on hand in Toronto, as it takes too long for orders to be shipped from the factories at Cleveland. The prices are unchanged. We quote : Barb wire, in carlots, \$2.65 and for less than carlots, \$2.77½ f.o.b. Cleveland. From stock, Toronto, \$3.

GALVANIZED WIRE.—A fair business of a sorting-up nature is reported in galvanized wire, which remains unchanged.

Quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Trade in this line is of a light sorting-up nature. We quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Business in this line continues fair. The discount is 22½ per cent.

WIRE NAILS.—A good demand for these continues, with stocks in the hands of the jobbers light. We quote $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Business in cut nails is of a moderate nature, and prices are unchanged. We quote: Cut nails, $2.45 per keg and $2.37½ for carlots.

HORSE NAILS.—These continue steady and unchanged. We quote the discounts as follows: "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—These continue in moderate demand. We quote as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The scarcity in these is unrelieved and the demand is well sustained. Discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—A good demand continues for these, and the stocks in the hands of the jobbers are light. The discounts are: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The situation in these is about the same as last week. There is a heavy demand and a scarcity of sizes. We quote: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—A moderate volume of business continues in these at unchanged prices. We quote as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Trade in green wire cloth continues fair. We quote $1.37½ per 100 square feet.

SPADES AND SHOVELS.—These are in moderate demand, and the discount continues unchanged at 40 and 5 per cent.

ROPE.—Business in rope in general is good, and there is a brisk call for hay fork rope at present. The prices are unchanged. We quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—A heavy demand is being experienced for binder twine at present, but as nearly all of this season's make has previously been booked for delivery when required, the supplies now available are small, and a shortage in binder twine for this season is already anticipated. The factories are busy and are bare of stock, and the market is strong. Quotations are as follows: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—The demand for these is keeping up well at unchanged prices. The discount is 60 per cent.

EAVETROUGH, ETC.—Quite a heavy call for eavetroughing is being experienced this year, and so far the amount of business done in this line is in excess of that of last year. Our quotations are as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—A good demand continues for building paper from all parts of the country, and we quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—A few small orders are still coming in for these. The discounts are now as follows: 50 per cent. on high-wheeled lawn mowers, "Star" mowers, 9-in. wheels, $2.25 to $3; "Daisy" mowers, 7-in. wheels, $2.25 to $2.50.

HARVEST WHIPS.—A number of sorting-up orders in harvest whips continue to be received.

POULTRY NETTING.—A good business is being done in this line for delivery next year.

TINWARE AND ENAMELLED WARE.—A good demand continues for preserving kettles, and other lines of enamelled ware are moving freely. Tinware is also experiencing a good sorting-up demand.

SPORTING GOODS.—The active demand noted last week in guns and rifles is keeping up, and ammunition is also moving freely. Retailers seem to be preparing to do a good business as soon as the season opens.

CEMENT.—The tone of the cement market is stronger this week and the demand has improved. The stocks in the hands of the manufacturers are small, and they find it hard to fill all their orders. An inquiry from some sections of the United States comes for cement, but the makers here have all they can do at present to attend to the Canadian trade. Our quotations are as follows: Canadian Portland, $2.25 to $2.85, and Canadian hydraulic, $1.35 to $1.60 per bbl.

METALS.

There has been no marked change in the general local trade in metals, and business continues good. Prices are steady, and those at present prevailing are likely to be maintained for some time to come. In the United States pig tin was reported weak and lower, due to the anxiety of a number of holders to sell, and as the consuming demand is almost wholly lacking, few buyers were found. This caused prices to decline considerably. In iron, there continues on the other side more or less demand for spot and early delivery with next to nothing to meet it.

PIG IRON.—The local market is strong and unchanged. The United States market is, generally, quiet, with very little business doing. We quote on track, Toronto : No. 1 foundry, $21, and No. 2, $20.50.

STEEL BOILER PLATES.—The tone of the market for these continues strong with an active demand. We quote $1.80 for carload lots, on track, Toronto.

STEEL BEAMS.—Trade in steel beams is keeping up. Quotations are unchanged at $2.75 for steel beams, from stock, and $2 per 100 for carload lots on track.

STEEL RAILS.—These are quoted at $30 per ton for steam railway rails, and $35 per ton for electric railway rails.

TOOL STEEL.—The local demand for tool steel is heavy, and prices are unchanged. We now quote "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—A fair volume of business continues to be done in this line.

SPRING STEEL.—Trade in spring steel continues fair.

BOILER TUBES.—The market continues steady with a good demand.

BAR IRON.—The local market for bar iron continues strong and active, with a scarcity of stocks. The United States markets are strong and quiet, and our quotations are as follows : $1.95 to $2.05 base. Extras cut to length while rolling : 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—Business in this line continues good. We quote: Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

DECATUR, BULL & CO., Sales Agents, **MONTREAL.**

CANADA PLATES.—These continue in fair demand at unchanged prices. We quote : All dull, $3 ; half-polished, $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—There is a fairly active movement in these. We quote in case lots : Queen's Head, $4.50 for 28 gauge ; American, $4.40 for 29 gauge ; Bell brand, $4.20 for 28 gauge.

TIN.—There has been a little improvement in the local demand for tin. In the United States the market is lower and easy, owing to some holders of pig tin becoming anxious to sell. We quote $32 to $33 per 100 lb.

TINPLATES.—A fair amount of business is being done in these at unchanged prices. We quote : Charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER.—An active business locally is doing in copper. The outside markets are weak and quiet. We quote : Ingot copper, $14 per 100 lb.; sheet copper, $22 to $23.

BRASS.—A fair amount of business continues to be done in this line. The discount is 15 per cent.

PIG LEAD.—This metal is in better demand on the local market. We quote pig lead, $3.50 to $3.75 and bar, $5.

IRON PIPE.—A good local demand is reported for iron pipe. The prices of the sizes of iron pipe above 2 inches in diameter have been reduced. The price of 2½-in. pipe is now $20 per net 100 ft., instead of $21, and 4 per cent. discount. The discount on the smaller sizes is now 7½ per cent., instead of 4 per cent. as heretofore. We quote as follows per 100 ft. : ¼-in., $2.40 ; ⅜-in., $2.65 ; ½-in., $2.85 ; ¾-in., $3.65 ; 1-in., $5.20 ; 1¼-in., $7.35 ; 1½-in., $8.95 ; 2-in., $12.55 ; galvanized, 1-in., $7.20. Trade discount, 7½ per cent.

ZINC SPELTER.—The market for zinc spelter is quiet and the prices are unchanged. We quote $5 to $6.

ZINC SHEETS.—There has been no change in trade in this line, which continues steady. We quote : Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Business in this line continues brisk at unchanged prices.

ANTIMONY.—A good business in small lots is doing in antimony. We quote $19.50 per 100 lb.

PAINTS AND OILS.

The features of the paint and oil market for this week are the reductions of 3c. per gal. in raw and boiled linseed oil, and 2c. in turpentine. The decline in oil is caused by the manufacturers wishing to sell and the buyers not being over-anxious to purchase. The buying, therefore, at present is mostly in small lots. A weaken-

ing of the primary market caused the decline in turpentine, but later advices from the South report a reaction there in that product, and it is quite likely that this market will follow with an advance. Trade, locally, has quited down considerably, and white leads and dry colors are inactive. A small sorting-up trade continues in mixed paints, and paris green is more active with some of the holders. O.herwise the market is featureless. We quote as follows :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards ; ½c. per lb. extra will be charged for 12½ lb. packages ; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25 ; bladders, in 100 lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL— Raw, 1 to 2 barrels, 79c.; boiled, 82c. ; 3 to 5 barrels, raw, 78c.; boiled, 81c.; 6 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 69c.; 2 to 4 barrels, 68c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a fair volume of business doing in glass, and the prospects are for a big trade this season. A number of dealers still report a scarcity in some of the sizes. Quotations are as follows : Under 26 in., $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5 75 ; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

A fair business continues in old material and the market is steady. We quote as follows : Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 per net ton ; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The market for these continues inactive. An advance of ¼c. has been made in the prices of cured hides. We quote : No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8¼ to 8½c.

SKINS—Trade in these is dull and the prices are unchanged. Quotations are : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; lambskins, 30c.; shearlings, 25c.

WOOL—The stagnant condition of this market has not been relieved and the outlook for an improvement therein is not promising. Fleece wool is quoted at 13c., and unwashed, at 7c. per lb.

TALLOW—The market is featureless. We quote 6¼ to 6½ per lb.

COAL.

No change is reported in the situation at the mines and no prospects of a settlement are yet in sight. Local coal merchants have on hand a supply of hard coal sufficient to supply current demands, but if the lock-out continues that article will be very scarce during the winter. At the international bridges our quotations are as follows: Soft coal, $3 to $4 per ton.

PETROLEUM.

Trade in petroleum is fair. A number of orders are now being received for delivery later on in the season. We quote as follows : Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Turpentine is down 2c. per gal.

Raw and boiled linseed oils have declined 3c. per gal.

A reduction has been made in the prices of iron pipe in the sizes above 2 in.

H. S. Howland, Sons & Co. are in receipt of an advice of a shipment of lawn swings. These have been scarce for some time, as owing to the low prices at which they are being sold, some of the manufacturers ceased making them for a while. There is hardly anything that pleases children so much as a nice lawn swing.

STOVE WORKS FOR FORT WILLIAM.

The by-law to give W. J. Copp and Harold E. Copp, of Hamilton, $15,000 to locate a stove, range and foundry works in Fort William was carried July 23, by the almost unanimous vote of 379 for and 23 against.

A HAMILTON DEFAULTER.

Mr. H. G. Wright, of the tin manufacturing firm of E. T. Wright & Co., Hamilton, says that the defalcation of J. C. McKeand would probably amount to about $10,000. However, he could not say for certain, the work on McKeand's books not having been finished.

EIGHTY-THREE ELEVATORS.

Since the season opened The Ogilvie Flour Mills Company of Winnipeg has built new elevators at Arnaud, Oakville, Basswood, Sinclair, Arcola, Grenfell and Balgonie. The average capacity of these elevators is 32,000 bushels each.

In addition to seven already completed, they intend to build 14 more. This will bring the total number of their elevators up to 83, with an aggregate capacity of 3,000,000 bushels.

The company has three gangs of men at work under its superintendent, H. W. Chafant. They will continue building at points they have selected all the season.

A CAUSE OF FAILURE.

Many a business man has come to grief because he lacked a reserve of capital, of discipline or of knowledge of his business, says Success. In good times, when anybody could sell goods, he was all right ; but, when a panic came, and his notes were refused at the bank, he went down because he had no reserve of savings or of character.

Shrewd business men are always on the watch for emergencies, financial storms or panics ; they know perfectly well that it takes a very different kind of ship timber to wrestle with the tempests than it requires in pleasant weather, when there is no strain or stress. It is the man who prepares for an emergency, who keeps his sails trimmed and his ship in order that weathers the gale.

Fire caused damage to McLean's hardware store, 121 Dundas street, London, on July 22, to the extent of $10,000 or $11,000. Damage was covered by insurance.

THE JAS. MORRISON BRASS MFG. CO. LIMITED TORONTO, ONT.

Fitzsimmons, for two-storey brick detached residence, near Broadview ave., for $1,700; W. J. Miller, for two-storey detached brick dwelling, near Broadview ave., north side of Simpson ave., for $1,700.

BUILDING PERMITS IN OTTAWA.

Building Inspector Pratt issued nine permits during the week, of which the majority were for additions to dwellings: W. Green, frame kitchen, Archibald street, $200; A. J. Magurn, solid brick addition to printing office, Wellington street, $225; Bate & Co., ironclad warehouse, Bank street, $200; P. Aitchison, frame building, Pretoria avenue, $700; Joseph Heyden, frame dwelling, King street, $250; Frank Rohde, frame addition to dwelling, McKay street, $350; R. S. Chandler, brick-veneered addition to dwelling, James street, $400; Charles W. Donivan, terrace of four brick-veneered dwellings, Daly avenue, $6,000.

PLUMBING NOTES.

A singularly neat and attractive advertisement has just been issued by Owen & Presho, 6 Wellington street east, Toronto, practical plumbers and gasfitters. Though the idea is old, advertisements of this style always prove welcome. Their list of fire alarms is particularly bright, and surrounds an advertisement of the firm.

LAWSUIT OVER A PATENT.

The Canada Water and Sewage Purifying Company, of Windsor, Ont., has begun proceedings against the city of Winnipeg for an alleged infringement of patent. Winnipeg has always had trouble with its water supply, owing to alkali. In 1891 The Pittsburg Testing Laboratory Company took hold, and has just finished a system which softens the water and purifies it to a great extent. The description of the system appeared in an engineering paper, and the directors of the Windsor company were struck with the similarity between their invention and the system used by the Pittsburg people. An investigation followed, and it is alleged that the plant installed at Winnipeg is similar to the one on which the Windsor concern holds patents.

PLUMBERS PLAY INDOOR BASEBALL

The Hamilton plumbers visited Brantford plumbers on Saturday. Owing to the inclement weather, indoor baseball took the place of outdoor sports. The features of the game were McPherson's base running and Squibb's work in right field. McArdle, for Hamilton, put up a splendid game, and the work of the referees gave entire satisfaction.

The umpires were A. Haworth and Charles Taylor. The morning game resulted 15 to 19 in favor of Brantford and the afternoon game, 23 to 21 in favor of Hamilton.

The following is the line-up of the two teams:

Hamilton — Smith, s.s.; Walsh, 2b.; McAndrews, p.; Drake, 1b.; McArdle, 3b.; Garsom, r.f.; Harris, l.f.; Stanton, c.f.

Brantford—Whitfield, p.; Minnes, c.; Qua, 1b.; McPherson, 2b.; Pohlman, 3b.; Muirhead, s.s.; Anguish, l.f.; Squibb, r.f.

After the morning game the visitors were dined at the Belmont, and after the second game refreshments were served at the Vendome, where also a programme was rendered. The visitors expressed themselves as having enjoyed their outing heartily.

BUILDING IN MONTREAL.

Montreal has felt the building boom as well as other Canadian cities. During the first six months of this year, Alcide Chausse has issued 428 permits for buildings, with a total value of $1,766,689. This is an increase in the number of permits of 310 and 74 respectively for the same periods in 1900 and 1901, while the increase in value over 1900 is $983,659, and over 1901, $619,212. The aggregate of values of buildings, for which, this year, up to date, permits have been given is $1,885,338.

During the last week the following building permits were taken out in Montreal: William Smith, 56 Simpson street, on Busby Lane, one warehouse, four storeys, $6,000; M. J. Archambault, 777 Cadieux street, on City Hall ave., one house, two dwellings of two storeys, for $2,450; The Chevra Cadisha Corporation, Jos. Ruhin, 517 Craig street, on St. Urbain street, one factory, $16,000; G. Ross, 1116 Sherbrooke street, one house, one dwelling, four storeys, $6,000; Lucien Huot, 55 Street Railway Building, at 584 Sherbrooke street, one house, four dwellings, three storeys, $8,000; Dominion Bridge Company, 317 St. Patrick street, alterations to one house of two storeys, $3,000; Armand Goyer, 1224 De Montigny street, on Sangimet street, one house of three dwellings of three storeys, $3,000.

WATERWORKS CONTRACTS.

Dobson, Jackson & Fry, of Medicine Hat, N.W.T., have just completed the construction of a waterworks system at Suffield, N.W.T., and a sewer at Medicine Hat, upon which they have been engaged for seven months. They have now the contract for a waterworks and sewage system at Edmonton, as well as for laying five and a half miles of gas mains at Medicine Hat. Mr. Fry will supervise the work at Edmonton, and Mr. Dobson that at Medicine Hat.

PLUMBING AND HEATING CONTRACTS.

The John Ritchie Plumbing and Heating Company, Adelaide street east, Toronto, reports the following contracts: Plumbing for Delaney & Pettit's new factory, Jefferson ave.; plumbing and heating for the residence of J. B. Andrews, corner of King and Jefferson ave.; the plumbing for residence of H. H. Hall; alterations for plumbing to residence of Jno. Morrison, Grenville street; plumbing of new residence for Miss A. B. Orde; plumbing and steam heating to the new addition to the Boys' Home, George street.

MR. FLETT IN FORT WILLIAM.

H. R. Flett, of The Dominion Radiator Company, Toronto, visited Fort William last week in connection with the contract his firm has to equip The Marks-Clavet-Dobie Company's new business block with a heating plant.

PAINT SPECIALTIES

RAMSAYS EXTERIOR LEAD, always the leader in the lead market—advertised to all architects and painters in Canada. Ordered by dealers because it's easy to sell, pays well and satisfies all—Special booklets to help.

RAMSAYS VIENNA GREEN. A clean, pure, rich green in three shades, away ahead of imported greens and cheaper as well. The strongest and brightest of all the greens, to cover anything that should be green and kept green—booklets.

RAMSAYS OUTSIDE PAINTS. This is the paint for the farmer's barn. It's what he wants for his outhouses, fences, etc. It does the work and isn't dear. It pays.

RAMSAYS UNIVERSAL VARNISH. It is made for the boat, the canoe, the house, the church, doors, wainscots, anything that wants a varnish that is all varnish and nothing else.

A. RAMSAY & SON, MONTREAL.

STEEL WIPES OUT IRON INDUSTRIES

HENRY SIMPSON, in the mining and metallurgical number of Cassier's Magazine, points out that less than a quarter of a century ago Middlesbrough, Eng., had little to do with the manufacture of steel, though it was one of the most important finished iron-making centres in the world, and in the zenith of its prosperity so far as regards the value of the iron output, which was as recently as 1873, it had 2,136 out of the 7,159 puddling furnaces at that time in existence in Great Britain. The make of finished iron even 20 years ago was 726,000 tons, but directly after 1882 there commenced a rapid decline, so that in 1900 only 136,000 tons were produced, and in 1901 about 94,000 tons.

This remarkable change has been brought about solely by the supersession of iron by steel, first as a material for use on the permanent way of railways and afterwards as a material for the construction of both steam and sailing vessels.

It was about the year 1875 that steel began to encroach on the business of the iron-rail makers, and in this district the production of iron rails (which in 1873 was over 374,000 tons, and formed 53 per cent. of its total output of finished iron) had by 1876 dropped to 124,000 tons owing to the competition of steel. In 1879 the output had dwindled to 8,000 tons, or only 2 per cent. of the total production. This decline in the iron-rail trade was a heavy blow to the iron manufacturers of the North of England, which had been the chief seat of that business in Great Britain.

But to counterbalance this falling off there sprang up toward the close of the seventies a vast extension of shipbuilding, so great, in fact, that it required more iron than was necessary to make up for the decline by the loss of the rail trade. Now both the iron rail and plate trades are of very little importance.

How severely the extension of the steel trade in the district has affected the finished iron trade will be appreciated when it is stated that out of the 45 finished iron manufactories that were in operation in the Northeast of England a quarter of a century ago 25 have completely disappeared; nine still exist as iron rolling mills; two have added a steel plant to their iron works; six have been converted into steel rolling mills and have abandoned altogether the manufacture of finished iron; two roll steel but do not make it, and one is now a foundry. Thus, only 20 of the old works are still in existence. Four entirely new steel rolling mills have been established since 1876, and at the present time 23 works are engaged in the North of England in the production of manufactured iron and steel, of which 10 are steel works pure and simple.

THE ONLY WAY.

Truthfulness in dealing with the public outweighs all other considerations. Why should I be the less careful about the statements I make in talking to the public through the press than when speaking face to face? I speak to each individual who reads my advertisement; my relation to him is a personal one. I must win his confidence. I can only do it by telling him the truth. Not only must I take good care that I do not deceive him, but I must so word my advertisement that he cannot be self-deceived by it.—Dean Alvord, before the New York Sphinx Club.

LINSEED IN 1901-1902.

SPEAKING of the world's linseed crop in 1902, Dornbusch says that although the yield from India proved better than indicated early in the season and was again rather larger than in the preceding year, it fell short of the average. Argentina produced its record crop, and the exports last year increased 160,000 tons on those of 1900. No figures have yet been published regarding the Russian outturn, but, judging from the poor shipment total of 55,377 tons, it may safely be assumed that the crop did not exceed 100,000 tons, or only 25 per cent. of the previous year. The United States of America, like the River Plate, had its banner crop and produced 650,000 tons, or 175,000 tons larger than 1900, which then stood its highest. Shipments to Europe, however, were not in proportion, as the 73,000 tons exported were not only 45,000 tons short of the quantity in 1897, but a moiety even then had to be brought back. Every season this has been the case, and North America always proves to sell more than it can spare for European requirements, and cancelling contracts or buying back invariably follows. Directing attention to the United Kingdom imports, it is found that the needs of Great Britain show a falling off and for last year went below the average by 57,000 tons. British mills used about the same quantity of Indian seed as in 1900 and took up more of La Plata. India has left for shipment but little more than half the quantity at this date last season, and, with Russia about in the same poor position to export as a year ago, it looks as if the "visible supply" for the next few months must diminish. Prospects of shipments in the late autumn are favorable as regards America. The Argentine also promises to be a free shipper again this season, but December is the earliest this Republic can move its crop to the seaboard, and even then only under the most favorable crop conditions. Summarizing the foregoing, it would appear that the sources of supply will be restricted for the rest of the calendar year, while from now onward the market may be subject to the customary budget of crop scares.

DISAPPEARING WINDOW SCREEN.

A WINDOW screen with entirely new features has been patented by Henry T. Wright, of Philadelphia. Nothing adds more to the comfort of a house than a good equipment of screens and yet the bother and trouble of putting them in in the spring and taking them out in the fall and their care during the winter months is a serious drawback to their use. The screens cannot be thrown into the cellar or some unused shed when they are not wanted, but must be stored in some place where they will not be subjected to the extremes of temperature or dampness.

Considerable expense is occasioned by retaining the services of a man skilled in the use of tools to adjust the windows in the spring.

With the screen referred to, all the cares and troubles attendant on their use is dispensed with absolutely. When the screen is wanted for service it can be summoned into place instantly, and, when there is no occasion for its presence, it sinks into a pocket in the wall, out of sight and yet stored in the very best possible place for its reception which could possibly be devised.

The Wright screen is part of the window frame and a larger one below, and can be placed in buildings in the course of construction, although it is readily possible to place them in old houses. There is a small pocket at the top of the window frame and a larger one below, and in these the screens are reposing when not in use. The upper rail of the top sash and the lower rail of the lower sash are fitted with a means of fastening the screen to the sash, and when this union is effected the screens follow the sash as it is moved up and down to suit the wishes of the occupant of the room. On the lower sash the fastener consists of a knob which also takes the place of a sash-lift. An arrow is engraved thereon, and when this is in a horizontal position, it indicates that the sash is working independently, but when the arrow is placed in an upright position, the sash and screen are working in unison. This arrangement permits the window to be opened from both the top and bottom, giving the best possible ventilation and yet both openings are properly protected.

The screen frame is of metal and as it is always protected from hard usage, its life is very long, but should it become necessary to renew it, the screen can be very readily taken out and replaced in a very short time, and the operation can be done by anyone with even the most rudimentary knowledge of the use of tools.

Besides being adapted for use on dwellings, office buildings, hotels and similiar structures, this window screen is also applied to the railroad car window.

PIG IRON OUTPUT LARGE.

THE Iron Age in its current issue says of the capacity of blast furnaces in operation :

"In spite of the blowing out and banking of a number of blast furnaces in the east, in Virginia and in the Ohio Valley, the active capacity with which we entered the second half of the year is as large as it has ever been. This is due to the fact that a number of large plants, notably in the Central West, have resumed after the short strike of the furnacemen in the valleys.

"The weekly capacity of the furnaces in blast on July 1 compares as follows with that of the preceding periods :

	Total capacity per week. Gross tons.	Coke capacity per week.	Charcoal capacity per week.
July 1, 1902	352,590	344,950	7,640
June 1	344 749	337,492	7,256
May 1	352,064	345,627	6,437
April 1	337 424	331,140	6,284
March 1	323,028	316,039	6,989
February 1	332, 45	32 ,440	6,605
January 1	298,460	291,994	6,468
December 1, 190	324,761	3 7,358	7,403
November 1	320,824	313,775	7,049
October 1	307,982	300,538	7,444
September 1	299,861	293,256	6,605
August 1	303,847	297,469	6,578
July 1	310,950	303,793	7,157

"The position of furnace stocks, sold and unsold, as reported to us, was as below on July 1, as compared with the five preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron :

Stocks—	Feb. 1.	May 1.	June 1.	July 1.
Anthracite and coke	121,762	96,315	57 231	61,312
Charcoal	32,433	29,030	15,977	13,725
Total	154,200	125,348	73,208	75,037

"The sharp decline in the stocks of charcoal iron is noticeable."

CARRYING TRADE OF THE UNITED KINGDOM.

The Liverpool Steamship Owners' Association have just prepared a very interesting series of tabular comparative statements with respect to the carrying trade of the United Kingdom during the 10 years 1891-1900, showing the part of that trade carried in British and foreign vessels, distinguishing the trade with foreign countries and that with British possessions, and also distinguishing vessels with cargo and those in ballast. The figures have been obtained from the "Annual Statements of the Navigation and Shipping of the United Kingdom." The tonnage of vessels with cargoes trading to foreign countries in 1891 comprised 36,428,937 British and 15,816,415 foreign, while in 1900 the figures were 42,780,184 tons British and 26,566,403 tons foreign. The annual average for the 10 years was 40,860,575 tons British and 18,887,284 tons foreign. The percentage of British decreased from 69¾ to 61¾, while that of foreign increased from 30¼ to 38¼, the annual average percentages for the whole decade being respectively 68 and 32. The vessels trading from the United Kingdom to British possessions with cargo were of 9,105,416 tons in 1891 and 9,551,871 tons in 1900, while foreign ships were of 963,456 tons in the former year and 959,586 tons in the latter. The annual average percentage of British increased in the 10 years from 90½ to 91¼, while that of foreign decreased from 9½ to 8¾.

A SAVING IN FUEL.

A PROCESS has been discovered by which a saving of 25 per cent. can be effected on the cost of coal either for domestic or manufacturing purposes. At least, this is the claim according to Stoves and Hardware Reporter made by the inventor, who is said to have sold the process to a syndicate of capitalists in this country for a round half million of dollars. They must have considerable faith in the working value of the process, yet there is always a doubt to be cast on any invention which merely promises to revolutionize methods on which inventive minds have been at work for years without success. Some time ago a process for making good fuel out of common clay was exploited, but if it was a success no one outside of those immediately interested has become aware of the fact. There are various patents covering methods for the concentration of heat from the sun's rays and distributing it from a central station, but no plant has been installed so far as the commercial or scientific records inform us, and the practicability of the method is still open to question. There is no desire to cast a doubt upon any fuel-saving process in advance of its demonstration as either a success or a failure, but their repeated discoveries without effective results recall the experience of a large user of power who was called upon by a number of inventors in succession, each one of whom offered him a device that was guaranteed to save him from 10 to 50 per cent. in fuel. A brief calculation showed him that by using all these devices together he could save more than 100 per cent. in fuel and have a considerable quantity left over, a calculation, however, which reduced the several claims to an absurdity.

NO MORE NEED FOR IT.

A characteristic story is told of Abe Gruber, the well-known New York lawyer. When he was a boy looking for something to do he saw the sign, "Boy Wanted," hanging outside of a store in New York. He picked up the sign and entered the store. The proprietor met him.

"What did you bring that sign in here for?" asked the storekeeper.

"You won't need it any more," said Gruber, cheerfully, "I'm going to take the job."—Washington Post.

The estate of R. Hill, general merchant, Ballantrae, Ont., has been sold to W. H. Jones.

Sigredeur Eyolfsson, hardware merchant, Saltcoats, N.W.T., has sold out to A. Anderson.

Taylor & Haggart, manufacturers of iron bedsteads, Victoria, B.C., are contemplating removing to Vancouver.

FIRES.

Myres & Pedden, ironworkers, Winnipeg, have sustained small damage by fire.

Gillean McLean, hardware merchant, London, Ont., was partially burned out ; insured.

DEATHS.

Robert Stevenson, builder, St. Stephen, N.B., is dead.

J. A. Graves, of Graves Bros., general merchants, Tilsonburg, Ont., is dead.

IRON MOULDERS' APPRENTICES.

On Monday the International Iron Moulders' Convention, in session in Toronto, discussed the request presented to them by representatives of the Stove Founders' National Defence Association that the ratio of apprentices to journeymen be increased from one to eight, as it is at present, to one to five. They claimed that the present number of apprentices was not sufficient to keep up the supply of moulders.

The committee appointed to discuss the proposal were not unanimous in their recommendation. The majority report recommended the ratio of one to six ; the minority favored one to seven.

The principal argument of those opposed to increasing the ratio of apprentices was that when the next period of depression comes there will be more moulders than there is work for.

A large number of resolutions were submitted, but it was finally decided to continue the present ratio of one to eight. This was carried by a majority of three to one.

NO INTERRUPTION.

Notwithstanding the severe damage to their Montreal plant by fire, The Henderson & Potts Co., proprietors of The Nova Scotia Paint and Varnish Works, will be able to continue business from the Halifax factory without interruption. Orders are being shipped from that factory now, the firm allowing their customers the difference in freight, while the necessary repairs are in progress on the Montreal factory. The latter is being rapidly overhauled, and in a few weeks everything will be in order again.

To good management men and tools, add Apollo galvanized iron.

There is no way to do so good work or to make so much profit on it.

Brown and Manilla Wrapping

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS

July 25, 1902

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

DOMINION COAL AND STEEL.

THE Dominion Coal Co. and The Dominion Iron and Steel Co. have certainly a bright outlook, to judge by the strides already made, and the demand with which the products of each of these companies meets with. According to the president of the two companies, Mr. James Ross, the net earnings of the coal company for March, April, May and June, the first four months of the fiscal year, showed an increase of $300,000 over the earnings for the same period in 1901. Only the last two of these months were in the season of St. Lawrence River navigation, and July, he thought, would show an output of 300,000 tons or more. He stated that this year there would be over 1,000,000 tons of coal sent up the St. Lawrence against 850,000 in 1901.

As to The Dominion Iron and Steel Co., Mr. Ross said that they could sell three times as much as they could produce at present. The company was rapidly getting in shape to produce the full output of the plant, 30,000 tons per month. The steel, too, was of the first quality, and never had a customer made a complaint. The chief point was to get down the cost of the raw material for manufacturing steel, as from four to five tons of the various materials were required to produce one ton of steel. Along this road the company is proceeding rapidly, as in June, 1902, they managed to have all the ore delivered at Sydney at 35 or 40 per cent. less cost than last year. He expected that the cost could be brought down materially lower than this, which was under $1 per ton.

The company has secured a number of options on ore bodies, and is spending a good deal of money in testing and developing such, as it is their policy to secure all the iron ore possible in Canada. The three buildings for the rail mill have been practically completed and the machinery will shortly be installed.

Mr. Ross spoke of the ever-increasing market for steel, and the number of new industries springing up in which steel was the principal material used. If such corporations of good financial standing were wanting in this country the company would build other mills themselves.

The man who loafs would die were it not that someone always has a loaf to spare.

HELP THE FARMERS.

ULTIMATELY the success of the merchant depends on the success of the farmer. A merchant's good times come around when the farmer comes to town on market-day with a good fat purse. Retailers in country towns all know this, and realize that in the farmer is to be found their best customer.

Under the circumstances it will be to the merchant's best interest to keep the farmer well posted on those matters of public importance which will tend to increase his prosperity. For instance, a pamphlet has just been published by Mr. J. G. Rutherford concerning the breeding in Canada of horses for army use, which contains matter of vital interest to the farmer. In this document Mr. Rutherford points out that the South-African campaign has demonstrated the necessity for equipping the army with serviceable mounts. Such an equipment to day has become imperative in every army with any pretence of being modern.

Canada, which would naturally be expected to supply any number of suitable horses, has been found strangely lacking in this respect. It is not an easy matter at present to obtain in this country any large number of horses altogether suitable for army use. This lack is due to the want of encouragement shown to breeders and the absence of a demand for such horses. To-day there is a demand and there should be an encouragement. Therefore, in self-interest, our merchants ought to direct their country customers' attention to the new demand. Very little extra effort or expense will be required to increase the present small supply enormously. Instead of rearing light horses and ponies, which are of but little value, breeders might just as well raise animals better suited to military service.

EXPORT DUTY ON NEWFOUNDLAND IRON ORE.

A REPRESENTATIVE of HARDWARE AND METAL in London, England, reports as follows: "I have just been informed by one of the Canadian Ministers now in London that during one of the conferences between the Colonial Premiers, Sir Robert Bond, the Newfoundland Premier, remarked that his Government intended placing an export duty on iron ore. 'Sir Robert holds,' said the Canadian Minister, 'that the Island is getting very little benefit from its enormous beds of iron ore, and that as the Dominion Iron and Steel Co. bought the mines at a comparatively low figure and is mining the ore at a very low cost, it can afford to pay a moderate export duty.' "

This is all the information our correspondent furnishes, but it is enough to indicate that the Newfoundland Government proposes to do what it has been for some time expected to do.

About six or seven months ago The Evening Herald of St. John's, Newfoundland, started an agitation in favor of the imposition of an export duty of 25c. per ton on iron ore. The Herald is generally understood to be in the confidence of the Government, and it is possible our contemporary was feeling the way. At any rate, the proposition appeared at the time to meet with a great deal of favor, and it is possible the Government has been influenced by public opinion in the matter.

The iron deposits of Newfoundland which have become so famous of late years are on Bell Island, about 35 miles from St. John's. The ore beds consist of small regular blocks of red hematite, which are piled one upon another to an average depth of about 8 ft., and extending over an area of nearly 1,000 acres. The quantity of ore within this area is estimated to be nearly 40,000,000 tons. The cost of mining the ore and placing it on board ship is estimated at 25 to 30c. per ton. Both The Nova Scotia Steel and Coal Co. and The Dominion Iron and Coal Co. draw the greater proportion of their supplies from the Bell Island deposits. The mines were at one time owned by the former company, but the latter secured an interest two or more years ago for which it paid about $1,250,000. In the area purchased by The Dominion Iron and Coal Co. there are estimated to be 28,000,000 tons of ore.

According to the trade and navigation returns of the Dominion the imports of ore from Newfoundland during the fiscal year 1901 were about 520,000 cwt., the value of which was $165,000. A tax of 25c. on this amount would, of course, greatly add to the cost of the ore. While this would be regretted the iron and steel manufacturers of Cape Breton would still have cheaper ore than any of their competitors on this continent.

LOCAL INTERESTS AND THE ATLANTIC SERVICE.

IT is to be hoped that local jealousy will not be sufficiently strong to prevent the realization of a fast Atlantic service between Canada and Great Britain.

For ten years scarcely any question has been more largely in the public mind than the necessity of a fast Atlantic service. There have been times when it has been relegated to the background or eclipsed for the time being by some other question, but it has again and again come to the front; and it will continue to do so until it has been dealt with in a way that the necessities of the case demand.

Among the various problems which are to-day demanding solution that regarding transportation transcends all others. The tariff is important. Imperial trade is important. But unless we have efficient transportation facilities the trade and commerce of the country must labor under disabilities no matter how favorable the conditions may be in other particulars. And the fast Atlantic service is at least one of the pivotal points of the transportation problem.

On some of the questions before the public it would be practically impossible for the business men to unite, because of the political atmosphere which surrounds them. But there is no political atmosphere around the transportation question. As far as the Atlantic service is concerned there is no doubt in it a mixture of sentiment, particularly since the Morgan merger startled the British world, but the sum and substance of the matter is, after all, business. It therefore demands the attention — the careful attention—of business men. If they cannot solve it in a satisfactory manner no one can. To leave it to the politicians would be idle. And yet there is danger of business men delaying solution of the question by viewing it from a local or provincial and not from a national standpoint.

What we want to keep before our mind is not the particular interests of Montreal or Quebec or of Halifax or St. John. The paramount interest to consider is that of the Dominion. And the more we allow that interest to overshadow all others the more easily will the question be settled.

MISMANAGED COUNCILS.

MISMANAGEMENT of the city's affairs is even a more than usually fashionable subject for discussion in Toronto at present. It is asserted that the affairs of the city are not run in a business-like way. No doubt this is quite true. And the cause is not far to seek: It is the lack of practical business men in the council.

If the ward heeler is the predominating influence in the council, the citizens cannot expect anything else but mismanagement. Like begets like.

We are quite aware that the self-respecting business man has very little to encourage him to enter public life through the door of the municipal council in Toronto or any other city. Influences without number are brought to bear against him the moment he steps into the arena. But these influences, even if in the beginning they defeat him, cannot finally do so. Next to fitness the essential to success is persistency.

Business men are gradually awakening, and it is to be hoped that when the next municipal elections come around they will be wider awake than ever before, not only in Toronto, but in every Canadian city as well.

Some attention to this matter might, with profit, be given by such organizations as the Canadian Manufacturers' Association, the Retail Merchants' Association, the Maritime Board of Trade and the Master Plumbers' Association when they meet in annual convention in the course of the next month or two.

TALES OF TRAVELLERS FROM THE EAST.

MR. J. F. JUNKIN, managing director of The Manufacturers' Life Insurance Company, who has just returned via the Empress Line from Japan and other points East, was asked the question : " Is there any opening for Canadian enterprise in China and Japan ? "

Said Mr. Junkin : " Yes, there should be a large and continually growing market for Canadian flour, lumber, beef, and other products, as well as for many lines of manufactured articles, such as electrical appliances, machinery, etc. Japan has made more progress during the last 30 years than any other nation has done in centuries, and electric light, bicycles, and other modern conveniences are coming into general use, even in the interior. The Anglo-Japan alliance will be strong enough to protect China from the European nations who have been acting towards China like a pack of ravenous wolves. There will be no more partition or grabbing of territory, and China will soon learn to confide in the good intentions of the allies, who will then be able to lead her out into more enlightened and progressive ways. Once thoroughly awakened and enlightened under some coming leader, she will startle the nations. The Chinese have a great deal of latent energy, and the business men are honorable in their dealings."

Mr. Junkin also stated : " India, for want of water, consequent on deforestation, seems to be in a state of partial or total famine almost all the time, especially in districts without irrigation. Canadians should take a lesson and preserve their forests, and wherever they have ruthlessly destroyed them, as in many parts of Ontario, they should do a certain amount of replanting each year. In Japan, where they are almost nature worshippers, they long ago began reforestation, and have now many beautiful forests of cryptomena, pine, camphor, maple and other fine trees. Not a twig is wantonly sacrificed, with the result that the whole country is like a garden. Water is plentiful everywhere, and their forests are a perpetual source of wealth."

Mr. W. C. Matthews, Canadian general manager for R. G. Dun & Co., has also just returned from an extended trip to the Orient. When interviewed, Mr. Matthews stated : " The Philippines are very rich in natural wealth, agriculture, minerals and forests.

" This wealth can only be reached by the development that comes through manual labor, and by the suicidal policy of the United States Government in applying the Chinese Exclusion Act to the Philippines they have shut out the only class of people able and willing to do the work—the Chinese coolies. The country will never be developed by the Filipinos, as they are idle and uncertain, incapable of any sustained physical effort, and unwilling to work more than to supply their bodily wants, which are few and easily met."

When asked as to the possibilities for trade, Mr. Matthews said that there was practically no chance for Canadian trade with the Philippines. Flour was about the only article that could be sold, and the long and expensive haul before shipment made competition with the Oregon and Washington product impossible.

There is a great deal of building going on in Hong Kong, with an active demand for structural steel and other building material that could be supplied by Canada if a steel plant was in operation on the Pacific Coast.

" All the foreign trade in Hong Kong, both import and export," he continued, " is in the hands of Europeans and Americans, with Great Britain well in the lead. The distributing trade is done exclusively by the Chinese, who are natural born traders, shrewd and keen, but generally very reliable. Their simple word is taken for transactions involving large sums of money, and they very rarely break faith."

Of Shanghai, where British, German, and United States merchants compete, the former still doing the bulk of the trade, Mr. Matthews spoke with enthusiasm. Of the Chinese he said that they are a much higher type of men than is generally supposed in Canada, where we practically only see the coolie class ; they are born merchants, cool, clear-headed and able, and in a business transaction can hold their own with any nationality under the sun."

" China," said Mr. Matthews, " was suffering from the low value of silver, the currency of the country being on a silver basis. The indemnity of 450 million taels due other nations was due in gold, and with silver at its present price, this meant adding 150 million taels to the present indebtedness, which was a very serious thing for even a rich country like China."

Mr. Matthews replied in the negative to the question : " Is Canada doing as much business in China as she could ? "

" The country is an enormous buyer of flour, which comes almost entirely from the United States, mainly from the same causes as in the Philippines, and because it is cheaper, though poorer. A trade could be got by Canada, and while it would cost something to do it, the market would be sure when once captured, as it is difficult to get a Chinaman to change when once satisfied. There is a great deal of lead used, and with the Government bounty now in force she should now get her share of this market. Lumber can also be sold in much larger quantities if transportation facilities are improved."

" Commercially, Japan has been making enormous strides," said Mr. Matthews. " In 1891 their total foreign trade, both export and import, was 142,454,540 yen ; in 1901 it reached 508,166,187 yen, an average growth per year of 36,571,647 yen. During the four years of 1897 to 1901 the tonnage of Japanese vessels increased 2,287,706 tons, bringing it up to a total of 3,861,659 tons, while Great Britain has 4,080,583 tons and Germany 1,192,153.

" Their motto is evidently ' Japan for the Japanese,' " said Mr. Matthews, "and while they made use of foreigners in starting their railways, telegraphs, etc., they have now dispensed with them entirely, and everything is done by their own people. There is a chance for Canada to increase her trade in timber, lumber, flour, fish and lead, but it will have to be gone about systematically, and may require the expenditure of some time and money before satisfactory returns are reached ; but the field is a good one and the business worth working for."

Mr. Matthews stated that wherever he went in the Orient Canada was a frequent source of conversation. The contingents to the South-African War had advertised the country greatly, and created a warm feeling for us among the other colonies."

CONTRACTS FOR A WINNIPEG SCHOOL.

On July 21 tenders for the erection of a new public school on the corner of Edmonton and St. Mary's streets, Winnipeg, were awarded at a meeting of the public school board. Contracts were entered into with the following contractors, their tenders in each case being the lowest : Kelly Bros., excavation, draining, stone and brick work, cement floors, plastering, $16,900 ; John McLeod, carpenter and joiner work, $11,845 ; W. & W. Rutley Co., heating and ventilating apparatus, $2,500 ; James A. Payne, painting and glazing, $1,640 ; Douglas Bros., tin and galvanized work, $1,455 ; J. L. Wells & Co., plumbing, $446 ; E. S. Harrison, electric wiring and fixtures, $285. Total, $35,071.

THE B. C IRON INDUSTRY.

At a meeting of the Voters' League, Victoria, B.C., the report of the joint committee, as given by Mr. Lugrin, was adopted, that the following resolutions should be carried : (1) That the Government be requested to use the services of the Provincial Mineralogist to examine and describe and sample known deposits of iron, and that a bulletin be published embodying the results ; (2) That an official report embodying the report of the special committee on iron and steel and all other available and reliable matter tending to advertise the iron and steel resources of the Province be compiled, and copies forwarded to the Hon. J. H. Turner, and the boards of trade at the leading cities in Canada and elsewhere.

LEAD REFINING AT TRAIL, B. C.

An unparalleled degree of purity has been attained in practical lead refining operations. At Trail the refined product turned out by the new process of refining by electricity is no less than .999 pure. In addition to attaining such wonderful results with respect to the quality of the product, the electrical process is understood to be less costly and cumbersome than the chemical process ordinarily followed.

The Canadian refining industry thus secures an initial advantage over its competitors, which will be timely, for under existing circumstances the industry has many odds to compete against.

The present production of refined lead at Trail is ten tons daily, and some 40 men are employed about the refining plant, although the permanent force to maintain production at its present standard will not be as large as will be the case as soon as a market can be found for an increased production.

CANADA PAINT COMPANY'S ANNUAL PICNIC.

SATURDAY, July, 26, was a red letter day with the employes of The Canada Paint Co. in Montreal. Seven carloads of merry-seekers pulled out of the Bonaventure Station, G.T.R., bound for Otterburn Park at St. Hilaire.

The managing director, Robert Munro, owing to a peremptory engagement, was unable to accompany the excursionists, but he assisted in seeing that everyone was safely embarked and there was much cheering as the train pulled out.

The St. Gabriel Independent Brass Band was engaged for the day and played lively airs at each stopping place en route. Casey's Symphony Orchestra occupied the stand for the dancing. The music was all that could be desired.

Fortune favored the picnicers in the matter of weather. The day was a glorious one, the sun shone brilliantly in its setting of blue sky which was just here and there tinged with fleecy clouds. The countryside and Campbell's seignory on Beloeil mountain never looked better. A gentle breeze played upon the temples of the gay throng and served to keep everyone in good humor. The air was vocal with the songs of birds and the laughter of children, who, in their exuberance of spirits, carolled forth merrily. Like untiring sentinels the giant trees (their opulent foliage just swayed to motion by the gentle zephyrs), looked down upon the pleasure-seekers and spread a refreshing shade. Cattle grazed and lowed in the surrounding fields, the "chip," "chip," "chip" of the gay chipmunk was heard, and the picture was, indeed, an inviting one.

Beyond, the wavelets of the Richelieu River were seen, and ever and anon loud laughter broke the pastoral stillness as the games proceeded—some drove, some fished and some watched the ball match, "Elephant" vs. "Prism." Johnny Baptiste was there lolling in the shady places, breathing tender words by wireless telegraphy to Rosalie Laflamme; Jock O'Hazeldean and Flora McGillicuddy sat by the river bank pensive and silent as befits a Highland courtship.

James Campbell, of the The Acme Can Works, acted as umpire, and also gave a fine exhibition of wrestling with Fred Thibault, catch-as-catch-can style.

Hugh W. Aird, the popular and indefatigable treasurer of The Canada Paint Co., also acted as umpire, and his decisions always gave unqualified satisfaction.

The chemist of the Company, Dr. Kyle, made a capital referee for the football match, but alas! as most referees do, he came out of the field badly battered. Dr. Kyle took the friction good naturedly, and invariably threw oil (linseed) upon the troubled waters.

The hundred-yard dash was a brilliant affair, and elicited great praise from the spectators. Throwing the 56-lb. weight was a fine exhibition of skill. It was found that some one had purloined the weight for a boat anchor, and a bladder of putty was impressed into service in lieu of the 56-lb. avoirdupois.

A large amount of work devolved upon the secretary, Edward Coleman, but he performed his duty to the entire satisfaction of everyone present, and was voted unanimously a jolly good fellow.

It is satisfactory to note that it was the most successful outing ever held by this company's staff, and they desire to heartily thank, one and all, those who so liberally contributed to the picnic fund.

The programme was printed in colors, and was a more than usually elaborate thing of the kind.

John Thompson, the superintendent, armed with a marshal's baton, was here, there and everywhere on the grounds seeing that the ladies were well looked after, the children regaled with cocoanuts, candies and fruit, and that each man received his just due. John Cox, of the printing department, attended to the gentlemen of the press, and saw that their wants were supplied.

NEGOTIATING FOR STEAMERS.

F. H. Clergue, of Sault Ste. Marie, is negotiating with President Campbell, of the Detroit, Belle Isle and Windsor Ferry, concerning the purchase of one of the steamers now operating at Detroit. The boat will, if the deal goes through, be placed in operation between the American and Canadian Soo above the rapids. The Clergue interests want two boats capable of breaking the ice, and, as the steamers of the Ferry Company have demonstrated that they can do so efficiently, one of them will probably go to the Soo.

HANDSOME SILVER TROPHY.

The new Ontario Bowling Association trophy, to be competed for at the annual tournament at Niagara-on-the-Lake commencing August 10, has been awarded to The Toronto Silver Plate Co., Limited, after some keen competition.

It is to be manufactured of sterling silver and stands 25 in. high on an ebony plinth. The neck and upper portion of the cup is fluted in the French gadaroon style. The shield is handsomely engraved and surrounded by an applied wreath of maple leaves. The ribbon bearing the name of the Association is also applied.

In the centre of the shield are bowls and net, the handles are also ornamented at outer extremity with bowls in lignum vitae. The base bears four sterling silver shields with lignum vitae bowls alternately placed.

The design is most pleasing and reflects a great deal of credit on The Toronto Silver Plate Co.'s designer.

10,000 DIFFERENT BRUSHES.

It is an interesting fact to note that the United Factories, Limited, manufacure over 10 000 different kinds of brushes. They make a brush for every known want—from the finest camelhair brush down to the common dandy brush. Dealers who make a specialty of horse and carriage brushes will do well to note that this large concern import all their raw material direct from the producer. This means much in a wide-margin-of-profit sense to the retailer.

LONDON ROLLING MILLS.

Work on the plant of The London Rolling Mills Co., London, has commenced, and it is expected that the new industry will be in operation in November. The mills are to be located on Trafalgar street, east of the London and Port Stanley tracks, and adjoining the site for The McClary Co.'s new foundry. The main building will be 150 x 176 ft. About 65 persons will be employed at the start. The works at Guelph have been closed, and the removal of machinery to London begun.

A NEW AGENCY.

F. C. Hirsch & Co., 228 St. James street, Montreal, have been appointed sole Canadian agents by Hartley & Sudgen, Halifax, England, for their welded wrought iron boilers, for heating churches, schools and public buildings. These boilers, being welded, instead of riveted, cannot leak at the joints. For public buildings these boilers are unexcelled, and those having to fit up new buildings should examine them.

INQUIRIES ABOUT CANADIAN TRADE.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London :

1. Inquiry is made for Canadian shippers of wood flour by a firm who are needing a considerable quantity.

2. A London firm have asked to be placed in communication with some of the principal oilcake mills in Canada.

3. A firm in a good position to undertake the agency in London of a large wood pulp mill in Canada desire to correspond with an important concern not already represented.

4. A Welsh importer is desirous of obtaining f.o.b. prices at Canadian ports, and c.i.f. prices Bristol or Liverpool for Canadian spruce and pine lumber, mouldings, etc.; also for oils and greases in barrels or drums. He is also prepared to quote for high-grade Portland cement for export.

5. An Italian house ask to be referred to a leading Canadian exporter of Labrador cod.

6. An English firm manufacturing agricultural tools, steel files, etc., make inquiry respecting the opening in Canada for their goods.

7. A Canadian firm of engineers with a branch in England are open to take up the agency for Canadian manufacturers of pig iron, steel rails, billets, iron and other ores, wood pulp, etc.

8. A young Canadian now on a visit to Europe desires to get into touch with some English firms in the grocery and smallware line who require such an agency in the Dominion as he can offer on his return.

[The names of the firms making the above inquiries can be obtained upon application to the Editor of HARDWARE AND METAL.]

The Value of Quality.

The one thing and the most essential thing in any article that distinguishes it, that makes it better and more satisfactory than other similar articles in quality.

THE SHERWIN-WILLIAMS PAINT

has every essential of quality. It's a well made paint—one that always gives satisfaction to the user and never brings discredit on the dealer. It's a paint that a dealer may pass over the counter and be certain of good results.

In addition to intrinsic worth, it has the selling qualities that build up trade and make money for the dealer. It's well advertised and is known and sold all over Canada.

Our B-13 booklet tells how Sherwin-Williams Quality and Sherwin-Williams Advertising builds up paint business. Write for it to-day.

SALE OF BLACK MAGNETIC ORE MINE.

Deposits of black magnetic ore at Whycocomagh, C.B., were sold, July 25, through the office of McLaughlan & McCabe, solicitors to officials of The Dominion Steel Co. for $100,000.

The quality of ore is by experts declared to be extraordinary, containing 66 per cent. metallic iron, with only traces of sulphur and phosphorus. The quantity of silica is but small. The mine was discovered last year, but it was only last month that its great value became apparent. Its fame traveled swiftly, for within the past few days requests for specimens have been received from Sault Ste. Marie, Montreal and Toronto.

The quantity of ore is estimated at many millions of tons.

THE COMMISSIONERS MEET.

At the first meeting of the Temiskaming and Northern Ontario Railway Commission on Tuesday, July 29, all of the commissioners were present—A. E. Ames, Edward Gurney ; F. W. Folger, Kingston ; M. J. O'Brien, Renfrew, and F. E. Leonard, London. Mr. Ames was chosen chairman, D. E. Thomson, K.C., was appointed counsel pro tem, and P. E. Ryan, secretary pro tem. Reports were received from W. B. Russell, chief engineer for the line, and E. J. Sinclair, acting solicitor, showing the survey and the purchasing of the right of way to be making satisfactory progress. Work is in proceeding on the first 20 miles.

The next meeting of the commission will be on August 9.

CANADIAN AGENTS.

Decatur, Bull & Co., Montreal, are sole Canadian agents for the National Cutlery Co.'s shears, who are not connected with any combination, who make all their own malleables, and manufacture the only tinners' snips and shears made in the world with a steel ride. No soft spots, no saw edges, and with a perfect guarantee. See cut of the no stop joint. Each pair of these shears put up in a separate pocket.

FINEST MICA MINE IN THE WORLD.

The Lacy and Smith mica mine at Sydenham, near Kingston, is said from recent discoveries to be the finest mine of this class in the world. A new bed of great value has been turned up and pieces 7 ft. long have been taken out.

HER FIRST LOCOMOTIVE.

The following is from The Toronto Globe of July 29, 1852 : "A locomotive was put in motion on Monday, for the first time, in New Brunswick, on the first section of the St. Andrew's and Quebec Railway."

A NEW ENTRANCE.

Lewis Bros. & Co. will shortly have the new entrance to their warehouse completed, which will considerably improve the appearance of that part of the building. The new stairway, which is being put up, is much wider than the old one, and is being handsomely fitted up in hardwood. The old entrance will be closed entirely.

AGAIN ON DECK.

Mr. F. S. Murdoch, who represents The Canada Paint Co. in the Lower Provinces, had the misfortune a while ago to meet with an accident, fracturing his leg. We are happy to report that he is once more about and "on deck" for business. Mr. Murdoch has many friends in the Maritime Provinces who will be glad to hear of his recovery, and, it is understood, that a hearty welcome is awaiting him at various points.

MR. CRATHERN A LEADER.

Mr. Jas. Crathern, the well-known wholesale hardwareman of Montreal, is a candidate for reappointment as the representative of the Board of Trade on the Harbor Commission. "His record as a member of the commission," remarks The Gazette, "is evidence that to reelect him will be to retain the services of a capable man attentive to his duties. The likelihood is that he will be reelected."

RETAIL MERCHANTS' MOONLIGHT.

The Toronto Branch of the Retail Merchants' Association of Canada will hold their annual moonlight excursion on Wednesday, August 13, 1902, on the steamer Chippewa.

EXCURSION OF GUELPH SALESMEN.

About 500 salesmen and clerks, of Guelph, enjoyed their second annual outing to Berlin on Thursday, July 24. The Royal City Association had chartered a special train.

The officers were as follows: Secretary, O. L. Dunning; starter, J. Gould; judges, C. L. Nelles, F. Hendley and James Hewer. President Wallace, with the other officers and members of the committee, assisted these gentlemen, and the manner in which the sports were run off was indeed creditable.

In the evening, through the kindness of His Worship Mayor Eden, the Berlin band gave a concert at the park for the pleasure of the visitors, at which about 3,000 people were present.

TOURISTS IN MARITIME PROVINCES

The I.C.R. is doing a rushing business these days. The tourist travel this season is very large. For the 11 months of the year ending May 31 last there was a deficit of about $40,000, compared with $600,000 for the same time last year. The June figures are not yet completed, but when they are this deficit will be wiped out and there will be a small surplus remaining. When the I.C.R. estimates were under discussion last season Mr. Blair said that he expected to close the year with a surplus of about $40,000 or $50,000, and his expectations, according to the information which is now being received at the Department, will be borne out when the final returns are in.

AN EDMONTON HARDWAREMAN'S VIEWS.

Jas. A. Stovel, one of the leading hardware merchants of Edmonton, Alta, in Winnipeg last week stated that the Edmonton district is filling up very rapidly with a splendid class of new settlers, and real estate values have increased very materially during the last two years. One section of the district has been settled by a contingent of 3,000 Russians, who are all prosperous, and will make a substantial addition to the population of the West. Mr. Stovel has great faith in the future of the Edmonton district, and points to the remarkable growth of the town and district as one of the features of Western development.

Robinson & Co. are reported as about to start in the retail hardware business in Toronto.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

POWER REQUIRED TO DRIVE MACHINERY.

SOME recent tests made on machine tools and shafting showed that 60 feet of 2-inch shafting, driving 17 countershafts with from one to three belts each, required 5 amperes to drive at 150 revolutions per minute, the current being supplied at 150 volts.

To cut hard cast iron required 6 amperes, the cut being ½ by 1-16 inches, and the cutting speed 100 feet per minute with one of the new special tool steels.

A 20-inch drilling machine run without cut, absorbed 1 ampere. A circular milling machine, run on cut, took 1 ampere, and idle it absorbed 0.5 ampere only.

A spur-gear cutting machine requires 0.75 ampere idle, and 1.25 ampere when cutting teeth of about ⅜-inch pitch three at once.

A 6-inch lathe only absorbed 0.25 ampere idle. Except the heavy boring mill with 30-inch table, which did the heavy cast-iron cut, the machines cited were all of light type. Generally, it may be said that machine tools of the light order require very little power to drive them, and there is not much present reason for applying separate motors to them. The 60 feet of shafting cited above was driving 17 machines, all placed on one side of the shaft. It could drive an equal number of machines placed on the opposite side of the shaft, or, say, one machine to each 2 feet of shafting. As the belt pulls would balance on opposite sides, a total current for 34 machines and their countershafts would probably not exceed 8 amperes, or, say, 0.25 ampere per machine. Where machine tools are busy, it will not pay to drive them by separate motors - it will be better to group them on shafting. Nothing, of course, should interfere with the grouping of the machine to secure the best arrangement of work.

Where one shaft drives a number of similar machines, there is some economy to be secured by coupling it up in several lengths, so that in the event of a slack period, or of overtime on a few machines only, the line shaft may be uncoupled beyond the few machines needed. Where it can be arranged, the motor should drive upon the middle of the shaft, but very frequently it is more convenient to arrange the motor to drive from the end.

When a shaft drives different kinds of machines, all operating on the same pieces, it may be both possible and convenient for the machines to be mixed together all along the shaft, instead of being grouped in sets of A, B, C, etc. Then at slack periods some of each machine can be driven off one section of the shaft, the remainder of the shaft being uncoupled for economy of power. This point is, of course, to be secondary to shop economy, but may well be attended to if other economies permit of it.

No bevel wheels should be permitted for coupling shafts at right angles. Each shaft must have its own motor. Heavy machines should not be grouped with light machines, especially when the heavy machines are of the reciprocating order, such as heavy planers. Heavy machines of this type demand a heavy current at each point of stroke reversal. They cannot well have fly-wheels, except at the motor side of the driving belt, because the back and forward strokes of the machine are done at different speeds, and a fly-wheel is therefore inadmissible. It is thus proper for heavy machines to have their own motors, while it is also equally proper that a large number of small machines should have one motor only the load on which is rendered more uniform with the number of machines it drives. In textile machinery the speed is constant for long periods at a time in a few machines, and absolutely so in others. It does not vary widely in any.

In machine tool work machines are fitted in themselves for a wide range of speed. Where a motor can be economically run at wide limits of speed, it will enable the machine which it drives to be simplified to a corresponding degree. When arranging for driving a new works, a balance must be struck between the simplification of the machine and of the motor which drives it. As specially arranged machines are at present more difficult to obtain of satisfactory order than of standard machines, this should be remembered when deciding upon the system to be employed. With separate motors to each machine, each motor must have a power in excess of the maximum effort of the machine it drives. Consequently the aggregate power of a dozen separate motors will be nearly or quite double the power of a single motor that would drive the dozen machines in a perfectly satisfactory manner. Separate motors are therefore likely to involve an excessive first cost. For the remodelling of existing works, the separate motor will usually be quite out of the running. Fairly modern places may require little else than the removal of present motive powers in favor of electrical motors, the present motive power being perhaps a small steam or gas engine on each line shaft, or, perhaps, a pair of bevel wheels, or a belt or rope pulley. Where enormous economies have been effected by means of electrical driving, the cause must be sought in the widely scattered nature of the works, the comparative fewness of machines, and the great length of shafting, or of more wasteful steam piping, and in the badness of the bearings of the shafting and of the attention, as well as in the low quality of the many small engines employed. But in a textile factory there is but small hope of any economy by electrical driving. Probably about one-fifth the present indicated horse-power could at once be cut out by discarding the main engine and driving each shaft by a separate motor. A really well-driven factory may require 37 tons of coal per 1,000 horse power per week, or per 800 horse-power delivered to the shafting. The coal bill is, say, £20 per week. The engineer and fireman will still be required to attend to motors and heaters. To supply 800 horse-power for 56 hours per week for £20, will demand that energy must be sold for 0.107d. per horse-power hour for fuel, to compete with the best present steam practice; allow even ¼ of a penny per horse-power hour, or, say, 1-6 of a penny per unit, and it will be seen that where electrical energy is generated from coal, utilized by means of engines with a poor load factor and distributed by cables, there is but little prospect of its competing with independent high-class steam engines in well-arranged factories of the textile type. But there are undoubtedly many factories that use probably three times the amount of coal of our high-class assumed factory, at 50 per cent. greater price. Power must, therefore, cost these factories about 0.5d. per horse-power hour, or even 0.7d. per unit.

For second-class factories electrical energy can be supplied at paying rates, while for certain classes of factories using heavy machines which do not run continuously, electricity can be purchased to show an economy. Every case must be considered on its own merits, but upon the general lines above indicated.—Electrical Review.

"TWO BALLS"

"Two Balls" is the name of a folder which is being distributed by The Canadian General Electric Company, Limited. The Two Balls Adjustable Hanger, as the name implies, consists simply of two balls, within each of which is concealed in its proper relative position, a vulcanized hard fibre flanged pulley over which the cord passes. Thus the bearings for the cord are of the best insulating material. The whole construction is so simple that there is virtually nothing to get out of order—no springs, no mechanism—two balls, that's all. Several cuts are contained in the folder showing how it is possible to hang the light on a "Two Balls" adjuster, and place it or take it just where you want it. The whole works with automatic adjustment.

The hanger is shown in plain enamel finish, attached to a common rosette at the ceiling, with pattern finished in black iron, gold bronze and aluminum. The hanger is also used with a common attachment plug screwed into socket on the usual fixture, thus furnishing a convenient way of using the "Two Balls" as a portable electric lamp. The hanger is also shown in plain polished brass or nickel with ceiling canopy, being used in a finer grade of work than the enamel finish. A cut shows the hanger in fancy polished brass, embossed pattern. This is often chosen instead of the plain polished finish.

NICKEL STEEL FOR ENGINE FORGING.

By R. S. Tappenden.

THE principal advantage of nickel steel over ordinary carbon steel for forgings lies in the relation which the elastic limit bears to the tensile strength and elongation, the elastic limit being in a sense the true strength of the metal. The elastic limit of nickel steel is very much higher than the elastic limit of carbon steel of the same tensile strength and elongation, very often 30 per cent. higher, and in some cases as much as 50 per cent. higher. The principal drawback to the commercial use of nickel steel is the first cost of producing it, which, in many cases, is higher than the cost of ordinary finished forgings.

The United States Bureau of Steam Engineering is using nickel steel very largely in the principal engine forgings, the specifications being of H. G. M. F. tensile, 95,000; elastic, 65,000; elongation, 21 per cent. in 2 inches. These specifications are met and in many cases exceeded at the works of The Fore River Ship and Engine Company, some tests going as high as 74,400 elastic, 110,000 tensile, 21 per cent. elongation.

One virtue of nickel steel is the facility with which a low carbon steel will harden, it being the practice after a forging is forged and rough machined, to heat it and dip in oil, which hardens it very much; afterward the forging is submitted to an annealing process which removes any strains set up in the metal by the sudden cooling which it receives. Nickel steel, after the first cost of production, is not much more expensive to forge than any carbon steel that runs over 0.40 per cent. carbon, and about the same care is necessary in heating and forging as is required by a high carbon steel.

The market for nickel steel is gradually spreading to the commercial trade. Some of the largest engine builders are using it in work where special strength is required; notwithstanding the increased cost over common steel, it is money saved when we consider the cost of breakdowns and delays.

In cases where strength and lightness are required, the high elastic limit of nickel steel permits of using forgings of much less sectional area for the same strength. When the virtues of nickel steel become more largely known it will most surely be used largely in our merchant marine. One of the greatest benefits derived from its use is the fact that a fracture started is not nearly so apt to increase in size as in common steel or wrought iron. This is due to the great tenacity and strength of the metal.

Nickel steel if properly forged, oil tempered and annealed has a very fine grain, and the fracture, in testing, is close and homogeneous and free from crystalline spots. Nickel steel permits of a very fine finish on polished surfaces, and is free from checks and seams, and compares very favorably with any other composition of either steel or wrought iron.

In forging the ingots the United States Government requires a discard of 20 per cent. from the top and 5 per cent. from the bottom from all bottom-poured ingots and a discard of 25 per cent. from the top of all others. The wisdom of this policy is borne out in general practice, as the testing machine shows very quickly when the stock is taken too near the top or bottom of an ingot. Anybody trying to be economical in workin up the discard always regrets the attempt, as it soon shows in the quality of material, and inspectors should be extremely careful that the full amount of discard is taken off and not embodied in the forgings.

NEW GASOLINE MACHINE.

A. F. Gundlach, of Sorel, Que., and F. Paul, jr., have invented a new gasoline gas-producing machine. It obviates difficulties experienced from danger of asphyxiation, and the light is cheap. One gallon of gasoline produces 546 feet of gas, thus making the gas cost 31c. per 1,000 feet.

TO PREVENT COLLISIONS.

An interesting invention for the prevention of railroad collisions has been made by W. J. and J. P. Hare, of Toronto. By means of a third rail, composed of two bands of metal insulated on a wooden base, on a wheel similarly constructed an electric current is sent out half a mile or more in each direction from the engine, the current being alternated by means of an eccentric connection in the driving wheel axle. It is claimed that tests have shown that in this way a positive warning will be given to each of two approaching locomotives.

NEW LIFT LOCK NEAR PETERBORO'.

Rapid progress is being made in the new lift lock on the Trent Valley Canal, just east of Peterboro', which, when completed, will greatly lengthen this chain of inland navigation. This lock is quite remarkable in its way. Its function will be to lift vessels bodily a height of 65 feet to cover a high ridge of land and to avoid building half a dozen or more small locks, to pass which would consume so much more time. The new lock will accommodate vessels 140 feet long, 3[illegible] feet wide, and of 6 feet draught, and is built to raise 2,000 tons by hydraulic pressure. In its construction, which has so far occupied four years, 26,000 cubic yards of concrete, made from Canadian Portland cement, have been used, or a weight calculated at 112,320,000 pounds The work is of great magnitude, and yet simplicity, as the lifting of the one pontoon containing the vessel will be accomplished by hydraulic pressure by filling the corresponding pontoon with water to the required weight and lowering it, thus the one weight of water raising the other, including the vessel, by overbalancing it.

A NEW ELECTRIC CLOCK.

The latest electrical device is a clock that will run for more than three years without winding, and keep good time throughout the entire period, says Profitable Advertising. It was invented by Oscar A. En Holm, and is manufactured by The Commercial Electric Time Company.

The application of electricity is in supplying a motive power in the place of the usual spring. In the base of the clock, concealed from view, are two sealed batteries whose capacity is ten ampere hours. In the place of the spring, and running through the centre of an electro-magnet or solenoid, is an armature in the form of a rod composed of a magnetic material. This core is suspended from a lever, which is connected to the gear train by means of a small ball clutch guided by standards. The clock starts with the core or armature at its highest point, its own weight carries it downward; and, as it descends, it pulls down the lever with it, which has a sliding motion insuring uniform driving power, thus giving the driving power to the regular machinery of the clock.

When the armature reaches the lowest point it tips a bulb containing mercury, which completes the circuit. This causes the electromagnet to raise the armature to its original height, when the bulb again assumes an upright position, disconnecting the circuit.

It is stated that the batteries contain enough electricity to run the clock for more than 3,000 days, or over eight years, but the makers guarantee it for only three years.

MACHINERY NOTES.

H. W. Petrie, Toronto, shipped J. Ballantyne & Son, Preston, a 16-inch shaper.

Dyment, Butterfield & Co., Barrie, Ont., have added a 100-inch radial drill to their plant, the machine being furnished by H. W. Petrie, Front street west, Toronto.

The July monthly stock list of machinery, tools and power has just been issued by H. W. Petrie, 141-145 Front street west, Toronto. It contains its usual complete list of machines for immediate delivery.

Owing to the satisfaction given by a "Jewel" automatic engine installed in the plant of The Northern Navigation Company, at Collingwood, some time ago, H. W. Petrie, 141 - 145 Front street west, Toronto, has just made shipment of another No. 4 "Jewel," to be operated in the plant of the above company.

The Toronto Junction Gasoline Engine Company, 116 Bay street, Toronto, have just received a consignment of steel launches finished throughout with polished oak. They report that Dr. Emery has taken their gasoline launch Wanda to Lake Simcoe. This company has just completed a gasoline engine for pumping oil for the plant of Fox & Ross, Northwood.

A CLEVER DEVICE.

An exceedingly clever device is "Porcelain Cleats, No. 1740," just issued by The Canadian General Electric Company, Limited. Reasonable claims, tersely expressed and admirably arranged render the advertisement neat and attractive. "Hardware and Metal" seldom sees a better distribution card. The final exhortation is particularly good. "If you agree, you will order; if you doubt, order and be convinced." This advertising effort is sure to prove a splendid trade bringer.

The International Mining Company, Limited, with a share capital of $1,500,000, has been incorporated by a number of Sault Ste. Marie men, including L. C. Holden, W. M. Snell, V. E. Metzger, M. J. Magee and S. E. Fleming.

TWENTY NEW LOCOMOTIVES.

Twenty consolidated locomotives for special freight service, five passenger locomotives, and two for switch work are among the additions to the rolling stock of the I.C.R. The contract for these has been given to the Canadian Locomotive Co., of Kingston, Ont. The Rathbun Co., of Deseronto, Ont., will build 150 platform cars for the people's road. In the I.C.R. shops at Moncton there are under construction four 10 wheeled passenger locomotives, a first-class car and a number of platform and box cars.

Facilities at Moncton are also to be increased by the addition of a car shop, blacksmith shop, storerooms and offices for the rolling stock department, all of which work will be done by tender. Roundhouses and shops will also be built at River de Loup and Chaudiere Junction.

These additions have been necessitated by the very rapid development of the business on the line.

The new I.C.R. steel ferry steamer Scotia is running on regular schedule across the Strait of Canso and is giving every satisfaction. When the 30 mile stretch of road from Stellarton is equipped with the 80-lb. rails the I.C.R. will have heavy rail facilities from Truro to the Sydneys. This is expected to prove of immense advantage in handling the traffic which must eventually come from the Cape Breton towns.

BEDSTEADS.

An invitation is extended to the trade to see the samples of English brass and enamelled bedsteads of every description, which F. C. Hirsch & Co., 228 St. James street, Montreal, have received. They are manufactured by the old-established firm of Thomas Perry & Sons, Limited, of Bilston, England, whose reputation for the manufacture of these articles is world-wide.

INDUSTRIAL GOSSIP.

CALCIUM CARBIDE AT SHAWENEGAN.

EXISTING plants have been quite unable to keep pace with the increasing demand for calcium carbide, the substance used principally in making acetylene gas. The industry is said to be only in its infancy, and men who have studied the question prophesy that within a comparatively short time calcium carbide will be used to a far greater extent than at present, especially for lighting purposes. Shawenegan Falls, the new manufacturing centre of the Province of Quebec, will soon have extensive calcium carbide works.

It has peculiar advantages, which will help to make the new carbide company a tremendous success. In the first place, there is an inexhaustible supply of cheap water-power, then taxes are exceedingly low, and the supply of labor is sufficient to provide for all requirements in that direction. The town is centrally situated, and it is an easy matter to ship to any point in the Dominion either by water or rail.

The Shawenegan Carbide Company, as the new concern will be known, has been organized under the laws of the Province of Ontario, confirmed by a special Act of the Quebec Legislature, and will operate under the patents granted to Thos. L. Wilson, of Ottawa. Among the directors are James W. Pyke, of Montreal; John Joyce, of Boston; Walter Barwick, of Toronto; and J. E. Aldred, who has played so important a part in developing the resources of Shawenegan Falls.

MANUFACTURE OF ELECTRO-STEEL IN SWEDEN.

At a meeting of The Iron Manufacturers' Association (Brukssocieteten) at Jernkontoret, Sweden, Engineer F. A. Kjellin and Mr. Benedicks gave some very interesting information about the production of electro steel at Gysinge. The problem of smelting steel by electricity has for a long time attracted the attention of inventors. By the advice of Engineer Kjellin, Mr. Benedicks decided in 1899 to build at Gysinge an electric steel furnace without electrodes.

In the latter part of February, 1900, the first furnace was finished and ready for trial, and after a few experiments the first ingot was produced. The steel was found to be of excellent quality. The problem was thus solved technically, but not economically; for, with the dynamo of 78 kilowatts used, not more than 270 kilograms (575 lb.) of steel were obtained in 24 hours, and in the furnace there was not room for more than 80 kilograms (176 lb.). A larger furnace was seen to be necessary, and this was completed in November, 1900, and proved to be a great improvement. In the second furnace, which held 180 kilograms (397 lb.), from 600 to 700 kilograms (1,220 to 1,340 lb.) of steel were produced in 24 hours. The Gysinge sulphite factory burned down on August 11, 1901, and it was decided to build steel works in its place and to use the water-power available there. For the steel furnace there was utilized a turbine of 300 horse power, with direct coupled generator. The new furnace is to hold 1,800 kilograms (3,970 lb.), and the production is estimated to be at least 1,500 tons a year if charged with cold raw material.

Engineer Kjellin said that the steel produced is of superior quality and characterized by strength, density, uniformity, toughness, and the ease with which it can be worked in cold, unhardened condition, even when containing a very high percentage of carbon. Compared with other steel, it also has less tendency to crack or warp when hardened.

The reason why this steel in certain qualities differs from other steel, especially in its softness when unhardened, is considered to be its freedom from gases. The manufacture of special steel, with nickel, chrome, manganese, and wolfram, will, of course, not meet with any difficulties. The chrome steel and wolfram steel produced at Gysinge have proved to be excellent for lathe tools. When used for permanent magnets, the Gysinge wolfram steel has been found to give stronger magnets than other wolfram steel, and has not warped in the hardening.

From estimates made, it has been ascertained that the furnace used at Gysinge, which is simple in construction and easily managed, has prospects of competing, as to cost of operation, with the furnaces heretofore used for fusion of steel, especially as it yields steel of a better quality.

SHIPBUILDING AT SYDNEY.

At a meeting of the ratepayers of Sydney, C.B., on Friday last for the purpose of discussing the advisability of granting a bonus to a shipbuilding industry, Mayor Crowe stated that as a result of the bonus of $50,000 granted to The Dominion Iron and Steel Company in 1898, instead of a town of 2,500 there was a splendid city of at least 14,000 people, and moreover, the rate of taxation had not been increased one cent. He urged strongly a bonus for a steel shipbuilding industry.

The following resolution was passed:—

Resolved that this meeting request the town council to call a public meeting of the ratepayers at the earliest date permitted by law to consider the advisability of voting a sum of $250,000 as a bonus towards a shipbuilding industry to be established within the town limits.

SCORIA BLOCK PLANT FOR SYDNEY.

A representative of The Canadian Scoria Block Company visited North Sydney last week to select a suitable site for the erection of a plant to manufacture bricks. Hitherto these bricks have been imported to Canada from England and Belgium, where they are made from the slag of blast furnaces. The company has already made blocks in Toronto, and a thorough test of them made by Dr. Bovey, the Dean of the Faculty of Applied Science at McGill, proved their superiority over the imported article. The high cost of scoria blocks has hitherto limited their use to street crossings and street-railway pavements, but when they are turned out at a greatly reduced cost, they will, it is expected, be largely used for the foundation of buildings, piers, and for use in damp places. The company has purchased the exclusive right to manufacture by the new process and has secured the services of the inventor to overlook the work of manufacture. The company is being formed in Toronto with a capital of $150,000. The provisional directors are Hon. John Dryden, Hon. George Foster, H. Waddington, W. C. Trotter, Simpson Rennie, J. Blacklock and William Murins.

A NEW BRIDGE FIRM.

The Sarnia Steel Bridge and Structural Works is a new enterprise added to the list of Sarnia's manufacturing industries. The new works have been established in The Turnbull Boiler Works on the bay shore. The manager of the new concern is W. H. Mackenzie, formerly of The Port Huron Bridge Works, Port Huron, a gentleman of long experience in the business of steel and wrought-iron construction, and thoroughly acquainted with every department, theoretical and practical, of the business. The Sarnia Bridge Company's specialty will be the construction of steel and wrought iron highway bridges, but they will be prepared to handle all varieties of steel and wrought iron structural works. The use of steel construction for road bridges, growing out of the increasing scarcity and consequent costliness of suitable bridge timber, is extending year by year. The company has already orders on its books from two municipalities in the county for steel bridges, with the prospect of several more important contracts of a similar kind to follow in the near future.

The Paris Plow Company, Limited, has just been incorporated with a share capital placed at $250,000, at Paris, Ont. The applicants for incorporation were Messrs. Frederick Ward, of Batavia, N.Y.; John Penman, R. L. Murray, S. Appleby, P. G. Wickson, of Paris; and C. Barker and G. D. Clump, of South Dumfries township. The company will manufacture plows and other agricultural implements.

THE IRON MOULDERS.

The Iron Moulders' Convention in session in Toronto, on Friday last selected Philadelphia as the place of meeting in 1905.

The elections resulted as follows:—President, Martin Fox, Covington, Ky.; first vice-president, Jos. F. Valentine, San Francisco, Cal.; second vice-president, M. J. Keough, Troy, N.Y.; third vice-president, J. P. Frey, Worcester, Mass.; fourth vice-president, John Campbell, Quincy, Ill.; secretary, E. J. Denney, Cincinnati, O.; assistant-secretary, John G. Weaver, Covington, Ky.; financier, R. H. Metcalf, Cincinnati, O.; treasurer, Alex. Faulkner, Cleveland, O.; editor Iron Moulders' Journal, David Black, Cincinnati, O.

All of the foregoing officers were re-elected, but there were other candidates for every position, and in some cases the contest was keen.

Most of the candidates left Saturday, and the secretary paid out about $50,000. This convention lasted longer than any other in the history of the order. It was 20 days since it opened. Each delegate received $3 a day and travelling expenses. The mileage and per diem allowance while travelling amounted in the aggregate to $20,000.

John Bowman

HARDWARE & COAL CO.

LONDON, ONT.

Our stock of goods for the spring trade is now complete, and we can fill all orders promptly on the following lines :

Wire, Nails, Cordage, Window Glass, White Lead, Paints, Whiting, Churns, Linseed Oil, Spades and Shovels, Screen Doors, Wove Wire, Poultry Netting, Builders' Hardware, Guns and Sporting Goods. Finest stock in the Province of Cutlery.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, August 1, 1902.

HARDWARE.

MIDSUMMER quietness, as usual, now prevails in hardware circles. But although business is not as brisk as some weeks ago, orders for fall delivery are coming in satisfactorily, and as the present season is inevitable and always expected, the trade are not in a complaining mood by any means. Among the fall goods now beginning to move are lanterns, sleigh bells, skates and hockey sticks, guns, etc., orders for which for fall delivery have begun to come in well. An advance of 5c. took place in black tea kettles, Nos. 8 or 9 now being quoted at 55c. and No. 10 at 60c. In picks there is also an advance in price, amounting to about 50c. per doz. all round. The prices now are: 5 to 6 lb., $4.75 per dozen; 6 to 7 lb., $5.10; 7 to 8 lb., $5.35; short mattocks, $5.65; long mattocks, $5.75; pick mattocks, $5.75. The prices on wire netting for 1903 have been settled and the new discounts will be found under the heading of "poultry netting." Other lines in general hardware are unchanged in price.

SCYTHES.—These have become very quiet on the market, the demand now being wholly of a sorting nature. We now quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—Trade in barb wire continues quiet. The demand is still very light, and business is confined to small orders for some special purpose. There has been no change in the price, which is $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—There is nothing of importance to note in this market, which is quiet under a light demand. Prices are steady. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Business in this line is still of a quiet nature at unchanged prices. Our quotations are now as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The market is very much the same as a week ago. There is but a small demand, and trade is quiet. The discount, which is unchanged from last week, is 22½ per cent.

BRASS AND COPPER WIRE.—There is no change. The market continues quiet and featureless, with the discount still at 60 per cent.

FENCE STAPLES.—There is not much doing in fence staples. A few orders are still received, but the market, in general, is very quiet. Prices are unchanged, and galvanized staples are quoted at $3.25 per 100-lb. keg, and bright at $2.90 per 100-lb. keg. For 25 and 50-lb. packages, 25c. extra is charged.

WIRE NAILS.—These are in fairly good demand. No quotable change has occurred, and in small lots the price is $2.55; in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a moderate demand for cut nails at unchanged prices. We quote: $2.45 per keg for small lots, and $2.37½ per keg for carlots.

HORSE NAILS.—There is a small amount of business doing in horse nails. Jobbers report a continual improvement in the number of orders as the fall approaches. The discount on "Monarch" nails has been changed to 70 and 5 per cent. instead of 66 2-3 per cent. We quote: "C" brand, 50 and 7½ per cent.

Preserving Season Requirements

Have you examined your stock of Preserving Utensils lately?
It would be unfortunate to run out of any of these lines just at present.
We can make prompt shipment of any orders (large or small) for these goods.

off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 70 per cent. off. "Monarch" horse nails are also discounted at 70 and 5 per cent.

HORSESHOES.—A fair demand is reported for horseshoes, and trade is improving. Nothing of interest has occurred during the past week on this market. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 1, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—These are moving about as usual. A fair and steady demand is reported with no quotable changes whatever, and the discounts are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There is nothing new to report in this line. The market is still quiet for cordage. Binder twine is scarce and firm in price, but no quotable change has been made. Our quotations are now as follows: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—The demand is keeping up well on both lines, and the market is fairly active and steady. The prices are unchanged. Discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—These continue to move about as usual. Trade is fair and nothing of importance has occurred during the week. We quote: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Business during the past season in building paper and builders' hardware has been of the most satisfactory character. Building paper, in particular, moved rapidly throughout the season, and sales have been very large in comparison with other years. Now, however, the demand has dropped off greatly and the market has become quiet. Prices are unchanged. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.;

dry sheathing, 35c. per roll ; tar sheathing, 45c. per roll ; dry fibre, 50c. per roll; tarred fibre, 60c. per roll ; O K and I X L, 65c. per roll ; heavy straw sheathing, $30 per ton ; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is little demand for this. The market is quiet, and the price remains at $1.37½ per 100 square feet.

POULTRY NETTING.—Trade is quiet at present in this line. Prices on wire netting for 1903 have been decided on, and the discounts will be 60 per cent. off for 19 wire and 55 per cent. off for heavier. For immediate delivery there is no change, and Canadian or English is discounted as follows : 2 x 2 mesh, 19 wire, 50 and 10 per cent.; 2 x 2 mesh, heavier wire, 50 per cent. Canadian list used.

HARVEST TOOLS.—Business in this line is quiet and featureless. The discount is 60 per cent.

FIREBRICKS.—These move out slowly and trade is quiet. We quote : English, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—There has been no material change in the condition of the market. The demand is only fair, and prices are unchanged. Our quotations are as follows : Canadian cement, $1.90 to $2.25 ; German, $2.20 to $2.30 ; English, $2.15 to $2.25 ; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The metal market continues active, and is in a somewhat better condition in some lines. Supplies, which became short on account of the damage done to the Monteagle's cargo, have been replenished to a certain extent by that of the steamer Montfort, now in port. As regards the cargo of the Monteagle, some of the terne plates came out all right, but not a great quantity, while the Canada plates suffered badly.

PIG IRON.—There is no change in the price. The market remains very firm. We quote : Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—The demand is fair. The price of merchants' bar is $2 and of horseshoe iron, $2.20.

BLACK SHEETS.—These are in fair demand and there is still some shortage reported. We quote : 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.This continues to move out well at unchanged prices. We now quote as follows : No. 28, Queen's Head, $4.40 ; Apollo, 10¾ oz., $4.40 ; Fleur de Lis, $4.15 ; Comet, $4.25 ; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There is a fair inquiry. No change in price is reported. We quote 14c.

INGOT TIN.—This has not improved. The demand is only fair. The price of Straits remains at 33½c.

PIG LEAD.—There has been no change in the condition of this market, which is still quiet, the price being $3.25.

LEAD PIPE.—Composition and waste are quoted at 8c. and ordinary at 7c., with the discount at 37½ per cent. The demand is only fair.

IRON PIPE.—A moderate business is doing this week at unchanged prices. Our quotations are as follows : Standard pipe per 100 feet, in lengths under 19 feet : Black, ¼, $2.40 ; ⅜, $2.65 ; ½, $2.85 ; ¾, $3.65 ; 1-in., $5.20 ; 1¼, $7.35 ; 1½, $8.95 ; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.15 ; ½, $3.85 ; ¾, $5 ; 1-in., $7.20 ; 1¼, $10.05 ; 1½, $12.20 ; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, ½, $4.20 ; ¾, $5.25 ; 1-in., $7.55 ; 1¼, $10.55 ; 1½, $12.75 ; 2-in., $17.60. Galvanized, ½, $5.20 ; ¾, $6.65 ; 1-in., $9.55 ; 1¼, $13.25 ; 1½, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—There is a fairly good trade being done in this line and prices have been steady. Charcoals are quoted at $4.75 to $5.25 per box and cokes, $4.25 per box.

CANADA PLATES.—The scarcity of Canada plates which began to be felt on the local market has been considerably relieved by fairly large shipments by the steamer Montfort. No quotable change has been reported, and we quote : 52's, $2.70 to $2.80 ; 60's, $2.85 to $2.90 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35 ; galvanized, 60's, $4.45 to $4.55.

STEEL.—Trade is quiet and the market shows no change. We quote as follows : Sleighshoe, $2.10 ; tire, $2.20 ; bar, $2.05 ; spring, $2.85 ; reeled machinery, $2.75 ; toecalk, $2.70.

SHEET STEEL.—There is no improvement in this market, which continues quiet at unchanged prices. We quote : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—There is nothing of importance to note in the market for tool

steel. Trade is quiet and no quotable change has occurred. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—Some business is doing this week, but the demand is irregular and the market, in general, is quiet. $7.50 is the price quoted.

COIL CHAIN.—Jobbers report a fair demand for chain this week at unchanged prices. Our quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Nothing new has occurred in this market. Trade is rather quiet, and the price remains at $5.85 to $6.25.

ANTIMONY.—In this line business is very quiet and the market is featureless. We quote 10c.

ZINC SPELTER.—The demand for this has not improved. The price is still 5c.

SOLDER.—We quote 18c. for bar solder and 20c. for wire solder. Business continues brisk in both lines.

PAINTS AND OILS.

With the exception of a little flurry in paris green, which has been in active demand for the past few days, nothing unusual has occurred in paints and oils. A meeting of white lead manufacturers was held, but the price to the retail trade remains unchanged. The liquid paint trade is keeping up wonderfully well, and manufacturers are as busy to-day as they were in April, a very unusual state of affairs. The sudden arrival of warm, dry weather, has apparently stimulated the business all over Canada. Coach colors, enamels, roofing paints and varnishes are all feeling the effect of the growing time, and an optimistic feeling prevails in this branch of the hardware trade. Linseed oil and turpentine have been steady throughout the week. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

The Handsome Effect Of Our Sheet Metal Fronts

Makes them wonderfully popular, either for new buildings or improving shabby exteriors

We make them complete, including Cornices, Door and Window Caps, etc.—a most durable, economical finish, giving fireproof protection, as well as fine appearance.

These, and our improved metal building materials for exterior and interior use, are favorably known throughout Canada for their reliable merit—a merit we intend to maintain. So you stand certain of satisfied customers when you sell our goods.

A look through our catalogue will be profitably interesting to anyone in the trade.

The Metallic Roofing Co., Limited,

WHOLESALE MANUFACTURERS,

TORONTO, MONTREAL, WINNIPEG.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The only change in price to report in this market is on heavy copper and wire, which is ½c. lower per lb. Copper has been very weak of late; supplies have been large, and there is no demand. Iron remains quiet and unchanged in price. Zinc is in good demand, and there is a better feeling in red brass. We quote as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6 to 6¼c. per lb.

GLASS.

The market is still quiet. The trade have all purchased their supplies and nothing but a few sorting orders are being received. Our quotations are as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There has been no quotable change in this market, which is quiet and steady. We quote as follows: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 30c.

MARKET NOTES.

Black tea kettles are 5c. higher.

Picks have advanced about 50c. per dozen.

Wire netting for 1903 will be from 5 to 15 per cent. lower.

"Monarch" horse nails are now discounted at 70 and 5 per cent., instead of 66 2-3 per cent. off.

ONTARIO MARKETS

Toronto, August 1, 1902.

HARDWARE.

THE midsummer season has quieted down business in hardware in common with other lines, but a fair number of sorting-up orders continue to come in by mail. The demand for rope continues good and some jobbers are experiencing a scarcity in harvest rope sizes, which they find it difficult to relieve by reason of slow deliveries from the factories. Trade in horse nails is increasing, but the prices of these are still very low. Horseshoes are also active, and the same applies to harvest tools, the principal demand for these being in forks, scythes and snaths. The season for lawn mowers is over. Eavetroughing continues in good demand and stocks in the hands of jobbers have become light by reason of the slowness of the manufacturers in filling their orders. Canadian Portland cement has advanced 15c. per barrel.

BARB WIRE.—There is quite a demand this week for barb wire, and some call is reported for hay-baling wire. Prices are unchanged. We quote $2.65 in carlots and for less than carlots, $2.77½ f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—There is still some call for galvanized wire, and our quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15;

No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The volume of trade in this line continues moderate at unchanged prices. We quote the base price as follows: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Trade in this line keeps steady and prices are unchanged. The discount is 22½ per cent.

WIRE NAILS.—These are still meeting with a steady demand.. We quote the base price as follows: $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A small trade in cut nails is reported this week with no change in prices. We quote: Cut nails, $2.45 per keg and $2.37½ for carlots.

HORSE NAILS.—Business in these is increasing, but prices are still low. The manufacturers claim that there is no profit in making them. The great number of manufacturers engaged in making these keeps the prices low. Base price is quoted as follows: "C" brand, oval head, 50 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. Countersunk head, 60 per cent.

HORSESHOES.—Quite a little business is doing in these for the fall trade. A manufacturer of horseshoes in the United States had a large quantity of slightly damaged goods which he endeavored to dispose of in this country, but he is reported to have found the market here too low to do business. Prices in the United States, it is claimed, are considerably higher than they are here. Our quotations are now as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The demand for these still continues in excess of the supply, and the market is strong. We quote the discounts as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—Trade in these is still brisk, but supplies are limited. Discounts are: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Business in these is keeping up well, and our quotations are now as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—A good many orders are coming forward for the cheaper grades of doors. We quote: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—There is still some sorting-up business being done in green wire cloth, but the trade of the season will soon be over. We quote the base price at $1.37½ per 100 square feet.

SPADES AND SHOVELS.—A fair sorting-up trade continues in these. The discount is 40 and 5 per cent.

ROPE.—A good trade is doing in all lines of rope, especially in hayfork rope, some sizes of which are scarce. The prices continue unchanged. We quote as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—A good demand for binder twine continues from all quarters of the country, and the available supplies are rapidly diminishing. The indications this season are that owing to so much damp weather, that has been prevalent all summer, there will be lots of stalk to the grain, and this will require and extra quantity of binder twine to be used. Our quotations are as follows: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—A good number of sorting-up orders are coming in from all directions, and forks, scythes and snaths are at present in brisk demand. The discount is still 60 per cent.

EAVETROUGH, ETC.—A heavy demand for eavetroughing continues, and jobbers find it difficult to fill all their orders owing to the slowness of the factories in making deliveries. Quotations are as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—A good trade is keeping up in building paper. In fact, all building materials are selling well. The market is steady. The base price is as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

HARVEST WHIPS.—A good trade is doing in whips of all kinds, including harvest whips.

POULTRY NETTING.—Quite a number of sorting-up orders are being forwarded to outside points.

TINWARE AND ENAMELLED WARE.—A large amount of tinware continues to be sold, and a large movement in enamelled ware is reported to continue.

SPORTING GOODS.—A good demand is reported for guns and rifles, and trade in ammunition is on the increase.

CEMENT.—There has been an advance of 15c. per barrel in Canadian Portland cement. The manufacturers are finding a greater demand for cement than they at present can attend to and are refusing orders continually. A very active inquiry keeps up. We quote as follows: Canadian Portland, $2.10 to $3 and Canadian hydraulic, $1.35 to $1.60 per bbl.

METALS.

There has been no change in the general metal business this week. Trade is not so heavy as during the busier seasons of the year, but some business continues without much large buying. The United States pig iron market has steadied itself, its upward career being checked by importations of that product from other countries. The outside copper markets are quiet, and the English and United States tin markets are easier. There has been a slight reduction of 10c. in some cases in all dull and half-polished Canada plates.

PIG IRON.—The market locally, is still strong. The market of the United States is steady and little inclination is manifested by dealers to buy for future delivery. We quote on track, Toronto, as follows: No. 1 foundry, $21 and No. 2, $20.50.

STEEL BOILER PLATES.—Trade in this line is keeping up well, and the tone of the local market is firm. We quote: Steel boiler plates, $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—A good business continues in these. We quote: Steel beams, from stock, $2.75 and $2 per 100 in carload lots on track.

STEEL RAILS.—These are quoted at $30 per ton for steam railways and $36 per ton for electric railways.

TOOL STEEL.—A good local business keeps up in tool steel. We quote as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The business doing in this line continues fair.

SPRING STEEL.—A fair trade is reported in spring steel.

BOILER TUBES.—The demand is fair and the market steady.

BAR IRON.—Stocks of bar iron on the local market continue small and the demand is in excess of the supply. The United States markets are steady. Our quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is no change in this line and a fair amount of business is being done. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Some business continues in these. Some jobbers have reduced the prices of all dull and half-polished Canada plates 10c. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—A brisk demand for these continues. The base price in case lots is: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.20 for 28 gauge.

TIN.—This metal is quiet on the local market. The London tin market was irregular and the New York market dull. There was little buying on either market. Prices continue unchanged at $32 to $33 per 100 lb.

TINPLATES.—These have been more active during the week. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER.—Trade in ingot copper is slack, but the demand for sheets has improved. The outside markets are quiet and steady. We quote: Ingot copper, $14 per 100 lb and sheet copper, $22 to $23.

BRASS.—This metal continues in good demand. We quote the discount at 15 per cent.

PIG LEAD.—A fair demand for pig lead is reported at unchanged prices. We quote pig lead at $3.50 to $3.75 and bar, $5.

IRON PIPE.—An error was made last week in saying the trade discount had been changed from 4 to 7½ per cent. on all sizes up to 2 inches. The discount remained the same as before. We quote per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Discount of 4 per cent. on page 37 is for carlots.

ZINC SPELTER.—There is some demand for zinc spelter in small lots. We quote 5 to 6c. per lb.

DECATUR, BULL & CO., Sales Agents, MONTREAL.

ZINC SHEETS.—Trade in this line continues steady at unchanged prices. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—An active business in this line continues.

ANTIMONY.—The market for antimony is quiet. We quote $19.50 per 100 lb.

PAINTS AND OILS.

During the week trade in paints and oils has dropped off considerably and the market is quiet. Raw and boiled linseed oils and spirits of turpentine are unchanged. The market in England for linseed oil has increased in strength and the spirits are stronger on the primary markets. The manufacturers of white lead ground in oil have increased the rebate on leads to the jobber. From this out until the end of the year 5 p. c. rebate will be granted on all lots under a ton, and on from 1 to 5 tons the rebatewill be 10 per cent. A little sorting up business continues in mixed paints, and the other lines of paints are quiet. We quote as follows :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards ; ½c. per lb. extra will be charged for 12½ lb. packages ; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE—Benzine, in barrel lots, 17c. per gal.; gasoline, ordinary, 20c., and engine, 21c. f.o.b. Toronto.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25 ; bladders, in 100 lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL— Raw, 1 to 2 barrels, 79c.; boiled, 82c. ; 3 to 5 barrels, raw, 78c.; boiled, 81c.; 6 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE—Single barrels, 69c.; 2 to 4 barrels, 68c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

A fair amount of business In glass continues for this time of the year. prices are unchanged. We quote as follows : Under 26 in., $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5 75 ; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

Trade in this line keeps fairly active. Scrap zinc is weaker, while lead is stronger. We quote: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼c.; iron, No. 1 wrought, $14 per net ton ; No. 2 wrought, $6 ; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES — Trade continues quiet at unchanged prices, and we quote as follows : No. 1 green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8¼ to 8½c.

SKINS — The skin market is also inactive. Our quotations are as follows : Veal skins, 6 to 14 lb. inclusive, No. 1; 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; lambskins, 30c.; shearlings, 25c.

WOOL — The receipts are small and the market is firmer. We quote fleece wool, 13c., and unwashed, 7c. per lb.

TALLOW—The arrivals are limited and the prices are firm. We quote 6¼ to 6½c. per lb.

COAL.

There have been no advances made so far either by the strikers or the mine owners to effect a settlement. Latest reports from the mining regions seem, however, to indicate that work will soon be resumed by the miners. The news of rioting at the mining regions seem to show that matters there are coming to a head, and the belief is becoming general that an early settlement will be arranged. Quotations are as follows : Soft coal, $3 to $4 per ton.

PETROLEUM.

A good summer trade is reported in petroleum, and prices are unchanged. We quote as follows : Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Canadian Portland cement has been advanced 15c. per bbl.

The discount on cast iron fittings is now 50 and 10 per cent., instead of 60c.

The discount on malleable fittings has been changed from 35 to 30 per cent.

Jobbers have reduced the prices of all dull and half polished Canada plates 10c.

ORDERS FOR SHELF BOXES.

Cote, Boivin & Co., of Chicoutimi, Que., have just placed their fourth order for shelf boxes and cabinet. L. A. Levesque, Ville Marie, Que., is equipping his new store with J. S. Bennett's shelf boxes and shelving.

BUSINESS IN ANNAPOLIS VALLEY.

A well-known business man of Kentville, the pretty little town in the Annapolis Valley, Nova Scotia, writes : "Although the season has been so queer the Valley looks well. Business seems very good all over this county, although crop prospects are not at high water mark."

PERSONAL MENTION.

Mr. T. S. Sevanston, of Lewis Bros. & Co., Montreal, passed through Toronto on his way home on his vacation.

Mr. Albert H. Hough, of Toronto, representative of the Montreal Rolling Mills Co., is holidaying in Montreal.

Mr. J. T. Kinsman, foreman of the Fletcher Mfg. Co., Toronto, has just come successfully through an operation for cancer.

Mr. C. W. Sprague, of The National Cutlery Co., Philadelphia, Pa., was in Montreal calling on the trade during the week.

Mr. W. H. Carrick, of the Gurney Foundry Co., Limited, Toronto, has just returned from a trip to the Maritime Provinces, during which he spent most of his time at Digby and Wolfville, N.S.

McBean, alterations to dwelling, brick-veneered, corner of Queen and Greenwood ave., for $700; James Wilkie, 2½-storey brick and roughcast dwelling, 321 Shaw street, for $2,300; Wm. Allison, one-storey dwelling, brick front, roughcast sides and back, 141 Jones ave., for $500; Jas. Laing, brick front to dwelling, 300 Givens street, for $600; Walter Nash, for pair semi-detached 2½-storey brick dwellings, near College street, east side of Beatrice street, for $4,000; James Russel, two-storey brick detached dwelling near Dupont street, west side of Palmerston ave., for $1,600; W. Reynolds, for a two-storey frame and brick cellar dwelling, 1991 Queen street east, for $1,400; Ed. J. Roberts, pair semi-detached two-storey roughcast brick cellar and brick-veneered dwellings, Hamilton street, near Elliott street, for $900; Mrs. M. Stewart Thompson, two-storey and attic, two pair semi-detached brick and stone dwellings, on Brunswick ave., near Bloor, for $12,000; Mrs. Johanna Duff, two-storey brick dwelling on Columbus street, for $800; Allan Coskie, two-storey and attic brick-veneered dwelling, stone foundation, near Carlaw ave., on Bain ave., for $1,000; Mrs. Siddal, 2½-storey brick residence, corner Roxborough and Scarth Road, for $4,000; Isaac W. W. Plewes, two-storey attic and brick detached dwelling, Spadina Road, near Bernard ave., for $4,500; Jno. E. Hoare, for pair of 2½-storey brick and stone dwellings, 34-36 Albany ave., near Bloor street west, for $6,000.

BUILDING PERMITS IN OTTAWA.

During the week eleven building permits, amounting to the value of $17,500, were taken out in the office of Building Inspector Pratt, of Ottawa. They were all for new residences or alterations, and were as follows: A. Kerr, frame dwelling, Kenny street, $750; D. Doherty, solid brick addition to workshop, Besserer street, $350; George Johnston, brick-veneered dwelling, Stewart street, $800; W. H. Bishop, veneered dwelling, on Gilmour street, for $1,100; Chas. Boivin, for a frame dwelling on McLeod street, $800; Dr. W. C. Cousens, alterations to dwelling, Slater street, $1,000; Mr. Wilson, brick-veneered dwelling, Cooper street, $2,200; Mrs. J. K. Forbes, brick-veneered dwelling, Cartier street, $3,800; James Wilson, solid brick dwelling, Somerset street, $2,500; Wm. J. Davidson, two brick-veneered dwellings, Lisgar street, $3,000; W. Green, frame kitchen, Turner street, $200.

BUILDING NOTES.

Ottawa is to build a million dollar hotel this fall.

Wilfrid Mercier, Montreal, has secured the contract for building the new greenhouse on Mountain Park, for $2,035.

The Nova Scotia Steel and Coal Company propose building a machine shop at North Sydney, which will give employment to a large number of men. Plans have already been prepared.

James C. Johnstone, contractor, Cornwall, Ont., has secured the contract for the building of a new wing, 38 x 26 feet, to the Cornwall General Hospital. The wing will have three storeys, exclusive of basement.

The Cape Breton Silicate Brick Company has let the contract for a building to be erected at the lower end of the town. The building will be 100 feet long, 50 feet wide and two storeys high. The company expects to start manufacturing by October.

PLUMBING AND HEATING CONTRACTS.

Campbell Bros., Cornwall, Ont., have secured the contract for the plumbing and heating of the new wing of the Cornwall General Hospital.

R. Bigley, Queen street east, Toronto, will instal the new combination heating apparatus of hot water and hot air for J. B. Reid, Bloor street.

J. W. Walsh, Hamilton, will do the plumbing and put in the steam heating in the new public school on Mary street; also in the Nurses' Home.

Dr. Kennedy, of Guelph, has awarded the contract for the hot water heating and the plumbing of his new residence to J. W. Walsh, of Hamilton.

Mimms, of Spadina ave., Toronto, has secured the contract for the lighting and plumbing of dwelling for J. N. Sampson, Dufferin and Dundas streets.

Fiddes & Hogarth, 122 King street east, Toronto, plumbers, steam and gasfitters, have secured the contract for plumbing and lighting four houses on Isabella street for Mr. Bryce.

Lessard & Harris, Montreal, report the following plumbing, heating and roofing contracts: Henry Birks & Co., manufacturing jewelers, building; Catholic Home for Incurables, Notre Dame des Neiges; North British and Mercantile Insurance Company, building.

A. Rogers & Co., Hamilton, report the following contracts: J. Stuart, two dwellings on Markland street, plumbing; Dr. Leslie's dwelling, Main street, combination system, hot air and hot water; Schmidt House, St. James street, combination system; Mr. Steele, Dundas, plumbing; Bank of Hamilton, Orangeville, steam heating; T. W. Barry, dwelling, 85 Robinson street, hot-water heating and plumbing; Mrs. Osborne, dwelling, heating and plumbing.

BUILDING IN WINNIPEG.

Winnipeg is experiencing one of the greatest building booms in its history. According to the figures furnished by Building Inspector Rogers, the value of the buildings constructed to date amounts to $1,622,800. This is $400,000 in excess of last year, which closely approached a record breaker. The buildings are all of a good class, and construction is not confined to any particular section of the city. A large addition has been made to the Winnipeg Grain Exchange building.

BATH TUB AND SOIL PIPE FACTORY.

H. T. Bush and A. E. Pipher, of Detroit, are negotiating with the Ottawa City Council for a factory location and site for the manufacture of a line of porcelain enamelled bath tubs, soil pipe and soil-pipe fittings. They will employ approximately 100 men the first year, with the possibility of doubling this number in two years; all men—no boys or girls. Enamel sifters, pattern men and moulders' day's pay average a very high rate. They write:

"What we need is about two acres of land, a building 100 x 250 feet, two storeys in front and back about 100 feet; balance to be strictly foundry building, with 150 horse-power. We must have the best of railway facilities for shipping, with railway siding to warehouse, and water transportation if possible. While we anticipate starting in the smallest way possible, which would be a melt from 10 to 12 tons per day; that is, would approximate about 3,000 tons in and out, or a total of 6,000 tons for the first year, with the possibility of doubling this tonnage inside of two years."

A REMODELLED HOTEL.

The Queen Hotel, Halifax, has lately been undergoing extensive improvements. Manager Fairbanks has expended $20,000 in refitting and remodelling.

The contract for the hot-water heating was one of the largest single contracts ever let in the city of Halifax. 140 radiators, equal to over 5,000 square feet of heating surface, were required, and the cost was upwards of $5,000.

New plumbing has also been installed, in the most scientific and sanitary manner. Steel porcelain lined baths have been placed throughout the entire hotel. Drainage and ventilation have also received special attention, and all the basement has been concreted.

The incandescent system of electric lighting is of the most perfect description and was installed at a cost of $2,000. Electric fans are also placed in different parts of the building.

Throughout the entire building only the best and most expensive hotel furniture has been used, and everything is new.

The contractors who did the work were S. M. Brookfield, the rotunda; James Dempster & Co., staircase; Crump & Perrier, hot-water heating; Gordon & Keith, furniture; David Roche, painting and paper hanging; John Starr & Son, electric light.

PAINT SPECIALTIES

RAMSAYS EXTERIOR LEAD, always the leader in the lead market—advertised to all architects and painters in Canada. Ordered by dealers because it's easy to sell, pays well and satisfies all—Special booklets to help.

RAMSAYS VIENNA GREEN. A clean, pure, rich green in three shades, away ahead of imported greens and cheaper as well. The strongest and brightest of all the greens, to cover anything that should be green and kept green—booklets.

RAMSAYS OUTSIDE PAINTS. This is the paint for the farmer's barn. It's what he wants for his outhouses, fences, etc. It does the work and isn't dear. It pays.

RAMSAYS UNIVERSAL VARNISH. It is made for the boat, the canoe, the house, the church, doors, wainscots, anything that wants a varnish that is all varnish and nothing else.

FIRSTS AND SECONDS IN GRANITEWARE.

VERY unsatisfactory for the retailer is the present condition of the graniteware business. The departmental stores "bargains" are killing the trade. These bargain goods are often culls, which, owing to some defect in their manufacture have been rejected from the regular lines of goods. The dealers of Toronto, particularly, suffer from this practice and are becoming much dissatisfied with the manufacturers at their methods of doing business. This state of the trade came up for discussion at a recent meeting of the hardware section of the Toronto branch of the Retail Merchants' Association of Canada, and it was decided to discuss the matter at the coming convention of the Retail Merchants' Association of Canada, to be held in Toronto on September 9 and 10.

To ascertain the views of the hardware merchants in Toronto on this matter, a representative of "Hardware and Metal" called on a number of dealers.

H. C. Maas, hardware merchant, 360 Queen street west, Toronto, said that there was now no profit for him in the graniteware business. For some years the manufacturers of that line of goods had been in the habit of disposing of their culls and surplus stock in quantities at a time to the highest bidder, usually one or other of the departmental stores. The smaller merchant, through insufficient capital, was unable to buy these lots. Besides, his trade was not large enough to allow him to quickly dispose of large amounts of graniteware. So he had to let the departmental stores slaughter prices and demoralize the trade. He thought by the retail merchants meeting and taking a firm stand in the matter the present state of affairs in the graniteware market might be improved.

The manner in which the graniteware business at the present time is conducted was not approved of by H. Tweedie, 371 Yonge street. Some manufacturers supplied the departmental stores with graniteware at about 35 per cent. less than was allowed the retailer. He also knew of a manufacturer of stoves who likewise did business with the departmental stores in the same way. For the last three years he had persistently refused to patronize these manufacturers on this account, and he believed that if every other merchant did the same as he did, there would soon be an end put to this practice.

John Caslor, hardware merchant, Queen street west, declared that all retailers should not buy from manufacturers who discriminated against them in favor of the departmental stores. It would probably take a long campaign to thoroughly arouse the merchants to the necessity of their holding together and fighting the manufacturers who upheld the departmental stores. City merchants already were fully alive to the fact, and now their task was to educate the merchants outside the city as to the necessity of their binding themselves together and fighting for their rights. Graniteware now had to be sold by the smaller dealer almost without profit, owing to the bargains of the departmental stores. Things were going from bad to worse and the only way he could see to remedy this evil was for the merchants everywhere to organize.

C. P. Godden, hardware dealer, King street east, had suffered from the departmental stores selling their graniteware off by means of "bargains." The graniteware business was now in a bad condition for the retailer, but he was unable to suggest a remedy. Anything he thought that would be attempted to be done to put a stop to this practice would but serve to advertise the departmental stores.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

GEORGE ALLAIRE, sawmill owner, St. Francois Xavier de Brompton, Que., has assigned.

Jackson & Cheesman, contractors, etc., Montreal, have dissolved.

R. A. Lawrence, general merchant, Wetaskiwin, N.W.T., has assigned.

P. A. Craig, blacksmith and carriagemaker, Windsor, Ont., is dead.

James McCalla, proprietor of W. J. & J. McCalla, grocers and hardware merchants, St. Catherines, Ont., is dead.

ELECTRICAL NOTES

ARRANGEMENTS are now being made for the transfer of the plant and all property of The People's Heat and Light Company to The Halifax Electric Tram Company; the price to be paid by The Tram Company is $350,000.

This week The Canadian Suspender Company of Toronto purchased a two horse-power motor from Jones & Moore, 22 Adelaide street west, Toronto.

Jones & Moore, 22 Adelaide street west, Toronto, during the week have sold a complete electric lighting plant to The W. & A. G. Gray Co., of Saskatoon, N.W.T.

The contract for the equipment of The Levis County Electric Railway Company, to be operated at Levis, opposite Quebec, connecting together Levis, St. Joseph, Biennville and St. Romauld d'Etchemin, has been awarded to Ahern & Soper. Some 21 cars and snow sweepers will all be made in Ottawa. The route of the railway along the river front commands a magnificent view of the St. Lawrence, Quebec city, Isle of Orleans and the Laurentian Mountains, and the cars will serve a population of about 25,000.

Ahern & Soper have successfully completed the installation at Montreal and Chambly of 20 Westinghouse electric transformers, which are the largest in size and greatest in capacity ever manufactured in the world. Each transformer has a capacity of 35,500 lights, making a total of almost three quarters of a million of lights. At Chambly the transformers stop up the current to 25,000 volts for transmission to Montreal, where it is transformed down again to 2,000 volts for distribution on the circuits of The Montreal Light, Heat and Power Company.

BURMAN & SONS' CELEBRATED CLIPPERS

CANADIAN GOODS FOR CANADIANS.

FAIR WARNING.

We desire to give the Hardware Trade timely notice and a fair warning, that they will consult their own interests by ordering promptly what they may require of "C" Brand Horse Nails.

We have now arrived at the season of the year when every man and machine we have are fully engaged in the production of our usual average requirements for the Fall trade. It is approaching the time when every hardware dealer sells more horse nails than at any other period of the year. Don't wait until your stock is sold out of certain sizes, and be subjected to the delay which is inevitable, when a large number of orders are poured in on us from one end of the country to the other, and all wanted for "prompt shipment."

Another thing: (between ourselves) anthracite coal of the high quality which we use for forging, is not to be had "for love or money." We have been waiting since May for a shipment. We have only enough for another month, and then it will depend upon the price of coal (if we can get any) and some other considerations, how much more we shall have to charge you for "C" Brand Horse Nails. You wont buy them any lower this year than you can do to-day. We guarantee that.

MORAL :—Buy "C" Brand Horse Nails to-day, and every day.

Canada Horse Nail Company
MONTREAL.

CATALOGUES, BOOKLETS, ETC.

METALLIC BLOTTERS.

SOME people swear by blotters as good advertising mediums, and a glance at a set of six sent out by The Metallic Roofing Co., of Toronto, would convince even the most inveterate opponent of any kind of publicity that there was something pretty clever and insistent about the advertisements on these blotters. One-half the blotter is occupied by a cut done in glaring colors and the other half describes the picture in breezy fashion, always pointing to the moral that the goods of the roofing company are the best.

SPORTING GOODS CATALOGUE.

Catalogue No. 9, of the wholesale hardware firm of A.M. Bell & Co., Halifax, is dated July, 1902, and deals with the many ranges of shot guns, ammunition, etc., handled in their warehouse. Every article is illustrated and concisely described, with price affixed. Some space is also devoted to gun implements, sportsmen's sundries, skates, saws, halter chains and wringers, but the guns and rifles form the specialty.

FINE PRECISION TOOLS.

The Massachusetts Tool Co., of Greenfield, Mass., who are represented in Canada by Decatur, Bull & Co., have issued a catalogue of their fine precision tools, including steel rules, micrometers, calipers, etc., which the trade should apply for. It is illustrated with a number of exceptionally fine engravings of the various tools, and full descriptive text will be found regarding each article. This catalogue will be sent to any of the readers of this paper applying to the above firm for it.

CAVERHILL, LEARMONT & CO.'S CATALOGUE.

Catalogue No 42, of Caverhill, Learmont & Co., Montreal, is a book of 80 pages illustrated with numerous cuts of the goods handled by this firm. They are dealers in guns, rifles, ammunition, sporting goods, skates, sleigh bells and sewing machines. Their guns and rifles are of the celebrated Marlin and Winchester makes, guaranteed to be of good materials and workmanship. Revolvers also can be obtained from this firm, who always carry a full range of patterns and makes varying in price according to their quality. For the benefit of their customers they always have on hand a full assortment of gun parts, loading implements, powder flasks, etc. Their steel traps, fishing tackle, compasses, hunting knives are of good material and warranted to stand the test of use. Their steel skates are of durable pattern, and their sewing machines are tested before leaving the factory, and each bears the guarantee of the maker to stand the wear and tear of family use for five years. Further information may be obtained by addressing a card to the headquarters of this firm at Montreal.

GREEN

The popularity of green is strongly in evidence. Green is the color of the season and may be seen everywhere. Green Shutters are still in vogue and the favorite brands of the **Canada Paint Company** are preferred.

The brands Dry, or ground in Oil are:

"Evergreen."
"Bottle Green."
"Mistletoe Green."
"French Permanent Green."
"Royal Permanent Green,"
and
"Crown Imperial Green."

Close buyers will bear in mind that we manufacture our own Green and Dry Colors from the essential chemicals.

In Liquid Paints we make the following tints:

"Apple Green."
"Bottle Green."
"Emerald Green."
"Green Stone."
"Olive."
"Pea Green."
"Parrot Green."
"Window Blind Green,"
and
"Mountain Green."

In Carriage Colors ground in Japan we manufacture:

"Coach Painters' Green."
"Merrimac Green."
"Parrot Green."
"Quaker Green,"
"Very Deep Green."
"Silician Ollve,"
and
"Bronze Green."

OUR SUCCESS
in Green is creating imitations. Avoid Sustitutes.

MANITOBA MARKETS.

Winnipeg, July 28, 1902.

IN company with other jobbers, hardwaremen have been busy all week looking after visitors and customers. There is great activity in hardware at present, and some houses are finding it hard to keep abreast of orders. Considerable selling was done during the week. All lines of building hardware are in specially good demand, as the amount of building throughout the country is astonishing.

There is a good deal of interest being taken in binder twine in this market at present owing to the splendid outlook for crops and the fact that there will be little or no surplus twine in the United States to help out this market. Prices have not changed since last week, but there is a decidedly firmer tone to the market. Implement men are busy, as the shipment of mowers and binders is in full blast, and there is also a good demand for ploughs. The business done by implement men through Fair week was heavy. Quotations are as follows:

NOTES.

A. Ross & Co. have built a large addition to their store at Miniota, and are putting in a fine stock of hardware.

The Stuart-Arbuthnot Machinery Co. had one of the best exhibits at the Winnipeg Industrial, and also supplied power and shafting for all other machinery in motion in the main building.

The reason for using Apollo galvanized iron is: it is the best iron: works easiest: makes the best job, and costs least for labor.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

BRITISH COLUMBIA AS A MINING CENTRE.

THAT British Columbia has a right to the title of the "Mineral Province of Canada" is proved by the report of the Minister of Mines for that Province, which has just been published. The statistics presented cover the year 1901, and show that fully 49½ per cent. of all the gold, silver, copper, lead, iron, nickel, coal and coke produced in Canada came from British Columbia.

No other Province can lay claim to such a mineral output, and, if we may judge by the rapid development of the mining industry there, no other Province can ever hope to be able to equal this record.

The march of progress began with the year 1892, when lode-mining had at length reached profitable proportions, and ever since then the gross output for each year has surpassed that of its predecessor very appreciably. The net result may be seen when it is explained that in 1892 the value of the output was only $2,978,530, while in 1901 it had grown to a value of $20,086,780. Such a record is truly one to be proud of, and the prospects are that in the future the increases will continue.

Under the heading of "General Developments of the Year," a summary of the work done in all the mining divisions is supplied. From this it may be gathered that but a small fraction of the immense resources of the Province are at present being exploited. Several districts are in a transition stage between placer and hydraulic mining, and therefore production has fallen off there. In still others prospectors have been at work and important finds have been made. The older districts in general show an increased output, though for various reasons some are pretty much at a standstill.

The coal mines of the Province have made wonderful strides forward. The net output for 1901 was 1,460,331 tons of coal and 127,081 tons of coke. Of this, 1,261,744 tons of coal and 15,398 tons of coke came from the collieries on Vancouver Island, and 198,587 tons of coal and 111,683 tons of coke from the Crow's Nest collieries. A distinction is drawn between these two sources of supply. In the Coast collieries the output is limited by the market for the product, as these older collieries are better prepared to meet an increased demand, while the Crow's Nest collieries are as yet new and their output is limited, not by the market, but by the undeveloped condition of the collieries and the limited transportation facilities. These difficulties are being rapidly removed and next year an increased output is anticipated.

Turning to the old production, it is seen that 1901 witnessed an increase of 12 per cent. over 1900, bringing the net value of the output up to $5,318,703. This is the greatest gold production British Columbia has ever made. The increase has been made up principally in the lode-mining operations. A value of $4,348,603 was produced in 1901, an increase of 26 per cent. over the production of 1900. In the other processes there have been slight decreases.

Silver is derived from both silver-lead ores and copper ores, and what is worthy of note is that the production of silver from the first-named has shown a falling-off whereas there has been a greatly increased tonnage of the copper-silver ores. Lead, which showed a phenomenal increase between 1899 and 1900 of 206 per cent., in 1901 witnessed a slight falling-off due to the condition of the market and not to the mines themselves. The copper production for the year has been 27,603 746 lb. of fine copper, an increase of 17,606,666 lb. or 175 per cent. over that of 1900.

All this is a very encouraging statement of the mineral wealth of British Columbia, and should the prognostications of the assayers be verified in fact there is a golden future before the mining industry in that Province.

COMING MEETING OF THE MANUFACTURERS.

IT is very gratifying to Canadians who have the welfare of their country at heart to find that the manufacturers of the land have organized themselves into a broad, well-principled association, which to-day wields no small influence upon the future of the country.

The Canadian Manufacturers' Association is not an organization formed to secure a monopoly for certain firms, but its aim is to do all in its power to strengthen Canadian industries and gain for them a firm footing in the markets of the world.

While for a single firm or even for the Government of the country to take the needful steps to push on foreign trade would be of little avail, yet, when it comes to a union of all the powerful manufacturing interests of the country, then results may be more easily secured and at a lesser proportionate cost. It was with a firm belief that in union there is strength that the manufacturers of Canada have united together.

All this is but preliminary to a brief reference to the impending annual meeting of the Canadian Manufacturers' Association, to be held in Halifax on August 12, 13 and 14. It is safe to say that such a meeting a few years ago would have been an utter impossibility. It would have been out of the question to expect a representative gathering of manufacturers to take the time or afford the expense of journeying to the eastern extreme of the Dominion. But now all is changed. The Association has gained strength in all parts of Canada, and manufacturers everywhere have come to believe in its efficiency and usefulness. The possibility of a meeting in Halifax is, consequently, the outward sign of a growing strength.

At the Halifax gathering several important matters of deep interest are to be discussed. The three allied problems of transportation, viz., steamship communication with Britain and the sister colonies, the improvement of Canadian harbors and waterways, and railway regulation by means of a commission will all be treated. Then, the Association will formulate some definite plan of action with regard to the tariff. It will express its opinion about the appointment of special trade representatives. It will state its views concerning importation of alien labor and about the various phases of the postage problem, and among general matters it will discuss technical education, an all-Canadian exhibition, a new trade index and the educational campaign fund.

In this bill of fare many subjects deserving of attention are included, and it may be expected that all will be handled with the carefulness and the sagacity of the modern business man.

To predict what will be the outcome of these discussions would be impossible, but it is not beyond the bounds of possibility that the Association will not only speak out strongly, but will take action to secure an increase in the Canadian tariff. If such is the case this will undoubtedly be the most far reaching of the reforms that will be advocated. With improvements in trade facilities, all will be in sympathy, but any attempt to change the tariff will likely raise a good deal of opposition.

COAL STRIKE CRIPPLING TRADE.

NO settlement of the coal strike in Pennsylvania and the Virginias yet appears in sight, and the situation is showing increasing seriousness from an industrial standpoint.

In Canada the situation is scarcely less serious than it is in the United States. Unless the strike soon ends some of the manufacturers will be compelled to close down their factories. And at present there does not appear to be any hope of a speedy settlement. In fact, no one seems to anticipate one until September at any rate. The question with many a manufacturer is what in the meantime he is going to do for fuel.

One of the largest manufacturers in the Dominion informs us that he has been trying ineffectually since May to procure anthracite coal necessary for the kind of goods he manufactures. Having on August 1 only about 30 days' supply on hand it is possible he will have to close down his works.

Throughout the United States and Canada the lack of fuel is curtailing the pig iron output, and those industries in turn which are dependent upon the latter are also being handicapped in their operations.

Statisticians are estimating the amount of money which the mine owners and the employes are losing by the strike, but no one seems equal to the task of computing the loss entailed upon the different industries which are compelled to curtail their operations owing to the lack of fuel.

MARITIME PROVINCES AND THE WEST.

IF we may believe the press of the Maritime Provinces of the Dominion, there exists considerable feeling down in the east about the way in which the press of Ontario is alleged to be ignoring the existence of the Maritime newspapers and their news columns. The protest of two Nova-Scotian papers has received considerable attention in the editorial columns of several Ontario papers, which, on the whole, appear to regard the matter lightly and merely suggest that some better news service covering the whole Dominion should be inaugurated.

There is no doubt, however, that there exists a number of papers in Ontario which have always recognized the importance of the Eastern Provinces, and have given them much attention in their columns. These are the trade papers, and, in justification to them, some allowance should be made in the sweeping condemnation of the whole Ontario press. It will be found on inspection of the volumes of any respectable trade publication that for years the Maritime Provinces have figured prominently therein. Indeed, the good work of the trade papers may be credited, to a great extent, with bringing about the revival of interest in the east, which finds expression in the present meeting of the Canadian Manufacturers' Association in Halifax.

To take a concrete instance. Readers of HARDWARE AND METAL will remember that for several years almost verbatim reports of the meetings of the Maritime Board of Trade have appeared in its columns. Besides this the market reports regularly appear in our columns.

In spite, however, of whatever defects there may be in the press, the people of the Maritime Provinces and Western Canada are being gradually brought closer together, and one of the fruits of it is the enlarged trade which is developing between these parts of the Dominion.

THE YUKON AND ITS TRADE.

AN INTERVIEW WITH MR. GEORGE H. HEES.

THAT far-away corner of the Canadian Dominion which goes by the name of the Yukon Territory, still wears an air of glamor and mystery for the average easterner. Being so distant and so remotely connected with the arteries of travel and commerce, it has naturally become a good field for the propagation of all manner of political, moral and commercial exaggerations. Therefore when a traveller returns east after having endured the rigors of a journey thither, he is eagerly questioned as to his experiences and views, and people never seem tired of hearing about the Yukon Territory. Realizing this continued interest, a representative of HARDWARE AND METAL called on Mr. George H. Hees, of Toronto, who has just returned from Dawson City, and asked him for a "story" of his trip.

"I went to the Yukon," said Mr. Hees, "for pleasure and also for business; to see the country and to examine the prospects for the manufacturers of Canada. I visited the creeks and mines and found many Toronto people there, who were enthusiastic about the place. They had become accustomed to the climate, and say they could hardly live now in the quiet east. The output of gold last year amounted to $24,000,000, but Mr. Senkler, the Canadian assistant gold commissioner, told me in an interview that the Government estimate for the coming year would not exceed $14,000,000. The reason for this is that no important discoveries of gold fields have been made within the last year and a half, and the old creeks and finds are being worked out. It will take years—some 10 or 20—to work out the present fields, but it follows unless they discover new ones the product will grow smaller year by year. The hope is to find gold quartz.

"Dawson City, situated at the base of Dome Mountain, rising 2,000 feet above the city, has 5,000 inhabitants and is two miles long by one wide. The Government has shown its faith in Dawson by putting up large and substantial buildings. The barracks for the mounted police are large and commodious and capable of accommodating over 500 soldiers, and, whether mines increase or decrease, Dawson, being the headquarters of the Government and mounted police, must always be a city of considerable importance. It is at the junction of Klondyke Creek and the Yukon River. The Yukon is navigable by light-draft boats from St. Michael's to White Horse, a distance of 1,800 miles. The city has four churches; several schoolhouses, all well built and well supported; two banks, charging interest at the rate of 18 per cent. per annum; two theatres and numerous dance halls, where varied entertainments are provided. Gambling has been lately suppressed, and Dawson is the most orderly and quiet place in Canada."

"How about the American business invasion?"

"Most of the merchants doing business are Americans, and, having come out in the early days and having connections with business houses in the United States, they naturally obtain supplies from jobbers where they are best known. They were able to get travellers' prices for anything they had to sell, and the small matter of 35 per cent. duties did not interest them. But now Vancouver and Victoria jobbers are looking well after the trade of Dawson. There are several large transportation and trading companies in Dawson that carry large stocks. They conduct departmental stores, and sell almost anything required by the citizens or miners. These companies own their own ships and carry freight up to St. Michael's in them, thence transfer to lighter craft, which go up to Dawson, thereby saving the extremely high rates by way of Skagway, Alaska, over the White Horse and Yukon Railway, thence by the Yukon to Dawson, which the small trader who gets his supplies thus is obliged to pay.

"Governor Ross told me that but a year or so ago $1 in the east would buy as much as $6 in Dawson, but lately, checking over bills, he found the difference now is about $1 to $4.50. No coin less than 25c. is used in the Klondyke. The three daily papers—smaller than our 1c. papers—sell at 25c. each, $4 a month, $40 per year in advance. All drinks, hard or soft, 25c., but all mixed liquors 50c., poor cigars 25c. or three fair ones for $1. A leading barrister told me he thought he had passed the period of being surprised at Dawson prices, but that morning when he was charged 25c. for a pair of common shoelaces he thought the price rather steep. Rents are very high. An office that rents in Toronto for $30 per month would bring $130 in Dawson. Small shops rent from $10 to $20 a day in advance. Dining-room girls get $100 per month and house servants from $75 to $125 per month. Hotel charges are more reasonable. A small room $2.50 per day, breakfast or lunch 75c. and dinner $1; the meals are better than you would expect under the circumstances. Sample rooms from $5 to $10 per day; hauling baggage $1 per piece.

"There is now in Dawson a great surplus of laborers, who are ready and eager to go to work. I am told there are 10 applicants for every job available, and yet boat load after boat load of adventurers are arriving almost daily to swell the crowd of idlers. Knowing these conditions, and seeing in almost every issue of the Seattle, San Francisco and other papers the glowing accounts of the Klondyke, one cannot help feeling that the transportation companies are responsible for those alluring stories. Dawson is about 4,500 miles from Toronto. From St. Michael's to Vancouver is about 2,800 miles, and from St. Michael's up the Yukon to Dawson about 1,400 miles. The Yukon is navigable for light draught boats 1,760 miles. The cost of a two months' trip would be between $500 and $600."

Dawson is within a little more than one degree from the Arctic circle, and when Mr. Hees was there in June it was almost as light at midnight as at noonday. Saloons, restaurants and fruit shops kept open all night, and out-door games, like cricket or tennis, were often played after midnight.

BLACKSMITHS ORGANIZE.

The blacksmiths of Eastern Ontario have formed an association, which, for the present, embraces 25 shops in that district, including the blacksmiths of Almonte, Carleton Place, Carp, Pakenham, Clayton, Kinburn and Marathon. Mr. Givens, of Pakenham, is the president; Mr. Hannan, of Kinburn, vice-president, and E. G. Code, of Almonte, secretary-treasurer. A committee has been appointed to draw up a schedule of prices to govern the association and also to draft a constitution. It is understood the prices on work will be advanced between 15 and 20 per cent.

Manitoba---Its Wheat Crop and its Merchants.

From Our Own Correspondent.

PORTAGE LA PRAIRIE, Aug. 2, 1902.

YOUR correspondent has just reached this point after a very hurried week of travel, and a general letter on the points touched during the week may not be without interest to readers of your magazines.

Monday morning, July 28, left Winnipeg at 8.45 on the Glenboro' branch of the C.P.R. The train was crowded with excursionists to the Winnipeg Industrial, who had spent Sunday in the city, and, judging from the amount of luggage checked and the enormous quantity of hand baggage, their visit had not been without profit to the merchants of Winnipeg.

Carman is situated 57 miles from Winnipeg in the heart of one of the richest wheat sections of the Province, and is decidedly the most picturesque town in Manitoba, as, in addition to a large number of fine trees of natural growth, the Boyne river runs right through the town, and is spanned by some three or four foot-passenger and vehicle bridges. The settlement of this section dates back to 1880, and the town has had the advantage of a well-to-do farming community to draw from.

Just now the wheat crop is the all-absorbing subject of conversation and interest, as the heads are now filling. The spring was backward and the growth not what it ought to have been until the beginning of July. Since that date, however, the weather has been ideal and the growth simply phenomenal. As the next three weeks is the critical period that will make or mar the season's work, everyone, merchant and farmer alike, is on the qui vive as to the result. A bicycle trip of some 17 miles through the wheat belt immediately surrounding Carman gives one a sight not soon to be forgotten. On either side of the road, as far as the eye can reach, are fields of waving grain broken only by occasional clumps of trees and good farm buildings. In this neighborhood is situated the farm of the Hon. R. P. Roblin, Premier of the Province, where your correspondent saw 780 acres of wheat in one field, that gives every indication of giving 30 bushels to the acre, and may possibly reach 35 bushels.

The town of Carman is growing rapidly and a large number of new buildings are being erected both in town and country; in fact, dealers in building materials are at their wits end to keep up with the demand. A new $25,000 hotel is being erected with all modern improvements, and the Starkey House, the principal hotel at present, is being enlarged by an addition, giving 13 new bedrooms, doubling the size of the dining-room and giving additional kitchen room and pantries.

In the brief time at the disposal of your correspondent it was not possible to call on all the trade, but Roblin & Sons and E. L. B. McLeod's establishments were visited. Both of these houses do a general business and carry large and well-assorted stocks and report business excellent in all lines.

In addition to a general, business Mr. McLeod makes a specialty of ladies' goods of all kinds, and his stock of dress goods and blouses is superior to that of many a large city store. If any lady of the town or country calls for anything that he does not happen to have in stock it is ordered by either wire or letter, according to the urgency of the case.

GLENBORO'.

The next halt worth mentioning was made at Glenboro', 104 miles from Winnipeg. Here also the promise of harvest is the best in the history of the settlement and everyone is proportionately happy and contented. Your correspondent had a view of this section from the top of the mill, an elevation of 65 ft., and from which the country for a radius of 15 miles lies before you like a beautiful picture with the Tiger Hills for a background. There are four large general stores in Glenboro', but it was only possible to call on three of them. J. F. Fumerton & Co. occupy a fine brick store, 32 x 75 ft., two storeys and basement, and carry a large and well-assorted stock of dry goods, boots and shoes, groceries, crockery, glassware, millinery and the like. Mr. Fumerton reported trade for the season very satisfactory.

J. R. Kelly has been in business at this point for a number of years and carries a full general stock. He reported business good, and stated that the amount of cash in circulation this summer was much larger than usual, owing to the establishment of a creamery where the farmers were paid monthly for their cream. This was a great advantage, not only in the matter of money, but also in saving the merchants the loss that is always attendant on the handling of dairy butter. F. Friderickson has done a general business in Glenboro' for 20 years. He is an Icelander, and there are large numbers of his countrymen settled in the neighborhood, many of whom are worth from $30,000 to $50,000. In addition to a large general store business, carried on in somewhat limited quarters, Mr. Friderickson has a good farm a few miles out of town on which he has a crop of wheat that will run 30 bushels to the acre.

SOURIS.

At Souris a brief stop was made, not sufficient to permit of seeing anyone but Mr. McCullough, the owner of the large flour mills, but, judging from the amount of buildlng going on, things must be in a very prosperous condition.

BRANDON.

On to Brandon, where the annual Western Fair was in full swing. The city so crowded that beds were at a premium, and many pepole had to sleep in the city council chamber and the station waiting rooms. Merchants were far too busy to talk.

RAPID CITY.

The next point made was Rapid City, 22 miles directly north of Brandon. The whole character of the country is different, it being fine rolling uplands with numerous bluffs of trees. This section has been settled for 23 years, and has always done mixed farming. The farms are all well tilled, there are fine herds of cattle and excellent farm buildings. The town is progressing. The creamery is doing well. The crops promise better than last year, when the average yield of the section was 38 bushels to the acre of wheat.

Le Page Bros. have a fine brick store and are doing a good general business. Both

HAMILTON, ONT.

partners were absent when your correspondent called. Hindson also does a large general trade. He has been in business in the district for about 20 years. He reported trade satisfactory for the season, although the cold, wet weather of June had made summer goods a little slow for a time.

There is a fine large hardware store at this point, but, unfortunately, there was no time to call. It is estimated that in addition to the crops, $80,000 worth of cattle will be sold out of the Rapid City section this season.

As there is but one train daily between Rapid City and Minnedosa—on the M. and N.W. branch of the C.P.R.—we drove across country in the early morning, a delightful drive of 20 miles; the road for nearly half the distance lying along the valley of the Little Saskatchewan, which, in Cree, is swiftly running water.

MINNEDOSA

is a large and substantially-built town, lying on both banks of the river and sheltered by beautiful encircling hills. The character of the farming and business generally, closely resembles those of Rapid City, but the town, being a divisional point, has additional railway facilities. The demand for lumber, and, in fact, all classes of building material, is tremendous; dealers are not able to get supplies in fast enough.

P. J. McDermott is one of the principal merchants of the town and the only one it was possible to call on. He has a very fine brick store, two storeys and basement, and it is packed with an excellent stock of boots and shoes, dry goods, clothing, crockery, groceries, and, in fact, everything that goes to make up a stock in a country town. Mr. McDermott reported trade good in all lines. There is a good creamery at this point and that is always a boon to the merchants as it means a certain amount of cash in the farmers' hands the year around.

NEEPAWA

was also visited, but that town and Portage la Prairie have already been fully described in these pages.

ABOUT STEEL SHAFTINGS.

The Pittsburg Steel Shafting Co., manufacturers of turned and polished shafting, are not altogether newcomers in the Canadian field, but they have never had a representative here until Mr. Alexander Gibb was appointed Canadian agent a short time ago. Mr. Gibb is to be congratulated on securing this agency. It is one in which, owing to the acknowledged superiority of the turned shafting made by this firm, there are great possibilities for a large trade.

Those acquainted with the steel manufacturing business know the difference between turned shafting and that produced by the cold rolled or cold drawn process. In the turned shafting the surface of the metal is not laminated and the bar is not subject to internal strains that cause crystallization and liability to fracture, as is often the case with the other processes. With the patent machines used in the turning process the shafts can be made perfectly round and parallel in any diameter. The shafts are highly polished, and not only present an attractive appearance, but are especially suitable for use as piston rods. Their exactness in size, too, makes it possible to fit couplings, pulleys, etc., to the shafts much easier than in the ordinary shafts; and, in addition, since they are perfectly round and straight a very high speed can be attained without vibration or heating of journals.

A Good Fall Business

is almost a certainty for dealers who are fortunate enough to hold

THE SHERWIN-WILLIAMS Agency

We have plans under way now that will secure to every dealer who works with us the largest and best paying paint business in his locality.

We are prepared to give good help to every man who is willing to take hold of our goods with us, and it is a noteworthy fact that those dealers who avail themselves of our proposition not only succeed in the paint business, but are also successful in their other lines.

We want live dealers everywhere who are looking for a money-making business connection. If you do not hold our agency now, it will pay you to write us for prices and further information by return mail.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, CLEVELAND, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY

A TWEED MERCHANT'S NEW STORE.

Wm. Wright, who has a general store in Tweed, Ont., started excavating for a 30-ft. addition to the rear of his store. The addition will be of brick and two storeys high. The ceiling at the rear of the present store will be raised to the same height as at the front, and the ceiling of the new addition will also be of the same height. This will give Mr. Wright considerably more room for his large stock, and he will have a much brighter and a more commodious store.

TRADE CHAT.

J. M. ROBINSON has put in a full line of hardware and stoves for retail business at 264 Dundas street, Toronto.

The largest cargo on record was received at Fort William on August 5. The steamer Oliver carried 7,000 tons of coal.

A disastrous fire in Robertson & Givans' grocery and hardware store, Moncton, N.B., caused damage to the extent of $12,000.

Lewis Bros. & Co. are presenting with each two dozen "Klean Kutter" razors a handsome and valuable plush lined leather box suitable for display case.

A large meeting of the ratepayers of Sydney, C.B., decided almost unanimously to vote a bonus of $250,000 for a steel shipbuilding industry. There are two suitable sites for a shipbuilding yard in Sydney, one at Barrack Point and the other near Whitney pier.

A despatch received in Toronto on Monday, August 4, by Elias Rogers, managing director of The Crow's Nest Pass Coal Co., stated that the miners' strike at the Fernie mines had been satisfactorily settled and the men were returning to work. This applies not only to the mines at Fernie, but also to Michel, were a sympathetic strike had been ordered.

GODERICH HARDWAREMAN WEDS.

A pretty wedding took place at Woodbine Cottage, Ashfield, Ont., on Tuesday evening, July 22, when Miss Ella, daughter of Mr. and Mrs. Jacob Crozier, was united in the bonds of matrimony to Mr. Melvin W. Howell, of McKenzie & Howell, hardware merchants, Goderich, Ont. Rev. T. R. McNair, officiated, and the ceremony took place in the presence of relatives and a few intimate friends of the bride and groom. The bride was beautifully dressed in garments of old rose silk, trimmed with lace applique, and wore besides a sapphire and pearl brooch, the gift of the groom.

The happy couple left the following morning on a trip to Toronto, Niagara Falls and other places. HARDWARE AND METAL wishes Mr. and Mrs. Howell long life and happiness.

PROTECTING LOCAL MERCHANTS.

The Town Council of Lachine has issued notices to the effect that no merchant living outside of the town will be allowed to solicit business within that municipality unless a fee of not less than $15 be paid. This special license was intended chiefly to prevent Montreal merchants from absorbing the business of Lachine. The distance between the two places is only about nine miles, and it is a very easy thing for the city dealers to send out their delivery wagons to Lachine and to keep canvassers there for the purpose of securing orders. This custom has been practised for some time by Montreal firms, with, it is claimed, serious results to the Lachine storekeepers, and business in the latter place suffered so severely from it that a decrease of income from taxation was threatened.

PERSONAL MENTION.

Mr. W. G. Ayling, bookkeeper for Decatur, Bull & Co., Montreal, and vice-president of the M.A.A.A., has been spending a few holidays in Ottawa this week.

Mr. J. H. Roper, representing Alexander Gibb, has just finished a trip through central and eastern Ontario, going as far west as London. His trip occupied about six weeks.

Mr. Emil C. Boeckh, of United Factories, Limited, has recently returned from a satisfactory trip through Manitoba and the Northwest. He reports the outlook for trade in general very good. The United Factories are rightly proud of their effort, and people are appreciating their push in the West as elsewhere.

Decatur, Bull & Co., Montreal, have been appointed sole Canadian agents for the knife cleaner manufactured by The World's Manufacturing Co., London, Eng.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

SWISS TRAVELLING CRANE TOOLS.

ONE of the most interesting and practical electrically - operated machines now in general use in the machine shops of the leading manufacturers in this country and abroad is the overhead travelling crane, says F. C. Perkins, in Scientific American. It is now considered by most engineers that the overhead travelling crane operated by electric motors is a necessity for the rapid and safe handling of all heavy work, and for moving the tools themselves when portable. It is becoming more and more the practice to use separate electrically-operated portable tools, bringing them in succession to the heavy work requiring their use. In order that the electric cranes may operate in all the parts of the shop, reaching every tool, or every large piece of work to be tooled, there must be no overhead obstructions, and we find this another reason for the direct-connected electrically-driven tool, with its entire absence of overhead pulleys and shafting. The Maschinenfabrik Oerlikon, of Oerlikon, near Zurich, have recently designed an attachment for electric cranes, whereby the tool electrically operated is directly mounted upon the crane, and may easily be brought to the work to be drilled at any part of the shop. The motor is controlled from below where the work is being done, and a suitable counterweight balances the drilling apparatus, allowing it to be easily moved up or down. A direct-current motor supplies the necessary power. The electric cranes are operated by either alterating or direct-current motors, although the latter are more extensively used at the present time, on account of the ease with which they may be controlled, and the great range of speed possible with the direct-current motor. The alternating-current motor has, however, the advantage of having no troublesome commutator, and may be made practically ironclad. Where the induction motor can be used, not even slip rings and brushes are necessary, which is a decided advantage; but in most cases slip rings and brushes are found quite necessary, in order to introduce resistance on starting, and hence alternating current motors for this class of work are not as extensively used as direct-current motors.

A weighing device suspended from a crane would undoubtedly find extensive use, as any heavy piece of work could easily be raised and its weight noted without difficulty.

NO SETTLEMENT

No settlement was made at the meeting of creditors of Pendrith & Co., machinists, 74 Adelaide street west, Toronto, who assigned to E. R. C. Clarkson. The meeting was held at the office of the assignee, and the statement presented showed clearly the liabilities, as owing to the necessity of finishing the contracts on hand it was not possible to procure a list of the assets. The total liabilities are over $30,000, of which $23,000 are direct, $2,600 preferred, and $5,500 secured. George T. Pendrith offered for the assets $6,500, of which $500 was to be cash, and the balance on time. The creditors did not come to any arrangement, but appointed inspectors to act with the assignee, and with power to dispose of the estate. Mr. Pendrith was asked to submit his offer in writing. The machinery is understood to have been valued at $16,000.

THE NIAGARA POWER DISPUTE.

The Ontario Government on Wednesday disposed of the dispute between The Canadian and Ontario Niagara Falls Power Companies by passing a general Order-in-Council providing that all plans and specifications, whether concerning structures within the park, below the bank or projecting out into the stream, shall be submitted not only to the Park Commissioners, but also to the Government. This will avoid hasty action in any case and will not involve delay.

AUTOMATIC HAY PRESS.

A company is being organized this week in Brantford, for the construction of an automatic hand-hay press. The charter will call for a capitalization of $50,000. They will have a complete monopoly of their line of manufacture for 18 years in Canada. After the company has been formed and the charter secured, the work of preparing for manufacturing the article will be rushed forward rapidly, and it is expected that samples will be ready for display at the fall exhibitions.

MACHINERY NOTES.

A 30-in. upright drill was shipped to The Richelieu & Ontario Navigation Co., at Sorel, by H. W. Petrie, Toronto.

John Mutch's machine shop, Winnipeg, and three stables were destroyed by fire on August 4. The loss is estimated at $4,000.

The Gillies estate works at Carleton Place, Ont., has installed a gasoline motor in the office of The Almonte Times.

The McLachlan Gasoline Engine Co., Queen street east, Toronto, shipped, on Wednesday, August 6, two 7 H.-P. gasoline engines to Glenboro', Manitoba.

The McLachlin Gasoline Engine Co., Queen street east, Toronto, have booked an order for one 15 H.-P. engine for the Experimental Farm at Indian Head, N.W.T.

A 22-in. x 8 ft. F. E. Reed lathe and 30-in. "Bullard" boring and trimming mill was installed in the plant of The London Machine Co., London, by H. W. Petrie, Front street west, Toronto.

An "up-to-the-minute" laundry has been established at 403 Spadina avenue, Toronto, by Campbell Bros., and called the "Corona." H. W. Petrie, 141-145 Front street west, Toronto, supplied and installed the entire plant.

STRIKE SETTLED.

In Toronto, the machinists' trouble with their employers, relative to increase in wages demanded by the union has, after several weeks' delay, been settled, and the men have been granted a substantial increase. Representatives of the union and the employers, who have been holding joint conferences, with a view of reaching an amicable settlement and averting any further trouble, have effected a settlement in the nature of a compromise by which the machinists will receive an advance all around of 7½ per cent., which will bring the minimum rate up to about 20 cents per hour. There will be no change in the hours of labor, and the terms have been ratified by the union.

ELECTRICAL NOTES.

Jones & Moore, Adelaide street west, Toronto, have sold a 6 H.-P. motor to The Toronto Roller Bearing Company.

The Hunter, Rose Co., Toronto, have purchased a 10 H.-P. motor from Jones & Moore, Adelaide street west, Toronto.

H. & A. Saunders, Toronto, have purchased from Jones & Moore, Adelaide street west, Toronto, a plating dynamo and electric motor.

The Northwestern Development Syndicate are installing a ten-stamp mill, sawmills, tramway and complete electrical equipment on their property at Camborne Claim.

The Levis Electric Tramway has taken action against The Clergue Co., of Sault Ste. Marie, on account of delay in delivery of rails. It is now said in Levis that, owing to this delay, street cars will not be running until next spring.

The I. O. F. electricians are lighting up the Foresters' Temple with electric lights. With the number of lamps in the neighborhood of 10,000, Coronation Day will be as brilliant on that corner as it was on the occasion of the Duke and Duchess' visit in October last.

The town council of Rat Portage will submit a by-law to the ratepayers providing for the construction of an electric railway from Rat Portage through Norman to Keewatin. The towns have already the waterpower with which to generate the electric power, and it is estimated that the railway can be constructed for $50,000, and that when completed it will be a paying investment.

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

INDUSTRIAL GOSSIP.

THE Carleton Foundry Company has been granted letters patent. The capital stock is $6,000 and headquarters at St. John. The incorporators are Messrs. William G. Haslam, William J. Irons, Ezekiel McLeod, W. Edwin Riley, John J. Gordon, William E. Scully and H. Colby Smith, all of St. John.

The Deering Harvester Co. are erecting works at Hamilton at an estimated cost of $95,000. The work of construction is under the supervision of F. Dickenson, contractor, and the architect is Edward Patterson.

RUBBER GOODS FACTORY.

There seems to be every prospect of securing the location in Ottawa of a branch manufactory for rubber tires, wheels, ball bearings, axles, etc. Ald. Coates has just returned from New York, whether he went to point out Ottawa's exceptional advantages. The manufactory would employ from 70 to 80 skilled workmen.

NEW IMPLEMENT FACTORY

The Cockshutt Plow Co., Limited, Brantford, Ont., have erected a large factory at Brantford at a cost of $150,000, which they will equip with the latest type of machinery for the manufacture of plows and agricultural implements. They are also building a new warehouse at Winnipeg, Man., of brick and stone, at a cost of $50,000.

NEW CAR SHOPS.

Work on the new car shops of the British Columdia Electric Railway at New Westminster, B.C., has been commenced. The new shops will be 75 x 100 ft. in size and will be large enough to turn out eight cars per day. These cars will be of a serviceable pattern, 32 ft. long. The whole plant will cost about $15,000, and everything is to be in operation by October 1.

NEW IRON AND FOUNDRY CO.

In The Canada Gazette public notice is given that under the Companies Act, 1902, letters patent have been issued under date of July 25, incorporating Thomas J. Drummond, manufacturer, Edgar Mill McDougall, manufacturer, George E. Drummond, manufacturer, John Dyer, manager, and T. Brosseau, advocate and King's counsel, all of Montreal, for the following purposes: To manufacture, buy, sell, deal in and deal with iron, iron ore, steel and kindred products, car wheels and railway supplies generally, to do general foundry and machine work and other business of a like nature, incidental thereto or arising therefrom; to purchase, lease or otherwise acquire, sell and deal in any mine, mining rights and land in the Dominion of Canada and elsewhere, explore, work, exercise, develop and turn to account the same, etc. The operations of the company are to be carried on throughout the Dominion of Canada and elsewhere, by the name of The Canada Iron and Foundry Company, Limited, with a total capital stock of $150,000 divided into 1,500 shares of $100.

TO MAKE MANURE SPREADERS.

A by-law will be submitted to the ratepayers of Stratford on August 14 to guarantee the bonds of The Kemp Manufacturing Co. to the extent of $15,000 for 15 years, if they erect a large factory in the city for the manufacture of manure spreaders. The company will employ upwards of 100 hands. A trial of the machine was made in Downie, and farmers pronounce it a most serviceable implement. The United States factory is situated at Newark Valley, N.Y. The Stratford Board of Trade have in charge the organization for bringing out the vote.

NEW COMPANIES.

The Cerberite Co. of Canada, Limited, is incorporated with a capitalization of $500,000. Those interested are: Dr. William Beatie Nesbitt, Dr. John Noble, James Pearson and J. K. Paisley, of Toronto, and Hugh Mann, of Winnipeg. The object of the company is to manufacture and deal in chemicals and chemical compounds, and dynamite, cerberite and all other explosives. The head office of the company is in Toronto.

Other companies incorporated are: The London Rolling Mills Co., Limited; capital, $200,000; head office, London. The Butchart Bros. Real Estate Co., Limited; capital, $150,000; head office, Owen Sound. The J. M. Green & Sons Co., Limited; capital, $50,000, contractors and builders, St. Thomas.

The American Bridge Co. of New York is authorized to do business in Ontario, with a capital of $100,000.

A HANDSOME WINDOW.

On Sunday, June 29, was unveiled in St. John's Church, Norway, Ont., a memorial window commemorative of the 27 years' rectorate of the late rector, the Rev. Charles Ruttan. The window adds materially to the beauty of the church, and reflects great credit on The Luxfer Prism Co., Toronto, whose production it is. The subject of the window is the appearance of the angel to the three Marys at the empty tomb on the first Easter morning. The cost of the window ($200) was contributed by the congregation. On the window are inscribed the words: "To the glory of God, and in loving memory of Rev. Charles Ruttan, for twenty-seven years rector of this parish."

Another window will shortly be placed in position by the same firm, the subject being the nativity of Christ.

The Luxfer Prism Co., Toronto, have secured contracts for windows at several points throughout Ontario.

SOME IMPORTANT TRADE QUESTIONS.

HARDWARE AND METAL has received from Charles W. Creed, secretary of the Maritime Board of Trade, the subjects for discussion at the annual meeting of the Board at Sydney, C.B., on Wednesday, August 20. They are as far as known to date the following:

1. Proper methods of curing, culling and preparing dry and pickled fish.
2. The urgent necessity of better aids to navigation on the Atlantic seaboard and the entrance to the Bay of Fundy.
3. The desirability of daily steamship communication between St. John and Digby throughout the year.
4. Is not the fast Atlantic service an absolute necessity in the development of the Maritime Provinces?
5. The necessity of the establishment of county Boards of Trade.
6. Trade with South Africa.
7. Forest preservation.
8. Preferential Customs tariff.
9. Steel shipbuilding.
10. Government ownership of the fast Atlantic service.

A WESTERN MARRIAGE.

At the home of Dixon Bros., who operate a general store in Maple Creek, N.W.T., a very pretty wedding was celebrated on Wednesday, July 23, when Miss Harriet Crela, formerly of Peterboro', Ont., and Mr. F. W. Porter were united in the bonds of holy matrimony. The groom was supported by Mr. J. R. H. Dixon.

CATALOGUES, BOOKLETS, ETC.

SPORTING GOODS CATALOGUE.

THE MARLIN FIREARMS CO., New Haven, Connecticut, U.S.A., have just issued their 1902 catalogue. The catalogue is equal to almost any other catalogue before issued for general distribution to the sporting trade. The cover, in colors, represents an up-to-date sportsman. The volume is an illustrated price list, and contains many points of interest to those who appreciate the delights of shooting.

NEAT BLOTTERS.

The Metallic Roofing Co., Limited, corner of King and Dufferin streets, Toronto, Canada, have issued some very useful advertisements. Some neat blotting papers have been sent out to the trade with exceedingly catchy phrases, all pointing to the excellence of the productions of this enterprising firm.

WARNOCK & CO.'S TOOL CATALOGUE.

James Warnock & Co., Galt, Ont., have just issued their illustrated tool catalogue and price list. Some new features have been introduced in hatchets and boys' and hunters' axes. Handsomely illustrated and neatly printed, the catalogue reflects considerable credit upon the enterprise of the firm. Full particulars, description and price accompany each article. The catalogue should be a trade-bringer.

SUPERIOR SHEARS.

The National Cutlery Co.'s bankers' or paper shears are now in use in many of our banking institutions, and leading paper hangers at once recognize their superiority in shape and quality. They have no soft spots, no saw edges and are fully guaranteed, and made with a steel ride. They are acknowledged to be excelled by no other make. Each pair is put up in separate pockets. Ask for catalogue.

HEAVY SALES.

The success with which "Comet" brand galvanized Canada plates have met with in Canada during the past season has been seldom equalled by an article so short a time on the markets. Messrs. W. Gilbertson & Co., Limited, Swansea, Wales, the makers of this brand, only commenced to manufacture galvanized Canadas this year, but, in spite of their recent introduction, Mr. Alexander Gibb, the Canadian agent, was able to dispose of the whole year's output. He asked the manufacturers to increase their capacity for this work, and they have consented, adding another galvanizing pot, which will materially aid the output. The capacity of the factory for making galvanized Canada plates is now 55 tons per week. The reason of their great success is on account of the low price at which they can be sold here.

DUPLICATE ORDER BOOK.

The Canadian General Electric Co., Limited, with commendable zeal and tactful consideration, have presented their customers with a complimentary duplicate order book. It will prove a source of convenience, enabling their customers to keep a copy of the orders they send to the company.

NEW MINING COMPANY.

Letters patent have been issued incorporating Erskine Henry Bronson, manufacturer; Thomas Ahearn, electrician; Levi Crannell, manufacturer; Cassius Clement Ray, merchant, and Lyman A. Ray, merchant, of Ottawa, for general mining purposes, the operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of The Bonanza Creek Hydraulic Concession, Limited, with a total capital stock of $1,000,000, divided into 10,000 shares of $100.

SHERWIN-WILLIAMS PICNIC.

The Sherwin-Williams Co. held a most successful picnic for their employes at Bout de l'Isle on Thursday, July 31, this being the fourth annual affair of the kind. About 300 people were present and a very enjoyable day spent. The morning was occupied with athletic sports, followed by a football match, and every event was hotly contested. An orchestra had been provided, and the afternoon was passed in dancing, boating and other amusements. The party returned to the city at 7 p.m., tired but happy, and well satisfied with their day's outing.

The winners of the various events were as follows:

100-yard dash—1, C. S. Bann; 2, J. Ellard; 3, Sam. Gray, jr.

50-yard dash (ladies)—1, Miss Gilson; 2, Miss Renaud; 3, Miss Whitehead.

Running broad jump—1, P. Raymond; 2, C. S. Bann; 3, J. Ellard.

Sorting boots—1, J. Gorman; 2, G. E. Radford; 3, S. Gray, jr.

Needle and thread race—1, Miss Smith and J. Ellard; 2, Miss E. Whitehead and Sam. Gray, jr.; 3, Miss Clements and E. Budge.

Three-legged race—1, Fisher and Enright; 2, Raymond and Aggett.

Tug-of-war—Won by W. P. Paton's team.

Football game—Won by W. S. Messer's team.

The assets of Gorman & McDonnell, Douglas, Ont., general merchants, have been sold at 50c. on the dollar.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, August 8, 1902.

HARDWARE.

IN wholesale hardware circles, the week has been a quiet one, though trade in goods for fall business is commencing to improve, and the outlook for trade is encouraging. Many of the travellers are now enjoying their holidays, and with the houses whose representatives are not on duty, business is very quiet. A new list has been issued on Gurney's scales and weighbeams, and the discount is now 40 per cent. off on all lines. Richelieu plain white closets have advanced 25c., and are now quoted at $3.75. A good many orders have been booked for axes, sleighbells, skates and cutlery for the fall trade, and horseshoes are moving more rapidly at the present prices. A new list has been issued on turned wooden handles, the discount on which is 50 per cent. throughout. Heretofore the discounts have been different on the various handles, and a more uniform price now prevails.

BARB WIRE.—The market for this wire remains quiet and without feature. The price is $3 per 100-lb. keg f.o.b. Montreal.

SCYTHES.—Business in scythes is practically all in sorting orders, the regular demand for the season being over. We now quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

GALVANIZED WIRE.—Trade continues only moderate, and nothing in the way of a change in price has occurred to alter conditions on the market. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There has been no improvement in the demand for this article. The market is inactive. Our quotations follow: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Only a small amount of business is passing in fine wire. The discount is unchanged from 22½ per cent.

FENCE STAPLES.—Trade is not active this week, and no new feature has appeared on the market. The price of galvanized is unchanged at $3.25 per 100-lb. keg. An extra of 25c. is charged for 25 and 50-lb. packages.

WIRE NAILS.—These are moving out as usual, with nothing special to report on the market. The price is unchanged. We now quote in small lots, $2.55; in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is not much doing this week. Business is confined almost wholly to small lots. We quote $2.37½ per keg for carlots, and $2.45 per keg for small lots.

HORSE NAILS.—Business in this line shows a continued improvement, and trade this week is reported fair. The discount on "New Countersunk" heads has been again changed, and is now 66 2-3 and 5 per cent. off, instead of 70 per cent. off. Our quotations are as follows: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 and 5 per cent. off. "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—The demand has been better this week than last, though trade is still of only moderate proportions. No quotable change has occurred in prices. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.35; No. 1

Stove Orders—Important.

The indications are that the demand for our "Famous" stoves and furnaces will be very large this Fall, and we are working our immense factories in both London and Hamilton to meet it.

In order to insure prompt delivery we would ask all customers to instruct us to ship the bulk of their orders early, as we may not be able to ship so promptly when the Fall rush begins.

By complying with this request you will be fully prepared for the stove business when the season opens, and will run no risk of not having the goods when they are wanted.

All invoices for stoves and furnaces delivered any time during August and September will date from the 30th of September.

MIDLAND, ONT. Limited

and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—The demand for screws, while not particularly active, is steady, and a satisfactory business is doing at unchanged prices. The discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Conditions in the cordage market remain practically unchanged. Trade is quiet, and our quotations are as follows: Manila, 15c.; British, manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is no change. A fairly good demand is still reported by all jobbers, and the market is steady. The discounts are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—There has been no material change on this market. Business continues fair, with no changes in prices to report. We quote the discounts as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The heavy demand for building paper has ceased and the market has assumed the quietness which usually characterizes it at this season of the year. No change in prices is to be reported. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—But a small amount of business is doing this week. The price quoted is $1.37½ per 100 square feet.

POULTRY NETTING.—This moves out but slowly at present. Canadian or English is discounted at 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used. For delivery in 1903 the

For a good all-round trade-winner and trade-keeper there is nothing you can stock to compare with a reliable line of paint.

"Ark Brand"

has many points that cannot be equalled by other paints, and we give you a written guarantee to back up what is said of it. On the whole "Ark Brand" cannot be beaten. Our sales prove this.

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

discounts are 60 per cent. off for 19 wire and 55 per cent. off for heavier.

HARVEST TOOLS.—Trade is slow. The discount remains at 60 per cent.

FIREBRICKS.—There is nothing special to report in this market. Business is quiet and prices are uncnanged. English bricks are quoted at $16 to $22 per 1,000 and Scotch, $17 to $22 per 1,000.

CEMENT.—Trade in cement is of the usual midsummer nature, and there has been no material change since our last report. Our quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The market for metals has been active during the past week, but, notwithstanding the arrivals of sheet metals since the loss from the steamer Monteagle, there is still some shortage reported in a few sizes. Prices, generally, have been steady in all lines, and there are no quotable changes to report.

PIG IRON.—The market here retains all its firmness. No quotable change is to be reported. We quote' Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—This continues to move out fairly well. Merchants' bar is quoted at $2, and horseshoe iron at $2.20.

BLACK SHEETS.—A fairly good business is passing in black sheets, but some sizes are still reported scarce. Further shipments are daily expected, and our quotations follow: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50. and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This has been in good demand at steady and unchanged prices. Nothing of importance has occurred since our last reuort. Our quotations now are' No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—The demand for ingot copper continues light, and the market shows no new feature. The price is 14c. per lb.

INGOT TIN.—There is not much change in this metal. Straits is still quoted at 33½c.

PIG LEAD.—The market is quiet and without special feature. The price quoted is $3.25.

LEAD PIPE.—Trade continues about moderate, and prices are unchanged since last week. Composition and waste are quoted at 8c., while ordinary sells for 7c. The discount remains at 37½ per cent.

IRON PIPE.—This is in fair demand on the local market. No quotable change has occurred. We quote: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—Business is only of moderate proportions this week. Prices are unchanged. We quote: $4.75 to $5.25 for charcoals, and $4.25 per box for cokes.

CANADA PLATES.—These have been in good demand during the past week. Arrivals have been fair lately, but there is some shortage yet, 60 sheet Canadas being especially scarce. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—There has not been any improvement in this market, and trade is still somewhat quiet. Quotations are: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—A fair amount of business has been effected during the past week, but there is still great room for improvement in the demand. Prices, which are unchanged from those of last week, are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—The demand for this metal is still small, and the market remains quiet under steady and unchanged prices. Quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—The price of terne plates remains at $7.50. The market shows no improvement in the demand, and business is quiet.

COIL CHAIN.—There has only been a small trade in chain on the local market

during the week. There is nothing special to report. Quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade continues quiet in this line. We quote $5.85 to $6.25.

ANTIMONY.—There is only a small amount of business doing in antimony, which is quiet at 10c.

ZINC SPELTER.—Nothing of importance has occurred to change conditions on this market. Trade continues quiet and featureless. The price is unchanged, 5c. being still quoted.

SOLDER.—In solder the usual steady demand has been felt throughout the week, but nothing of special interest is to be reported. The price of bar solder is 18c., and of wire solder, 20c.

PAINTS AND OILS.

No change in staples is reported this week, and the market is steady throughout. Supplies are coming forward freely, and a large number of back orders are rapidly being taken off the slate. Most manufacturers are pressing hard to clear up everything before the commencement of the autumn trade, and indications point to a brisk business in all classes of goods. Paris green has again assumed a sluggish tone, and it is thought that stocks on hand will be sufficient for the present season. A heavy demand is expected for putty shortly, as building operations have been so brisk during the past season. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal. Discount, 5 per cent.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

The Handsome Effect Of Our Sheet Metal Fronts

Makes them wonderfully popular, either for new buildings or improving shabby exteriors.

We make them complete, including Cornices, Door and Window Caps, etc.—a most durable, economical finish, giving fireproof protection, as well as fine appearance.

These, and our improved metal building materials for exterior and interior use, are favorably known throughout Canada for their reliable merit—a merit we intend to maintain. So you stand certain of satisfied customers when you sell our goods.

A look through our catalogue will be profitably interesting to anyone in the trade.

The Metallic Roofing Co., Limited,

WHOLESALE MANUFACTURERS,

TORONTO, MONTREAL, WINNIPEG.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Business has gone along quietly in scrap metals during the week, and there is no quotable change to report. Copper continues easy, but no further decline is reported. Zinc and red brass are both freely inquired for. We now quote as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6 to 6¼c. per lb.

GLASS.

Nothing of interest has occurred in the market since our last report. Jobbers report a quiet trade, what orders are being received being for small lots. We now quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

No change in price is reported in the market for hides. Trade, in general, is quiet. Quotations are: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 30c

---

MARKET NOTES.

Plain white Richelieu closets are 25c. higher.

Gurney's scales and weighbeams are discounted, off a new list, at 40 per cent.

The discount on "New Countersunk" horse nails is now 66 2-3 and 5 per cent. off, instead of 70 per cent. off.

ONTARIO MARKETS

Toronto, August 8, 1902.

HARDWARE.

A FAIR business is being done in hardware. Some sorting-up orders still come in by mail. In horse nails there has been a change, and there is a likelihood of a further advance. Trade, in fact, is quite bright. The factories are catching up to orders in bolts and nuts. In screws, the factories are still behind with orders, and are catching up but slightly.

BARB WIRE.—The demand for barb wire is fair, and prices are without change. We quote $2.65 in carlots, and for less than carlots, $2.77½ f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—A demand is still being made for galvanized wire. quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Prices are unchanged, and a fair amount of business is reported in the local market. We quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—A moderate amount of trade in this line continues. Discount, 22½ per cent.

WIRE NAILS.—Business is wire nails is steady and prices firm, and our quotations are as follows: $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Conditions are the same in this line. Business is quiet at the

following prices: Cut nails, $2.45 per keg, and $2.37½ for carlots.

HORSE NAILS.—The increase in business in horse nails has at last affected the price in this line. The manufacturers have been complaining about the lowness of price and smallness of profits. "C" brand has a change in quotations. It is expected that a further advance will follow. We quote: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—Fall requirements are bringing a fair demand for horseshoes. Our quotations are now as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $1; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The market is good for screws, and though the factories are gaining on the orders it is only slightly. Discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—With stocks light, a good demand is still experienced. Discounts are: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The factories are catching up to orders, and business still continues brisk at firm prices. Our quotations are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—A moderate amount of business continues in this line at unchanged prices. We quote: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Business in green wire cloth is quiet. We quote the base price at $1.37½ per 100 square feet.

SPADES AND SHOVELS.—These are in fair demand in the local market. The discount is unchanged at 40 and 5 per cent.

ROPE.—A good trade is doing in all lines of rope, especially in hayfork rope, some sizes of which are scarce. The prices continue unchanged. We quote as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—Supplies available are small, since all this season's make was previously booked for delivery when required. A good demand is made from all sections. We now quote as follows: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—Prices are firm and a brisk trade is being done in forks, scythes and snaths. Business is principally a sorting-up one. The discount continues at 60 per cent.

EAVETROUGH, ETC.—A heavy call for eavetroughing is being experienced. The large number of orders to fill make it almost impossible for factories to make prompt deliveries. Our quotations are as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—The demand is good, and our quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

HARVEST WHIPS.—Sorting-up orders continue in harvest whips, with a fair business doing in all kinds of whips.

POULTRY NETTING.—Business is fair, and trade is mostly of a sorting-up nature.

SPORTING GOODS.—As fall approaches business in ammunition becomes larger. An active demand is felt for guns and rifles.

CEMENT.—A large number of good orders are coming in for cement, and the manufacturers have their hands filled with orders. The prices remain unchanged and are quoted as follows: Canadian Portland, $2.40 to $3, and Canadian hydraulic, $1.35 to $1.60 per barrel.

METALS.

In metals, no large buying is reported in the market at present, but the demand for shipments from stock is well maintained for this season of the year. Prices are steady and firm all around. There has been no change in prices during the week.

PIG IRON.—A fair amount of business is being done in the local market. In the United States pig iron is firm, but quiet. We quote on track, Toronto: No. 1 foundry, $21 and No. 2, $20.50.

STEEL BOILER PLATES.—Trade in this line is keeping up well, and the tone of the local market is firm. We quote: Steel boiler plates, $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—A good business continues in these. We quote: Steel beams, from stock, $2.75 and $2 per 100 in carload lots on track.

STEEL RAILS.—These are quoted at $30 per ton for steam railways and $36 per ton for electric railways.

TOOL STEEL.—Prices are unchanged, and a steady market continues locally. Our quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—In this line a fair demand continues with volume of business practically the same.

SPRING STEEL.—Locally, the demand is moderate and business continues unchanged.

BOILER TUBES.—The local market shows the same fair demand, with markets steady.

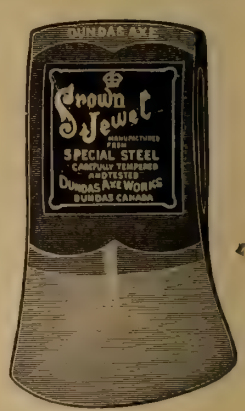
..A..
STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.



Dundas Axe Works, Dundas, Ont.
W. L. Haldimand, Jr., Eastern Agent, Montreal.

BAR IRON.—The scarcity of stocks of bar iron still continues, with a strong, active demand surpassing supply. The United States market is strong and quiet. We quote as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—In this line the demand is better than a week ago, and prices are unchanged. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Business is more active in this line. Prices are steady. Our quotations are as follows: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all bright, $3.75.

GALVANIZED SHEETS.—A good demand for galvanized sheets is felt in the local markets. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

TIN.—There is a fair demand for small lots in tin. Prices are unchanged. We quote $32 to $33 per 100 lb.

TINPLATES.—A fair demand has been felt for tinplates in the local markets. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER.—The demand for ingot copper has improved, and sheets are still showing a fair demand. We quote: Ingot copper, $14 per 100 lb., and sheet copper, $22 to $23.

BRASS.—In brass, no change in the state of the market or prices has occurred during the week. The discount is 15 per cent.

PIG LEAD.—This is reported to be quiet on the local market. We quote: $3.50 to $3.75, and bar, $5.

IRON PIPE.—A good local demand is reported for iron pipe. Prices remain unchanged. We quote as follows per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—A fair demand is felt on the local market for zinc spelter. We quote 5 to 6c. per lb.

ZINC SHEETS.—A fair amount of business is being done in this line in small lots. We quote: Cask lots, $6 to $6.25, and part casks, $6.25 to $6.50.

SOLDER.—There have been no changes in prices or demand during the week.

ANTIMONY.—A slight increase in the demand has been experienced during the week. We quote $19.50 per 100 lb.

PAINTS AND OILS.

Trade of the past week in paints and oils has still continued to be very dull. Raw and boiled linseed oils and spirits of turpentine are still unchanged, although turpentine is reported stronger in the South. The English market for linseed oil is still strong and continues to increase. A few orders are coming in for ready-mixed paints, and prices are about the same. A considerable advance has taken place in benzine and gasoline. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18¾c. per gal.; gasoline, ordinary, 21¼c., and engine, 22¼c. f.o.b. Toronto.

PARIS WHITE.—90c. to $1 per 100 lb.

GLASS.

Business keeps fair with prices unchanged. We quote: Under 26 in., $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Trade in this line keeps fairly active. Scrap zinc is still weak, while lead is stronger. We quote : Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼c.; iron, No. 1 wrought, $14 per net ton ; No. 2 wrought, $6 ; machinery cast scrap, $14 ; stove plate, $10 ; malleable and steel, $6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—There is a fair demand for hides in this market, with a little advance in prices. Quotations are as follows : No. 1 green, 8c. ; No. 2 green, 7c.; No. 1 green, steers, 9c. ; No. 2 green, steers, 8c.; cured, 8½ to 9c.

SKINS.—The skin market is also a little more active. Quotations are as follows : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; shearlings, 35c.; lambskins, 35c.

WOOL.—The receipts are small and the market is firmer. We quote fleece wool, 13½c. and unwashed, 7½c. per lb.

TALLOW.—The arrivals are limited and the prices are firm. We quote 6¼ to 6½c. per lb.

COAL.

The situation of the coal strike still continues about the same, and not much advancement has been made toward a settlement. Local coal dealers still have a supply on hand, but they report that unless a settlement is effected soon, it will not last long. There has been no further rioting, which looks as if the matter was coming to a head. In speaking to a large dealer, he expects the strike to be settled before September 1. We quote $3 to $4.50 per ton for soft coal.

PETROLEUM.

A strong business still continues to be done in petroleum at unchanged prices. We quote : Pratt's Astral, 17 to 17½c. in bulk (barrels extra) ; American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white,16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

NEW PLANT AT CHARLOTTETOWN.

A PORTION of the new plant of The Charlottetown Light and Power Company, of Charlottetown, P.E.I., is now being operated. At present the 1,200 light dynamo is being driven by the large new engine recently imported. The Ideal engine is being placed in position and it is expected that in the course of a few days the street-light plant will be transferred to the new station. Men are also at work excavating for the foundation of the large engine in the station at the foot of Pownal street. The new stokers are being operated and are giving perfect satisfaction. In the pump house an engine has been placed for generating air for these stokers. This engine also operates the feed pumps and four feed-water heaters and fans. One of the most interesting parts of the machinery is the automatic device for feeding coal, the engine's speed being set by an automatic valve at the speed the boiler is to work at. When completed the new plant will be fitted with marble switchboards and concrete floor.

IRON AT THE COAST.

J. W. Ladd, one of the original owners of the iron deposits at Sechart, and now agent of The Pacific Steel Company, passed through Victoria last week on his way from Irondale, Washington, to visit the company's properties on Barkley Sound.

The company is operating at Sarita, Copper Island, and Sechart, on Barkley Sound, and on Texada Island. The supply of ore for the Irondale smelter is being taken from Texada at present, but as soon as proper transportation and shipping facilities are provided shipments will be made from Barkley Sound.

At Copper Island, an aerial tramway may be made to take the ore the 1,500 feet from the mine to tidewater.

Development work is being done at Sarita, Sechart, and Copper Island, and several thousand tons are on the dumps ready for shipment.

Mr. Ladd states that he considers that the Irondale establishment will demonstrate that there is a market in the Pacific Coast States for a very considerable quantity of iron, and that when that market is fully supplied by local furnaces the managers will naturally desire to extend their business further afield and invade the markets of China, Japan, and Australia.

When it has been proved that British Columbian iron can compete successfully with British, United States, and Cape Breton iron, capitalists will be eager to establish plants on Vancouver Island.

The scarcity of hematite iron, which is required to mix with the hard magnetic ores, militates, in a measure, against the manufacture of pig iron in Vancouver.

EXHIBITION AT CAPE TOWN.

AN excellent opportunity to promote trade with South Africa will in all probability be afforded manufacturers throughout the British Empire by the proposed Cape Town Exhibition. This industrial display, inasmuch as the Exhibition is confined to exhibits from the British Empire, will tend to increase the commercial relations between the South-African colonies and the other sharers in the British Empire. The Chamber of Commerce and Town Council of Cape Town will appoint an advisory board, in order to forward the arrangements and interests of manufacturers participating in the exhibition.

Manufacturers desirous of participating in a scheme which offers so unique an opportunity of bringing their products before the South-African public should hasten their applications for space.

The time fixed for the holding of the exhibition, November, 1903, to February, 1904, is certainly very opportune. The various paralyzed industries, and especially those of farming, dairying and wine-growing will then be busy in schemes for a fresh start, and the tangible and visible exhibition of the latest and most up-to-date appliances, tools, mechanism and machinery, cannot but lead to very extensive and profitable dealings, and the opening, doubtless, of new and permanent trade outlets for manufacturers.

Alfred P. Baker, F.R.C.I., is general manager, and among the patrons are Lord Milner, Right Hon. Sir J. Gordon Sprigg, Prime Minister of Cape Colony, and the Chamber of Commerce, Cape Town.

SITUATION VACANT.

NEW CATALOGUE JUST ISSUED—WRITE FOR IT.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week the following building permits were issued at the office of the City Commissioner, Toronto: George Christian, one-storey roughcast dwelling, Dufferin street, for $400; Francis Phillips, two-storey and half pair semi-detached brick dwellings, Manning avenue, for $5,000; H. Frank Squires, pair semi-detached two-storey and attic brick and stone dwellings, Albany avenue, for $7,000; Jacob Singer, alterations to brick dwelling, cor. John and Stephanie streets, for $2,000; Alex. Campbell, alterations and addition to dwelling (brick) 233 Simcoe street, for $300; J. J. Walsh, two pair semi-detached, two-storey stone and brick dwellings, Springhurst avenue, near King street, for $4 400; Wm. Minto, pair attached two-storey brick stores and dwellings, 575½ and 577 Dundas street, for $3,000; Wm. White, pair semi-detached two-storey and attic brick dwellings, Concord avenue, near College street, for $6,000; York County Loan and Savings Co., two-storey and attic detached brick dwelling, north-west corner of Roncevalles and Fermanagh avenues, for $7,500; York County Loan and Savings Co., for two-storey and attic brick dwelling, detached, south-west corner Roncesvalles and Fermanagh avenues, for $7,500; Dominion Bank, two storey brick addition to bank, corner Spadina avenue and College street, for $4,000; F. Wilkinson, two-storey dwelling, brick front, roughcast sides and back, 16 Garnett avenue, for $1,000; W. J. Hewitt, two-storey dwelling, brick front, roughcast sides and back, 15 Euclid avenue, for $1,000; Isaac McHenry, pair semi-detached two-storey and attic brick dwellings, 218 and 220 Gladstone avenue, for $5,000; Geo. Irwin, pair semi-detached two-storey and attic brick dwellings, stone foundation, Dufferin street, near King street, for $4,000; A. Peel, two-storey dwelling, brick front, roughcast sides and back, north-west corner Clinton street and Barton avenue, for $500; Caroline J. Roberts, pair semi-detached two-storey and attic brick dwellings, stone foundation, 213 and 215 Beverley street, for $6,600; Lucinda Roberts, two-storey dwelling, brick front, roughcast sides and back, 228 Havelock street, for $400.

BUILDING PERMITS IN OTTAWA.

In building circles there is a fair activity. The volume this year is, perhaps, not so large as in the previous season, but the structures which have been put up are solid and substantial. This week's list of building permits is as follows: W. H. Bishop, brick-veneered dwelling, Gilmour street, $1,100; George Johnston, brick-veneered dwelling, Stewart street, $1,800; D. Doherty, addition to workshop, Besserer street, $350; A. Kerr, frame dwelling, Kenny street, $750; W. G. Leclair, two brick-veneered dwellings, Bridge street, $1,000; John O'Meara, brick-veneered dwelling, Bolton street, $1,000; T. Kennedy, brick-veneered dwelling, Wellington street, $1,700.

BUILDING PERMITS IN MONTREAL.

Since August 1, the following building permits have been issued in Montreal: To The Bell Telephone Co., for the erection of a one-storey building, 100 x 50 ft., to cost $13,500; to C. Ochu, for the erection of a three storey building, 24 x 36 ft., to cost $2,400; to S. D. Vallieres, for the erection of a two-storey building at 1051 St. Hubert street, to cost $2,500, size 43 x 102 ft.

BUILDING PERMITS IN HAMILTON.

The building permits issued during July totalled $131,450, as compared with $120,025 in the same month last year, an increase of $11,425. August is off to a good start with the following: Hamilton Distillery Co., for a brick addition to its premises at Wellington and King streets, $2,000; Rastrick & Sons, for alterations and addition to the Hannah street school, $7,000; Stewart McPhie, for a brick addition to 90 Markland street for Mrs. M. Malloch, $2,000, and John S. Huart, brick addition to 394 South Queen street, $500.

PLUMBING AND HEATING CONTRACTS.

Fiddes & Hogarth, 122 King street, have secured the contract for plumbing and lighting three houses for Ald. Lamb, on Sumach street.

Louis Hilliard, of Rat Portage, Ont., is having plans prepared for a $40,000 modern hotel to replace the one destroyed by fire.

Purdy, Mansell & Co., plumbers, Adelaide street west, Toronto, report the following contracts for the week: Plumbing and heating for The American Cereal Co.; hot-water heating for dwelling of Mr. H. C. Hammond, 60 Grosvenor street, Toronto; also steam heating for the Queen's Hotel, Port Hope.

PLUMBING AND HEATING NOTES.

The employes of the Dominion Radiator Company, Toronto, will hold their tenth annual excursion to Niagara Falls, per steamers Garden City and Lakeside, on Saturday, August 16.

BUILDING OPERATIONS IN TORONTO

The building permits issued by the City Commissioner continue to show a large increase over those of last year, judged by the values of the buildings to be erected. For last month the permits were for buildings of an aggregate value of $402,769, and for July of last year $175,635, an increase of $227,134. The increase for the year to date is still better—1902 to date $2,304,614; 1901, $1,595,300, an increase of $709,314.

BUILDING OPERATIONS IN QUEBEC.

Permits have recently been granted by the city of Quebec to Mr. Fackney, contractor, for the repairing af the Salvation Army building on Palace street, and to Mr. H. Dorion, to repair the St. Jean Baptiste Church, in which work the sum of $4,650 will be expended. The work of building a new presbytery in the parish of Jacques Cartier is progressing rapidly. The new structure, which is in charge of Mr. E. Page, of St. Raymond, will be a three-storey one built with stone and finished in most modern style.

BUILDING OPERATIONS AT THE SOO

McPhail & McCarty will build an addition to the Baptist church.

K. Wright is building a two-storey brick house on Front street for Mr. McGregor.

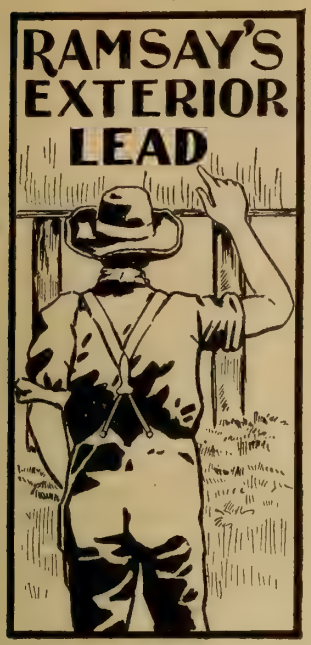
W. J. Bell will build a hotel on the Vaughan property at Bruce and Queen streets.

Wm. Coates is building a brick cottage on Lucy Terrace. K. Wright has the contract.

James Thomson, architect, has prepared plans for a brick residence for W. A. Quibel to be erected on Pim street hill.

Contractor McKissock has the frame of E. L. Stewart's $6,000 Upton Road residence up. The basement is built of concrete and cost $1,000. The house is 58 x 34. It will be finished in red quartered oak.

Excavation has been commenced for a 38 x 100 foot bar, office and sample-room addition to the Cornwall Hotel on Queen street. The building will be one storey in height, with hardwood floor and fittings. Head & Radford are the architects.



Every painter puts his finger on it when he makes a choice of white lead for durability, whiteness, a guarantee to last and a nice easy lead to work. Every dealer wants it because it's a money getter in an easy way. Our handsome booklets assist the sale, because they prove the superiority of Ramsays Exterior Lead. Architects demand it because they know it's better than pure lead or any other. Buy Ramsays Exterior for money-making, and never mind the substitutes—there are lots of them—Ramsays Exterior costs less than pure and can be sold for more.

A. I. Fuller, coal and lumber dealer, Carievale, Man., has had his coal shed burned; no insurance.

Robertson & Given, grocers and hardware merchants, Moncton, N.B., have had their stock damaged by fire; insured.

DEATHS.

Benjamin Leith, harnessmaker, Pilot Mound, Man., is dead.

CATALOGUE OF ELECTRIC HEATING DEVICES.

"Modern Heat, Electricity," is a neat catalogue of electric heating devices just issued by Keith & Fitzsimons, King street west, Toronto. In the preface some straightforward reasonable claims are made to patrons and manufacturers. Every article is handsomely illustrated and briefly described; the price accompanies. An index serves to guide us in this well-arranged booklet which is highly creditable to the firm.

TO PICKLE BRASS CASTINGS.

The following method of pickling brass castings is recommended by an exchange: If greasy, the castings should be cleaned by boiling in lye or potash. The first pickle is composed of nitric acid, 1 quart; water, 6 to 8 quarts. After pickling in this mixture the castings should be washed in clear warm or hot water, and the following pickle be then used: Sulphuric acid, 1 quart; nitric acid, 2 quarts; muriatic acid, a few drops. The first pickle will remove the discolorations due to iron, if present. The muriatic acid of the second pickle will darken the color of the castings to an extent depending on the amount used.

CHANGE IN A SIMCOE FIRM.

The firm of Palmerton & Madden, dealers in tinware, stoves and plumbing, has disappeared from the list of Simcoe's mercantile establishments. Upon Mr. Palmerton's demise the surviving partner became, under the terms of partnership, the sole owner of the business at a stipulated price. Mr. Madden has now disposed of Mr. Palmerton's interest to his brother, William B. Madden, of Joliet, Ill., and in future the style of the firm is to be Madden Bros. Both brothers are thorough mechanics. John H. Madden will continue to have charge of all outside work in the heating, plumbing and roofing lines. The store and workshop will be under the charge of Wm. B. Madden.

GET OUT OR GET IN LINE.

IF the concern where you are employed is all wrong, and the Old Man a curmudgeon, it may be well for you to go to the Old Man and confidentially, quietly and kindly tell him that he is a curmudgeon. Explain to him that his policy is absurd and preposterous. Then show him how to reform his ways, and you might offer to take charge of the concern and cleanse it of its secret faults.

Do this, or if for any reason you should prefer not, then take your choice of these: Get out or get in line. You have got to do one or the other—now make your choice.

If you work for a man, in heaven's name, work for him!

If he pays you wages that supply you with bread and butter, work for him—speak well of him, think well of him, stand by him and stand by the institution he represents.

I think if I worked for a man I would work for him. I would not work for him a part of the time and the rest of the time work against him. I would give an undivided service or none.

If put to the pinch, an ounce of loyalty is worth a pound of cleverness.

You cannot help the Old Man so long as you are explaning in undertone and whisper, by gesture and suggestion, by thought and mental attitude, that he is a curmudgeon and his system dead wrong. You are not necessarily menacing him by stirring up discontent and warming envy into strife, but you are doing this: You are getting yourself upon a well greased chute that will give you a quick ride down and out.—Extract from Elbert Hubbard's "Get out or Get in Line."

SOMETHING NEW FOR HARDWARE MEN.

A knife-cleaning machine that will really clean the rustiest knives at the rate of 500 an hour, without doing them the slightest damage or requiring very much exertion on the part of the operator, should be an article that hardware merchants could handle in quantities, particularly if the price be within reach of all customers. All this can be truthfully said of the knife-cleaning machine made by The World's Manufacturing Co., London, Eng. One is astonished at the low price of this machine, $4.50, after an inspection of it and witnessing the ease and thoroughness with which it does its work, in addition to its strong make and handsome finish. For hotels, restaurants, etc., it should be invaluable, and in the home where the work of cleaning the knives is most tedious and disagreeable the machine is sure to receive a good welcome. It has already met with great success in England. The Canadian agents are Decatur, Bull & Co., Montreal.

SALE OF MONTEAGLE'S CARGO.

MUCH interest was shown in the sale of the damaged metals on board the steamer Monteagle, which took place at the Montreal docks on Monday afternoon, August 4. A great deal of the cargo, including galvanized iron, Canada plates, black sheets, etc., was disposed of by auctioneer Kearns, but there is still a quantity left which will be sold at the end of the week.

The attendance was large, and all seemed willing to bid. The buyers included both Montreal dealers and a number from Ontario. Among the latter were Mr. A. E. Kemp, M.P., and Mr. Skerrow, manager of The Kemp Manufacturing Co., Toronto; Mr. Pope, of The McClary Manufacturing Co., London ; Mr. Thorn, of The Metallic Roofing Co., Toronto, and Mr. Pedler, of The Pedler Roofing Co. Oshawa. Others were, Mr. Henderson, of Henderson & Potts, paint manufacturers, Halifax; Mr. Thos. Davidson, of The Thos. Davidson Manufacturing Co., and several hardware retailers, plumbers and tinsmiths of Montreal. St. Hyacinthe and other towns in the vicinity of Montreal were also represented.

Fair prices were obtained, as a rule, for the damaged metals. Of course, the prices ranged, in many cases, from very low to comparatively high figures, according to the amount sold, the smaller lots bringing fairly good prices. Canada plates sold from about 85c. to $1.50 per box. Galvanized Canada plates brought on an average of $1.70 per box, and from about 16 to 29c. per case was paid for galvanized iron.

A CHANCE FOR SOMEONE.

A good live man will find an opportunity seldom thrown in his way advertised in another column in this issue of HARDWARE AND METAL. A shovel factory is advertised to lease, and those who know that the output of shovels is restricted in Canada, and that there are only three factories in the country, will see at once the advantage to be derived from this investment. Private reasons are given for the former manager's retirement.

ALL CANADA AT TORONTO.

There will not be a Province or a piece of territory in the Dominion that will not be represented at the exhibition to be held in Toronto this year from Monday, September 1, to Saturday, September 13, and is to be opened by the Earl of Dundonald. To mark their appreciation of this evidence of the country's confidence, the executive have increased the prize list until now it is proudly boasted that, with specials, upwards of $37,000 will be distributed in prizes among the exhibitors, sixth-sevenths of which will find its way to the agricultural community. Besides this $35,000 is to be spent in special attractions and music. The new dairy building and the new art gallery, which will greatly increase the value of the exhibition as a factor in the education and elevation of the people, will be completed. In the dairy building not only will there be exhibits of dairy products, utensils, and so on, but lectures and demonstrations will be given twice daily in a hall provided with seating accommodation for 600 people. Reduced rates will, of course, be available on all lines of travel.

WILL ATTEND THE CONVENTION.

Mr. E. H. Cooper, Montreal secretary of the Canadian Manufacturers' Association, is daily receiving new names of those who will attend the Association's convention at Halifax next week.

Among those who have already arranged with him for railway and hotel accommodation are : Messrs. Robert Munro, Canada Paint Co.; Geo. E. Drummond and T. J. Drummond, of Drummond, McCall & Co.; Edward Macdougall, Caledonian Iron Works ; E. Goodwill, of The Thos. Davidson Manufacturing Co.; Wm. MacMaster, of the Montreal Rolling Mills ; Wm. Smaill, of The Canada Horse Nail Co.; D. W. McLaren and J. C. McLaren, of J. C. McLaren Belting Co.; J. J. McGill and Ald. G. W. Sadler, of Sadler & Haworth ; James Fyfe, G. R. Prowse, Jos. Fortier, J. M. Fortier, W. W. Watson, Joseph Allan, R. W. Douglas, George Esplin and W. A Desbarats.

Others from Montreal are going, and altogether there are expected to be between 35 and 40 from that city.

SECURES VALUABLE ORE BEDS.

Three years ago August 5 the first sod was turned in the construction of the plant of the Dominion Iron and Steel Co., and now the plant, as originally proposed, is completed and enjoying a substantial revenue. An official of the Steel Company stated that the ore deposits on the Orinoco River, in Venezuela, for which a company has been formed by F. S. Pearson, a director of the Steel Company, would prove of inestimable value to this company, as the ore referred to was said to be the finest in the world, and this company would receive it at a cost substantially $1 per ton less than it would be sold to other companies. Nearly 300,000 tons will be shipped from Venezuela to Sydney yearly, and a regular fleet of steamers will be employed in carrying it.

The P. R. Cumming Manufacturing Co., Limited, TORONTO

We beg to advise the trade that we have purchased a large factory in Clarksburg, where we are installing a complete outfit of new automatic machinery for the manufacture of all kinds of **Enamelled Wood Turnings;** and that we have also acquired the business of **The Dominion Skewer Co.,** so that we now possess facilities unequalled in Canada for the production of curtain poles, rings, broom handles, enamelled knobs and handles, skewers, flagstaffs, etc., in addition to our present lines of kitchen specialties, such as can openers, mincing knives, mouse traps, etc.

Yours truly,

The P. R. Cumming Manufacturing Co.,

LIMITED,

90 Richmond Street East, TORONTO.

FEATURES OF TRADE UNIONS IN GERMANY.

IN GERMANY not only the independent workers have banded themselves together for the promotion of general as well as special industrial interests, but the movement has spread and now includes unions of officials, commercial unions and associations of workmen of every description. The cartel, or union of masters has been formed chiefly for the promotion of industrial objects; we have, as well, associated enterprises of unions, groups, and classes, and, finally, the co-operative societies of the working classes.

Up to the present time Germany has 145 chambers of commerce and trade and 10 of agriculture. Around these are grouped the people's industrial council, the German agricultural council, and the land-economy colleges. The home railways' council represent the interests of traffic. Councils of doctors and lawyers regulate the learned professions. There are, besides, various independent associations to protect the interests of manufactures, trade and traffic, and other unions to represent special classes and callings, namely, the union of German smelters, the great associations of architects and engineers, the German fishery union, the inland shipping union, the householders' and tenants' unions—all of which have been established throughout the land for all the more important occupations and branches of industry.

Co-operative societies—German co-operative societies and associations can look back upon half a century of successful activity. At present the self-aided trades and industrial co-operative societies number altogether upward of 17,000 local societies, af which 9,000 are agricultural, and include more than1,000,000 peasants. Fourteen thousand co-operative societies are comprised in 29 unions. In 1898, the 1,371 associations connected with the Charlottenburg union had 941,000 members. Their share capital amounted to $31,713,500, while the reserve fund was equal to one-third of the capital. The associations lent their members $481,236 worth of raw materials, necessaries of life, dwellings, etc., during 1898.

SPHERE OF ACTIVITY.

A general view of the activity of the entire number of 17,000 German associations will show that on March 31, 1899, they were classified in the following manner: 10,800 credit co-operative societies, people's and industrial banks, societies for advancing loans, savings and credit bank associations were carrying on business with the aid of 40 central banks. Most of the others were employed chiefly in buying and selling; some, also, in producing goods. They were divided into 376 industrial associations (half of these being producers) and 3,900 agricultural associations, the majority of which were occupied in production on their own account, such as dairy work, vine and fruit culture, etc. In round numbers, 1,200 were for the purchase of raw materials, about 100 were occupied in the sale of goods, and nearly 500 were work associations. Of other associations, the most important are the 1,375 co-operative supply associations and the importance of the steadily increasing building and dwelling societies (about 250) must not be underrated.

INDUSTRIAL UNIONS.

In 1898 there were 59 industrial unions in Germany with 500,000 members. Each organization was in turn connected with 16,000 other local organizations. The budget of this immense union amounted to $2,500,000, and $1,000,000 fell to the expenditures. This latter sum was paid out for relief of the needy, funds for strikers, and for the press. The largest list of members belonging to industrial unions is among the metal workers (75,000), the wood workers (60,000), the textile workers (27,000), and the miners (28,000). The most perfect of these work unions, is that of the book printers, consisting of 24,000 members.

TRADE UNIONS.

The second group, the so-called Hirch-Duncker trade unions, includes at the present day 86,500 members in 1,700 local unions. Of these, 34,000 belong to unions of engineers and metal workers, and 16,500 to those of handicraftmen and workers in manufactories. The entire property of the trades' unions amounted, at the end of 1898 to $700,000. Since their foundation and up to 1895, they had distributed nearly $5,000,000 for sickness and burial money, in relief for the disabled and needy, for legal protection, and for educational purposes.

JOURNEYMEN'S SALARIES.

Toward the end of the nineties there were 140 journeymen's societies with half a million members. Their funds amounted to nearly $20,000,000, and they had given away $8,000,000 for charitable purposes.

SHOPKEEPERS.

Social and educational interests play an important part in the associations of officials and mercantile people. The largest of the latter is the German mercantile association, with 127,000 members, of whom 25,000 are employes. The chief object of this, together with three other large associations with a total membership of 67,000 is, besides the social side, to procure information as to situations, to distribute relief, and to provide funds for technical and other instruction. In addition, there are four large associations of shopkeepers' assistants.

UNION OF THE EMPLOYERS OF LABOR.

For the protection of special interests as opposed to the workmen, there are unions for the employers of labor. In the foremost rank is the Hamburg league with 17 large associations, which comprises the most varied industries and extends to a number of places. Three are for mining and smelting concerns, 11 for metal manufacturers, 4 for brewers, 4 for the textile trades, 9 local and 1 central league for the building trade, 2 for the hat trade, and 1 for the manufacture of tapestry, besides 3 leagues of masters in the manufacture of wood.

OTHER LEAGUES.

Kindred leagues, representing especially the industrial side of professional interests also exist in the liberal and learned professions, as, for example, the various German authors' societies, associations of journalists, musical societies, the German stage union, the artists' society, banks for the relief of teachers, and societies for female teachers. These not only watch over the interests of the different classes, but also promote charitable objects and offer their collective services for the organization of exhibitions and performances.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the commercial circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

OPEN TERMS ON WHITE LEAD.

A FIXED price for ground white lead no longer prevails, the Association having decided on Friday, August 8, to allow open prices ; and it is expected that the present arrangements will hold good until the end of the year, if not longer. Some members of the Association expressed dissatisfaction with the existing conditions, and their desire that the Association should no longer control the price was acceeded to, as it was the general feeling that a more favorable opportunity could hardly be obtained to create open terms than the present.

The demand for ground white lead is unusually heavy. Rarely, indeed, has the business in this staple article been as brisk as it is to-day. Manufacturers are receiving heavy orders from all parts of Canada ; and notwithstanding the good turnover in liquid paints, it is difficult for grinders to keep abreast of the movement in white lead in oil, which seems to be still the favorite form of buying paints.

A variety of prices may be expected. Probably in no two factories are conditions and circumstances identical, and the selling figures will be decided upon accordingly. Some makers have so far held to the former price ; some have not established any price, while others have already given new quotations. The quotations given below are only approximately correct, but they at least serve to show how far below the former prices one of the largest manufacturers has quoted ; and they will probably make a fair average between the old prices, which one grinder has determined to stick to, and the figures which may be quoted by smaller dealers later on. This factory quotes as follows f.o.b. Montreal : Best brands, Government standard, $5.25 ; No. 1, $4.87½ ; No. 2, $4.50 ; No. 3, $4.12½, No. 4, $3 75. The terms offered are four months, or 3 per cent. off for cash in 30 days. The above prices are 62½c. below the old Association figures.

In Toronto prices of white lead appear to be more demoralized than in Montreal. Stocks there also are very light, and some leading manufacturers have been unable to fill all their orders for some time. The range of quotations made by two leading Toronto houses follow : Pure, white leads in oil, Government standard, $4.90 to $5 ; No. 1, $4.52½ to $4.62½ ; No. 2, $4.15 to $4.25 ; No. 3, $3.77½ to $3.87½, and No. 4, $3.40 to $3.50, f.o.b. Toronto. Terms, 4 months, or 3 per cent. off for cash in 30 days.

AN EXHIBIT REFUSED.

WITH no little surprise has the announcement been received from the secretary of the Wisconsin State Exhibition that there is no room left for the projected Canadian exhibit. This is doubtless a mild way of stating that the Wisconsin State Exhibition does not want a Canadian display. If such is the case the reason is not far to seek, and it is not much to be wondered at that the step has been taken.

The exodus of settlers from the Northwestern States of the Union across the border has now been going on for some time, and there is every prospect that it will increase. This loss of population, and of a very valuable population at that, cannot but be viewed with anxiety by the Governments of the several States concerned, as well as by the country as a whole. It cannot, therefore, be wondered at that those in authority are going to do all in their power to stem the tide of emigration. To prevent the display of the choicest Canadian products, which would tend to attract people to this country, is a very obvious way of assisting in this movement, but whether it is a wise policy is doubtful. The people of the United States will have to realize that their country has about reached its limit of natural development, while, at the same time, Canada still offers vast areas for speculation and exploitation. A movement of population from the former to the latter becomes accordingly inevitable, and to try to stop it by such means as refusing to exhibit its products is alike fruitless and foolish.

FEATURES OF THE PIG IRON SITUATION.

THE pig iron trade continues in a healthy condition. In both Canada and the United States the demand continues to exceed the supply. And in both countries a brisk business is being done for next year's delivery.

All the furnaces in Canada have large orders on hand for 1903 account and some of them are sold up to their full capacity. Quite a little business is now being done for the second half of 1903.

It is worthy of note that foundry iron is cheaper in Canada than it is in the United States, the ruling quotation for No. 2 foundry at the furnaces here being $20.50 to $21.00, while in Buffalo the quotable figure for the same grade is $25.25 f.o.b. In Chicago No. 2 foundry is quoted at $26. At the latter point some of the foundries who bought over-freely are disposing of their surplus stock at a good profit. The fact, however, that they are selling has created a suspicion of weakness, but it is significant that the iron thus being offered is quickly picked up. As a despatch this week says: "Chicago is greedy for spot iron."

The production of pig iron in the United States is steadily increasing. Mr. Swank's report shows that the total production of pig iron in the United States for the first six months of 1902 was 8,808,574 gross tons of 2,240 lb., which is much the largest output of pig iron ever made in that country in any six months' period. The remarkable feature of Mr. Swank's report is that it shows on June 30 the total stocks of unsold pig iron in the whole country were only 30,861 gross tons, which is equal to about one-half a day's output of the entire country. Of this output of 8,808,574 gross tons, 7,882,732 tons were coal and coke pig iron, and Pennsylvania has the proud distinction of making 3,434,346 gross tons, or about 40 per cent. of the entire output of the country. Ohio comes next with an output of 1,771,132 tons, or about half the output of Pennsylvania. Of the nearly 3,500,000 tons of pig iron made in Pennsylvania in the first six months of this year, the Pittsburg district turned out 2,092,842 tons, or about 25 per cent. of the entire output of the country.

When it is considered that the United States at the present time is making far more pig iron than ever before in her history, and much more than England and Germany combined, and yet has a stock of pig iron on hand equal to about one-half day's supply, it is truly a remarkable condition, and reflects strongly the wonderful prosperity that has existed in the iron trade since the beginning of 1899, and that promises to last not only for the balance of this year but all through next year as well. Another extraordinary feature in connection with the pig iron situation, pointed out by a New York paper, is that present prices are more than twice as high as they have been at different periods when the iron trade was in a depressed condition. To illustrate this point, it can be stated that thousands of tons of Bessemer pig iron were sold as late as 1897 at $9.25 a ton at Valley furnace. The present price of Bessemer iron at the Valley furnaces for shipment this year is about $21.50, at maker's furnace, or nearly two and one-half times as high as it was in 1897. Still another remarkable feature of the situation is that, in spite of the present high prices of pig iron, consumers are buying heavily, not only for this year's delivery but for shipments running all through 1903.

BUSINESS MEN IN THE BRITISH CABINET.

INTEREST in the Coronation has so overclouded all other events during the past week that little attention has been paid to the announcement of the readjustment of the British Cabinet, made public on the same day as the Coronation ceremony took place.

To Canadian business men there is probably little of moment in the changes gazetted. Perhaps to some the introduction of several younger men into the Government and the reduction in the average age of the Ministry will be viewed with much approval and will bear most weight. But many others will see a deeper significance in the appointment of Sir Michael Hicks Beach's successor. While the Prime Minister and Mr. Chamberlain dominate the Cabinet, yet neither are in actual touch with the Treasury, nor can they afford to tamper much with the management of that Department. Hence, the Chancellor of the Exchequer is, in deed as well as in word, the guide of the financial destinies of the country, and to him financiers all around look for indications of what is to be the state of the money market.

Sir Michael Hicks-Beach was a man of much prominence in the office he held. His tenure of that office will be momentous because he produced the biggest budgets Britain ever saw. Half a dozen years ago the £100,000,000 Budget was a new thing. In 1901-1902 there was a £200,000,000 Budget. Though he has added £92,000,000 to consuls and has increased the floating debt by £75,000,000 more, yet, on the whole, he has refused to saddle posterity with a great deal of the expense of the Boer War which he might very well have done.

As his successor comes Mr. Charles Thomson Ritchie, a Scotchman, with a lengthy business training and much experience of government. As president of the Local Government Board from 1886 to 1892 he showed himself to be an administrator not devoid of courage and capable of plodding industry. So worthy an administrator did he demonstrate himself to be that on Lord Salisbury's resumption of power in 1895 he was appointed President of the Board of Trade. There he had a wider range for the exercise of his individual initiative, and his handling of trade disputes was most commendable. Since the election of 1900 he has been Home Secretary, and now, as many surmised, he has been placed in charge of the Exchequer. That there will be no great change from the preceding management of this Department is evident, while there can be little apprehension that there will be any mismanagement.

Of the young blood infused into the Cabinet, the most notable name is Mr. Austen Chamberlain, son of the Colonial Secretary. This young man, while he can scarcely be accused of acting as a tool in his father's hand, will, nevertheless, second his father's policy and in his management of the Post Office Department there is little doubt that in time many of the reforms desired by the colonies will be brought about.

INDUSTRIAL GOSSIP.

WORK is progressing favorably at the cement mill of Durham, Ont. The big smoke stack 185 ft. high, a single column of riveted steel sections, is now complete, and the first smoke passed through it a few days ago.

A proposition is on foot to put a flour and grist mill in Medicine Hat, N.W.T. W. B. Marshall, butcher, and H. C. Yuill, hotelkeeper, and others of Medicine Hat are interesting themselves.

The Tudhope Carriage Co., Limited, Orillia, Ont., have awarded the contract for one of their proposed new buildings to J. R. Eaton, and work will be commenced at once. The building will be of brick, 60 x 120 ft., five storeys, and will be used for storage and shipping. The contract price is in the neighborhood of $12,000.

Rhodes, Curry & Co., Amherst, have just received the contract for building 50 houses at Sydney Mines for The Nova Scotia Steel Co., also a contract for finishing the interior of A. Hobeeker's house at Halifax at a cost of about $12,000, and Harvey Graham's house at New Glasgow, both of these to be finished in very handsome and high-priced natural woods.

LARGE OUTPUT OF COAL.

The month of July was a record-breaker for The Dominion Coal Co., of Sydney, N S. The following is the output of the various collieries for that month :

	Tons.
Dominion No. 1	61,416
Dominion No. 2	44,678
Dominion No. 3	39,549
Caledonia	62,967
Reserve	77,973
International (Bridgeport)	21,607
Total output	308,190

The output and sales show a most gratifying increase, the output for July being 35,000 tons in excess of that of June, and over 63,000 tons in excess of the output of the month of July, 1901.

It is reported in industrial circles that the company lately formed to take over the iron properties at Londonderry has made an offer to The Nova Scotia Steel Co. for their plant at Trenton. The report that The Dominion Iron and Steel Co. were negotiating for this plant is untrue and was probably circulated as the result of the other offer.

A BONUS FOR SHIPBUILDING.

A meeting of the ratepayers of Sydney, C. B., was held a few days ago to vote upon the question of making extraordinary expenditure of a sum not exceeding $250,000 to be granted to a shipbuilding industry to be located within the limits of the town of Sydney.

The resolution to vote the money was unanimously carried.

On motion it was decided to appoint a committee of nine to act in conjunction with the town council or a committee appointed for that purpose by the town council in accordance with the resolution.

The following were appointed as such committee: R. Gillis, Isaac Greenwell, Colin McKinnon, J. A. Gillies, Capt. Nelson Townsend, D. A. Hearn, W. H. Morley, J. E Burchell and Capt. John Carlin.

A PROGRESSIVE HARDWAREMAN.

A. W. Humphries, the well-known retail hardwareman of Parkhill, Ont., was in Toronto this week. He reported business good, but said that he feared damage had been done the crops in his part of the country by the wet weather. Mr. Humphries, who does a large business in hardware, tinware and stoves, is one of the most enterprising hardwaremen in the country, and in the course of a few minutes' chat one gathers many ideas from him. He has been a subscriber to HARDWARE AND METAL from its inception, and his clerks and himself regularly peruse its contents.

PERSONAL MENTION.

Mr. S. J. Frame, of Jenkins & Hardy, Toronto, has returned from an outing in Muskoka.

Mr. Richard Lock, of The Rathbun Co., cements, etc., Toronto, is spending his holidays in Muskoka.

Mr. W. G. Harris, of the Canada Metal Co., Toronto, is spending a few weeks at Atlantic City, N. J.

On August 6, Mr. Lincoln Goldie, son of Mr. Jas. Goldie, of The James Goldie Co., Limited, Guelph, millers, was united in marriage, at Berlin, to Miss Estelle Aileen Bricker, daughter of Mr. Levi Bricker, of Bricker & Diebel, dry goods merchants, Waterloo. Rev. Principal Caven, of Knox College, Toronto, uncle of the groom, officiated.

TO ISSUE NEW STOCK.

The Nova Scotia Steel and Coal Co. has decided to issue $1,910,000 common stock, $1,030,000 of which will be offered at once to the holders of common stock of record on August 20.

In a circular signed by the president, John F. Stairs, the statement is made : The demand for steel and coal exceeds the present capacity of the works, and the company is now suffering on account of its inability to supply this demand. After careful consideration your directors have unanimously concluded that it is imperative that the company should provide for a larger output of both coal and steel, for further enlargements of its plant, opening up another colliery, constructing additional coke ovens and steel-melting furnaces at Sydney Mines, and other improvements both at Sydney Mines and Trenton.

The work will cost about $1,850,000. The following estimate has been made of the future profits of the company after the completion of this work :

Estimated profits	$ 742,000
Additional profits	270,000
Total	$1,012,000
Interest	$ 200,000
Sinking Fund	30,000
Dividends on preferred stock	82,400
Total	$ 311,400

Available for dividends on $5,000,000 common, $700,100.

THE TEMISKAMING RAILWAY.

AT a second meeting of the Temiskaming and North Bay Railway Commission held on Saturday afternoon, August 9, at the office of the chairman of the commission, A. E. Ames, the members present were : A. E. Ames, B. W. Folger, of Kingston ; M. J. O'Brien, of Renfrew, and F. E. Leonard, of London. Edward Gurney was the only absent member of the commission. Reports were received from E. S. Senkler, of North Bay, who has been acting in the capacity of solicitor to the commission, and from Chief Engineer W. B. Russel. A set of by-laws for the guidance of the members of the commission was submitted by the counsel pro-tem. D. E. Thomson, K.C., and adopted. Mr. Folger was authorized to interview the officials of the G.T.R. and C.P.R. in regard to the terminal facilities and the interchange of traffic at North Bay, and submit a report to the commission. A. E. Ames was instructed to accept the offer of George E. Mountain, chief engineer of the Canada Atlantic Railway, to act temporarily in a consultative capacity.

It was decided to call for tenders for the clearance of the right of way, grading and other construction work.

P. E. Ryan was appointed secretary-treasurer of the commission, Mr. Senkler solicitor, and Mr. Russel chief engineer.

Mr. Ryan, who received the appointment of secretary-treasurer, has had considerable railway experience, having been connected for a number of years with the mechanical department of the Canada Atlantic Railway and the general purchasing department of the C.P.R. During the past three years Mr. Ryan has been acting as private secretary to the Hon. F. R. Latchford.

McCLARY'S SUCCESSFUL PICNIC.

ON Saturday last the picnic of The McClary Manufacturing Co., Limited, London, Ont., to Port Stanley was a record-breaker. The outing of the employes of this company has always been a popular affair, but this year, with the excellent weather and the general holiday, the crowds in attendance exceeded all expectations, and eclipsed even the excursions of popular local societies. Large specials ran from London and were fully packed. Some special trains ran also from St. Thomas, so that when the whole crowd assembled on the hill at Port Stanley it made the largest gathering that Fraser Heights has seen this season. The railway authorities estimate that nearly 5,000 were present. Everyone was in good spirits, and in every respect the picnic passed off in the most delightful manner.

The employes had placed the arrangements in the hands of a competent committee, who furnished an entertaining programme. The leading events were a tug-of-war and baseball match. In the latter event a picked team of the employes was pitted against the regular team, which has held top place in the local Wholesale League. The game was most exciting, requiring 11 innings, and was won by the picked team by one run. Col. Gartshore filled the difficult position of umpire. The prize was $25 cash. A tug-of-war, refereed by J. K. H. Pope, was won by men of the stock side of the establishment from a team of the foundry side. Other amusements were a game of rounders between teams of girls from the establishment, and a fishing competition, in which only one of the five contestants succeeded in the half hour allowed in landing a fish and the prize. There was also a baby show, a waltzing contest and a fine programme of sports for men, women, boys and girls, with cash prizes of generous amounts.

LINSEED OIL IMPORTS FROM ENGLAND.

Editor HARDWARE AND METAL, — We wish to draw your attention to an error in your article on linseed oil and turpentine on page 10 of your issue of July 26. The figures given in the latter part of the article comparing imports of linseed oil from Great Britain and United States for the periods ending May 31, 1901 and 1902, are entirely misleading. We have not the actual figures for 1901 before us, but this is not necessary to enable you to correct the error, which has simply occurred by your having overlooked the quantity given in the column under the heading of "Preferential Tariff," which represents imports from Great Britain only; the quantity imported under that clause of the tariff for the 11 months ending May 31 being 528,321 gals. It is only in very exceptional cases that the price of linseed oil in the United States reaches a figure which makes its importation into Canada practicable, and as your article would convey quite the opposite impression we shall be obliged if you will publish the correct figures in your next issue.

Yours truly,

H. W. AIRD.

[Remarks: Mr. Aird is correct. In transcribing the figures from the trade returns the quantity classified under "Preferential Tariff" was overlooked, and we thank him for pointing out the error. The total quantity of linseed oil imported from Great Britain for the 11 months ending May last was 528,321 gals., against 592,571 gals. for the same period in 1901.—The EDITOR.]

P. R. CUMMING MANUFACTURING COMPANY.

A representative of HARDWARE AND METAL called at the office of the P. R. Cumming Mnfg. Co., Limited, 246 St. James street, Montreal, and had a short chat with Mr. W. M. Bowie, Montreal agent for this company. Mr. Bowie reported business to be exceptionally good for all lines manufactured by this company, which include can openers, paring knives, window cleaners, vegetable slicers, mops, mouse traps, potato mashers, stamped steel and wire goods. An inspection of samples was sufficient explanation why their lines are meeting with such general favor from the trade. The P. R. Cumming Co. are sole Canadian agents for the National Sweeper Co., of Marion, Ind., whose products are being successfully pushed in this market.

EXPORT TRADE WITH GERMANY.

Becker & Haag, of Berlin, Germany, correspondent members of the Canadian Manufacturers' Association for Germany, are in a position to bring Canadian manufacturers into touch with the German trade and market. Any firm desirous of opening an export business with Germany will find them at their disposal to give the necessary assistance. In such cases it is necessary to send to the address, Becker & Haag, Berlin S. 42, Ritterstr. 27, the following information:

1. Export price list of articles, and, if possible, catalogues and small samples.
2. Indications concerning packing, net and gross weight and measurements.
3. The freight rate c.i.f. German port. To obtain these have Mr. Otto Thorning, 13 Peter street, Montreal, forward them to Becker & Haag's Berlin office.

With this information, Becker & Haag are enabled to make investigations and make proposals for best introduction.

TRADE CHAT.

AN English company is said to be offering $160,000 for the 26 claims of iron ore on Baker Mountain. It is said that Baker Mountain, or at least its south side, is practically one mass of iron ore, and the fact that the Crow's Nest coal fields are so near by makes the properties of great value. The iron is said to assay 62 per cent. metallic iron, with no sulphur.

The Hamilton Iron and Steel Co. will spend $200,000 on a new plant.

The Temiskaming and Northern Ontario Railway Commissioners have rented an office in rooms 15 and 16 Manning Arcade, 24 King street west, Toronto.

Contracts have been awarded by The Ogilvie Flour Mills Co. for a 250,000 bushel elevator to be erected behind its rolled oats mill on Higgins avenue, Winnipeg.

The International Harvesters' Co. has been incorporated, including the McCormick, Deering and three other companies manufacturing farm implements. The new concern has one plant under erection in Canada.

ROLLING MILLS BURNED.

Fire caused considerable damage to the Guelph Rolling Mills on August 9. There is no insurance, the policies having been cancelled a couple of months ago on account of the high rate and the fact that the firm were removing. The loss as yet cannot be estimated, but it will be considerable. The building belongs to The White Co., of London, Ont.

HIGH-CLASS TAILORS' SHEARS.

The National Cutlery Co.'s tailors' shears in A, B and C shape and bolt, are worked with extraordinary ease, because they are the only tailors' shear made with a steel ride, and laid with a special steel of superior quality and tempered by a patent method. They have no soft spots, no feather edges. They are fully warranted, and put up in seperate pockets, each pair. See the cut. Ask for catalogue. Decatur, Bull & Co., Montreal, are the sole agents.

CAREER OF A BARB-WIRE MAN.

JOHN W. GATES, of New York, has had a "barbed-wire" career. He was was early impressed with the fact that there was more profit in making barbed wire than in selling it, and started a factory with a friend and a capital of less than $8,000. The business was very profitable from the start, and soon he and seven others started a barbed-wire business with an aggregate capital of $20,000, and declared dividends of "about 50 per cent. a week." They did not do quite so well every week; their net profits for their first year were only 750 per cent. At that point Mr. Gates bought out his associates, and started another barbed-wire factory with a capital of $50,000, and the net profits in the first year were 376 per cent.

One of his former associates started an opposition factory, but it only took Mr. Gates 15 minutes to convince him that there was more money for them in combination than in competition. They had a bad year in 1885, "the year 1886 was fairly good." For the four years 1884, 1885, 1886 and 1887 he and his associates divided 500 per cent, 125 per cent. a year for four years, of which one was poor and one only "fairly good."

One of the incidents of these four years was the purchase of 50,000 tons of steel billets in England. The purchase itself was so large as to send the price up between $5 and $10 a ton. One-fifth of the whole quantity was sold to Mr. Carnegie at a profit of $100,000.

During these years Mr. Gates had been encroaching—so they complained— upon the patent monopoly of The Washburn & Moen Company and I. L. Elwood, and he had paid out a million dollars in patent litigation. He persuaded his competitors that they should share the monopoly of the patent laws and organized a company to control all barbed-wire patents, and this company "for many months paid dividends of 100 per cent. a month."

He was unfortunate in one purchase. He bought a barbed-wire concern with a capital of $300,000 and $850,000 of debts. It "was, of course, absolutely bankrupt. But we did not know it." Within 12 months the whole $850,000 of debts was paid off from the profits. With this he combined several other barbed-wire mills, and for about four years "the average net earnings were between 27 and 28 per cent." on a capitalization that has some appearance of being inflated.

Mr. Gates's story shows what a man of the necessary force of character and strength of mind can accomplish. The United States conferred upon Mr. Gates and a few others a monopoly of the barbed-wire business in the United States, and they have certainly not wasted their opportunities.

COMPETITION

in business is so keen now-a-days, it requires unusual efforts to make more than an ordinary success. Dealers all over Canada are making a success with

The Sherwin-Williams Paints and Varnishes

because the goods are advertised and pushed with unusual vigor.

Everything that can be done to keep them in front is done. There is nothing ever neglected that would tend to increase their sale.

Our large advertising department and its best thought and energies are constantly employed thinking and planning new ways to help our agents keep ahead. In consequence, the saying: "Put The Sherwin-Williams Paints and Varnishes on your shelves and you'll bring business to your store," has come to be accepted as an axiom.

If you want to know more about our goods and methods, write to day for our "B 13" booklet. It's free.

SHIPBUILDING IN THE STATES.

"HARDWARE AND METAL" has just received a copy of the introduction of the 1902 Blue Book of American Shipping, a marine directory of the United States, issued by The Marine Review Publishing Company, Cleveland, O. This edition, the seventh annual, deals with statistics of shipping, naval affairs, etc. The introduction is a resume of merchant ship construction during the past year and also of the progress of the shipbuilding industry throughout the United States. It says in part:

"The number of vessels built in the United States during the year ended June 30, 1902 (nearly all for coasting trade, of course, and a very large part of them on the great lakes), was 1,657 of 473,981 gross tons, compared with 1,709 vessels of 489,616 tons for the preceding year. The decline during the year is, in sailing vessels, canal boats and barges. This year the sailing tonnage aggregated 101,072 tons; last year, 128,099 tons. A substantial increase is noted in steel steamers, which aggregate 275,479 tons, as against 235,265 tons for last year. The construction of canal boats and barges declined from 88,331 tons to 57,502 tons.

"The lake shipbuilders close this year about midsummer, as their most active period is the fall and winter. In the year now closing they have built 43 vessels, costing about $10,250,000. They already have for the coming year orders for 28 vessels that are to cost about $7,250,000. This summary does not, of course, take into account any of the small vessels. It refers only to large steel ships. In this whole list of new lake vessels, for the year closing as well as for the year to come, only two are tow barges. The lone steamer is supulanting the steamer and its consort. In fact, several large steel tow barges on the lakes have recently been converted into steamers.

"In the matter of the opening of an all-water service between Chicago and Great Britain, The Northwestern Steamship Company of Chicago placed four steamers on the route. Each of the steamers made one trip and then the enterprise was abandoned. The steamers were taken to the coast and converted into oil-tank vessels. During the year two vessels were completed at lake shipyards for transatlantic service. They are the Minnetonka and Minnewaska of 7,000 tons carrying capacity each. As they were too large for the Canadian canals they were constructed into two sections each, towed through the canals and then joined. This feat was successfully accomplished, but it is not probable that any more vessels will be built in this way for some time to come, as the builders were certainly without profit on their order, and the ships upon completion found very unsatisfactory freights in the competitive trade of the Atlantic. No new naval contracts were placed during the year. Contracts for one battleship, two armoured cruisers and two gunboats, authorized in the last Naval Act, will be placed shortly. In addition, one battleship will be built in the New York navy yard. Independent of these there are 51 warships under construction for the United States navy with a total displacement of 264,987 tons, a total horsepower of 523,420, and costing for hulls and machinery, $74,731,666."

CATALOGUES, BOOKLETS, ETC.

CATALOGUES WANTED.

EARLY on the morning of Friday, August 8, the greater portion of the interior of the office of P. & F. Corbin, New Britain, Conn., was destroyed by fire. The purchasing and sales department offices suffered the heaviest losses, many papers relating to orders being consumed, together with the entire collection of catalogues of the purchasing department of the American Hardware Corporation. Manufacturers are requested to send copies of their catalogues to the purchasing agent, A. N. Abbe, to replace those lost.

PAINT JOURNAL.

Good Paint, published by John Lucas & Co., Philadelphia, New York and Chicago, is a neat little paint journal. With an exceedingly clever cover, and many helpful suggestions and ideas, it serves as an educator for the paint trade and as an advertisement for Lucas paint.

CARPET SWEEPER CATALOGUE.

The salesman's catalogue of National roller-bearing carpet sweepers, advertising The National Sweeper Co., of Marion, Indiana, U.S.A., is perhaps the handsomest and neatest article of this class that has reached us for some time. Beautiful half-tones, in colors, accompany, admirably showing forth the beauty of the carpet sweepers. Tastefully arranged and excellently worded are the claims put forward for these household articles.

GET ONE OF THESE.

The Canada Hardware Co. are giving display boards with every six or nine dozen padlocks bought. The boards, which are handsomely finished, hold either six or nine dozen locks, and display them in a most attractive manner. They can be stood on a counter, in the window or on the floor.

NEW PAINTS ON THE MARKET.

A carload of "Jewel" paints, manufactured by The Wadsworth, Howland Co., Chicago, has just been received by their Eastern Canadian agents, The Canada Hardware Co. They include domestic paints, roof and barn paints, buggy and wagon paints, "Enamelit," varnish stains, floor and furniture polish and wall finish. The Wadsworth, Howland Co. are the only paint manufacturers who make wall paper cleaner, which is now to be had only from their Canadian agents. Mr. Brown, of the Chicago firm, has been in Canada introducing his company's goods to the trade, and reports greater success than he expected. The paints made by the above firm are all of the highest class, no common paints being handled.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

BRITISH MACHINERY IN CANADA.

A DEPUTATION of representative mechanical engineers and others connected with the paper-making and wood-pulp trades was recived on July 31 by Lord Strathcona at the office of the High Commissioner for Canada. The object of the deputation, as appeared from a memorial presented to Lord Strathcona, was to induce him to use his influence through the Canadian Minister of Commerce to break down a prejudice among Canadians—fostered by Americans on the spot—against British-made machinery. His Lordship was also asked to exert his influence to bring a deputation of representative pulp and paper makers from Canada to Great Britain, so that an effort might be made to demonstrate to them the superior advantages of British-made machinery.

Among those who addressed the High Commissioner in support of the memorial were: George Bentley, chairman of directors, and James Nuttall, managing-director, of Bentley & Jackson, Bury, Lancashire; D. Harris, chairman of directors, of Bertram, Limited, Edinburgh; James Bertram, of James Bertram & Sons, Limited; Thomas T. M. Lumsden, of James Milling & Sons; H. J. Rogers, of Watford Engineering Works, and S. J. Phillips, proprietor of The Paper-Maker and Wood-Pulp Maker, who introduced the deputation.

The speakers admitted that the distance between Canada and Great Britain was a factor in favor of the United States, and asked that for three years this special class of machinery should be admitted duty free. In this period they were convinced the British trade could be established. In reply, Lord Strathcona requested that a resume of the speeches be embodied in an extended memorial, and he promised to do all he possibly could to further the desires of the British manufacturers.

NEW ELECTRIC CAR.

A new electric car has been undergoing severe tests in England, the results of which have been highly satisfactory, as the vehicle has succeeded in covering 100 miles without recharging. The car itself is made by Krieger, of Paris, but the electrical fittings are supplied by a London firm. The electrical installation consists of two compound motors, which drive the front wheels independently. The battery comprises 44 Leitner cells, of 300 ampere hours capacity, and is capacle of running the car 100 miles without recharging at a speed of 40 miles per hour on a level road. When travelling down hill the motors are reversed and become generators and recharge the battery. Another interesting feature of this arrangement is that by converting the motors into generators an excellent braking effect is produced, and in the majority of instances is sufficient to hold the vehicle in check, without necessitating the application of the mechanical brakes.

MACHINERY NOTES.

Specifications, plans and an entire sawmill, complete in every detail, were shipped to Sault Ste. Marie, for Rueben Shapley, by H. W. Petrie, Toronto.

A 21 in. Little Giant water wheel, with all shafting and connections, also a saw and shingle mill, are being shipped to Norval O. Brown, New Liskeard, New Ontario, by H. W. Petrie, 141-145 Front street west, Toronto.

The Gasoline Engine Co., of Toronto Junction, Limited, have sold a 7 h. p. marine engine to Mr. Ditchburn, of Gravenhurst; a 5 h.p. marine engine to Mr. Beadle, of Delta, and a 4½ h.p. gasoline engine to Mr. Blue, of Sudbury.

THE GREAT STEPHENSON.

George Stephenson, the noted English inventor, was the son of a colliery engine keeper, and grandson of a Roxburgshire shepherd, and was born at Wylam, near Newcastle, June 9 1781. From herding cows and hoeing turnips he rose to be a fireman in a colliery, meanwhile devoting his spare time to acquiring an education. He invented, contemporaneously with Davy, a colliery safety-lamp, the "Geordie," for which he received a public testimonial of £1,000. In 1812 he became engine-wright at Killingworth Colliery, and here two years later he constructed his first locomotive. "My Lord," with a speed of six miles an hour for the colliery tramroads. His invention the next year of the steam-blast made it an ultimate success. In October, 1830, the memorable competition of engines took place, resulting in the triumph of Stephenson's "Rocket," running 30 miles an hour. From 1834-37 he was engineer on the North Midland, York & North Midland, Manchester & Leeds, Birmingham & Derby, and Sheffield & Rotherham railways. In 1845 Stephenson visited Belgium and Spain, but later years he spent in the quiet pursuis of a country gentleman, dying at his country seat of Tapton, near Chesterfield, August 12, 1848.

ELECTRICAL NOTES.

A BIG contract has been secured by The Gee Electrical Co., of Colborne street, Toronto, from the Dominion Government. They will install storage batteries, dynamos and motors at the Burlington Bridge, Hamilton.

Scott's sawmill at Springhill, N.S., has been equipped with an electric light plant.

Jones & Moore, 22 Adelaide street west, Toronto, this week sold a 10 h.p. motor to Zock & Co., Toronto.

Jones & Moore, 22 Adelaide street west, Toronto, during the week have installed a complete electric light plant an the dredge Frank, Owen Sound.

The Smith's Falls Electrical Power Co. have reduced the contract price of the town street lights of Smith's Falls by $100 for the first six months of the year. The lights, when first installed, did not give perfect satisfaction.

The Kay Electrical and Motor Co., Limited, 221 Queen street east, Toronto, have installed a machine for the W. R. Johnston Co., wholesale clothiers; also, two 8 h.p. and one 3 h.p. motors for Gowans, Kent & Co. They have supplied George Nolan, of Tottenham, with one large generator and motor for transmission of power from mill to elevator; they have also sold an electrotyping dynamo to the Central Press, and have closed a number of other contracts.

WINDMILLS FOR AFRICA

Canadian windmills are now being shipped to South Africa. The Ontario Wind Engine and Pump Co., Limited, of Atlantic avenue, Toronto, have just shipped a carload to that place, thus doing much to justify the claim of their trade mark, "The sun never sets on the Canadian Air Motor."

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

BOLT HEADING, UPSETTING AND FORGING MACHINE.

THE 4-inch. upsetting and forging machine built by a machinery company of Cleveland, Ohio, has been designed to meet the requirements of locomotive and car builders, and other users of heavy forgings. The bed of the machine, as explained by Iron Age, is a single steel casting weighing 18½ tons. The shaft is a fluid compressed steel forging. The grip slide, toggle head and moving die block are steel castings, while the toggle links are heavy tool steel forgings hardened. These links are four in number, so that the dye block moves to its place in closing with a perfectly straight and even motion, no matter whether the dies are at either extremity of the die block or not. This is of great importance in forging close to size, because so wide a die block as is here used—about 2 ft.—if moved with a single pair of clinks would, when the dies were at one end of the block, be very apt to close them unevenly.

The mechanism that closes the dies is designed to give the very largest measure possible of what is known as "time"—that is, the time the dies remain closed with reference to the advance of the upsetting plunger. This means that the dies close so quickly that, after having been firmly closed, the plunger has as long a distance to travel as it is possible to get; and, as the upsetting begins after the dies have been closed, it is desirable to have the plunger travel far and still have the piece being upset carry straight. This form of cam was selected, as it gives the largest measure of time.

The machine is capable of exerting a die pressure of 65 tons before the automatic relief becomes operative. This relief is of new and novel construction. The cam is mounted between the rollers, the connection with the ram being made through the toggle lever. The spring is so mounted as to exert a pull upon an extension of one arm of the lever. The relative proportion of the parts is such that a strain of 10,000 lb. on the spring is sufficient to resist a pressure through the dies of 65 tons. Any pressure in excess of this causes the spring to yield when the machine is instantly relieved. Throughout the machine the factor of safety is 15.

CANADIAN LAKE VESSELS.

It has already been announced that the St. Lawrence & Chicago Steam Navigation Co., J. H. G. Hagerty, manager, has contracted with the Collingwood Ship Building Co. for a steel steamer of the 5,000-ton kind and that a similar vessel will be built by the same company for James Playfair, of Midland. Now it is understood, says The Marine Review, that Messrs. R. O. & A. B. Mackay, of Hamilton, and their associates practically completed arrangements on a recent trip to England for four new steel steamers. Two of the vessels will be of package freight kind for service between Quebec and Toronto. The other two will be large coarse freighters of about 5,000 tons capacity each for the Michipicoten ore trade. It is planned to have the two large steamers reduced in length when first put together so that they may pass up the Canadian canals. They will carry as cargo across the Atlantic their own middle sections. After arrival on the upper lakes they will be taken apart and the middle sections worked into them. It is claimed that the low cost of building the vessels, as well as favorable terms as to payments, will admit of going to this trouble in having them built on the other side.

The Messrs. Mackay are also negotiating for the purchase of the fast turbine passenger steamer King Edward, recently built on the Clyde. Their intention is to run her between Hamilton and Toronto, making three trips a day. The King Edward would be a novelty on this route. She is a very fast vessel and would cover the route three times a day without difficulty.

Owners of the large freight and passenger steamer Huronic, recently built by the Collingwood Ship Building Co., are figuring on another steamer of the same kind. They may let a contract in time to admit of construction of the vessel during the coming winter.

ENGLISH VS. UNITED STATES LOCOMOTIVES.

Charles Rous-Marten recently read a paper before the English Society of Engineers, in which he stated that a large proportion of English locomotives are 20 years old, and that some are even 30 and 40 years old. British locomotives only 20 years old, he remarked, were regarded as comparatively modern. While the longevity of these engines certainly spoke well for the material of which they were built, it could not be denied that they were out of date and unfit for modern railway purposes. The loads of the older engines were limited to five-sixths of that hauled by modern machines; in other words, six engines with six separate trains were required to perform the work of five improved machines on roads already congested. Furthermore, the cost of labor and working expenses was increased. In comparing English with American practice, Mr. Rous-Marten stated that engines made in the United States were not expected or even desired to last more than 10 or 15 years at the most, and that they were then displaced by new engines fitted with modern improvements and possessing a large margin of power. Although he deemed the extreme longevity of English locomotives distinctly undesirable, he also questioned the wisdom of using inferior material and workmanship which is often characteristic of the American locomotive.

INTRODUCING STEEL LAUNCHES.

THE Gasoline Engine Co., of Toronto Junction, Limited, have, in connection with their large trade in gasoline launches, made the venture of introducing to the Canadian trade the steel launch. In this connection they have just received a shipment of two carloads of steel hulls from The Michigan Steel Boat Co., of Detroit, Mich., who are doing an extensive trade in this line, as the steel hull for launches is no longer an experiment on the United States side.

These hulls are made of galvanized steel which will not rust, and they are further strengthened with a wood lining which gives them the advantage over the ordinary wooden hull of not only being much lighter, but also far more durable, giving no opportunity for leaks or breaks, which give so much trouble and annoyance in an ordinary boat. They are all fitted with airtight compartments, fore and aft, which guarantees them against sinking under any circumstances. The decks and cockpits are all finished in polished oak, and the general construction and design of the boat is such as to merit the approval of all. They have these hulls in 16-ft., 19-ft. and 22-ft. lengths, and can furnish them complete on short notice with their latest improved marine engine.

They have also ready for shipment several different designs and models of wooden hulls complete with engine. Their marine engine is gaining a reputation for simplicity of operation and general reliability.

The Gasoline Engine Co., of Toronto Junction, Limited, are making extensive preparations for next season's trade, and have leased the large premises adjoining the Toronto Canoe Club, where they are opening a large launch works.

LONG DISTANCE.

The Canada Paint Co. are now doing considerable business by telephone, the long-distance telephone system having been introduced throughout the building. Each desk in the office is equipped with one, and communication is easily had with any part of the factory, or with Toronto, and any other place where those who handle their paints happen to be. It is a great convenience, and the staff are naturally much pleased with the new order of things.

CHATS ON WEST-INDIAN TRADE MATTERS.

MR. HARNETT, OF BERMUDA.

MR. L. B. HARNETT, of the firm of W. T. James & Co., Hamilton, Bermuda, is making one of his periodical trips to Canada. His object is principally pleasure, but he is also devoting some time to business, the firm he represents being large jobbers and retailers in Bermuda. He was in Toronto for a few days last week, and "Hardware and Metal" had a pleasant few minutes' chat with him. He came to Canada by the Pickford & Black Line, and reports having had a pleasant voyage, and he spoke highly of the service. When questioned in regard to trade matters, he said: "Our desire in Bermuda is to trade with Canada, for we are of the same nation, but, of course, you can readily understand that we are compelled to buy where we can buy cheapest and to sell where we can sell to the best advantage. The trade between Bermuda and Canada is growing, but you have a great competitor in the United States."

"What Canadian products do you purchase principally?"

"Speaking for our firm alone, I might say that we buy all our flour from Canada, and we have been doing so for some years. Then we buy oats, hay, butter, cheese, bran, middlings, etc. Canadian soaps are beginning to come in more freely, and quite a little Canadian furniture is bought. Our firm is now buying a lot of canned goods from Canada, such as fruits and vegetables, and we find them of excellent quality. We prefer some of the canned fruits to those of California, their flavor and syrup being much better. So far, Canadian canned goods are knocking out New York prices. Of course, did they not do so we could not buy them."

"What about the dry goods trade?"

"Nearly all the dry goods we import into Bermuda come from England, our buyers going there twice a year. It is perhaps worthy of note that the people from the United States, who visit Bermuda in large numbers during the winter, purchase while with us a great deal of these English goods, particularly silks, dry goods and clothing. We have some fine tailor shops in Bermuda. These goods are largely purchased by the people from the United States who visit us, because they can get them a great deal cheaper than in their own country."

"Where do you get your hardware from, principally?"

"Our shelf hardware comes largely from Pittsburg, but the heavy goods are still largely imported from England. We have some good hardware stores in Bermuda."

Speaking of the products of Bermuda, Mr. Harnett said: "Our principal products are onions and potatoes. Of potatoes we raise three crops a year. The first crop is gathered about September, the second in January and the third in March. After the land has been given a little rest we produce on the same soil watermelons, muskmelons, and vegetables generally. There is only one crop of onions a year. The production of Easter lilies is quite an industry in Bermuda. Whole farms are devoted to their cultivation. The seed is sown in December and the flowers are gathered in July. It takes about three years to produce bulbs of saleable size. These fields of Easter lilies are a beautiful sight, particularly in the morning when they look like fields of snow, while the odor from them is delightful."

While a good many Canadians visit Bermuda in the winter, Mr. Harnett regrets that the number is not larger. "We have," he said, "a very fine climate and excellent hotels."

MR. CHARLES PICKFORD, OF HALIFAX.

Mr. Charles S. Pickford, who has been in the West Indies for nearly eight months in the interest of the Pickford and Black Steamship Company, is in Toronto, where he will remain some months looking after shipments for the West Indies. While in the West Indies he arranged for an exhibit at the Industrial Exhibition, Toronto. The goods are now on the way, and Mr. Pickford will have charge of the exhibit. During the volcanic eruptions at St. Pierre and St. Vincent, Mr. Pickford was in Barbados. He says the detonations were quite distinctly heard where he was, which was 90 miles from St. Vincent and that at five o'clock that evening the cloud of volcanic dust was so heavy in Barbados, that it was as dark as midnight, while by the next morning it had covered the island to the depth of an inch.

As in regard to Canadian trade with the West Indies, Mr. Pickford said: "There has been a great deal more Canadian flour sold than usual. The sales, however, are increasing in all lines, but particularly in flour, oats, biscuits and goods of that kind. The Christie, Brown Co., Limited, are now making regular shipments of their goods to the Islands. There is no reason why Canadian manufacturers should not sell in the West Indies nearly every kind of goods they produce, but one thing is sure, they must go and look after it."

"Do you think that the people of the West Indies are becoming more interested in Canada?"

"Yes; I think the sentiment in favor of trade with Canada is growing all the time. But the trouble is the United States manufacturers have their men going through the West Indies all the time selling their goods. It is only now and then that you meet a traveller representing a Canadian house."

"What about the shipment of West-Indian products to Canada?"

"That is not growing as fast as it should. I think if our people here would buy more goods in the West Indies, the sale of Canadian products in the Islands would increase more rapidly. We cannot expect those people to buy from us when we buy so little from them. Naturally, the inclination is to buy your goods from those to whom you sell. Another thing is that the exporters in the United States keep the merchants in the West Indies well posted as to prices of different kinds of merchandise, particularly on such lines as flour, peas and oats, while the Canadian exporters do not. This is a big mistake. While, as I have said, we do not buy as much from the West Indies as we should, our steamers have this winter brought up more sugar from the West Indies than ever before. The bulk of it came from Demerara, Antigua, St. Kitts and Montserrat."

"What are trade conditions like in the West Indies?"

"In Barbados, Demerara and the smaller islands trade is in a pretty bad state, and it is due to the fact that these islands are practically dependent upon the sugar industry. In Dominica, Trinidad and Grenada trade is good. In these places the cocoa, coffee and lime juice industries are quite important. Consequently, there is not the same dependence upon the sugar industry. In Demerara improvements have been made in the machinery in the sugar mills, but on the smaller islands in the West Indies they have not been able to do this on account of lack of money. The diamond industry in Demerara is making quite a stir, and oil has been struck in Trinidad, but I cannot inform you as to whether in paying quantities or not."

Mr. Pickford says that the weather in the West Indies during the last winter was wetter than usual. The number of people from Canada and the United States who spent last winter there was not as large, while the number of visitors from Great Britain was, on the other hand, much larger than usual.

Speaking of the transportation service, Mr. Pickford said that the railroad authorities say that there will be no difficulty in securing cars for conveying merchandise from points in Ontario to Halifax and St. John destined for the West Indies. It will be remembered that last year there was quite a little difficulty in getting a sufficient number of cars.

An exchange says: "Latest reports received from Singapore advise that the crop is practically at an end, and that producers refuse to make contracts for forward delivery. Shipments during May and June were short, and it is reported that deliveries also for July will show a deficiency of quite 10,000 cases. If this should prove to be correct, it will be a serious thing for many packers who, anticipating an enormous crop, made contracts for delivery during June, July and August at such ridiculously low prices that they now find they will be unable to fulfill their contracts unless at a loss."

For the GENUINE
Imperial French Green
of JOHN LUCAS & CO., PHILADELPHIA.

And CELEBRATED
ENGLISH VARNISHES
of CHAS. TURNER & SON, LONDON.

Cost Reducers

The leading implement and vehicle manufacturers' firms buy Lucas Paints. Why? Because they know from experience that they are notable cost reducers, and at the same time absolutely reliable products. They do away with time worn, expensive and cumbersome methods in the paint shop.

Lucas A. I. and V. M. Vermilions

are offered dry; also ground fine to semi-paste or paste consistency in Pure Linseed Oil and our celebrated Gibbsboro Japan.

They are light gravity colors, and when thoroughly mixed will remain in suspension for a comparatively long time. They facilitate and greatly reduce the cost of either dipping or brush work. On exposure to the atmosphere they grow deeper and richer in color.

They're permanent vermilions that cannot be equalled for preserving and decorating all kinds of agricultural implements and vehicles, baby coaches, hardware, wood, tin and iron toys.

Write for pamphlet showing the colors and giving practical working formulæ and methods for producing the best results at the least cost.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, August 15, 1902.

HARDWARE.

MOST jobbers report rather a quiet week, although business in a number of fall lines has opened up favorably, and several good orders have been received. This trade, however, has only commenced and is not yet of large proportions. Among the changes of the week is the discount on churns, which is now 51 per cent. off f.o.b. Montreal, Ottawa and Kingston, instead of 54 per cent; and 53 per cent. off f.o.b. factory, instead of 56 per cent. Churns with wooden stands are 15c. each less, and with the crank handles in place of the lever, also 15c. less.

BARB WIRE.—Trade is quiet, with no special feature to note. The price remains at $3 per 100-lb. keg f.o.b. Montreal.

SCYTHES.—A few odd orders are being received, all for small amounts. Otherwise, the market for scythes is very quiet. We quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

GALVANIZED WIRE.—There is no change to report in this line. Some business is doing at the prices quoted below, but the market in general is quiet. Our quotations are now as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is not much business doing on this market, and prices are unchanged. Our quotations are as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.; 1 and 2-lb. hanks, 25c.; ½-lb. hanks, 37½c; ¼-lb. hanks, 50c.

FINE WIRE.—The discount on fine wire has been changed to 25 per cent. instead of 22½ per cent. There is only a light demand.

BRASS AND COPPER WIRE.—The discount on brass and copper wire is now 62½ per cent. instead of 60 per cent. There has been no improvement in the demand, and the market is still quiet.

FENCE STAPLES.—Very little business has been done during the week. Galvanized staples sell at $3.25 per 100-lb. keg and bright at $2.90 per 100-lb. keg. For 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—Nothing of importance has occurred on this market since our last report. A fairly good movement is reported at unchanged prices. In small lots the price is $2.25 and in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananaque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Trade in this line is not of a very brisk nature at present, and nothing of interest is reported on the market. We quote $2.37½ per keg in carlots; in small lots, $2.15 per keg.

HORSE NAILS.—No further change in the discount of horse nails has occurred, and a good, steady demand is experienced this week for all lines. We quote as follows: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 and 5 per cent. off. "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—Business in this line continues to improve, and during the past week a fairly good trade has been done. Prices are unchanged and the market is steady. Our quotations are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller,

"Famous Active" Range

Burns Coal, Coke or Wood.

Made in 7 sizes. Every size can be fitted with high shelf, high closet, reservoir and water front.

Has more real practical cooking and fuel-saving features than any other range on the market. Its appearance speaks for itself.

If you do not handle the "Famous Active," it would pay you to put a sample on your floor.

MIDLAND, ONT. Limited

$3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—There is only a fair demand for these this week. The discounts are unchanged. Quotations are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There has been no change in the market for cordage or binder twine. The latter is scarce in many retailers' hands, and it is difficult to obtain more. We quote: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—The demand for these keeps up well. The prices are unchanged, and the market is steady. We quote the discounts as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—There is a fair inquiry for bolts and nuts. No special feature can be reported this week. Discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Business in this line is of a very quiet nature at present. The heavy demand is over and orders at present are for small lots for some special purpose. Quotations follow: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—No change whatever has occurred in the market, and trade remains quiet. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—A few orders are still being received, but the market is quiet and trade is of but small proportions. The discount on Canadian or English netting is 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used. For delivery in 1903 the discounts are 60 per cent. off for 19 wire and 55 per cent. off for heavier.

THE FRANCIS-FROST Co. Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

HARVEST TOOLS.—Very little busiis done in this line. The discount is 60 per cent.

FIREBRICKS.—A few orders are reported this week, but the market rules quiet and steady. The price of English firebricks is $16 to $22 per 1,000 and of Scotch, $17 to $22 per 1,000.

CEMENT.—The market is quiet. Prices are unchanged. Quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

METALS.

The local metal market has shown no new developments during the week. Trade, in general, continues good, and orders for seasonable lines are well up to the mark. Prices have been steady. While the supply of sheet metals is not heavy, and some jobbers are decidedly short on a few sizes, the effect on the condition of trade is practically nil, and it is expected that full supplies will be procured before long.

PIG IRON.—The situation in this market is not relieved in the least. The inquiry is heavy, and orders are far behind with all manufacturers. The price of Canadian iron is quoted at $18.50 to $19 and Summerlee is worth $21.50 to $22.

BAR IRON.—A fair amount of business is reported in bar iron, but no quotable change has been made. The market is steady at $2 for merchants' bar and $2.20 for horseshoe iron.

BLACK SHEETS.—There is a fairly good demand in black sheets, and most jobbers have supplies enough to answer all requirements. A few, however, report themselves as short on some sizes. The prices remain unchanged all round, and we quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Trade in this metal continues to be quite active. The market, however, is steady and prices unchanged, though stocks are none too heavy. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—Copper is rather quiet on the market at present and no new feature can be reported. The price remains steady at 14c. per lb.

INGOT TIN.—Trade continues about as usual, with Straits selling at 33½c.

PIG LEAD.—In this line there is little to report. Business is of but small proportions, and the price has not changed. We quote $3.25.

LEAD PIPE.—Composition and waste are quoted at 8c. Ordinary sells for 7c. The discount is 37½ per cent. The market has developed nothing of unusual interest since last week, and a fair demand is experienced.

IRON PIPE.—Prices on iron pipe remain unchanged throughout the list. Business is reported fair, and our quotations are as follows: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—There is a moderate inquiry for tinplates at the prices we quote. Nothing special, however, is doing. Charcoals are now selling at $4.75 to $5.25 and cokes, $4.25.

CANADA PLATES.—These remain unchanged in price on the local market, and trade is reported brisk. A few wholesalers are still short on some sizes, particularly 60 sheets. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—The market is featureless. Trade is quiet and prices unchanged. We quote: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—Trade is no more than fair. A few large orders, however, are reported to have been received this week, but the demand is irregular and the total of business does not amount to much. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—The market for tool steel shows little or no improvement, and trade is still quiet. The prices are unchanged. We quote as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leon-

ard's, 7½c.; Jonas & Colver's, 8 to 15c. ; "Air Hardening," 30 to 50c.

TERNE PLATES.—A somewhat better business has been done this week. The market, however, is still quiet. The price is $7.50.

COIL CHAIN.—In chain there is not much doing at present. Local buyers have placed a few orders, but apart from this the demand is very light. We now quote : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.95 ; 9-16, $3.85 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The demand has not improved and trade is quiet at unchanged prices. We quote $5.85 to $6.25.

ANTIMONY.—The market has exhibited no new feature since our last report. Business is of small proportions, and the price is steady at 10c.

ZINC SPELTER.—We quote 5c. This metal is absolutely featureless and in but small demand.

SOLDER.—There is a good demand for solder, and the market is active and steady. No material change has been reported. Bar solder is now worth 18c. and wire solder, 20c.

PAINTS AND OILS.

As regards prices there has been no change in any line, except ground white lead. The fixed price in this staple has been done away with and prices are now open. A number of prices are quoted by the different manufacturers. Dry white lead and dry red lead remain unchanged in price. Paris green is now quiet, and the feeling is that the trade is practically over for the season. In turpentine and linseed oil prices have been steady under a good demand. Supplies are equal to the demand, and the market shows no excitement whatever. We quote :

GROUND WHITE LEAD.—Best brands, Government standard, $5.25 to $5.87½ ; No. 1, $4.87½ to $5.50 ; No. 2, $4.50 to $5.12½ ; No. 3, $4.12½ to $4.75 ; No. 4, $3.75 to $4.37½ ; all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $1.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

Our Metallic Ceilings and Walls

Are an ideal finish for all kinds of buildings, because they combine both beauty and utility.

We make an almost countless assortment of artistic designs—the plates fitting accurately, the joins imperceptible and the pattern continuous in perfect precision throughout.

The sanitary superiority, fireproof protection, handsome effect and moderate cost appeal to all progressive people.

You can scarcely afford not to handle these goods—their uniform reliability makes satisfied customers every time.

Keep our catalogue and price list handy.

The Metallic Roofing Co., Limited,

WHOLESALE MANUFACTURERS,

TORONTO, WINNIPEG, MONTREAL.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There is no change to report in this market. The situation remains practically the same as last week. Zinc and red brass are firm. Wrought scrap is stiffening and higher prices are looked for. We quote : Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6 to 6¼c. per lb.

GLASS.

Trade is still very quiet and the market is featureless. Our quotations are as follows : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

Beef hides are ½c. lower this week and lambskins have advanced 10c. The market, however, is quiet. We quote : No. 1 hides, 9½c.; No. 2, 8½c.; No. 3, 7½c. Calfskins, 10 to 12c. ; lambskins, 40c.

MARKET NOTES

Lambskins are 10c. higher.

The discount on churns has been reduced 3 per cent.

The discount on brass and copper wire is 2½ per cent. higher.

Ground white lead has been reduced 62½c. by some makers.

The discount on fine wire is now 25 per cent. instead of 22½ per cent.

ONTARIO MARKETS

Toronto, August 15, 1902.

HARDWARE.

BUSINESS in wholesale hardware seems to be keeping up well, and although most of the travellers are enjoying their holidays, quite a few orders keep coming in by mail. These orders, though small, are quite numerous, and the prospects are bright for a heavy fall business. The manufacturers now have caught up in the lines in which they were behind, and from now on they expect to make deliveries promptly. No important changes have occurred during the week, excepting that the makers of wooden handles, such as heavy fork and axe handles, have issued a new list in which the discount in all lines is placed at 50 per cent. They state that this change has been made chiefly to secure uniformity in discounts.

BARB WIRE.—A moderate amount of business in barb wire continues to be done. The base price is quoted at $2.65 for carlots, and $2.77½ for less than carlots f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—This line is experiencing a fair demand at prices which are unchanged. We quote : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are

quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The trade doing in this line is of a light nature. We quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Quite a trade is reported this week. The discount is 22½ per cent.

WIRE NAILS.—A good demand continues for wire nails, and the market is strong and unchanged. We quote $2.55 for less than carlots and $2.50 for carlots. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These continue in good demand. We quote: Cut nails, $2.45 per keg, and $2.37½ for carlots.

HORSE NAILS.—Business in horse nails is inclined to be quite heavy, and an active demand is expected to shortly set in for the fall. At present orders are being taken only for immediate delivery. We quote base price: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—These continue active and firm. Quotations are as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—Although the holiday season is decreasing the demand for screws, there is still a good amount of business doing. Prices are unchanged. We quote as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—What has been said of screws may be said of rivets and burrs. Trade in these latter is much better than was expected. We quote the discounts: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The slight lull in trade that is being experienced just now is giving manufacturers an opportunity to complete the filling of their orders. But business is not by any means slack. We quote as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—There continues to be a little business doing in screen doors, but the season is about over. Prices are unchanged. We quote: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—The nature of the trade doing in green wire cloth is quiet. The price is $1.37½ per 100 feet.

SPADES AND SHOVELS.—A moderate sorting-up demand continues in spades and shovels. We quote the discount at 40 and 5 per cent.

ROPE.—Hay-fork rope is the principal size in demand in the rope line this week, but a number of small orders continue to come in for various sizes of other lines of this article. The base price is as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—There is likely to be a scarcity of this article before the season is over, as the heaviness of the grain crop this year is making it necessary to use more of this commodity than was expected earlier in the season. The prices are unchanged. We quote as follows: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—Trade is quite brisk, although the season will soon be over. The discount is 60 per cent.

EAVETROUGH, ETC.—Quite a quantity of eavetroughing is still going out, but business in this line is not so brisk as it was, and our quotations are as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—Trade in building paper remains about the same as it was last week. Our quotations are now as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

HARVEST WHIPS.—Business in harvest whips is still good, but the demand shows a considerable falling off.

CHURNS, ETC.—Trade in these is still good and the manufacturers have slightly advanced their prices. The discounts have been changed from 56 per cent. to 53 per cent., delivered from factories.

POULTRY NETTING.—Some sorting-up orders continue to arrive, but the season is about over.

SPORTING GOODS.—Orders for guns and rifles are quite numerous. There are also a number of loaded shells being forwarded to different parts of the country.

CEMENT.—A good demand keeps up for cement, and the market is firm and unchanged. The manufacturers are just able to keep up with their orders and no surplus stock is accumulating. We quote as follows: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 upwards per barrel.

METALS.

The condition of the local metal market is about the same as it was last week. The buying has not been heavy, but a fair demand continues for shipment from stocks. The outside tin markets are stagnant and easy, and the same may be said of copper. The iron market keeps in a healthy condition.

PIG IRON.—The demand for pig iron continues active and prices are strong. The ruling quotations f.o.b. furnaces are $20.50 to $21 for No. 1 foundry. A large

business is being done for future delivery next year.

STEEL BOILER PLATES.—These are still in good demand and the tone of the market is strong. We quote $1.80 for carload lots on track, Toronto.

STEEL BEAMS.—Trade in these keeps up fairly well. Prices are unchanged. Quotations are as follows: Steel beams, from stock, $2.75 and in carload lots on track, $2.

STEEL RAILS.—Quotations for steel rails are firm at $36 for electric railways.

TOOL STEEL.—The local market for tool steel continues unchanged. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—There is still a fair demand for mild steel.

SPRING STEEL.—Trade in this article continues moderate.

BOILER TUBES.—A moderate amount of business is doing in this article.

BAR IRON.—Buying is not as active as it was, owing to the holiday season being on, but a fair demand is still reported. In the United States little business is at present being done, but the prices are unchanged. We now quote $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is a good, steady demand reported for these. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is quite an active demand for these from stock at unchanged prices. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—Trade in galvanized sheets still remains active. In the United States prices are easy. Our quotations are as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

TIN.—There is reported a good demand for tin in small lots. The market is steady and unchanged. We quote $32 to $33 per 100 lb.

TINPLATES.—A fair amount of business continues in these. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER.—Ingot copper is quiet, and the same may be said of sheets. We quote ingot copper, $14 per 100 lb. and sheet copper, $22 to $23.

BRASS.—The movement of brass on the local market is small and the prices are unchanged. The discount is 15 per cent.

PIG LEAD.—More inquiry for pig lead has been made on the local market this week. The outside markets are strong. We quote: Pig lead, $3.50 to $3.75 and bar, $5.

IRON PIPE.—There continues to be a fair amount of orders for lead pipe on the local market. Prices are unchanged. Our quotations are as follows per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—This article is in more active demand this week. We quote 5 to 6c. per lb.

ZINC SHEETS.—A good demand is reported for zinc sheets. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Trade in solder continues steady.

ANTIMONY.—The market for this article is quiet. We quote $19.50 per 100 lb.

PAINTS AND OILS.

The feature of this week's market is the decision of the association of grinders of white lead in oil to leave the prices of white lead open. As a result, each manufacturer is quoting special prices of his own, and the market is demoralized. The decline in prices since last week is from 87½ to 97½c. per 100 lb., and many look

for even lower figures than these before long. As it is, stocks in the hands of the wholesalers are very light, and up to the present the manufacturers have been unable to cope with the demand of this season, which has been very great. The prices on white lead, which we quote, are the lowest obtainable. The market for spirits of turpentine and raw and boiled linseed oil is inactive and strong. Trade, generally, in paints and oils is experiencing the usual midsummer dullness. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, \$4.90 to \$5 ; No. 1, \$4.52½ to \$4.62½ ; No. 2, \$4.15 to \$4.25 ; No. 3, \$3.77½ to \$3.87½ ; No. 4, \$3.40 to \$3.50 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, \$5.02½.

RED LEAD.—Genuine, in casks of 560 lb., \$5 to \$5.12½; ditto, in kegs of 100 lb., \$5.50 ; No. 1, in casks of 560 lb., \$4 ; ditto, kegs of 100 lb., \$4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7¼ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, \$6 to \$6.25 ; Lehigh, in casks, \$6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to \$1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18¾c. per gal.; gasoline, ordinary, 21¼c., and engine, 22¼c. f.o.b. Toronto.

PARIS WHITE.—90c. to \$1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., \$2.25 to \$2.35 ; white, \$2.35 to \$2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., \$2.25; bladders, in 100-lb. kegs, \$2.40 ; bulk in bbls., \$1.90 ; bulk, less than bbls. and up to 100 lb., \$2.05 ; bladders, bulk or tins, less than 100 lb., \$2.90.

PLASTER PARIS.—New Brunswick, \$1.90 per bbl.

PUMICE STONE.—Powdered, \$2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, \$1.20 to \$1.40 per gal.; No. 1, \$1.10 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 79c.; boiled, 82c.; 3 to 5 barrels, raw, 78c.; boiled, 81c.; 6 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 69c.; 2 to 4 bbls., 68c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is not much doing at present in glass, but trade is expected to shortly pick up. Our quotations are now as follows : Under 26 inch, \$4.45 ; 26 to 40 in., \$4.65 ; 41 to 50 in., \$5.10 ; 51 to 60 in., \$5.35 ; 61 to 70 in., \$5.75 ; 71 to 80 in., \$6.25 ; 81 to 85 in., \$7 ; 86 to 90 in., \$7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Trade in old material is quiet and the local prices are unchanged. Our quotations are as follows : Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼c.; iron, No. 1 wrought, \$14 per net ton ; No. 2 wrought, \$6 ; machinery cast scrap, \$14 ; stove plate, \$10 ; malleable and steel, \$6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—The market for hides is firm and they are selling readily. We quote as follows : No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 9c. ; No. 2 green, steers, 8c.; cured, 8½ to 9c.

SKINS.—The usual supply continues to arrive and the market is without any change. Our quotations are as follows : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; shearlings, 35c.; lambskins, 35c.

WOOL.—There is a fair movement in wool reported at the following prices : Wool, fleece, 13½c.; unwashed, 7½c. per lb.

TALLOW.—There is a good demand for tallow, and no accumulation of stock. Prices have been advanced ¼c. per lb. We quote 6½ to 6¾c. per lb.

COAL.

What was said last week regarding the coal situation still holds good for this week. No new developments have been reported and no indications that work will shortly be resumed are apparent. The stocks of hard coal in the hands of local coal merchants are steadily becoming smaller, and if present conditions continue, prices will be very high this fall and winter. We quote at international bridges : Soft coal, \$3 to \$4.50 per ton.

PETROLEUM.

A fair business keeps up in petroleum. The fall demand will shortly set in. We quote : Pratt's Astral, 17 to 17½c. in bulk (barrels extra) ; American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

There has been a drop in white lead (ground in oil) of from 87½ to 97½c. per 100 lb.

The discount on churns has been changed from 56 per cent. to 53 per cent. off list, for delivery from the factories.

The Standard Paint and Varnish Works Company, Limited, Windsor, Ont., report that they are having a good run in Western Ontario for their "Monarch" brand white lead.

THE ONE-MAN POWER.

CONDITIONS of business are always changing. Sometimes we have the changes brought to our attention in peculiar ways.

The existence of numerous law offices where large forces are at work exclusively in the details of incorporating companies tells a significant story of recent developments.

It means that firms are changing to corporations, partners to stockholders. There is an independence and advantage in this form of conducting business which makes it popular.

The old-time business run by one-man power is rapidly becoming a tradition ; just as the newspaper that held its circulation through the presence of one well-known man in the editorial chair is gone. Both changes are incident to natural progress toward the day of permanent and larger things.

A little thought shows us that this is well. When a great business depends upon the energies of one man that man must keep his hands on a dozen levers. The routine even rests for its initiative upon the single personality ; and if that fails there is a bad break. When Horace Greeley died "his" paper suffered in a way that would not be true of to-day's Tribune should its editor pass away suddenly. Most of the readers do not even know the present editor's name.

Not until his recent death did many of the world hear the name of Ford in connection with The Youth's Companion, which he owned. The firm name "Perry Mason & Co." is a created one. Mr. Ford being a modest man, desired to conduct his paper under another than his own name, and so borrowed one from his imagination.

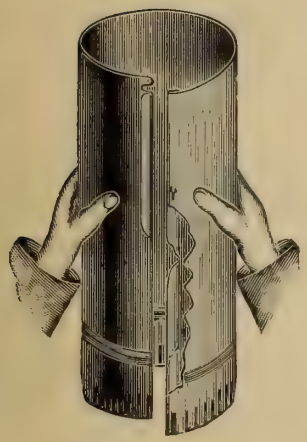
The up-to-date business enterprise starting to-day is an incorporated company. It is an impersonal thing. Customers and the public deal with it as such. Men may come and men may go, but it goes on ; and without stop or hindrance because of the physical vicissitudes of humanity.

It is said of the late Cecil Rhodes that the views he entertained of death were very simple. "When I am dead let there be no fuss. Lay me in the grave, tread down the earth and pass on," he wrote.

In all the great new business enterprises this may be done with the founders and the heads, be they ever so powerful, efficient and apparently essential to success. One by one they may be laid in the grave and the earth pressed down, while the great works and the great work goes on without interruption. —The Business World.

Brunet Eucharistе, general merchant, Nominique, Que., is commencing business.

Stove Pipe and Elbows



"Empire"
Patent Stove Pipes
Put up in Crates of 25 lengths each.

A Few Reasons why they are winners.

Long in the throat—which insures perfect draft.
Flat in the crimp—easily cleaned.
Holds no dirt, inside or out.
Adjustable—readily fitting all makes of pipe.
Saves time and labor in putting up. Makes neatest work.
Crated in bundles of one dozen—safe delivery insured.
Polished are made of Dark Blue Steel.
Common are made of Dark Black Steel,
5 — 6 — 7 — 8 inches.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week in the office of Building Inspector Copping, the following building permits were granted: Arthur Tepper, two-storey dwelling, brick cellar and front, rough-cast sides and back, 4 Bowman street, for $900; R. Maxwell, brick foundation and brick front, 430 Ontario street, for $600; Dr. Temple, two-storey and attic brick and stone dwelling, near St. George street, on Bloor, for $9,000; Mr. Fowels, alterations and additions to store, brick, 244 Parliament street, for $600; Ishmanel Baldwin, two-storey wood stable, 648 Palmerston ave., for $80; H. White, two-storey brick dwelling, on Walker ave., near Yonge street, far $2,200; Bank of Commerce, one-storey brick addition to bank, corner of Jordan and Melinda streets, for $10,000; S. Levinter, one-storey brick addition, Queen street west, rear of 433-435, for $500; Gurney Foundry Co., chimney stack, 100 ft. high, near Brant street, King street west, for $2,000; Mason & Risch, one-storey brick boiler house, 642 King street west, for $1,000; Joseph Tilt, five attached two-storey and basement brick dwellings, Chestnut street, near Queen, for $5,000; Lee estate, one-storey greenhouse, brick and glass, corner of Queen street and Lee ave., for $1,500; Bank of Toronto, two-storey branch, brick and stone, corner of Queen street and Spadina ave., for $16,000; Richard Toft, two-storey and attic brick dwelling, near Yonge street, on Woodlawn ave., for $2,500; Jos. Davison, for a two-storey brick stare and dwelling, 265 Pape ave., for $2,000; Acme Loan and Savings Co., pair of two-storey attic and semi-detached brick dwellings, Albany ave., near Barton, for $3,500; Polson Iron Works, one-storey carpenter shop, wood, covered with galvanized corrugated iron, on Esplanade street, for $1,350; Capt. Alfred Trigge, 2½-storey brick dwelling, near Yonge street, on Walker ave., for $4,000; R. H. Davies, 1½-storey brick stable, 84 Crescent Road, for $1,800; C. W. Turner, alterations and addition to store, brick and stone, at 26 West Market street, for $1,000.

OTTAWA BUILDING PERMITS.

During the past week six building permits were issued by Building Inspector Pratt. The aggregate value represented is $20,600. Following comprises the list: Christopher Scott, brick-veneered dwelling, Second ave, $800; estate of Mrs. Martin, four solid brick residences, King street, between Theodore and Wilbrod, $14,000; Robert J. Evans, for a frame dwelling, William street, $350; Eugene Patry, frame addition to dwelling, Margaret street, $250; H. B. Hill, solid brick double house, First Avenue, $4,000; Charles Gamble, brick-veneered dwelling, Flora street, $1,200.

TORONTO PLUMBERS AT HALIFAX

Among the Toronto plumbers who are in attendance at the Master Plumbers' Convention at Halifax are: J. Wilson, President of The John Ritchie Plumbing Company, Adelaide street east; Mr. Mansell, of Purdy, Mansell & Co., 46 Adelaide street west; W. H. Meredith, manager of The R. H. Lear Co., Richmond street west, and secretary of the Provincial organization, and Joseph Wright, of Bennett & Wright, Queen street east.

BUILDING NOTES.

CONTRACTS have been let for another fine business block on Talbot street, London, opposite the Market Square. J. Darch & Son will erect a six-storey warehouse, providing three retail stores on the ground floor.

Work has been commenced for the laying of the foundation of the Ross Rifle factory on the Cove Fields, in Quebec.

The Union Bank will erect on the corner of Main street and William avenue, in Winnipeg, an eight-storey branch and office building.

J. Darch & Sons, harness dealers, London, Ont., have taken out a permit for the erection of a six-storey warehouse adjoining the premises now occupied by them on Talbot street.

Bridgetown, N.S., reports the following building operations: Brick school house, to cost between $10,000 and $12,000; a two-and-a-half-storey brick building for store purposes and Y.M.C.A. rooms; house and ice-cream parlors for Mrs. Brown; a dwelling for J. F. Lloyd.

The Bell Telephone Company will erect on the property purchased at Nos. 31 and 33 Temperance street, Toronto, just east of the company's present property, a new building, as large as the present one, in the place of the old houses now standing there. It is understood that the price paid for the properties was about $17,000. New and larger switchboards of the central energy type will be placed in the new building, and ringing to get "central" will be dispensed with on all "main" telephones, as is now the case on "park" and "north" services.

PLUMBING AND HEATING NOTES.

J. B. RESTHER & SONS, architects, Montreal, have received instructions from The Freyseng Cork Company, Limited, to prepare plans for a large brick and stone factory on St. Paul street, Montreal, in which they will manufacture Canadian cork. The building will be erected on the premises bearing Nos. 655 and 657 St. Paul street. The cost of the building alone will be $15,000, and it will be fitted up with all the latest machinery at a cost of $60,000.

The plumbing of Dr. Hall's new office, Chatham, Ont., was done by J. C. Wanless, of that place.

The Keith & Fitzsimmons Co., Limited, plumbers, King street west, Toronto, are effecting considerable repairs and improvements in their office room and display windows.

The corner stone of the new Presbyterian Church at Midland, Ont., was laid on Tuesday, August 5. The contract price of the building is $13,357, and $800 for heating, the probable cost of the whole being about $16,000. Wallace & Cooke, of Midland, are the contractors, and Simpson & Moffat, Toronto, the architects.

Mrs. Foshay, of Bridgewater, Ont., contemplates extensive improvements to her hotel. Wide piazzas and a large wing will be added to the building; the dining-room will be enlarged; bathrooms, smoking-room, office and lavatory added, all fitted up with modern conveniences. Four sample rooms for commercial travellers will be a feature of the new hotel.

It is the intention of The Ottawa Trust and Deposit Company to add three storeys to the Trust Building at the corner of Sparks and Elgin streets, Ottawa. The structure is now a five-storey one, including the basement. The addition will mean an expenditure of several thousand dollars. Other improvements are contemplated, such as the installation of a second elevator.

PLUMBING AND HEATING CONTRACTS.

J. E. Gray, 121 Queen street east, Toronto, has secured the following contracts: Plumbing and hot-water heating of new dwelling of Rev. Father La Marche, of King street; also lighting, plumbing and heating of four new houses on Howland ave., for Mr. German.

Guest & Co., 86 Church street, Toronto, have secured contracts for plumbing and gasfitting for two houses for Mr. Morris, on Brooklyn ave; also the plumbing and gasfitting of one dwelling for Wm. Reynolds, Kew Beach; alterations to plumbing for A. Downing, Dunn ave.; alterations to plumbing of dwelling of Albert Clarke, Waverley Road.

When the farmer wants to paint his barn, his fence, his out-houses in general, give him something that will do the work well and not be costly. That's what he wants.

CAPTAIN NEEDED FOR STOVE TRADE.

DISCUSSING the condition of the stove trade a writer in Metal Worker says: "When one who has been in the stove business all his life, knows its possibilities and opportunities and what it has done, reads the statement of President Charles M. Schwab of The United States Steel Corporation, and sees that the expected profits for the coming year run up over $140,000,000, he wonders where the stove business comes in. The stove industry is one of far greater usefulness than the manufacture of steel rails, structural steel and other products made by The United States Steel Corporation, for every family must cook to eat and must eat to live, whereas railroads do not have to be built, neither is it compulsory to erect buildings, or even if a building must be erected it need not be composed of steel frame construction. On the other hand, every wooden or brick house contains one or more of the products of a stove foundry; this, however, is not necessarily the case with the products of The United States Steel Corporation.

"The concentrated product of the stove business, if it had a captain with the brains and backbone of Mr. Schwab, would show results which would astonish the old-fashioned stove manufacturer. The stove business is now principally run by the buyer and the Molders' Union. The poor devil of a manufacturer has little to do with it; he is only submitting to what he cannot help. The stove manufacturer does not control his iron, coke or coal, and only incidentally controls his bank account. If the stove business had a captain it would then control its iron, its coke and not only its bank account, but the Molders' Union as well, not to the detriment of any but for the benefit of all. When nearly every other product made here is exported in large quantities, why cannot stoves be exported? It is true they are exported, but what a penny peanut business it is compared with almost any other line of equal importance.

"The stove business needs a captain, and needs one quickly. It needs a captain who will gather the scattered soldiers who are all fighting on their own account, and fighting each other at that, and bring them into a harmonious company and march them on as one man, shoulder to shoulder, to the success that should come to hard and earnest workers. Where can the stove business find such a captain?"

MANITOBA MARKETS.

Winnipeg, August 11, 1902.

A STEADY, heavy trade in every line is reported this evening, and prices steady. The situation as to binder twine has improved somewhat since the damage to crops in Dakota, and the general opinion now seems to be that they will be enough for the Manitoba and Northwest crop. Price is very firm. Hardware houses find great difficulty in keeping up with the demand for building hardware.

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS.

Aug. 15, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

A BONUS FOR IRON IN AUSTRALIA.

AUSTRALIA appears to be bent on building up an iron and steel industry. It will be remembered that when the tariff of the new Commonwealth was brought down about a year ago provision was made for a protective duty on iron and steel. A Bill is now before the House of Representatives providing for the still further encouragement of the industry. This particular Bill provides a system of bonusing and is rather unique in its character. It provides for the setting apart of the sum of £324,000, equal to about $1,500,000. The specific amounts are:

£250,000, at the rate of 12 shillings per ton on (a) pig iron made from Australian ore; (b) puddled bar iron made from Australian pig iron, and (c) steel made from Australian pig iron. This bonus expires on July 1, 1907.

£20,000, at the rate of £2 per ton, on the first 10,000 tons of spelter made from Australian ore before July 1, 1905.

£50,000, at the rate of 10 per cent., on value of (a) galvanized iron; (b) wire netting, and (c) iron and steel tubes or pipes (except riveted or cast), not more than 6 in. in internal diameter, produced before July 1, 1905.

£4,000, at the rate of £8 each, on the first 500 reapers and binders made before January 1, 1904.

The intention of the Bill as originally introduced by the Government was to grant a bonus to private individuals who would undertake the manufacture of iron and steel and kindred products, but the labor element, which is strong in the Australian Parliament, has succeeded in so amending the Bill that, if it is finally adopted, a bonus will be given to the State Governments composing the Commonwealth that choose to go in for the manufacture of iron and steel on their own behalf. It is in this particular that the Bill is unique. A great deal of opposition to the measure has been engendered by the turn which affairs have taken.

"It is to be hoped," says Australasian Hardware, "that this decision may yet be reversed or the Bill abandoned. The position is unsatisfactory to all concerned. If the Commonwealth is to stand committed to such debatable policy, it should be by a full majority of the men appointed to manage its affairs, and not by a vote of 25 in a house of 75 members. Whether the Bill will be finally adopted remains, of course, to be seen."

Although the amount which it is proposed to set apart as a bonus is rather liberal, it is, perhaps, scarcely as much so as the bonuses which are now given by Canada to the iron and steel industries in this country. For, during the next few years the amount which is likely to be paid out by the Canadian Government is likely to far exceed the amount that may be paid by the Australian Government. In this country no limit is set to the amount; and the development of the industry here during the next year or two is certain to be large.

The Canadian Act provides for the giving of a bounty of $3 per ton on pig iron made in Canada from Canadian ore, and $2 on the proportion produced from foreign ore. A bounty of $3 per ton on steel ingots manufactured from ingredients of which not less than 50 per cent. of their weight consist of pig iron made in Canada; a bounty of $3 per ton on puddled iron bars made from Canadian pig iron. An Act passed in 1899 provided that these bounties should be paid at a gradually diminishing proportion from 1902 until June 30, 1907, when they cease.

The amount paid in bounties during the fiscal year ending June 30, 1901, was nearly $500,000, being divided as follows: Pig iron, $351,259; puddled iron bars, $16,703; steel ingots, $100,057, making the actual total of $468,019.

STICK TO TRUTH.

IT IS not a wise thing for business men or anyone else to evade truth. Truth is the foundation of the State and of business, as well as of the Church. It is, therefore, a good thing for every sphere of action.

The freedom of business, the freedom of politics and the freedom of conscience which we enjoy to-day are born of the courage of the man who held truth to be something for which it was worthy to contend.

To evade truth often appears the easiest way in which to surmount difficulties. But the employment of such methods, while they may appear to surmount difficulties, undermines character. And he whose character is undermined has about as much chance of succeeding in life as a pricked bubble has of maintaining its comeliness.

A REVOLUTIONIZING TREATY.

ALL of the thirteen articles comprising the British-Chinese Commercial Treaty, which has recently been arranged between Sir James MacKay, special commissioner, representing the British Government, and the Chinese authorities, have been adopted with the exception of Article 8. This article was of so far-reaching a nature, and its provisions were so unexpected by the Foreign Office in London, that no preparation was made for the possibility of its acceptance on the part of the Chinese. Hence, as it involves existant treaties, a short delay has been occasioned until the necessary legislation can remove all obstacles to its proper working.

Article 8 practically opens up China to the British or to any other trader who may follow the British lead. To understand how this very desirable result has been brought about, it will be necessary to recall two things. In the first place, until the time of the Japanese War, the Pekin administration regarded all standing armies and military preparations as a nuisance and relegated the care of such details to the Viceroys of the several Provinces. These Viceroys possessed almost Imperial power over their districts, and, because the pay from Pekin was small, they had recourse to taxes of all kinds to raise funds. Chief and most profitable among the taxes was the "likin" or internal transit duty, which was imposed on all goods going in or out of the district. By raising this "likin" to an exorbitant amount whenever foreigners were concerned, the Viceroys kept European traders out of their dominions.

The necessity for a standing army, which has been felt in China ever since the crushing defeats inflicted by Japan, has occasioned a change in the attitude of the central Government towards the Viceroys. This change has likewise been accentuated by the recent invasion of the powers, which has clearly demonstrated to the Chinese that if they are to keep their empire from being divided up among the European powers they must give foreigners free access to the country.

Sir William MacKay has shown the Viceroys an expedient to surmount their difficulty. While removing the "likin" on all but a few articles and placing all Customs control in the hands of the maritime officials, he suggests the imposition of a surtax over and above the existing Chinese Imperial tariff, which will in some measure repay the satraps for their losses. This feature requires the sanction of the British Government before it can come into effect, but its adoption will be so beneficial that there seems no question but that it will be approved.

The effect of this reform can scarcely be realized. Hitherto China, which has stood out as a huge terra incognita, swarming with a vast population and big with commercial possibilities, has thwarted all efforts made by foreign nations to secure access to her innermost regions. If only this treaty receives honest treatment on the part of the Pekin statesmen, there can be no question that Great Britain will find another and a greater India in China. There is much hope expressed that the duplicity which has hitherto marked all Chinese diplomatic relations will be absent in this case. The Chinaman who has been prominent in negotiating the treaty, and who is known to be a straightforward character, has just been appointed High Commissioner of Trade for the Chinese Empire. In this it is believed a happy augury is to be found.

While the agreement is made primarily with Great Britain, there has been no attempt made to exclude other nations. Any nation, whatever, is left at perfect liberty to march through the door thus so conveniently thrown open by the British Commissioner.

SHIPBUILDING IN CANADA.

FROM the "List of Shipping," issued by the Department of Marine and Fisheries, the reassuring piece of information is to be derived that not since 1891 has the tonnage of ships built in Canada reached as high a figure as that for 1901.

Even the increased tonnage over 1900 is reckoned at more than 50 per cent —an increase which has but once been equalled since 1874. Fluctuations, however, have occurred during the intervening period of such magnitude that this increase cannot be considered as phenomenal or as indicative of any very decided quickening of the industry. When it is remembered that the figure for 1874 was four times as great as the figure for 1901, it is hardly time to assert that Canadian shipbuilding is becoming a great industry.

To begin with 1874, the tonnage then constructed was 190,756. Roughly speaking, 44 per cent. of this was built in Nova Scotia, 22 per cent. in New Brunswick, 13 per cent. in Prince Edward Island, 12 per cent. in Quebec, and 6 per cent. in Ontario.

From 1874 a practically steady diminution continued until 1887, when the tonnage stood at 22,516. From 1887 there occurred a slight rally until 1891, and then a decrease until 1896 when the figures reached their lowest point at 16,146. The year 1901 stands at 34,481 tons, with but little change in the order or proportion of the shipbuilding Provinces, except that British Columbia has taken its place in the list, with a production of 20 per cent. of the total.

The smallness of the figure for 1901, compared with that for 1874, is no doubt due to the dying out of the demand for wooden ships and the substitution in their place of steel steamers. Of these Canada has not yet become a builder of any importance, but, with the materials all at hand in the Martime Provinces, it appears as if it should not be long before an extensive shipbuilding industry springs up there. The same may be said for British Columbia, which alone of all the Provinces shows a greater production now than in 1874. Then, in Ontario, Toronto and Collingwood have during the past few years turned out some magnificent steamers for lake traffic.

PERSONAL MENTION.

Mr. W. H. Evans, of The Canada Paint Co , left on Friday night, August 22, for the Adirondacks on a hunting and fishing excursion, accompanied by Mrs. Evans. They will spend about two weeks in this beautiful region. Mr. Evans is confidently looked to to catch a large number of particularly fine fish.

A happy event took place on Thursday, August 21, at 130 East Hunter street, Hamilton, the residence of the bride's parents, when Rev. Dr. W. F. Wilson united in marriage Miss Lillian M. Matthews, second daughter of George Matthews, of the Post Office Department, to Bert Lavery, of The Sherwin-Williams Co., Toronto.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

E. J. McCLINCHEY, general merchant, Bruce Mines, Ont., has assigned to James Glenville, Thessalon.

F. G. Roy, general merchant, Scotstown, Que., has assigned.

George H. Burkett, general merchant, Bridgewater, N.S., has assigned.

A. D. M. Bertrand, general merchant, St. Raymond, Que., has assigned.

Oscar Nadon, general merchant, St. Rose, Que., has assigned to H. Lamarre.

Alexander Pirie, contractor, Lethbridge, N.W.T., has assigned to J. H. Salisbury.

Arthur McBean, hardware merchant, Galt, Ont., has assigned to Harry Bishop.

Lambert Salvas & Co., general merchants, St. Francois Du Lac, have assigned to Lamarch & Benoit.

The creditors of A. D. M. Bertrand, general merchant, St. Raymond, Que., will hold a meeting to appoint a curator on August 29.

Mary Hancock, dealer in furnaces and stoves, Toronto, has assigned to The National Trust Co., Limited, and the creditors had a meeting on August 19. Her estate is to be wound up.

PARTNERSHIPS FORMED AND DISSOLVED.

Daoust & Frere, general merchants, Masson, Que., have dissolved.

Chausse & Latour, hardware merchants, etc., Montreal, have dissolved.

Ringwood & Wilson, dealers in lumber and implements, Lenore, Man., have dissolved; F. H. Ringwood continues.

Lamontagne & Fournier, general merchants, St. Charles, Bellechasse, Que., have registered a dissolution of partnership.

SALES MADE AND PENDING.

A. H. Moffatt, blacksmith, Wroxeter, Ont., is advertising his business for sale.

The assets of Dominique Mignac, hardware merchant, Montreal, are to be sold.

The assets of A. H. Pare, general merchant, Pont de Maskinonge, Que., are to be sold.

The stock of Young Bros., bicycle dealers, Ottawa, has been sold at 36c. on the dollar.

The plant and business of the Port Perry Electric Light Co., Port Perry, Ont., is advertised for sale by auction on August 25.

The stock of the estate of R. A. Lawrence, general merchant, Wetaskiwin, N.W.T., is advertised for sale on August 28.

CHANGES.

The Montreal Jobbing Co., general merchants, Montreal, have registered.

George B. Irvine, manufacturer of cement and flour pots, Vancouver, is out of business.

There's Money in Them.

Counter display card of The S. W. Buggy Paint.

The Sherwin-Williams Buggy Paint and The Sherwin-Williams Buggy Top Dressing are money making specialties.

They are particularly suited for use in and about livery stables. They work freely, are easily applied, and enjoy a good sale.

They are specialties that ought to have a place on every progressive dealer's shelves. Prices quoted and full information given on request.

Counter display card of The S. W. Enamel Leather Dressing.

THE SHERWIN-WILLIAMS CO.
PAINT AND VARNISH MAKERS.
CHICAGO, NEW YORK, CLEVELAND, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY

O. Charette & Cie, contractors, Montreal, have registered.

The Canadian Pneumatic Tool Co., Limited, Montreal, has registered.

Theo. F. Brisson, general merchant, Buckingham, Que., is retiring from business.

Harry Whitehead is successor to the late Ruth V Reid, general merchant, Elmsdale, N.S.

Rogers & Co., general merchants, Cannington, Ont., have sold out to John McKinstry.

G. H. Knowling, lumber merchant, Frobyshire, N.W.T., has sold out to Riddell & Co.

Wodlinger & Caminetzky, general merchants, Rosthern, N.W.T., are succeeded by M. Caminetzky.

Joel A. Broadwell, general merchant, Crofton, B.C., is to be succeeded by Taylor, Smith & Co., on September 1.

FIRES.

The elevator at Campbellford, Ont., of Henry M. Fowlds & Son, grain, coal and salt merchants, Hastings, Ont., was burned.

DEATHS.

Kenneth Macpherson, general merchant, Cardinal, Ont., is dead.

Jos. Pineau, husband of the proprietress and general manager of Jos. Pineau & Co., general merchants, Bic, Que., is dead.

A WONDERFUL LAMP.

The Ontario Lantern Co., Hamilton, have patented a new incandescent lamp which they justly call the "Brilliant." It has a spiral filament, and is so constructed as to produce from a 16-candle lamp from 23 to 25 candle-power from the tip or bottom of the lamp and its full-rated 16 candle-power from the sides of the lamp, without increasing the consumption of current, making the mean spherical candle-power of this lamp about 20 candle. It will be readily seen that this lamp has great advantages for consumers who purchase their light on metre rate, enabling them to procure from this lamp a much larger amount of illumination without any extra cost.

Samples of the "Brilliant" will be forwarded to all lighting stations and dealers in electrical supplies within the next month, and the manufacturers hope to be in a position to fill orders not later than October 1.

They have recently doubled the capacity of their incandescent lamp plant, which will enable them to produce 2,500 lamps per day.

Walter Grose, of Montreal, the sole selling agent of this company, will be pleased to quote prices and give any information desired in connection with the same.

ORIENTAL TRADE CONDITIONS.

"CHINA, Japan and the Philippine Islands," form the text of an article by W. C. Matthews, the general manager for R. G. Dun & Co., in Canada, which appeared lately in Dun's Review. Mr. Matthews has just returned fron an extended trip to the Orient, where he examined trade conditions at close range, and he is prepared to speak with authority on the situation there.

In the Philippine Islands, Mr. Matthews found conditions unsatisfactory. Trade was unsettled and capital slow of investment, mainly owing to uncertainty as regards the Uoited States policy on the currency question. In addition, the exclusion of Chinese labor was having disastrous effects. Filipino laborers will only work a sufficient time to secure the bare necessities of life, whereas one can depend on Chinese coolies for something more. The change meant a blocking of industrial and commercial progress.

The natural resources of the islands are enormous and there is abundance of land suitable for growing cotton and cereals, but the earliest field to be developed, according to Mr. Matthews, will be the forests, and there will presently be a need for sawmill machinery and railway materials. Native demands at present are principally for cotton goods and small metal wares. There are general importing houses which handle these articles, and later they are distributed through Chinese merchants.

Japanese trade during the last ten years has increased nearly threefold. Referring to the portion of it conducted with the United States, Mr. Matthews says that from Japan, the principal articles of trade are silk and tea, and from the United States, raw cotton and petroleum. In addition, there is a very good demand on the part of Japan for locomotives, railway materials and electrical supplies.

In China, Mr. Matthews finds both Germany and the United States making strong efforts to get a share of the trade hitherto monopolized by Great Britain. Germany, especially, assisted by lines of subsidized steamers, is making great advances. The United States controls the flour trade, which is carried on with the mills in Washington and Oregon States without any serious competition. In Hong Kong large building operations are in progress, which are giving rise to a demand for structural steel, nails, bolts and builders' hardware. Concessions to railways, granted by the Chinese Government, will also cause a demand for construction materials. The market for steel is increasing steadily, because the destructiveness of the white ant is making the use of any other kind of material impossible.

Mr. Matthews sees great results from the abolition of the "likin" duties, if only the reform can be effected. There is no doubt that the foreign trade of China would increase with great rapidity upon the removal of these barriers, but it is to be doubted whether the change can be effected at one blow. The Government may succeed in destroying the system between the larger cities and the coast, but it will probably survive for some time in the interior. Aside from the "likin" taxes there are oo serious restrictions upon the Chinese trade.

IVER JOHNSON SINGLE GUNS

are the successful result of an honorable ambition to make a Gun that is

Safe for the Jobber. Safe for the Dealer. Safe for the User.

SAFE Mechanically and Commercially.

THE TRADE PREFER THEM AND THE PUBLIC DEMAND THEM.

THE MASTER PLUMBERS OF CANADA.

Annual Convention of the Dominion Association in Halifax on August 13, 14 and 15.

FOGGY and raining. These were the conditions under which the delegates to the above Convention arrived in Halifax. We had often heard the expression "Go to Halifax," but never felt its full force and meaning until now. Probably no harm was meant in the remark, but we never understood it before. A few of the Halifax members boarded our train about ten miles out from Halifax. Perhaps they felt somewhat conscience-stricken in inviting the Convention to their city, and then were disheartened and disgusted that Old Probs. should

Frank Powers President. Lunenburg, N.S.

have gone back on them in this way. They certainly had a blue look when they got on the train, but tried to put on the best face possible, and explained that the normal atmosphere conditions of Halifax were not rain and fog. They had very kindly and thoughtfully, too, provided a street car service to take the delegates to the hotel. In fact, the Reception Committee left nothing undone to atone for the breakdown of the weather. But presto. What a change the next morning. The curtain of fog had lifted, the sun was shining gloriously, and the air felt cool and refreshing. Halifax had redeemed its fair reputation. Everything was bright and joyous looking. The magnificent harbor, capable, we were told, of giving security to a thousand ships, lay glistering in the sun before us.

Halifax is located on a peninsula and founded on a rock, and rises from the water to a height of 256 feet at the Citadel. From that point of view is seen such a panoramic display of beauteous scenery as is rarely met with. The weather has been all that could be desired from the opening of the Convention until its close.

After supper, the Executive met, as there was a great deal to do, and got through quite a lot of business in preparation for the Convention.

WEDNESDAY'S SESSION.

At 11 a.m. the Convention was called to order by President John McKinley, who, in a few apt remarks, welcomed the delegates, at the same time thanking the Halifax Committee for their very cordial reception of the delegates. He then appointed Mr. Hill, of Halifax, as tyler.

The first order of business was the appointment of a Credential Committee, which was made by the president, as follows: Frank Powers, Thos. Moll and W. H. Meredith.

W. H. Meredith presented the report of the Credential Committee, as follows:

President—John McKinley, Ottawa.
Vice-Pres —Frank Powers, Lunenberg, N.S.
Past President—W. H. Meredith, Toronto.
Secretary—H. A. Knox, Ottawa.
Treasurer—Ald. Jos. Lamarche, Montreal.

Provincial Vice-Presidents—
Ontario—Wm. Mansell, Toronto.
Quebec—John Watson, Montreal.
Nova Scotia—G. A. Perrier, Halifax, N.S.
British Columbia—J. H. Wilson, Toronto.
Manitoba—F. G. Johnson, Ottawa.

Ontario Provincial Associations—
W. Mansell, Toronto.
J. H. Wilson, Toronto.
John McKinley, Ottawa.
H. A. Knox, Ottawa.
W. H. Meredith, Toronto.
S. P. Gourlay, St. Catharines.

Local Associations—
Toronto—Joseph Wright.
" —Fred Armstrong.
Fredericton, N.B.—Mr. Shea.
Charlottetown, P.E.I.—Mr. Herman.
Montreal—Thos. Moll.
" —P. C. Ogilvie.
" —E. Lesperance.
" —R. Egan.
Ottawa—F. G. Johnson.
Halifax—G. A. Wooten.
" —J. E. Myers.
" —Jas. Farquhar.
Guelph—H. Mahoney.
Moncton, N.B.—Wm. Watson.
" —C. O. Rowe.
Sussex, N.B.—H. Dryden.
Mahone, N.S.—A. Gangille.
New Glasgow, N.S.—C. H. McKay.

On motion, the above were declared as forming the Seventh Annual Convention.

The following special committees were appointed:

Grievance Committee—Joseph Wright, Frank Powers, Jos. Lamarche, S. P. Gourlay, G. A. Perrier.

Resolutions Committee—Wm. Mansell, P. C. Ogilvie, Jos. Farquhar, H. Mahoney, G. A. Wooten.

Auditing Committee—Fred. Armstrong, Thos. Moll, H. Dryden.

On motion, it was decided to give the master plumbers of Halifax who were not already attending as delegates, a cordial invitation to be present and given the opportunity of taking part in discussions, but not to vote.

R. L. Borden, M.P., and Mrs. Borden sent their card, stating they would be "At Home" on the afternoon of the 13th, and asking the attendance of the delegates. An invitation was also received from S. M. Brookfield to pay a visit to the dry dock.

Ald. Joseph Lamarche, Treasurer, Montreal.

On motion, it was resolved to extend the hearty thanks of the Association to R. L. Borden, M.P., and Mrs. Borden and also S. M. Brookfield for their kind invitations, and also the Halifax Committee for the manner in which they had so kindly prepared towards making the visit of the delegates an enjoyable one.

As the noon hour had come, an adjournment was made to 1.30 p.m.

The chair was taken by the president at 2.30 o'clock.

Reports of retiring officers were read.

PRESIDENT'S REPORT.

Gentlemen and Members of the National Association of Master Plumbers of the Dominion of Canada.

At the last annual convention you honored me by placing me at the head of the National Association. The time has

now arrived for me to give an account of what has been done during my term of office.

In all matters of importance, I have consulted with the sub-Executive Committee before acting, and I have invariably found them most anxious to promote the welfare of the Association, and conservative in their advice.

When in convention assembled, we exhibit considerable enthusiasm, but, as a rule, it is left for the officers to maintain that spirit of confidence and activity throughout the year, and to them much credit is due for the efficient manner in which they performed their duty in the various Provinces. These officers will report to you in detail their work in the different Provinces.

Together, with your secretary, I have been in communication with a number of cities and towns where no local association exists, with a view to having them organize, and we have received a number of encouraging replies.

I am pleased to report that the master plumbers of Hamilton are again affiliated, and that Winnipeg has also come into our Association.

It was my good fortune, with your secretary, to attend the first meeting of the Ontario Provincial Association of Master Plumbers at Toronto in March last. I may say that the meeting was one of the largest and most representative that I have ever attended. The Provincial president and the members that assisted him in the formation of the Association deserve to be congratulated upon the splendid meeting. I sincerely hope that the day is not far distant when the other Provinces will also be organized.

I have found it very difficult to form local associations on account of the inclination to reduce prices in order to secure work. I trust, however, that the formation of Provincial associations will have a tendency to create a more friendly feeling toward each other, and give everyone to understand that the other fellow has a right to live.

One way in which the trade could be greatly benefitted, where proper plumbing laws are not now in force, is for the local associations in cities to secure the passage of by-laws, requiring all master plumbers to be examined as to their practical qualifications for conducting the plumbing business. I believe that it would be greatly to our advantage to educate our members, who appear to need it, that there is necessity for something more than a knowledge of sanitation to conduct the plumbing business with financial success. We could, with advantage, devote much time to cultivating a more friendly feeling toward one another, and honorable dealing amongst ourselves. We should be ready at all times to assist a worthy brother member mechanically or otherwise, and should not endeavor to invade the territory of each other.

I regret to say that there is sometimes a lack of interest displayed by members of local associations in attending regular meetings.

I would recommend that short talks be given periodically by those who have made a study of sanitary subjects. The free discussion of such subjects would serve to awaken interest that would be of incalculable benefit to us all.

I would like to see each and every member of this Association do a little missionary work in trying to induce master plumbers to become members of some local organization, where they will be in a position to protect themselves.

We have a number of complaints about the supply men not keeping faith with us, and while, in a few cases, I have found that there is ground for complaint, I believe that, as a rule, they are cautious about whom they sell to.

In conclusion, I would say that it has been clearly demonstrated to me that the benefits that accrue from an organization of this character are materially advanced by active co-operation and loyalty toward one another.

To the members of the Executive Committee, who have so cheerfully tendered me their able assistance during my term of office, I return my hearty thanks. I also desire to thank our worthy secretary and those who, by letter or personal effort, have labored to increase our membership.

It affords me great pleasure, indeed, to welcome you all to the Seventh Annual Convention of the Master Plumbers'

W. Mansell, Retiring Vice-President for Ontario, Toronto.

Association in this historic city, and to express the hope that we shall all derive much benefit from the meeting.

Respectfully submitted,
JOHN McKINLEY,
President.

VICE-PRESIDENT'S REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Steam and Hot-Water Fitters of the Dominion of Canada.

Gentlemen :—I have the honor of submitting my report as vice-president for the past year. It is with pleasure that I meet you once more, and bid you a hearty welcome to the City by the Sea, and hope that your stay will be both pleasant and profitable.

I am pleased to report a steady growth of the Association in Nova Scotia, and hope that the time is not far distant when every bona fide master plumber in Nova Scotia will be a member of our Association.

The Halifax branch, of which I have the honor to be president, is making rapid strides and is in a very prosperous condition. Meetings are held regularly and are well attended, and the utmost harmony prevails among the members.

In the matter of Provincial associations, I may say that although there is no actual association in existence in the Maritime Provinces, nearly all the master plumbers in the large and important towns of Nova Scotia, Prince Edward Island and Cape Breton are connected with the Halifax Association, and we are merely waiting for the time when Provincial plumbers are strong enough to meet without the aid of the Halifax Association.

I wish to call your attention to the need of Provincial sanitary laws. The country is suffering for a simple set of sanitary laws that would apply to all plumbing work done in any part of the Dominion.

Further, every master plumber in Canada should pass a fair examination and hold a certificate of competency before being allowed to work at or carry on the business of plumbing. In view of the above, I beg to suggest that this Convention do present a petition to each of the Provincial Governments of Canada, asking them to pass the required legislation at their next meeting; and I would also suggest that the master plumbers be asked to sign the said petition. The petition should embody a draft of the proposed sanitary legislation, which ought to be simple and to the point.

I would also suggest that a similarly signed petition be presented to the Dominion Government, asking them to adopt a good standard plumbing specification; and that the proposed specification include a by-law or clause that none but properly certified master plumbers be permitted to work on plumbing done by the Dominion Government.

In conclusion, I wish to say that some of the supply houses have broken faith with the master plumbers during the past year, and in some instances have almost become competitors. It is my intention to place information before you in connection with the above, and ask you to deal with it during this session.

FRANK T. POWERS,
Vice-President, N. A. M. P.

The above report was referred to the Legislative Committee, excepting the clause re journeymen, which was referred to the Executive.

SECRETARY'S REPORT.

Ottawa, August 9, 1902.

Mr. President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

As secretary of the Ottawa Master Plumbers Association, I beg to report there are twelve members in good standing.

This past year marked considerable advance in the cause of sanitary reform. We have succeeded in gaining the attention of our municipal representatives. Just now the by-law is under the consideration of the Public Health Board. Herewith is a copy of the ruling of the city solicitor of Ottawa, for publication in the report, which I am sure will receive your earnest consideration.

(Copy.)

Ottawa, March 12, 1902.

H. A. Knox,
Secretary N. A. M. P.

Dear Sir,—Herewith I am sending you copies of two by-laws prepared by me for submission at the meeting of the Finance Committee to be held on Thursday even-

ing next. One providing for the licensing and regulating of plumbers, and the other for the regulation of plumbing work. I have prepared separate by-laws in these matters because they are quite distinct, and the council derives its authority with respect to each from different sources. The authority to license and regulate plumbers is given by the Municipal Act, and the authority to make regulations as to plumbing work, by the Public Health Act. If these by-laws should be passed their enforcement will be under the jurisdiction of different committees.

That relating to licensing and regulating of plumbers under the Finance Committee, and that relating to the regulation of plumbing work under the Board of Health. The Finance Committee will probably report these by-laws to the council for a first reading, after which they will be printed, and the one relating to licensing and regulating plumbers referred to the Finance Committee, and the other, relating to the regulation of plumbing work, to the Board of Health, before being finally passed by the council.

In framing the by-law relating to the regulation of plumbing work, I have followed very closely the Toronto by-law, as it seemed to me to be the most up-to-date and satisfactory of those submitted to me.

Yours truly,
TAYLOR McVEITY,
Ottawa City Solicitor.
H. A. KNOX,
Secretary Ottawa M. P. A.

VICE-PRESIDENT OF ONTARIO.

To the Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen :—As your executive officer for the Province of Ontario, I beg to submit the following as my report of work done during my term of office. During the years that I have been associated with the affairs of our Dominion Association I have endeavored to advance the interests of our Association, and have always been of the opinion that Provincial associations would be beneficial to our organization. This matter has been before our Dominion Association meetings for the last two or three years, and at our last Convention in Toronto provision was made in the constitution whereby the Province could organize into Provincial bodies. During the early part of this year several meetings were held with members of our Toronto Association on the advisability of starting the ball rolling (in our Province). The matter was left in the hands of the three members of your Executive residing in Toronto, viz.: W. H. Meredith, J. H. Wilson and myself. A letter was sent to the different local associations and to our Dominion President, asking their co-operation, and a meeting was arranged to be held in the city of Toronto on the 28th of March last. That meeting was called by invitation to all master plumbers throughout the Province, and I have much pleasure in stating that a strong representation of master plumbers answered in person, and many more by letter, sending their good wishes and success to our undertaking. Those who attended in person represented the cities of Brantford, Guelph, Hamilton, Ottawa, St. Catharines, St. Thomas, Toronto and Windsor, and the towns of Berlin, Barrie, Peterboro', Petrolia and Smith's Falls; and as a result of their deliberations a strong Ontario Provincial Association was instituted, as you will see by perusing the minutes of the business done at that meeting, several copies of which are here for distribution. I beg to thank particularly the members of this Association who attended and helped to launch the first Provincial boat in connection with this, our parent body.

I am very pleased to report that we are increasing in members from all over our Province, and while I am sorry to report we have no representatives from either London or Kingston, I think, in the near future to have the locals again installed in these cities, and a complete organization existing in our whole territory.

I am pleased also to report a very heavy business year throughout the Province, and while, perhaps, not as profitable as should be, I think, with proper organization and a closer acquaintance with each other, the profits will increase to a condition more satisfactory than at present exists, but will only be attained by having the utmost confidence one with the other, and social acquaintance as far as possible.

W. H. Meredith, Vice-President for Ontario, Toronto.

I am deeply grieved to have to report the death of our esteemed and honored brother, Alex. Fiddes, who was stricken with paralysis in his office, and practically died in harness. You who were at our last meeting will all remember the pleasant feature of a presentation made to our late brother at our banquet, and how his heart was too full to respond. We little thought at that time he was so soon to be taken from our midst. God grant that we may be all in as good condition to stand before our Maker as he was.

In conclusion, I wish to thank the members for the honor of Ontario vice-president conferred on me last meeting, and hope that this meeting will be successful in instilling into the hearts and minds of all our members the motto of our Dominion Association—All for one; one for all.

WM. MANSELL,
Vice-President, Ontario.

QUEBEC REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen,—As Provincial Vice-President of the Province of Quebec, I beg leave to submit my annual report for the year ending July, 1902. During my term of office my time has been taken up a great deal with our Montreal Association, more so this year than in the past. The Montreal plumbers and steamfitters went out on strike the 1st of May, and I estimate that there are still about 60 men out. Some of our members say there is a great many more than this number not working yet.

The Montreal Association is not flourishing as well as I would like to see it, but, still we are having a very healthy growth; we report an additional two members over our report of last year. Of course, we have made more new members than this, but some have dropped away from us. However, I expect we will have a much larger increase this coming year, for I think the strike has shown some of our master plumbers the error of their ways, and now there are many of them preparing themselves to be good.

I am pleased to hear of the great strides the members in Ontario have made. This shows good work on behalf of the Vice-President for Ontario, and well deserves the thanks of this Association.

I would strongly advise this honorable body, when electing Provincial vice-president for the Province of Quebec, to see that his first qualifications will be that he can speak the French and English languages. This has been a great drawback to me, not being able to speak the French language.

I expect to be able to do some work along the line of organization on my way down to Halifax. With the assistance of some of our members, we will do what we can in Quebec city. My opinion is, until we manage to get the cities of Quebec and Montreal well organized, there will be no use for a Provincial association in the Province of Quebec

The past year has been a prosperous one for the plumbing fraternity in Quebec, but the coming year promises to outshine the past.

I would recommend that one of the first committees appointed would be the Grievance Committee, so as to give more time to look up the complaints that may be submitted.

I thank you, gentlemen, for the honor shown me in electing me Provincial Vice-President at the last Convention. While my work has not been as successful as I would have liked, I have done the best I could, and my great desire is to see our Province well organized.

JOHN WATSON,
Provincial Vice-President for the Province of Quebec.

MANITOBA REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen,—As Vice-President in the Province of Manitoba, I submit the following report: It is to be regretted that we have not any representative from the newly-formed association at Winnipeg, but, considering the distance and the time involved in travelling, we could hardly

expect one at this Convention. I am sure that we all feel proud to have them affiliated with us, and I am confident that in the near future we shall have much more promising reports of the work that will be done in the great Western country.

I have to report of the preliminary work that has been done, particularly in the city of Winnipeg, and now that such a noble start has been made, we look for many new associations being formed.

You will have laid before you several communications from the new association, referring to matters of vital importance to this Association. It will be seen that they are spirited and anxious to have the co-operation and the support of the master plumbers throughout the Dominion. I, therefore, feel that we have reason to congratulate ourselves, and I am sure your honorable body will receive those of our Western country with open arms.

I may add that the per capita tax has been forwarded, all of which I respectfully submit.

F. G. JOHNSON,
Provincial Vice-President,
Manitoba.

BRITISH COLUMBIA REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen,—As Provincial Vice-President for the Province of British Columbia, I regret that I am unable to report any great work accomplished. I had thought to find time during my term of office to make a visit to friends in the West, and, combining business with pleasure, visit several of the cities and towns in the Province and organize local associations, but through pressure of business and other unavoidable circumstances I found it impossible to get away from home. Early in the year I wrote nearly all the master plumbers in the Province, notifying them that in the absence of a representative from the West, I had been appointed Provincial Vice-President for British Columbia, and when the annual report was published, I secured a number of copies and distributed them throughout the Province, with a letter, advising the formation of local associations and affiliation with the National Association; and advancing many good reasons why master plumbers all over the Dominion should unite, also drawing their attention to the formation of Provincial associations as required by our constitution. I have had a number of replies (not as many as I expected or would have liked), some asking for information, others complaining bitterly of the unfair treatment received by them at the hands of some of the manufacturers and supply men.

I also had several requests for our Toronto local association by-laws and price lists, which I forwarded and have received one reply, stating that they had organized and expected in a short time to be in full running order with no outsiders.

As far as I have been able to learn the difficulty of forming local associations in British Columbia, with one or two exceptions, seems to be that the cities and towns are far apart, and in many instances only two or three plumbers in one place—in some cases only one. Feeling satisfied that a Provincial association would overcome the difficulty, and with that end in view, I wrote a number of the prominent plumbers of the various cities and towns through the Province, notifying them that we were about to form a Provincial association in Ontario, and as soon as the report was published I would send them copies. Those I have since sent, especially drawing their attention to clauses four and five in the constitution and by-laws, which fully cover the difficulty at present existing. So far I have had no replies, but judging from the correspondence I have had with master plumbers in the West, they are beginning to feel the want of thorough organization; and I have no doubt that in the near future there will be a Provincial association in British Columbia.

In conclusion, let me say that I hope the good work started in Ontario will be carried on and that before another Convention every Province in the Dominion will have a similar association, thereby bringing us in closer touch, one with the other, in the interests of all.

Below is a list of nearly all the prominent plumbers in the West: M. Dumond.

H. A. Knox, Chairman of Apprenticeship Committee, Ottawa.

Ashcroft; Jas. Munro, Chilliwack; Geo. Chapple, Grand Forks; Geo. Pattison, Grand Forks; Tilslet & Bishop, Greenwood; Bailey Bros., Nanaimo; Corbett & Co., W. E. Vanstone, New Westminister; Hebner & Hebner, Strachan Bros., Nelson; McLean & Conway, Phoenix; A. S. Hunden, H. F. Busch, G. M. Weller, Rossland; Trail Hardware and Plumbing Co., Trail; M. S. Rose, W. A. Brown, Otto Laursen, J. G. Mortimore, W. Leek, Barr & Anderson, Peach & Christie, Thos. Marshall, Knowdell & Hodgson, Jas. Hughes, Chas. Peters, Burkholder & Green, Weeks & Son, Vancouver; C. M. Cookson, J. H. Warner & Co., Watson & McGregor, A. & W. Wilson, Jno. T. Braden, City Plumbing Co., Jno. Colbert, Clayton & Costin, Clark & Pearson, E. F. Geiger, Hickman - Tye Hardware Co., J. T. Orr, A. Sheret, Victoria; W. Head, Calgary, Alb.; Shotton & McClughan, Kamloops.

Respectfully submitted,

J. H. WILSON,
Prov. Vice-Pres. B. C.

NOVA SCOTIA REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen,—As it is customary, I beg to submit a short report for the year 1902. As regards the Halifax Association, they still keep well to the front.

Last year's report shows that the Halifax Local Association came next to Montreal, "which has the largest association in the Dominion," and I feel fully assured that after the Convention we will be able to swell our ranks and become the banner branch of the Dominion of Canada.

We cannot make much gain in the city, as all the master plumbers are members of the association; it is the master plumbers outside that we want interested, and I think that after the Convention is over we will be able to show the plumbers outside of the city that it will be to their mutual as well as financial benefit to become members of our association.

I have been informed that the master plumbers of Sydney, C.B., are forming an association and it is their intention of amalgamating with the Halifax branch. There are eight master plumbers in Sydney, two of which are now members of our association; the members are, namely, Frank Power and Frank Bayers, formerly of Halifax, but who are now doing business in Sydney, and with two such men to guide them I have not the least doubt that it will not be long before we hear of very good results from Sydney.

I see by the report of the last Convention that the chairman advised the Provincial vice-presidents to put themselves in communication with the plumbers in the Provinces they represent, with a view to the formation of Provincial associations. I might say I have done but very little as I did not know how it could be worked in Nova Scotia satisfactorily, as in seventeen towns we have only about thirty-five members. "This does not include Prince Edward Island or Cape Breton," and the constitution reads when less than five master plumbers are located in one town they must become members of the nearest local association.

The only thing remaining for us to do is to get all or as many as we possibly can to join our association, and I have not the least doubt that the meeting of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada shall be of great assistance to the Halifax branch in bringing the master plumbers from the surrounding country into the association.

I might also state that we have a first-class plumbing law, which has been a great benefit, not only to the citizens of Halifax, but also to the master plumbers. Our journeymen plumbers have to pass a practical, also theoretical examination. The board consists of the city engineer and the plumbing inspector, who is a practical plumber; but our association has advised a master plumber of the city of Halifax on the board of examiners, which I think would be quite an advantage to the board.

However, this will take time, and we hope that in the near future that we will have a plumbing law and an association

that will be second to none in the Dominion of Canada.

GEO. A. FERRIER,
Vice-President for Nova Scotia.

MONTREAL REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen,—I have pleasure in presenting the seventh annual report of the Montreal Association, and in doing so must allude to the satisfaction the Montreal members feel in at last meeting witn our fellow members down by the sea.

I express the wish and hope of all the members of our association that this is but the first of many similar meetings, and that in the future as in the past, our friends from the Maritime Provinces of our country will continue to visit us in increasing numbers.

The Montreal Association has met with a reasonable amount of success during the past year ; our membership has been increased by nine, and we have lost three members by resignation as for other reasons.

Largely owing to the efforts of our association sanitary matters are kept well to the fore in our city. After many years of constant agitation, we have at last seen our efforts to banish the most unsanitary feature of our city bear fruit. This year the death-dealing privy pits are being done away with and sanitary water closets fitted in their place. We have not the slightest hesitation in saying that the effect of this most important sanitary measure will be shown in the near future in the decrease in the death rate, especially among our infantile population, which at the present time is alarmingly high.

Our plumbing by-law has proved helpful, but like all things human it is not perfect, and efforts are being made to have it amended in some points. More especially is it necessary that the journeymen should be examined before being allowed to practice, if good health is to result from good plumbing.

The most striking feature of the year was " the strike " in which the men as a whole were successful. The benefits of organization were demonstrated during the strike, and the necessity of having every respectable master plumber a member of our association was brought to bear on us in a practical way as it had never been before.

Our relations with our friends, the wholesale dealers and manufacturers, are pleasant and cordial, but there are still certain matters in which a more loyal adherence to agreements by both the masters and dealers would be mutually beneficial.

THOS. MOLL,
President.

SANITARY REPORT.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Gentlemen,—Your Sanitary Committee have the honor to report that during the past year there has been no falling off in the interest taken by the public in sanitary matters. The educational campaign, begun some years ago by the doctors, the press and the pulpit, has been kept up and is from year to year producing an increased interest in this important matter.

Statistics show that the average duration of life has been considerably prolonged, the great gain being along those lines in which we are more particularly interested.

Domestic sanitation, while some diseases continue to carry off their unfortunate victims at the former rate, those diseases known to be the result of filth, impure food and foul air ; in other words, diseases produced by controlable causes, are yearly becoming less fatal and frequent.

As good plumbing is now acknowledged to be a most, if not the most important feature in bringing about this satisfactory state of affairs.

Your committee feel that our master plumbers are reaping the reward, of the time, energy and means they have employed during the past, and can honestly be congratulated on the fact that their labors have not been in vain. While that is the case, our vigilance must not be relaxed ; we are only on the threshold and at the very beginning of our work,

THE PLUMBERS' CONVENTION—A GROUP OF THE DELEGATES.

Photo. by Gauvin & Gentzell, Halifax, N.S.

which must not cease until certain diseases, now so prevalent, are as rare as the once so deadly typhus fever.

The old simple form of plumbing has no longer a "raison d'etre." New methods, improved apparatus and materials are being constantly brought into the market, and under keen business pressure, pushed in a manner formerly unknown. The plumber of to-day must be in a position to distinguish the good from the bad, and protect the public and himself from imposition, for the old adage "that all is not gold that glitters," is constantly to be borne in mind in this connection.

While the many changes may, to a certain extent, have reduced the necessity of "knowing how to do," the reasons for knowing the "why" have increased tenfold. Education in the sciences forming the basic principles of our art is to-day more than ever necessary.

The great question in the opinion of your committee is, how are young men, the plumbers of the future to be trained? A knowledge of the skill of hand it is already difficult to attain in the shops. Where are they to attain the scientific knowledge so indispensible if they are to rank as more than skilled laborers and be competent to undertake work on the correctness of which, to a large extent, depends the safety of our people's most valuable and important asset—"Good Health?"

Can it be had in the colleges? Yes, but plumbers do not attend these important seats of learning. The common school. No. Such training forms no part of the common school course. The technical school? Perhaps in a modified form. Then there seems to be no other alternative than that of establishing in all large centres first-class plumbing schools, such as that founded by the late Colonel Auchmuty of New York.

In conclusion, your committee earnestly commends the question of the education and training of the plumber of the future to the serious consideration of our Association.

Respectfully submitted,

JOHN WATSON,
F. W. HARRIS,
J. P. CARROLL,
THOS. MOLL,
JOS. HUGHES,
Chairman.

LEGISLATIVE COMMITTEE.

To the President, Officers and Members of the National Association of Master Plumbers, Gas, Steam and Hot Water Fitters of the Dominion of Canada.

Your Legislative Committee beg to submit a brief report that they have not had any legal matters referred to them during the term now ending, but we are happy to report that the trouble referred to at our last Convention regarding opinions given by the city solicitor of Ottawa, in which he states that the city solicitor has now the power to enact such laws as would be workable and beneficial. It now appears that the officers have changed his ruling somewhat, and that cities and towns throughout the Province of Ontario may enact such laws under the general Act of the Dominion.

A full explanation has been given in writing and will be referred to in our secretary's report. Your committee would recommend that the cities and towns throughout the Province of Ontario lose no time in seeing that these laws be enforced, and we would refer you to what passed at the last Convention held at the city of Toronto, referring to Provincial vice-presidents instructing those officers to appoint committees in the different localities.

Your committee would advise that the executive secretary notify members of the different committees at the earliest opportunity after their appointment; also, that the first-named on such committees be convenor and he shall have his report forwarded to the executive secretary five days previous to day of holding Convention. All of which we respectfully submit.

F. G. JOHNSON.

On motion, the foregoing reports were referred to the Committee on Resolutions.

AMENDMENTS TO CONSTITUTION.

Under the head of new business, the following notices of motion to amend the constitution of Provincial Associations were presented by the Ontario Provincial

G. A. Perrier, Secretary, Halifax, N.S.

Association, and after some little discussion the same were adopted on motion.

Notices of motion to amend the constitution of Provincial Associations, as proposed by the Ontario Provincial Association:

1. That clauses 4 and 5 of Provincial Association Constitution be struck out and the following inserted:

"Local Associations may be formed with three members in towns where not more than four master plumbers are located, or with five members where five or more are located; where less than three they may become members of the nearest local Association and the Provincial Association; or in towns where less than three master plumbers are located, two or more towns adjacent to one another can unite in forming an Association of not less than five members."

2. That the word "Cushing's," in second line of clause 10, be struck out, and that the word "Bourinot" be inserted.

3. That the following words be added after the word President in fourth line of clause 12: "Or in the absence of the President and Vice-President, the Past President shall preside"; that the word "both," after the word "should," be struck out and the word "all" inserted. Clause so amended would then read: "The duti s of the officers of this Association shall be the same as in all civic societies, unless otherwise specified by the constitution and by-laws, the Vice-President taking the chair in the absence of the President; or, in the absence of the President and Vice-President, the Past President shall preside; and should all of these, etc."

VISITORS.

Visitors present during the Convention were:

Charles B. Naylor, J. G. Crump, E. Davidson, J. W. Power, J. McFatridge, C. P. Hill, H. Elford, G. Kinsman, M. Day, A. Donovan, W. S. Craig, Geo. Rent, all of Halifax.

The secretary read a letter of greeting from the president of the National Association of Master Plumbers of the United States, also enclosing a copy of Cleveland resolutions lately adopted by that Association.

At the request of the president the vice-president was about to read the above resolutions for the information of the Convention, when the tyler announced that a deputation of the manufacturers and supply men was at the door. On motion, business was suspended while the deputation was present, which was composed of the following gentlemen: Peter McMichael, of The Dominion Radiator Co., Toronto; Thos. McA. Stewart, of T. McAvity & Son; John Keeffe, of James Robertson Co., St. John, N.B.; John Carland, Star Iron Co., Montreal; Capt. J. H. Wynne, Gurney-Massey Co., Montreal; Arthur Betton, Jas. Morrison Co., Toronto; M. C. McRobbie, James Robertson Co., St. John, N.B.; N. P. Baxter, Webb Manufacturing Co., Montreal; ———. Forbes, Stairs, Son & Morrow, Halifax.

The president, in a few words, welcomed the delegation on behalf of the Convention.

Each member of the delegation responded suitably, and then a very interesting discussion on the trade relations existing between the manufacturers and supply men and the master plumbers ensued.

At 4.30 o'clock the meeting adjourned to meet again the following morning at 9.30 o'clock.

A PLEASANT DRIVE.

An invitation to a drive had been tendered to the delegates by The James Robertson Co., Limited, St. John, N.B., for the afternoon. About a dozen carriages formed in line into which the delegates and guests entered and were given an extensive drive around the city.

THURSDAY'S SESSION.

The president took the chair at 10.30 o'clock.

The President nominated the following as a nominating committee: J. H. Wilson, John Watson and A. G. Perrier.

NEXT PLACE OF MEETING.

Mr. Ogilvie nominated Montreal. Mr. Meredith would like to have nominated Toronto, but gave way to Montreal, which was then unanimously adopted as the place of meeting for the next annual convention in 1903.

A SURPLUS.

The treasurer's report was then read showing a balance on hand, after paying

delegates' charges and cost of reporting Convention, of $38.

The auditors' report was read, confirming the statement, and on motion the whole was received as read and adopted.

OFFICERS FOR 1902-1903.

The following officers were elected for 1902-1903 :

President—Frank Powers, Lunenberg, N.S.
Vice-President—P. C. Ogilvie, Montreal.
Secretary—G. A. Perrier, Halifax, N.S.
Treasurer—Ald. Jos. Lamarche, Montreal.

Provincial Vice-Presidents—

W. H. Meredith—Ontario.
Jas. Farquhar—Nova Scotia.
Wm. Watson—New Brunswick.
H. Mahoney—British Columbia.
A. J. Hammon—Manitoba.

Standing Committees—

Legislative—Fred. Armstrong, Toronto.
Apprenticeship—H. A. Knox, Ottawa.
Sanitary—J. W. Hughes, Montreal.
Essay—Jas. Pennington, Windsor.

Mr. Meredith moved a hearty vote of thanks to the retiring officers, and much regretted that we are losing from the Executive, Mr. Mansell. Mr. Egan seconded the motion and a standing vote was taken.

Past President McKinley suitably responded to the vote and expressed the pleasure he had had in doing the work of the Association. He did not think he could have got through the work efficiently without the valuable assistance of Mr. Knox, the retiring secretary.

Mr. Knox, in a few remarks, acknowledged the vote of thanks. Suitable responses were also made by Mr. Mansell, the retiring vice-president for Ontario ; Jno. Watson, retiring vice-president for Quebec, and J. H. Wilson, retiring vice-president for British Columbia.

MOTION OF CONDOLENCE.

The death of Alex. Fiddes since the last Convention was the occasion of a vote of condolence being moved by W. H. Meredith, of Toronto, who, in the course of his remarks, stated that there was no more honored member in the National Association, and also of the Toronto Association, of which Mr. Fiddes was the father. Mr. Meredith suggested that a letter of condolence should be sent to the bereaved family.

The motion was seconded by John Watson, and duly carried by the Convention.

VOTES OF THANKS.

Votes of thanks to the Halifax Reception Committee were moved, seconded and carried by standing vote and singing lustily "For They are Jolly Good Fellows."

A vote of thanks was unanimously passed and the secretary instructed to forward the same to the following : R. L. Borden, M.P.; Stairs, Son & Morrow Co.; James Robertson Co., St. John, N.B.; S. M. Brookfield, and Public Garden Commissioners, Halifax.

Adjourned to 2 o'clock.

AFTERNOON SESSION.

The president took the chair at 2.30 o'clock.

The president named the following as the Press Committee : F. G. Johnston, H. Mahoney and Mr. Kinsman.

AN ORGANIZER SUGGESTED.

Mr. Lamarche, in the course of a general discussion, called attention to the improved condition of things as compared with what existed before the organization of the Association. He then drew attention to the appointment of an organizer. It was too late now to bring the matter on, but it could be discussed during the coming year in all local associations.

REPORT OF RESOLUTIONS COMMITTEE.

This report of the Resolution Committee was received, and, on motion, discussed clause by clause.

The recommendation to adopt the

John McKinley, Past President, Ottawa.

president's report was, on motion, carried.

The vice-president's report occasioned discussion on the clause re the registering of journeymen plumbers.

The writer of the report explained that he wanted to raise the tone of the workmen, and to obtain more efficient work.

Ultimately the vice-president's report was referred to the Legislative Committee, except the clause dealing with journeymen, which was passed on to the Executive.

SANITARY COMMITTEE'S REPORT.

This was referred to the Legislative Committee. The report was adopted as read.

The report of the Resolution Committee was then adopted as a whole.

Mr. Meredith called attention to the copy of Cleveland resolutions, which, by the courtesy of the president of the National Association of Master Plumbers of the United States had come into the possession of the Dominion Association, and he would like the members to become acquainted with it. On motion, it was left to the Executive Committee to see that copies were forwarded to the local associations to be discussed by them and brought on again at the next Convention. This concluded the business of the Convention, which, on motion, is to meet at the call of the Executive in Montreal.

All the members joined heartily in singing "Should Auld Acquaintance be Forgot" and the National Anthem.

THE BANQUET.

The banquet given by the Halifax Master Plumbers at the Queen Hotel, on Wednesday evening, was equal to anything ever given by the Association before in that line, while the number of distinguished guests present and the array of talent and the oratory displayed by some of the speakers will make the occasion memorial and cause it to stand out as unique. Among the more conspicuous personages who were present, we noticed the following : R. L. Borden, M.P.; the Mayor of Halifax ; the Deputy-Mayor of Halifax ; Attorney-General Longley ; Senator Power, Speaker of the Senate ; Wm. Roche, M.P.; Hon. Mr. Drysdale, M.P.P.; Geo. Mitchell, M.P.P.; J. Keeffe, M.P.P., and Mr. Campbell, President of the Board of Trade.

President Frank Powers sat at the head of the cross table and was supported on his right by Attorney-General Longley, of the Provincial House, and on his left, by the Mayor of Halifax. Covers were laid for over 100 guests, and the menu was all that could be desired, of which the following is a copy :

SOUP.

Consomme a la Franklin.
Puree of Chicken a la Reine.

FISH.

Boiled Fresh Salmon, Remoulade Sauce.
Sliced Cucumbers.
Olives. Radishes. Sliced Tomatoes.

ENTREES.

Cotelettes de Veau aux Petits Pois.

JOINTS.

Roast Young Lamb with Mint Sauce.
Roast Spring Chicken with Bread Sauce.

VEGETABLES.

Cauliflower. Mashed Potatoes in Cream.
Green Peas.

ENTREMETS.

Steamed Plum Pudding, Cognac Sauce.
Raspberry Short Cake with Whipped Cream.
Vanilla Ice Cream with Sponge Cake.
Cheese. Crackers.

FRUITS.

Oranges. 'Nuts and Raisins. Bananas.

TOAST LIST.

1. His Majesty the King.
2. Our Visiting Delegates.
3. The Dominion, Local and Civic Governments.
4. The Manufacturing and Supply trade.
5. The Land we Live in.
6. The Board of Health.
7. The Fair Daughters of Canada.
8. The Press.
9. Our Guests.

First toast, "The King," responded to loyally by all standing and drinking to the health of His Majesty and joining with spirit in the singing of the National Anthem.

THE VISITING DELEGATES.

The second toast, "Our Visiting Delegates," had the names of President McKinley, Secretary H. A. Knox, W. H.

Use "HEINTZ" Steam Traps.

SEP 8 1902 RETURNED

Use "J.M.T." Valves.

UP-TO-DATE

Plumbers' Supplies

"J.M.T." Cushion-Disc Bibb.

GREENAWAY.

THE JAMES MORRISON BRASS MFG. CO., LIMITED

89-97 West Adelaide St., - - - TORONTO.

Meredith and Ald. Jos. Lamarche coupled with it.

President McKinley said it gave him much pleasure to be present, but, as he was not feeling well, he asked permission that W. H. Meredith reply more fully in his behalf.

W. H. Meredith said he had been looking forward with great pleasure to coming to Halifax, and meeting his confreres in that part of the world. He assured them that the realization was greater than the anticipation. Our body is not at all times looked upon with the highest regard, and he was glad to see before him memebers of the Dominion Parliament, the Provincial Legislatures, and the municipal body. Efforts will be made soon to appeal before the Legislature for laws to govern the sanitary conditions of our cities.

He appeared to remember that a year ago he reminded them that there was a mountain before them, but that had been surmounted and now there is not even a bluff before them.

Ald. Jos. Lamarche, of Montreal, said he had great pleasure in being there, at such a great banquet, which was not surpassed in any other place they had ever met. " When business is concerned, when life is in danger, there is no creed or nationality. We never thought that in such a short time that we should meet such distinguished people who are friendly to our fraternity. You have in this city to-day two classes of people who deserve your attention. They deserve to be best served. We, however, consider ourselves higher than the manufacturers, because we have to so utilize their goods that the people for whom we do work shall become manufacturers."

Before leaving he would ask one favor. It was that next year he hoped to have the pleasure of seeing them in Montreal. There they might not receive all people of the same nationality, but their reception would be hearty and sincere.

SENATOR POWER.

The next toast, " The Dominion, Local and Civic Governments," was responded to by Senator Power, Speaker of the Senate. He began by saying that when he was young, he was somewhat of a devout turn of mind, and used to repeat a hymn running as follows :

I want to be a plumber,
And with the plumbers stand,
A helper by my side
And a wiped joint in my hand.

He regretted that the Hon. Minister of Public Works, who was to have been there, had been detained elsewhere, because he has been charged with an expenditure of $6,000,000 per year, and very much of this goes into buildings of various kinds, which necessarily entail considerable work for the plumber. He, the speaker, had had experience with plumbing, more particularly with their bills. He could not say much as to the work done, but the bill could be seen with the naked eye. The business and science of plumbing are very important, for, if a plumber does not do his work well poison comes into the house, and then death often ensues. He expressed his great pleasure at being present, and wished the Association every success.

MR. R. L. BORDEN, M.P.

R. L. Borden, M.P., said he had no fault to find with the speech of the Hon. Senator, except to say that he had most scandalously neglected the Government in Canada.

" I suppose I may speak for the Government of Canada in one sense, and that is the sense in which we look upon the House of Commons—the administration of Federal affairs has been the Government of this country. There is a good deal of fault with the administration of the affairs of this country, whichever party may be in power."

He was delighted that the plumbers had seen it possible to come to Halifax. He recognized that the profession to which he belonged, and the plumbing profession, were akin in this : for their extreme moderation in their charges. In that sense he felt thoroughly at home.

MR. W. ROCHE, M.P.

Wm. Roche, M.P., was glad that the plumbers had remembered the Dominion Government, and of giving him the opportunity of making their acquaintance. Plumbing was one of the most useful of the arts. It ministers much to the comfort and happiness of our homes. His distinguished colleague had spoken of points of resemblance between the legal and plumbing professions. There might be soft solder in that, but he thought the strongest point of resemblance was the manner in which they were regarded by a deluded and sceptical populace.

HON. MR. DRYSDALE.

Hon. Mr. Drysdale, M.P.P., Minister of Works and Mines, representing the local Government on this occasion, said it gave him great pleasure to be present, and to find an association of this kind visiting the city of Halifax. He trusted that they would not visit this Province without finding out something they did not know before. He had listened to the references made to the plumbers, and he did not know a more long-suffering people than these same plumbers, who had to listen to such slanders of themselves. He regarded the calling of the plumbers as a scientific one, and one of great benefit to humanity.

MR. GEO. MITCHELL, M.P.P.

Geo. Mitchell, M.P.P., of the Local House, referring to the recent visit of the Civil Engineers, and Manufacturers, said : " And now the plumbers are here. These gatherings must be very beneficial in permitting of interchange of thoughts and ideas. He was glad that Mr. Lamarche had spoken of plumbing as a profession. Great improvements have taken place in the sanitary laws in the past 15 years. As one of the members representing the constitutency in which they had met, he extended to them a cordial welcome.

MR. KEEFFE, M.P.P.

Mr. Keeffe, M.P.P., said there had been a swing of good-fellowship connected with the proceedings which had made all feel very much at home. He was very sorry that a body like this did not exist years ago, as a great deal of sickness might have been avoided.

THE MAYOR OF HALIFAX.

Mayor Crosby, of Halifax, spoke of the difficulty in his responding to the toast after six eloquent and intelligent gentlemen had dealt with it. Speaking for the city of Halifax, he was delighted to welcome the members of the National Association of Master Plumbers' of Canada.

Deputy-Mayor McIlwraith also spoke on behalf of the city.

" Manufacturing and Supply Trade." This was replied to by Peter McMichael, manager of The Dominion Radiator Co ; Thos. McA. Stewart, of T. McAvity Co ; Capt. Wynne, of The Gurney-Massey Co.; John Keefe, of Jas. Robertson & Co., St. John, and Mr. Baxter, of Webb Manufacturing Co., Montreal.

HON. MR. LONGLEY.

" The Land we Live In." This toast, unfortunately, was given at a very late hour and left but little time for the very able and distinguished gentleman, who was to reply to it, the Hon. Mr. Longley, Attorney-General for Nova Scotia. He began by saying he wanted to bear witness to one thing—that he had before him as patient a body of men as he had ever addressed. They have traits they had never before been credited with.

" If the hour had been earlier and the circumstances more propitious, there was a vast deal that any man with any pretence to patriotism might say on behalf of this great and vast Dominion ; it is the heritage of everyone who calls himself a Canadian.

" There was a time, perhaps, when the people of Nova Scotia were not quite in love with everything that pertained to Canada, but that was a rebellious and stiff-necked generation. Now, there is no part of this wide Dominion, from the Atlantic to the Pacific, where Canadian sentiments find more prominent and thorough-going professions than in the Province of Nova Scotia.

" The Dominion of Canada to-day has the promise of being one of the greatest and most powerful and progressive nations that the world has ever seen. When its varied resources are examined it is found that they are not surpassed by any nation existing. On the basis of quality it is recognized that its population, not by numbers, but by character and moral fibre, are unsurpassed by any peoples in the world. But even as regards population, he believed he was correct in stating that the time is not far distant when Canada will occupy the position of a country with many, many tens of millions of people with enormous resources, with constitutional laws and Government that will challenge the admiration of the world and place her in the very forefroot of civilization and commercial progress of the world."

There was a great deal more that he would liked to have said, but the hour was late and he would conclude by saying it gave him the greatest possible pleasure to mingle with them.

OTHER TOASTS.

Mr. Campbell, President of the Board of Trade, in a few words expressed the satisfaction it gave him at being present.

The other toasts were suitably responded to and the function brought to a close by singing " God Save the King."

Taken altogether the Master Plumbers' Associatian must feel proud of the recognition and esteem which they are steadily more and more compelling professional gentlemen, statesmen, and the public at large, to give them.

DELEGATES VISIT THE HARBOR.

After the conclusion of the Convention Thursday afternoon the delegates and friends were given a trip up the harbor to Bedford by the generosity of Stairs, Son, Morrow & Co., of Halifax. A sumptuous supper was provided and everything done to make the trip a delightful one.

IMPRESSIONS OF THE PLUMBERS' CONVENTION.

By W. H. MEREDITH, Toronto.

THE Seventh Annual Convention of the National Association of Master Plumbers has gone into history as an event of the past, but the pleasant and profitable time spent at Halifax will be fresh in the memories of the delegates when many more Conventions will have come and gone.

One can hardly discuss the business aspect of the Convention so soon after enjoying the pleasure part of the programme; and, while I am dealing with the important business transacted, I must not fail to notice some of the good things that were in store for us. First, I must mention the trip down, and, secondly, the royal reception tendered us by the Halifax and Maritime Association.

The delegates from Western Ontario joined the Toronto delegates at The Richelieu & Ontario Navigation Company's wharf and boarded the palace steamer Kingston. After good-byes had been said, the signal was given and we gracefully glided out into the waters of Toronto Bay, on out into the blue waters of old Ontario, on to Charlotte, to Kingston, then down the St. Lawrence, through the 1000 Islands to Prescott. Here a change was made to the river boat Columbia, then through the rapids, reaching the commercial metropolis on time. After a short rest we proceeded to Quebec, the Ancient City. We spent the day visiting the historic sights, including Montmorency Falls.

In the evening word was passed around "On to Halifax," which city was reached about 7 p.m. next day. The reception committee boarded the train at Windsor Junction, and from that on until the last good-bye was said every moment was occupied. It was a contest between business and pleasure, with the odds seemingly in favor of the latter.

A few business sessions were sandwiched in, always to be remembered for the great interest manifested in the main object of the Convention, "the interchange of thoughts and ideas along the lines of scientific sanitation." This is why we organized some six years ago, to elevate our profession, to have such laws put upon the statute books of our country, that shall require all who follow our profession to have at least a thorough technical knowledge of the science of sanitation and an artistic regard for placing the various plumbing fixtures, to enable the bath-rooms of our homes to be fitted up not only in the most up-to-date sanitary methods, but also with a due regard to beauty and neatness. I could not but be struck in listening to the various officers' reports and the discussions that followed how thoroughly this idea has influenced the minds of the profession. The rule in the past has been, owing to such keen competition, to see just how near one could come to keeping the municipal laws on sanitation without breaking them. The rule, I firmly believe, in future will be to live beyond the laws and at the same time an endeavor will be made to have the most stringent laws enacted that shall not only be a protection to the conscientious plumber, but a safeguard to the health of the public. The wives and the children, the homes in our fair Dominion must be kept pure from the death-dealing gases that may enter where proper care is not used in installing the plumbing arrangements.

It was with some feeling of doubt as to the wisdom of taking the Convention so far away that the delegates left home. No such idea prevailed on the homeward journey. The Maritime master plumbers are a wide-awake lot of fellows and can certainly mix business and pleasure to perfection.

The Westerners certainly derived a great benefit in brushing up against their craftsmen by the sea. The many kind expressions of good-will extended by the manufacturers and jobbers showed that they fully appreciate the fact that it is to the interests of the master plumbers to unite no more than to the interests of the supply houses.

Ontario, Quebec, New Brunswick, Prince Edward Island and Nova Scotia were represented by regular delegates; Manitoba and British Columbia by proxy.

The outcome of the Convention will certainly be the organization of Provincial associations. Ontario gave such a glowing report of benefits derived since they organized only six months ago, that the other Provinces will surely fall into line.

In conclusion, I but express the sentiment of the entire delegation in saying how much we regretted parting with our Halifax friends. Let the motto for 1902-1903 be, "Organize, organize, and on to Montreal in 1903."

NOTES OF THE CONVENTION.

The pleasant memories of Halifax will not soon be forgotten.

Manitoba's greetings: "We are with you; success to the National Association!"

Was it thoughts of loved ones at home that caused friend Armstrong to throw such zest into his response to the toast "Fair Daughters of Canada?"

Joseph Wright's smiling face and pleasant voice caused great pleasure more than once.

Friend Wilson's rendering of Scotch songs made his hearers wish that Jim had been born in Ireland.

Five good men pass out of active service this year, Messrs. Mansell, Wilson, Knox, Watson and Gerieux.

Features of the Convention were the carriage drive, the banquet, the sail on the harbor, and lunch at Bedford.

The new blood is Messrs. Perrier, Farquhar, Watson, of New Brunswick; Lesperance, Ogilvie, Mahoney and Hammond.

What happened to Toronto's male quartette? Car No. 7 was a floating concert hall. Leader McMichael was a "peach."

Past-President McKinley has been attached to the Montreal Executive. So good a man cannot be let out of harness just yet.

Many of Nova Scotia's distinguished men graced the banquet by their presence and added not a little to the pleasure of the evening.

The new president has caught the right idea to advance the interests of the Association; let us hope he may bring them to a successful issue.

Wake up, Quebec, wake up! Don't let your enders, Ontario and the Maritime Provinces, beat you. Montreal is well organized; why not the Province?

What tune will Nova Scotia's trio, Powers, Perrier and Farquhar, sing at the next Convention? Will it be "We have done our duty and the Maritime Provinces are in line?"

Was the strain of business or too full enjoyment of pleasure responsible for the shrieks of fear from President Power when about to take a bracer in the salt sea? After all, it was only a six-inch eel—not a sea serpent.

In a Liverpool school lately a number of scholars were asked to explain the meaning of the term "righteous indignation."

One little chap replied:

"Being angry without cussing."

CANADIAN MANUFACTURERS' ASSOCIATION.

A SKETCH OF THE ANNUAL CONVENTION.

LAST Tuesday morning I was in St. John, where I received a telegram from my firm in Toronto (they are importers) to take a flying trip to Halifax to see one of our customers. Like a true business soldier, I obeyed the order nonchalantly. Much to my disgust, I found my customer out of town, and I was beginning to regard my side trip as a disappointment. But it wasn't. Falling in with one of the visiting manufacturers (and to be on the winning side I must needs fall in with them, for they had taken possession of the town) I wandered over to the Legislative Council Chamber in Nova Scotia's old Parliament buildings to attend the opening function of The Canadian Manufacturers' Association convention. In many respects it was like all receptions, warm in welcome and appreciation. But when at the conclusion President Munro read his address, which had, as its component parts, patriotism and practical ideas for the advancement of Canadian industry, I thought to myself here I am in a notable gathering, and I began to thank the fates or whoever it was that translated the spirit of my customer's grandmother to another world and had called him out of town to attend the obsequies. It was then I discovered what brought those 150 leading business men from British Columbia, Manitoba, Ontario and Quebec down to the Maritime Provinces to meet their fellow manufacturers. It was then I saw that the interests of Canadians are identical, if they are made so in conference. It was then I saw that this was more than a "red parlor" meeting called to devise ways and means to satisfy the greed of our "most insatiate" industrial class. Everything was open, except one secret meeting. Curiosity led me into that under false pretences, and the only question in regard to the convention I have not satisfactorily answered is—why was that meeting secret? Every word uttered was permeated with Canadian public spirit, and I am sure that the people of Canada would have appreciated the courtesy, and would have remained satisfied had they been informed of the process of reasoning taken by the manufacturers to arrive at their tariff conclusions, and of the means adopted to accomplish their ends in this direction.

"No, never have I come out of a more inspiring series of meetings and I regard my visit to Halifax as one of infinite blessing. I am a better man for myself, for my firm and for my country." That is a bona fide opinion expressed by a commercial traveller at the conclusion of the convention.

A GIGANTIC TASK.

The Canadian Manufacturers' Association (incorporated) is setting itself to a gigantic task and it will need all the strength that it can muster to accomplish that task successfully from the fact that it is the largest manufacturers' association in the world. Primarily, of course, it is organized to protect the manufacturing industries of the country, to conserve the Canadian market for Canadian woollens and Canadian capital, to secure proper legislation and squelch improper legislation affecting our manufacturing or trade interests; and, in a word, to properly direct our commercial Government. It aims to present the views of all Canadian manufacturers in a harmonious form. There are all sorts of opinions and politics in the organization, but at the meetings Canadianism rules and any resolution that is passed has been adjudged according to the best interests of the country.

But the Association has not contented itself with passing resolutions, nor is that the major duty of the annual meeting, which is mostly concerned with receiving the reports of the committees that have been actively engaged during the year and to decide on the line of work for the ensuing year. At the head office, beside the Executive Conncil, which meets monthly, there are the Tariff, the Commercial Intelligence, the Reception and Membership, the Industrial Canada, the Parliamentary, the Exhibition, and the Railway and Transportation Committies. There are branches of the Association in Toronto, Montreal, Nova Scotia, Winnipeg and Vancouver with special executives at each centre to concern themselves with local affairs and to bring suggestions before the Executive Council. There are sections of the different trades to guard the interests of each trade. And yet consolidation has only commenced. The work has gone on actively during the past year and the reports brought in all told of "accomplishment," evincing earnestness and energy, but it would seem that the more the Association does, the more it wants to do. Perhaps one of the most convincing proofs of its positive usefulness was the recent telegram from the Postmaster-General to the Secretary of the Association informing him that the Ministers in England were arranging for a direct line of steamers with South Africa and asking him when he could fill the first boat. But of the detailed work of the Association we shall speak later. Meanwhile that is sufficient to justify 150 of our leading business men in going all the way to Halifax to attend this meeting. Those who registered were as follows:

THOSE WHO WERE THERE.

Watson, Canada Sugar Refining Co., Montreal; Geo. M. Taylor, Vancouver Engine Works, Vancouver, B.C.; Chas. Frosst, Chas. Frosst & Co. Montreal; C. M. Wilcox, Toronto Carpet Manufacturing Co., Toronto.

Many of the members were accompanied by their wives, and there was a fair sprinkling of sons and daughters.

Entertainment was not the main desideratum of the travellers, yet they took all that was "coming" and, indeed, in Halifax the Association was compelled to alter its programme of sessions to allow the good people of that city to give full vent to their feelings of hospitality. The first group that was formed gathered to the number of 60 in Toronto on August 9, and took the boat for Montreal where they arrived at 6 o'clock Sunday. Here they were met by a delegation of Montreal manufacturers and escorted to the Windsor Hotel. Later in the evening the party was added to by the Montreal members and at 11.30 p.m. a special train carrying 150 passengers pulled out of Bonaventure station. Monday was spent in Quebec at the invitation of the manufacturers of the fortress city. Mr. Geo. E. Amyot, of the Dominion Corset Manufacturing Co., had organized a pleasant excursion and the Quebec manufacturers provided a most sumptuous luncheon at the Kent House, Montmorenci Falls. About 250 sat down to the tables which were spread in front of the hotel. Toasts were proposed to the King, the guests, the Quebec manufacturers and the press, bringing out several volleys of rattling good speeches.

At eight o'clock the special was boarded again at Point Levis and at six o'clock on Tuesday the manufacturers pulled into Halifax, after having been joined along the route by quotas of Maritime confreres. In the evening the delegates were presented with tickets to a high-class military tournament, while the Programme Committee held themselves away to devise ways and means to crowd 48 hours of entertainment, planned by the Halifax people, and 48 hours of business mapped out before leaving Toronto into the allotted period of two days. As a consequence, the manufacturers were in session all the next day, and the first day's business was concluded in time to allow the delegates to attend the band concert tendered in their honor in Halifax's beautiful gardens. On the next afternoon a delightful excursion on the harbor was squeezed in. In the evening the banquet was held in the spacious dining-rooms of the Halifax Hotel, and immediately following, at 3 a.m., the special was again taken to Sydney to view the steel works. The town entertained to an excursion on the harbor in the early evening, and at 9 o'clock the return trip was begun. Many dropped off at Truro to go through the Annapolis Valley, others left the train at Moncton for St. John, while a small party continued on to Montreal, reaching there Sunday and Toronto Monday morning. So delightful was the trip that the idea has been well received that the Association should have a three-weeks' excursion out to the Pacific Coast next year,

Halifax, where the Manufacturers met.

provided that the annual meeting is not held in Winnipeg, and it is said that on account of limited hotel accommodation the manufacturers will not be able to go to Winnipeg.

Why should the manufacturers go on an excursion? The pleasure is great, to be sure, and the pleasure of intercourse greater, but that is not sufficient to justify it. It is rather the inspiration bubbling forth from the convention that produces the resultant feeling of satisfaction. It does one good to talk of Canada; it breeds confidence. If this year's convention did nothing else than popularize the term "Made in Canada" among the delegates and emphasize the need of their buying Canadian goods, of their showing practical patriotism, it will have done good. And missionary work was done outside the Association in this connection. John Taylor, of Guelph, late of The Dominion Radiator Co., without whom no Canadian Manufacturers' Association can hold convention hereafter, tells a good story in this connection. On the boat at Sydney a newspaper boy stowed himself away, and, after seeing himself at a safe distance from the wharf, began to prosecute his business among the delegates. He fell upon Mr. Taylor, who, being an up-to-date business man, conceived the bold plan of buying him out and forming a "skindicate." He ordered the boy to distribute all the papers free of charge, which was done, and then the "newsy" got his money. Whereupon he immediately proceeded to gather up the papers again and resell them to Mr. Taylor. To maintain his "skindicate," of course he had to buy them, and to pay for them he handed the boy a Yankee silver piece. The boy looked at it contemptuously.

"That ain't no good. That ain't made in Canada."

THE TARIFF QUESTION.

Perhaps this talk about buying only Canadian-made goods was started by some ultra Canadian who noticed that the cars the party rode in were made in Dayton, Ohio, that the blankets that covered them by night and the silverware that fed them by day were made on the other side, and that even the matches provided to light the "imported" cigars were "made in Belgium." Mr. Munro's passionate appeal to popularize Canadian goods was also well received.

"There are needs which cannot yet be filled by Canadian manufacturers, but," he said, "the range is narrowing. We are finding out day by day that the range of possible Canadian industries is ever widening. Let us therefore unite our people from sea to sea in the patriotic sentiment to give 'Canadian-made' the first call.

"We are importing every year upwards of $100,000,000 worth of manufactured goods. May we not in the new fiscal year reduce this by at least one-eighth?

"The purchase of 5c. more of Canadian and 5c. less of imported products by every Canadian every week for a year would accomplish this. Let us stand together for one year and try.

"Every Canadian is a partner in the financial affairs of our Dominion, and is a partaker, therefore, in all her gains. Let us devise liberal things in promoting this movement, and all our people will be partakers with us in the benefit."

Certain it was that there were many bold resolutions made by the manufacturers themselves to use only Canadian-made goods wherever possible.

The manufacturers are doing all they can to the securing of the Canadian market for domestic factory products. It is a laudable aim, although not everybody approves of all the means the Association wishes adopted to attain the object. High duties in themselves are not desirable, but as a means to a desirable end they may perhaps be found a good expedient. In the resolution passed at the convention, the manufacturers left no doubt as to where they stood on this matter. They believe in adequate protection to home industry, and the Government will be asked to make a general revision of the tariff to transfer as much work as possible from United States and Continental to Canadian workshops.

Strong speeches were made on this subject by many of the manufacturers in attendance, chiefly Geo. E. Drummond, T. A. Russell, "Senator" Kloepfer, James Maxwell, H. Cockshutt and several others.

The late president, Mr. Munro, a man of moderate views, also referred to the need of a higher tariff in his presidential address in unmistakeable terms. In fact, the tariff brought out as spirited a debate as was heard during the convention, and when the Hon. Mr. Tarte declared himself for a "strong Canadian policy," and when R. L. Borden expressed his conviction that to the British Empire a factory in Canada was just as valuable as a factory in Yorkshire, they were cheered to the echo.

The manufacturers received great encouragement in their search for a higher tariff at Ottawa last session, and this is likely to induce them to press with redoubled vigor this coming winter. The Hon. Mr. Longley, in his banquet speech, prophesied the day when the present Government would be an advocate of a high tariff, and Mr. Borden's opposition would be decrying the "bloated monopolists." Time works miracles. It may be well to add the resolution as passed by the Association. It was as follows:

Resolved, that in the opinion of this Association, the changed conditions which now obtain in Canada demand the immediate and thorough revision of the tariff upon lines which will more effectually transfer to the workshops of the Dominion the manufacture of many of the goods which we now import from other countries.

That in any such revision the interests of all sections of the community, whether of mining, fishing, agriculture or manufacturing, should be fully considered with a view not only to the preservation, but to the further development of all these great national industries.

That while such tariff shall be primarily framed for Canadian interests, it should, nevertheless, give a substantial preference to the Mother Country and also to any other part of the British Empire with which reciprecal preferential trade can be arranged to our mutual advantage, recognizing always that under any conditions the minimum tariff must afford adequate protection to all Canadian producers.

It will be noticed that the Association declared itself on the preferential tariff. An attempt was made to separate the preference clause from the protective clause, but it was felt that the Association should show that the two ideas can be combined. The first and foremost principle laid down was protection to home industry. No tariff can be wholesome without providing for that. Then we should raise a wall against foreign nations as they do against us, and give the difference to Great Britain. But it was also pointed out that in granting a preference to Great Britain or the colonies we should get something in return. The Association feels that the Empire and its parts will profit by mutual trade, but it is not satisfied that Canada should make all the sacrifice necessarp for the establishment. We should look for cooperation in the other colonies, and the manufacturers believe we will not look in vain.

President Munro dwelt forcibly on the possibilities of intercolonial trade. He said: "Now in regard to our exports to other British colonies, it is well to fully understand the point at which we have arrived. We were informed recently that our share of the West-Indian trade is about 5 per cent., and you have realized something of the room there is for improvement. But when we return to Australia we find an external trade nearly double that of Canada, and Canada's share is not 5 per cent., nor 1 per cent., but about one-third of 1 per cent. Looking toward South Africa and taking the figures for Cape Colony alone, the imports for 1900 (exclusive of Government imports) are set down at $80,000,000, Canada's share being represented by a fraction so small as to be scarcely visible.

"Of course, we must make allowance for shipments of Canadian goods via United

States ports being entered as United States goods, but even then the truth is abundantly plain that we are woefully out of touch with our possessions in other lands, and they are equally out of touch with us, for their exports to us are even less than our exports to them."

Intercolonial trade is growing, however, and the Manufacturers' Association is doing much to encourage it. It has sent its delegates to the West Indies, and decided at the convention to send a man to South Africa. It has correspondents and agents in the different colonies and several foreign countries, and these gentlemen are doing good work in placing Canadian goods on those markets. The Trade Index is going out in large numbers to advertise Canadian industrialism, and direct lines of steamers are being inaugurated at the pressure of the manufacturers. It only rests with the individual manufacturers to follow up the advantage. The pointer they have given the Government, that the Canadian agents should be practical and competent business men, is in good season. It is said that some agents in the West Indies cannot be located.

But this matter of intercolonial trade was a digression from the tariff attitude of the Association, about which there is another word to be said. It must be noticed that the manufacturers are considering not only themselves in this matter; they are also considering the agricultural classes. They feel that the fact that the balance of trade in agricultural products against us with the United States is upwards of $18,000,000, entitles our farmers to some protection approaching to that enjoyed by the farmer across the border. Where farming is in an experimental stage the Association feels also that the industry should be encouraged. This was the reason that the Association urged that the duty on tobacco be raised from 10 to 20c. a pound. The resolution read as follows:

That the import duty on foreign raw leaf tobacco be increased to 20c. per lb,, and that the excise duty be reduced on the manufactured articles in Canada as follows: On cigars, to $2 per 1,000; on paper cigarettes, $1 per 1,000; on all-tobacco cigarettes or little cigars, not weighing more than 3 lb., 50c. per 1,000; and on all kinds of tobacco, plug, cut, or in leaf, for consumption, 5c. per lb., so as to compete with the United States on our border, and to have only one uniform color stamp, and discard the red and green stamps used now on our Canadian leaf, cigars and tobacco.

That the Inland Revenue (or excise) laws and regulations be amended so as to help consumption, growth and curing of Canadian leaf tobacco grown by our farmers in Canada, by allowing to blend with the foreign and use a uniform stamp instead of a specified green stamp, which is detrimental to its consumption.

EXPORT DUTY ON PULPWOOD.

E. B. Eddy, of Hull, was one of the most energetic men at the convention, and that in spite of his 75 years. He made a characteristic speech in submitting his resolution that an export duty should be placed on pulpwood. He claimed that if this were done many of the United States paper manufacturers must needs move their factories to Canada. This suggestion has frequently been made before, notably by Mr. McGibbon, of The Laurentide Pulp Co., and the Association thought well enough of it to ask the Dominion Government to place an export duty of $4 per cord on pulpwood.

EXHIBITIONS.

The Association has devoted considerable attention to exhibitions, both in and outside of Canada, feeling that people have not an adequate conception of the high-class goods made in this country. Mr. Munro says the people of the West-Indies knew we exported lumber and packed fish, but never imagined for an instant that Jas. P. Murray made good carpets, or that Mason & Risch made high-class pianos in Canada. Foreign nations are ignorant of our industrialism, and loath to say, many of our Canadian people are in the same plight. This is the justification the Association puts forward for sending exhibits to the Wolverhampton and Cork Expositions, for drawing the attention of its members to the Peace Exhibition which is to be held in Cape Town next year, and for deciding to agitate for the holding of a British-American Exhibition in Canada in 1903, to include Canada, the West Indies and Newfoundland.

SOME THINGS ACCOMPLISHED.

The influence of the Association must always be reckoned with in transportation matters. During the past year the Railway and Transportation Committee has seen much accomplished. It has seen the report of the railway commissioner brought down in support of their contentions. It has seen the Government promise a permanent railway commission. It has seen the freight rates on the Yukon & White Pass Railway cut down on its intercession. It has seen the appointment of a forwarding agent in New York by the Association to look after the shipment of the goods of the members. It has seen its plea for a fast steamship service taken hold of by the Government. It has seen the establishment of a direct line of steamers with South Africa. Much it has not seen, but in view of its accomplishment it can hope that all the other desiderata will be added unto it.

One of the latest practical ideas that has been promulgated by this committee is the plan evolved for the improvement of the West Indian steamship service. It is contained in the following resolution:

Whereas, the representatives of the Association to the West Indies in their report submitted, pointed out that the service from St. John and Halifax to Demerara and intermediate points was not sufficiently frequent in sailings, and in some cases the rates were found to be higher than the rates on similar goods from United States ports, which does not give Canada a fair chance to compete with the United States; it was pointed out also that the service to the Island of Jamaica was at present of little value;

Be it resolved: That in the opinion of this Association the Government should arrange for a more satisfactory schedule of sailings together with competing rates on the route from Halifax to Demerara and intermediate points and that the Government should encourage a direct line from a Canadian port to Jamaica, and further, with respect to the Canada-Jamaica line the question of imposing an import duty on bananas iand other fruit when imported into Canada otherwise than by a direct route to a Canadian port, should be considered.

TECHNICAL EDUCATION.

The attention given to technical education in the meetings and at the banquet was phenomenal. "At the threshold," said Mr. Munro, "we are confronted with the fact that in developing our resources our Dominion cannot furnish the needed skilled labor." The Alien Labor Act has been amended just to meet this difficulty. "Can we ever hope to compete successfully with other nations while we are dependent on them for our factory managers, superintendents and foremen, or even, in some instances, for our general operatives?"

Great attention is being given to technical education in agriculture and mining, but what provision is being made for a supply of tradesmen? Toronto is our most fortunate city in this respect, but this year it receded, for its technical school estimates were cut down. The Montreal branch has been giving some attention to an investigation of the technical facilities of the city, and finds that the annual expenditure per pupil is about one-twenty-seventh of the expenditure of a properly-equipped institution in the United States. The existing schools are well attended, but the courses are insufficient in range and thoroughness. Twenty-five thousand Canadians are students of the United States correspondence schools, and these pay at least $500,000 in tuition fees annually. Surely this is a sum that should be saved to our country. Mr. Munro made a stirring appeal for interest in this subject during the coming year.

ASSOCIATION'S PROGRESS.

To the Association, as such, the past year was interesting as the year of its incorporation. It was also a year of added strength—the addition of 226 new members, making the total membership 1,021, representing a capital of over $225,000,000.

Great strides were also made in consolidation. An office was opened in Montreal

with a permanent secretary in charge. A Nova Scotian branch was formed with an initial membership of 55. Sections have been organized, new committees put at work, and on all sides there is more interest being taken in the work.

Much of the credit for the healthfulness of the Association is due to Mr. Munro, the retired president, and it was quite fitting that Mr. McNaught's motion that he be presented with a testimonial of the gratefulness of the members should be accepted unanimously.

The new president, Mr. Birge, follows upon a series of active presidents, but he bids fair to keep the lamp trimmed and burning. He is an enterprising manufacturer and a man of large mind and keen grasp. He will be ably assisted by Geo. E. Drummond, a man of strength and one of the staunchest advocates of Canada for the Canadians. With these men at the helm and the old standbys, W. K. McNaught, J. O. Thorn, Wm. McMaster, W. K. George, John Taylor, C. C. Ballantyne, W. W. Watson, P. W. Ellis, Jas. P. Murray, Robt. Munro, Hon. J. D. Rolland, T. A. Russell, J. J. McGill and others we might mention at the oars, we can look forward for another year of active service for the Association. It means much to Canada that it should preserve its energetic character. Since the convention a strong Quebec branch has been organized, which will complete its thoroughly national representativeness. One of the most active Quebecers, Geo. E. Amyot, has been appointed chairman.

This sketch of the meeting cannot be brought to an end in better form than by quoting the conclusion to the late president's address: "But to whoever hears or reads, I venture to say that I know of no more patriotic organization on the round world than the Canadian Manufacturers' Association. We are striving to advance the Dominion's every interest, especially her industrial, and incidentally the interests of every other British possession. We have no political interests to serve or party to promote. May the day never dawn when patriotic business men, manufacturers of every shade and grade of political opinion, cannot heartily join in tbe deliberations of our organization.

"And let me add the prayer that the same enthusiasm, devotion and patriotism that has brought our organization to its present high state of efficiency will be not only maintained but advanced, so that the great themes that open out before us may be deliberated upon wisely, and that the labors of our new executive and committees may in the coming year help forward the development of our loved Dominion and the comfort and happiness of all our people."

CANADIAN AGENCY FOR TOOLS.

WE note that Decatur, Bull & Co., Montreal, have taken the Canadian agency for the sale of the precision tools manufactured by the Massachusetts Tool Co., of Greenfield, Mass., U.S. This company is the precision tool branch of the Goodell-Pratt Co. of the same town, and was organized by them for the manufacture of the finest class of mechanics' tools, complementing and extending their already most complete line of hardware specialties.

They are now manufacturing a very large and complete line of precision tools for machinists, draughtsmen, modelmakers and clockmakers, their product consisting of calipers and dividers, micrometers, protractors, tempered steel rules of all kinds, surface gauges, straight edges, squares and precision lathes. A glance at their catalogue shows that they have several novel and interesting features in the line of micrometers never before shown by any of the other manufacturers. Their 1-in. micrometer with depth plug attachment is certainly a most desirable tool. Their double micrometer, 1 and 2-in. combined, is made on the non-rotating spindle plan, and for many things it seems to be exactly what has been long wanted. They make micrometers adjustable for all measurements, 0 to 3-in. and 3 to 6 in. in length and diameter, and their No. 9 micrometer depth gauge is certainly an up-to-date desirable tool.

Last year this company purchased the tempered steel rule business of the old firm of Coffin & Leighton, of Syracuse, N.Y., who had a world-wide reputation for making the very best in their line; and the Massachusetts Tool Co. have enlarged and amplified it so that they are now making about every kind of rule wanted. Their specialty has been the fineness of their graduation lines, a very desirable point by the way.

Their catalogue also shows many small and convenient tools and devices that are used by the mechanic, among them a combination centre square which seems to fill the bill in every way, small, light, and lies perfectly flat on the work. Their line of depth gauges is a good one, and their No. 30, especially, has some novel features.

They make try squares from 3 to 12 in. with tempered steel blades which are accurate and well designed. Their draughtsman's protractors are of the best quality, as is required of such tools. Their line of surface gauges covers the ground completely, from the very cheapest to the highest type; as to their No. 55 we have never seen its equal for general utility purposes for the finest class of work.

They make steel clamps, bevels, parallel dividers, trammels, centre gauges, tool wrenches, drill and reamer holders, and have just now got a new line of spring calipers and dividers which show the greatest care in design and finish of anything we have seen for a long while. They are made from 2½ to 8 in.

They also make a precision lathe, 5 in. swing, that for a moderate price seems to embody all one would ask for for fine work.

The reputation so truly earned by the Goodell-Pratt Co. will be, we are sure, sustained by their precision tool branch.

They have recently issued a new catalogue, their No. 3, which illustrates and describes their full line, a copy of which can be easily procured from their Canadian agents.

A REORGANIZED FIRM.

A BUSINESS change of considerable interest to retail merchants and manufacturers was concluded recently, whereby The Union Petroleum Co. of Canada, Limited, took over the business of The Atlantic Refining Co., importers and dealers in illuminating and lubricating oils, with headquarters at Toronto. The new firm is incorporated with ample capital for the carrying-on of such a business and with the following well-known business gentleman at the head of affairs: President, A. E. Lewis; vice-president, A. C. Woodman; secretary-treasurer, F. M. VanZant. The company is affiliated with The Union Petroleum Co., of Philadelphia, who are the largest independent dealers in lubricating products, etc., in the United States. They own and control the output of two large refineries, having a combined capacity of 30,000 bbls. per month.

The new company have retained the old trade marks of their predecessors, which have become so well and favorably known throughout Canada. An old reliable is that of "Pennoline," which is absolutely the best grade of illuminating oil imported into Canada, and which is enjoying an increased sale daily. Their lubricating oils are also becoming more and more popular. Still another familiar seller is "Elastic Carbon Paint," easily a leader in its line. The firm have branches at Winnipeg, Manitoba, Vancouver, B.C., and St. John, N.B., and report a very prosperous season. They will be pleased to keep in touch with all old friends of the Atlantic Company as well as to meet new ones. Samples and prices will be cheerfully furnished at any time.

Donald McLeod, of D. McLeod & Son, general merchants, Dunvegan, N.S., is dead, and their Broad Cove branch store is burned.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

A NEW MACHINE.

JOHN McGILL, a Peterboro' machinist, has invented an engine to be driven by steam, water, compressed air, gas or gasoline. The most remarkable feature is the extreme simplicity of Mr. McGill's model. The engine itself consists essentially of a cylinder, flywheel and driving wheel, the two latter keyed to a central shaft, which enters the cylinder and is attached to the valvular mechanism, which revolves within it under the impulse of whatever motive medium is used. The cylinder, which is so short in relation to its diameter, varying according to the power required, as to be practically a hollow disc, is fitted with a system of valves of peculiar construction, which are the essence of Mr. McGill's invention. The steam, or whatever motive vapor or liquid is used, is admitted into the cylinder by an opening in the periphery, and causes the system of valves enclosed in the disc to revolve and impart motion to the shaft, to which are keyed the flywheel and driving pulley. That is all of Mr. McGill's invention as to the engine itself, and he claims that it has several important points of improvement over the ordinary steam engine. It does away with coming to rest, as does the ordinary engine, twice at every revolution. The engine never gets "on the centre." The motion is continuous, circular, smooth and without jar. The engine takes up less space—a working model, with a 5-in. cylinder and representing almost 1 h.p., occupying a space of only 7 in. square. The space occupied is from three to five times less than for the usual type of engine.

It is more economical in the matter of fuel consumption, the inventor claiming that it will produce two and a half effective revolutions for the fuel price of one with the ordinary engine, this advantage increasing with the size of the engine.

The furnace space required is less in ratio of 3 to 1, and, of course, fuel consumption is proportionately less. The McGill engine is capable of being run at a higher rate of speed, absolutely, and relatively, with less wear and tear, the motion being continuous and not reciprocating. Mr. McGill claims other advantages and a wide range of adaptability for his engine, but is first anxious to have its merits known in relation to its appreciation to fast transportation. In steamships he considers that the great speed it is capable of developing, with less consumption of fuel and less space for engine, boilers and coal bunkers, furnishes the essential desiderata of successful fast transportation—increased speed, economy and carrying capacity. He also claims that his engine can be adapted to faster steam and electric railway traffic, and he has invented and constructed an ingenious model of a street railway coach with the body hung low and provided with trucks of a peculiar construction which permit the taking of sharp curves safely at a very high speed.

Mr. McGill is a machinist employed by the Canadian General Electric Works, Peterboro'.

CONTRACT FOR ELECTRIC LIGHT PLANT.

F. Hayes, electrician of The Chatham Gas Co., has secured the contract for installing an electric light plant for The Beet Sugar Co., of Dresden, Ont. The plant will consist of about 500 incandescent lights inside the various buildings comprising this plant and 15 enclosed arc lamps of 2,000 candle power each, scattered around the grounds.

AUTOMOBILE LAWN MOWER.

For the first time a new automobile lawn mower whizzed over the Capitol grounds at Washington on a recent date. The green sward was clipped in about one-third the time necessary for a horse-drawn mower, The new machine greatly resembles a steam road roller, and sounds in operation like a steamboat. It has no difficulty in negotiating all the hills and valleys and irregularities of the Capitol lawn. The heavy rollers are declared beneficial because they crush down and kill the weeds, while leaving the grass uninjured.

ALCOHOL FIRING APPARATUS.

The United States Consul-General Richard Guenther, of Frankfort, Germany, writes under date of July 8, 1902: "The use of alcohol for technical purposes is being extended. The chief of the fire department at Hanover has constructed an alcohol firing apparatus, in connection with an automobile fire engine, which is said to be satisfactory. The fire department of this city had been using the first automobile fire engine in Germany, which does away with the disadvantages of smoke and noise during the trip, and it proposes to procure another alcohol automobile engine."

GAS ENGINE RESEARCH IN GERMANY.

THE Institution of Civil Engineers publishes the following abstract of a report by Eugene Meyer issued in The Zeitschrift des Vereines deutscher Ingenieure:

This is the first instalment of the results of experiments on gas engines carried out at the Institution for Technical Physics at the George Augustus University in Gottingen. The engine employed for the research work is a 10 horse-power Deutz motor. Both lighting and power gas are to be used. A description is given of the engine, power gas plant and the apparatus to be used for measuring the gas, cooling water, etc., and the degree of accuracy to be expected with the measurements.

The first questions investigated were concerning the effects of varying amounts of piston lubrication and the temperatures of the cylinder walls. The lubrication was begun with one drop every 40 seconds, for which the mechanical efficiency was 0 706, and the amount of gas used per brake horse-power per hour 823 liters (29 cubic ft.), and per indicated horse-power per hour 582 liters (20½ cubic ft.). The lubrication was gradually increased until the oil was running in almost a continuous stream. The mechanical efficiency had risen to 0.79, the gas used per brake horse-power per hour had fallen to 648 liters (23.2 cubic ft.), as per indicated horse-power per hour to 512 liters (18 3 cubic ft.). The load on the engine was practically the same throughout.

The great decrease in the amount of gas used as the supply of lubricant was increased is accounted for by Meyer on the supposition that some of the oil was vaporized in the cylinder and burned along with the gas. More elaborate experiments were made with the same result. In further experiments the temperature of the cylinder walls was varied from 16 deg. C. to 70 deg. C., while the oil supply was very liberal.

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

WANTED-- AN AGENT TO SELL

Stocks, Dies and Taps and other Engineers' Hand Tools and Platelayers' Tools to Hardware Factors, Railroad Companies and Mines, on a commission basis. Apply,

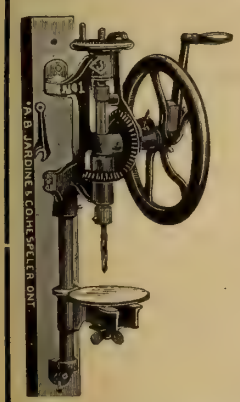
Easterbrook, Allcard & CO.,
LIMITED.
SHEFFIELD, ENGLAND.

Machinery of all kinds for all purposes.

Boilers of every description,
Engines, Plain and Automatic,
Screw Cutting Engine Lathes,
Speed Lathes,
Wood Turning Lathes,
Iron Planers and Shapers,
Barnes Drills,
Friction and Sensitive Drills,
Radial Drills,
Mining Drills,
Gear Cutting Machines,
Bullard Boring and Turning Mills,
Water Wheels and Motors,
Duplex and Single Acting Pumps.

My monthly stock list will give data of a large and well-selected line of machinery, both new and second hand. This list sent on request.

H. W. PETRIE, 141-145 Front St. W., Toronto

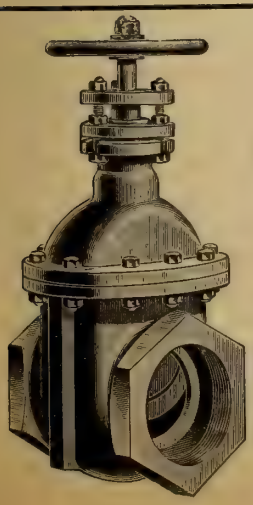


TRADE MARK J REGISTERED.

Blacksmiths' Hand Drills.

The very best.

A. B. JARDINE & CO.
HESPELER, ONT.



We Make Good

VALVES

Write for Catalogue. It tells all about them.

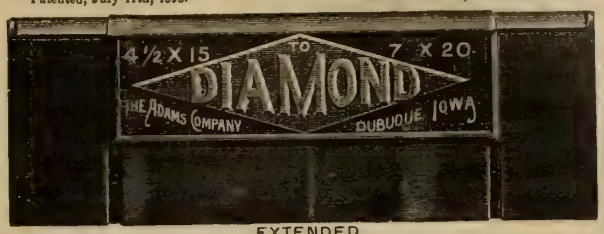
The Kerr Engine Co.
LIMITED
Walkerville, Ont.

DIAMOND EXTENSION STOVE BACK

They are easily adjusted and fitted to a stove by any one.

Please your customers by supplying them immediately with what they want.

Patented, July 11th, 1893. Canadian Patent, June 14th, 1894.



EXTENDED.

Sold by Jobbers of . . .

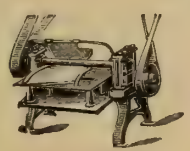
Hardware Tinware and Stoves.

Manufactured by THE ADAMS COMPANY, Dubuque, Iowa, U.S.A.
" " **A. R. WOODYATT & CO., Guelph, Ontario.**

"The Peerless"

is the best Bolster Spring ever produced. A fine line for the hardware trade. Write Us For Prices

James Warnock & Co. = Galt, Ont.



G. A. Crosby & Co. of Ontario,

SARNIA, ONT. LIMITED

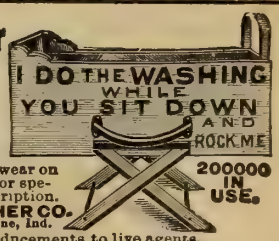
Manufacturers of

Patent Automatic Can Making Machinery, Presses, Dies and Special Machinery for Working Sheet Metal.

PAINTS We manufacture these brands :— "LION," "PEERLESS," "OWL," "RAVEN," also Ready-mixed House and Floor Paints, Roof, Barn, Bridge and Brick Paints, Coach Colors, Varnishes, Japans, etc. Our prices will interest you. Write us,

The Ottawa Paint Works, Ottawa, Ont.

The Rocker Washer



WARRANTED to do the family washing 100 PIECES IN 1 HOUR. No need for washboard; no wear on clothing. Write for special prices and description.

ROCKER WASHER CO. Clinton St., Ft. Wayne, Ind.

Liberal inducements to live agents.

"DAISY" CHURN

Has tempered steel cased bicycle ball bearings, strongest, neatest and most convenient frame. Only two bolts to adjust in setting up. Steel Bow Levers, suitable for either a standing or sitting posture. Has four wheels and adjustable feet to hold stand steady while churning. When churn is locked to stand the bow can be used as handles to move it about on the front wheels as handy as a baby carriage. Open on both sides to centre, giving free space for pail. Made with wood or steel stands, with Cranks only, or Bow Levers as desired.

Vollmar Perfect Washer

Has a most enviable record. A perfection of its kind—will wash more clothes in less time, do it better and easier, with less wear and tear, than any other machine.

The Wortman & Ward Mfg. Co., Limited
LONDON, ONT.
Eastern Branch, 60 McGill Street, Montreal, Que.

In both cases the heat value of the gas supplied was 2412 W.E. (9648 B.T.U.) per indicated horse-power per hour. From this it seems possible that even at comparatively low temperatures lubricating oil may be burned and contribute to the work done on the piston. The accuracy obtainable with the ordinary indicators was specially investigated, and also the methods of calibrating the springs. The temperature of an indicator may of course vary, and it was found in one case that the scale of the spring was altered by 4 per cent. when the temperature was changed from ordinary room temperature to about 90 degrees C. The dynamical theory of the indicator is applied to a few actual cases, and a graphic method is given by which the use of a Fourier series to represent the relation between pressure and time is avoided. The inertia of the parts is found to have little effect. Friction and inaccuracy of fitting in the indicator motion are the most important factors in distorting diagrams from their true shape. The indicated power of a gas engine cannot be determined with perfect exactness, and, while in many cases an accuracy of 1 per cent. may be obtained, in others the errors may be as much as 2 or 3 per cent.

MACHINERY NOTES.

A large Barnes upright drill was shipped by H. W. Petrie, 141-5 Front street west, Toronto, to G. H. Luscombe, Simcoe.

The Gasoline Engine Co., of Toronto Junction, Limited, will be making a specialty in their exhibit at the Exhibition this year of engines adapted to meet the needs of the farming community.

The business of W. J. Epplett, Adelaide street, Toronto, has increased to such an extent that he has found it advisable to add new machinery. H. W. Petrie, Toronto, who installed the plant, has delivered a three-sided molder to Mr. Epplett with which this gentleman expects to meet the increased demand.

PETERBORO RETAIL CLERKS.

A meeting of the retail clerks of Peterboro', Ont., was held on August 11. About 40 of the clerks of the town were present.

Organizer John Flett was present and delivered an able address, dwelling upon the benefits to be derived by being organized.

The following officers were elected :

President—R. J. Begley.
Secretary—R. K. Brown.

Money was subscribed for a charter, which will arrive in the course of 10 days.

R. Paulin, iron roofer, Montreal, was burned out ; partially insured.

Goods that are Wanted in the West Indies.

By John M. De Wolfe, in The Halifax Herald.

A GREAT many in Canada are of the opinion that there is an unlimited market for all kinds of manufactured goods in the West Indies, and that the people down there are just waiting for some enterprising man or men in Canada to bring the goods right along to supply them and make their little fortune. But when you consider that at least two-thirds of the inhabitants of the British Islands do not get an average wage of 1s. or 24c. per day, you can readily see that their purchasing powers and their requirements are very limited. So, after getting their food and a little cloth for wearing apparel, there is very little left to buy manufactured goods or to spend for anything but the bare necessities of life.

THERE IS ALREADY A LIBERAL SUPPLY.

Any goods that there is a profit in are already supplied by the Americans, English or Germans, so if Canada wishes to do a trade down there (not already taken up by themselves), she will have to do a lot of missionary or pioneering work to get in at all. They will have to put their prices down low (or fine), put up their goods nicely and neatly with attractive labels, or they will not be able to compete.

I have taken goods down several times and thought, at starting, that my prices were all right. My goods were up to the standard, but prices were not in it, and to my very great surprise I could buy similar goods at retail, express duties and profits added, for less money than I could put them f.o.b. Halifax. As I sell those goods for a small commission, you can easily see how one is handicapped in that market trying to sell Canadian goods.

LOSS CAUSED BY DELAY IN SHIPMENTS.

Another drawback that will have to be remedied is, often after an order is taken in good faith the goods do not come forward in a reasonable time, and often not at all. I have been told frequently : "It is no use to give you an order ; you do not fill it promptly nor up to sample ; and, moreover, we could get our goods from Australia in less time than you take to get them along from Canada."

There is a better market for manufactured goods in Trinidad, and Canada is largely to the front there, especially in cordage, paints and oils, varnishes, leads, brooms, brushes, butter, cheese, funeral furnishings, etc. Although I note M. E. Tripp, of Trinidad, urges Canadians to look sharp after especial lines of paints, oils, cordage, etc., when he knew, or ought to have known, that the paint, oil and varnish lines are already represented by five of the largest manufacturing houses in that line in Canada, and brooms and brushes by three, so that Canada has now the best place and sells by far the greater part of the cordage used in that market.

It would not lead up to a busy, healthy trade to have too keen competition between Canadian manufacturers which would obtain if Mr. Tripp's advice were taken.

CANADIANS IN FRONT RANK.

There are a number of other lines in which Canadian manufacturers are in the front place, which has been brought about by hard, persevering work, and it is pleasing to note we have so many lines well in hand in the West Indies.

There are several lines we cannot handle at all to-day—galvanized iron and zinc goods, such as buckets, pails, roofing sheets, pans, etc.; also tinware, tin, granite ware, glazed ware, shelf hardware, crockeryware, wire nails, cut nails, etc. Woodenware is not used to any extent, as the heat soon destroys it. Galvanized iron and zinc take the place of it.

SHOULD HANDLE BEST GOODS FOR TRADE.

Now we shall take up the goods that Canada can supply to-day. Flour, peas, split and round, oats, bran, shorts, middlings, cornmeal, pork, beef, hams, bacon, lard and lard oil, butter, cheese, etc. The most important of these is flour, and if managed right large quantities can be sold. As we have made so many mistakes in the past, the only wonder is that one can sell flour at all. Still, our Canadian flour is getting into favor every day, and, with new and better methods of handling and selling it, looking sharp after the conditions of the market and its requirements, one may obtain here a ready sale.

Ship promptly good fresh stock, put up nicely, neatly labelled, good barrels, closely packed, just large enough to hold the required quantity—not as has been the case in the past, the barrel made to hold 10 or 12 lb. more flour than is required, causing it to sift out and shift about in the barrel when it is moved a little or roughly handled, and thus bringing it more in contact with

the air, which will naturally help it to sour, especially in those hot storerooms down in the West Indies.

THE MANNER OF SELLING FLOUR.

There is another point I would draw attention to—the manner of selling flour and food products to bring successful results. The plan of the past has, in many cases, proved very unsatisfactory and must be remedied, and the sooner the better for the flour trade in the West Indies.

SHIPPER MUST BE IN TOUCH WITH DEALER.

You must get in touch with the dealers, and sell to them direct in as large or small quantities as they may require, and price might vary according to quantity. As most of the dealers are importers, it will be almost impossible to get them to buy from a commission merchant down there to whom the flour is sent on consignment, as is the usual way it is now shipped.

"But," you will say, "our flour cannot be bought any other way, and they must have it."

AMERICANS ALWAYS THERE TO COMPETE.

But that will not help matters at all, for the Americans are on hand to give them as good a brand at as low a price, and perhaps lower. And, moreover, if the dealer wants, say for a time, a particular brand, they will get their agents in New York to send it to them, or buy it through a New York house, and get it at first cost. The New York houses are bound to help them out, and their agents will sell direct to any one who will buy—that is able to pay for it—and he is on the alert all the time for new customers, offering all the inducements to get trade.

HINTS THAT CANADIAN GOODS ARE INFERIOR.

He does not forget to hint that the Canadian flour might sour soon and does not keep well. Knowing that one of the strongest arguments they use for successful sales is that their flour is largely ground from Manitoba wheat, leading them to believe or to suppose it is a particular brand of wheat, forgetting to tell the purchaser that the wheat is grown in Manitoba, one of the largest wheat-growing Provinces in Canada. Yet, they will urge that on account of having this wheat in the flour it causes it to keep much longer and make better bread.

NO OBJECTION TO FAIR CRITICISM.

I do not for a moment find fault with anyone for saying that our Canadian wheat will help the American flour if it is mixed with it, but I object to having the same wheat spoil and sour if ground in Canada. This seems to be the one complaint with our flour down in the West Indies—that it will not keep. My experience has been that the cause of any complaint of that kind is in the handling of the flour, for I know in a number of cases the flour was made and packed at least three or four weeks before it was in Halifax, and then perhaps delayed a time there, and that meant at least two months before it was in the hands of the consumers.

TIME CONSUMED IN HANDLING.

The same could, if properly handled, be put down in most of the islands in less than four weeks, making all the difference imaginable in its keeping qualities in the busy, hot West Indies climate.

You will kindly pardon me for taking up so much of your valuable space, but I thought it was due to our Canadian people to know some of the conditions of the West-Indian market. What they have to contend with to do a successful business in the West Indies I study.

A BETTER MARKET FOR SUGAR.

If we can make a better opening for the sale of their sugar in our markets, it would help materially in the West Indies. As we have already a branch of one of our live Canadian banks established in Trinidad, all arrangements for the monetary side of the question can be made, so that we will be able to do business in the West Indies with as much ease as we can in the more distant parts of our own Canada.

THE ADVANTAGES OF CONFEDERATION.

Until the British West Indian Islands are confederated and joined to us we may expect strong competition with England, Germany and the United States.

CONTINUITY.

The results to be derived from continuous advertising cannot be overestimated. That person or firm who desires their business to grow and expand must continue to advertise. In continuity is strength. The advertising you did yesterday will help your advertising of to-day, and the advertising of to-day will help that of to-morrow, and so on indefinitely. The child that makes the greatest progress at school does not attend on Monday, then skips Tuesday, back Wednesday, and then out again until the next Monday. No, he is in attendance every day.

Continuity is strength. Therefore that person who would add strength to his business must keep it before the public continuously—The Schemer.

Mr. H. H. Clarke, general merchant, Haliburton, Ont., was in Toronto on Tuesday on pleasure bent. He reported business good and the crops in a satisfactory condition. There was a slight frost in the neighborhood of Haliburton last week, but it did no damage.

CROPS IN NEW ONTARIO.

IN speaking of the New Ontario crop The Fort William Journal says: "From all parts of the district expressions of satisfaction can be heard. The farms in close proximity to the two towns have never looked better. Those on the Dason road, Arthur's, Heyder's and Wilson's, have tremendous grain crops, and the outlook for oats never was more pleasing. The hay crop has been gathered, and, owing to the splendid conditions during the spring, it is the heaviest for years. Barley, wheat and oats are all heading out nicely, and the yield per acre of these grains will be a surprise to the many who believe that there are no farming lands in New Ontario. On Arthur's farm it is estimated that the barley yield will be 80 bush. to the acre.

"If the present weather conditions prevail Mr. Tonkin will reap a harvest which will astonish old Ontario, as, at the lowest, it is estimated that the yield will be 100 bush. to the acre. The soil in this part of Canada seems specially adapted to the growth of barley, and it is not speaking beyond possibilities when we say that this part of New Ontario will be the greatest barley district in Canada. The burley grows to a height averaging 3 ft., and the heads are large and well filled.

"Mr. Baxter's farm, which has just been cleared in New Illinois Township, yielded 40 tons of hay on 12 acres.

"The farmers of New Ontario are prosparing, as is evidenced by the signs of progress going on. Farm houses and outbuildings of a permanent character are being erected, and on all farms the most improved farming implements are in use. Next season a large area will be cleared and ready for the plow.

"Mr. Burriss has made arrangements with the settlers for special samples of grain and hay for the eastern exhibitions. In all there will be 900 samples—300 from State River, 200 from Olive, 100 from Whitefish, 100 from Ox Drift and 200 from Rainy River.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, August 22, 1902.

HARDWARE.

THE movement in hardware has been unusually active for this season of the year during the week, all jobbers reporting a material increase of business over the previous week. Owing to the holiday season being still on, several houses are somewhat shorthanded. The most active lines are guns and other sporting goods. Orders for delivery in the fall are fairly good, but the bulk of the trade doing now is in goods for present requirements. As to prices, the market has been steady in nearly all lines. An exception is in "M" brand of horse nails.

BARB WIRE.—This moves rather slowly at an unchanged price, which is $3 per 100-lb. keg f.o.b. Montreal.

SCYTHES.—Trade in scythes is quiet and featureless, and our quotations are as follows: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

GALVANIZED WIRE.—There has been no improvement in the demand and the market is still quiet. We now quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Nothing of importance has occurred on this market, which is rather uninteresting at present. We now quote: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Trade is quiet and the discount remains at 25 per cent. Net extras on 1 and 2-lb. hanks are 25c. per 100-lb.; on ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is nothing new to report. Business is of small proportions this week, and the discount remains at 62½ per cent.

FENCE STAPLES.—Trade shows no improvement whatever, and the market is still quiet. The price of galvanized staples is $3.25 per 100-lb. keg, and of bright, $2.90 per 100-lb. keg, with an extra of 25c. for 25 and 50-lb. packages.

WIRE NAILS.—These continue in fair demand, but nothing special is doing. Prices are unchanged at $2.25 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a rather light demand for cut nails, and trade is not active. The price is $2.37½ per keg in carlots, and $2.45 per keg in small lots.

HORSE NAILS.—In "M" brand horse nails the discount on "Ovals" has been changed to 57½ per cent. off, instead of 60 per cent. off; and on "New Countersunks," the discount is now 67½ per cent. off, instead of 66 2-3 and 5 per cent. On other brands no change has been made. We quote: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 60 per cent.; "New Countersunk," 67½ per cent.; "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—Orders have been coming in freely during the past week, and business is much improved. No quotable changes are reported, and prices are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; feather-

The Belle Oak

weight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—Trade is fair and prices are unchanged. Quotations are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There is no change. Business has become quiet, and our quotations now are: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—The market is fairly active this week, but nothing of special interest has occurred. Discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—There has been no change and the demand keeps up well. The discounts are: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½ per lb. off list; hexagon nuts, 3⅝c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is but little business doing in this line. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—Trade is quiet. The price remains at $1.37½ per 100 square feet.

POULTRY NETTING.—Orders for poultry netting for delivery in 1903 are reported good. The discounts on Canadian or English netting are now quoted as follows: 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used. For delivery in 1903 the discounts are 60 per cent. off for 19 wire and 55 per cent. off for heavier.

HARVEST TOOLS.—These move slowly. The discount is 60 per cent.

FIREBRICKS.—There is no change. The price of English is $16 to $22 and of Scotch, $17 to $22 per 1,000.

CEMENT.—Trade continues quiet at unchanged prices, which are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

Canadian Distributing Agents for Grippin's Crack Filler.

METALS.

Heavy metals have continued to move well, considering that the present is usually a quiet season, and values in practically all lines exhibit a good deal of firmness. Iron and steel importations are reported heavy, and in view of the structural work in progress and the proposed work, buyers are willing to take the terms offered now instead of waiting for easier prices. The English market has been steady in all lines, except tinplates, which are somewhat weaker.

PIG IRON.—This is in continued heavy demand and all furnaces are working to their full capacity. We quote: Canadian, $18.50 to $19 and Summerlee, at $21.50 to $22.

BAR IRON.—There is a good movement in this line. A somewhat lower figure is quoted on merchants' bar, viz., $1.95 to $2; horseshoe iron is worth $2.20.

BLACK SHEETS.—These are moving out fairly well at unchanged prices. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 21 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Jobbers report an excellent demand for many brands of this. The market is steady, however, and unchanged in prices. Our quotations are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There has been no change in this market. We quote 14c. per lb.

INGOT TIN.—This is reported lower on the New York market. Locally, values are steady and unchanged, Straits selling at 33½c.

PIG LEAD.—Trade in pig lead is of a very quiet nature. The price remains at $3.25.

LEAD PIPE.—Trade is fair. The price of composition and waste is 8c. and of ordinary, 7c. The discount is 37½ per cent.

IRON PIPE.—There is a moderate inquiry for iron pipe and a fair trade is passing at unchanged prices: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—Trade is no more than fair. A cable from England quotes tinplates at 1½ to 3d. lower. On this market no quotable change is reported, and charcoal tinplates are worth $4.75 to $5.25; cokes, $4.25.

CANADA PLATES.—There is still some shortage in these, principally in the 60 sheets. The demand keeps up well. Our quotations are as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—There is no change in this. Trade is quiet. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—There is nothing new to report on this market. A moderate business is passing. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—This is moving about as usual with nothing of importance to note. Quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—There is but a small amount of business doing in this line. The price remains at $7.50.

COIL CHAIN.—Chain is moving better this week. The market however is still on the quiet side, and our quotations are: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade is quiet and the price is unchanged from $5.85 to $6.25.

ANTIMONY.—This is quiet at 10c.

ZINC SPELTER.—Nothing of importance has occurred in this line. Only a light inquiry is experienced and the price is still 5c.

SOLDER.—No quotable change occurs. Solder, however, is moving out well. We quote: Bar solder, 18c. and wire solder, 20c.

PAINTS AND OILS.

Linseed oil and turpentine have continued unchanged in price. There is a good supply of oil, but the price is maintained. The demoralized tone of the white lead market is reported to have been overcome to some extent, as grinders of established brands are finding that they can sell all they are able to turn out at a fair margin of profit. General business, while not particularly active is nevertheless in as good condition as can be expected during the holiday season. A number of travellers are on their holidays, and orders, in consequence, are few in number and easily handled. We quote as follows :

GROUND WHITE LEAD.—Best brands, Government standard, \$5.25 to \$5.87½ ; No. 1, \$4.87½ to \$5.50 ; No. 2, \$4.50 to \$5.12½ ; No. 3, \$4.12½ to \$4.75 ; No. 4, \$3.75 to \$4.37½ ; all f.o.b.. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—\$5.25 in casks ; kegs, \$5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., \$1.90 per 100 lb.; bulk, in less quantity, \$2.05 ; bladders, in bbls., \$2.25 ; bladders, in 100 or 200-lb. kegs or boxes, \$2.40 ; in tins, \$2.55 to \$2.65 ; in less than 100-lb. lots, \$3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, \$4.50 ; in 100-lb. kegs, \$4.75 ; in less quantities, \$5.75 per 100 lb. No. 1 red lead, casks, \$4.25 ; kegs, \$4.50, and smaller quantities, \$5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, \$5.25 ; smalls, \$5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, \$2.35 to \$2.45 ; orange, \$2.25 to \$2.35.

MIXED PAINTS.—\$1.20 to \$1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The feature in this market has been the increased demand for zinc, which, however, has been somewhat scarce. In other lines trade has moved along quietly with no special feature, and we now quote : Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, \$15 ; No. 2, \$7 per ton ; machinery scrap, \$16 ; stove plate, \$12 ; malleable and steel, \$5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6 to 6¼c. per lb.

GLASS.

A few sorting up orders are being received for immediate delivery, but the market, in general, is very quiet. Quotations are : First break, 50 feet, \$2.10 ; second, \$2.20 for 50 feet ; first break, 100 feet, \$4 ; second break, \$4.20 ; third break, \$4.70 ; fourth break, \$4.95.

HIDES.

No change is reported in the hide market this week. Beef hides have remained steady at the decline of last week. We quote : No. 1 hides, 9½c.; No. 2, 8½c.; No. 3, 7½c. Calfskins, 10 to 12c. ; lambskins, 40c.

MARKET NOTES.

Bar iron is slightly lower.

The discount on "M" brand horse nails, in "Oval" and "New Countersunk" heads has been changed. The former is now 57½ per cent. off and the latter, 67½ per cent. off.

ONTARIO MARKETS

HARDWARE.

Toronto, August 22, 1902.

THE condition of the general hardware market here continues to be satisfactory and a good deal of business is still being done. Horseshoes and horseshoe nails are active, and the same may be said of screws and bolts and nuts. The manufacturers are still behind in their shipments of the last two-named, and seem to be hampered by a scarcity of raw materials. A large amount of loaded shells are being sent to various parts of the country, and guns are still much in demand as the sporting season is now on. The season for screen doors and windows and green wire cloth is over. It has been a poor year for these two commodities, as the unfavorable weather has prohibited, in many cases, sales. A reduction has been made in the price of fine steel wire, the discount now being 25 per cent. instead of 22½ per cent., and in the price of brass and copper wire, the discount on which is now 62½ per cent. instead of 60 per cent. as formerly. The prices also of fine wire shanks have been cut in half. This change is due to the heavy importations of wire from Germany, resulting in the cutting of the prices of stove-pipe wire here, thus forcing the Canadian makers to meet the reduction.

BARB WIRE.—There continues a fair demand for barb wire, the prices of which are unchanged. We quote : Barb wire, in carlots, \$2.65, and in less than carlots, \$2.77½ f.o.b. Cleveland. From stock, Toronto, \$3.

GALVANIZED WIRE.—Trade in this line is keeping up well. Our quotations are now as follows : Nos. 6, 7 and 8, \$3.50 to \$3.85 per 100 lb., according to quantity ; No. 9, \$2.85 to \$3.15 ; No. 10, \$3.60 to \$3.95 ; No. 11, \$3.70 to \$4.10 ; No. 12, \$3 to \$3.30 ; No. 13, \$3.10 to \$3.40 ; No. 14, \$4.10 to \$4.50 ; No. 15, \$4.60 to \$5.50 ; No. 16, \$4.85 to \$5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at \$2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The base price of this wire is unchanged and jobbers are experiencing a fair inquiry for it. We quote the base price: \$2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, \$2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—The trade doing in this line is good, but owing to the continued importations of cheap wire from Germany, the Canadian manufacturers have reduced the prices here, changing the discount to 25 per cent. instead of 22½ per cent. as formerly, to meet the close prices made by the im-

Builders value the time saved by using EASTLAKE Shingles

Their Patent Telescope Side Lock, imitated but never yet equalled, makes them quicker and easier to lay than any other shingle in the market.

DEALERS VALUE the perfect satisfaction of all customers who choose these reliable lightning, fire and rust-proof shingles—they are a line you can't afford to leave out of stock. Fullest particulars in our catalogue.

The Metallic Roofing Co., Limited,

TORONTO, MONTREAL, WINNIPEG.

porters of the foreign article. The discount is 25 per cent.

WIRE NAILS.—These are still in good demand and prices are firm. We quote $2.50 for carlots and $2.55 for less than carlots. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—There is a good sorting-up trade doing in cut nails. We quote $2.45 per keg and $2.37½ for carlots.

HORSE NAILS.—The demand for horse nails is quite active. We quote the base price as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—A big volume of business is reported doing in these this week. We quote the base price as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The jobbers are quite bare of stocks, but the buying continues quite active. The manufacturers are much behind with their orders and seem to be hampered by a scarcity of raw material. We quote: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—An extensive demand for these has sprung up, and the market is strong. The discounts are quoted as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—There is a scarcity of carriage and machine bolts, which the manufacturers are unable to relieve, as they are much hampered by the lack of raw material. Our quotations are now as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—The demand for these is keeping up well. The discount is 40 and 5 per cent.

ROPE.—The season for harvest rope is over. Trade in the other lines is fair. Manufacturers claim they ought to advance the price of sisal, as the raw article is high in price. We quote as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER Twine.—The season for this article is practically over as far as the manufacturer and jobber is concerned, as they are all cleaned out of stock, which is now distributed throughout the country and the only doubt is whether there is enough to tie up the crop. We quote: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—There is still some demand for these. The discount is 60 per cent.

EAVETROUGH, ETC.—The demand for eavetrough is still good, although the season is becoming advanced. We quote as follows: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—Trade in this line is still heavy, there being a good demand from all parts of the country. The prices are unchanged, and we quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

HARVEST WHIPS.—There is a fair trade doing in these.

POULTRY NETTING.—The season is about over.

SPORTING GOODS.—There are large quantities of guns and rifles being sent out to various parts of the country. A good many loaded shells are also in demand.

CEMENT.—The manufacturers of cement are cleared out of stock and in some cases are behind with their orders. An active inquiry still continues. We quote as follows: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 upwards per barrel.

METALS.

Trade in metals, generally, continues fair and the prospects are for a good business in the fall, particularly, providing that the crop in Manitoba and the Northwest be safely harvested. The outside tin markets have been weakening during the week, and copper is dull. The pig iron market is inactive, as buyers continue to hold off in the hope of concessions being made by holders.

PIG IRON.—An active demand still keeps up for pig iron, and prices are firmly maintained. The outside markets are quiet. The quotations f.o.b. furnaces are as follows: No. 1 foundry, $20.50 to $21.

STEEL BOILER PLATES.—The market for these continues strong and the demand is good. We quote $1.80 for carload lots on track, Toronto.

STEEL RAILS.—Those for electric railways are quoted at $36.

TOOL STEEL.—Business in tool steel is about the same as it was last week and the prices are unchanged. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—There is a fair amount of business doing in mild steel.

SPRING STEEL.—There is still a fair trade doing in this line.

BOILER TUBES.—A good, steady business is to be reported in boiler tubes.

BAR IRON.—A fair amount of business continues locally in bar iron, and the inquiry is active. In the United States bar iron is very slow at present, and our quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—A good, steady demand keeps up in black sheets at unchanged prices. We quote: Common,

STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.

Dundas Axe Works, Dundas, Ont.
W. L. Haldimand, Jr., Eastern Agent, Montreal.

$3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—The movement for these from stock continues active and the market is steady. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—A good business keeps up in galvanized sheets. Our quotations are as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

TIN.—Buying in small lots is quite active in tin. Quotations are unchanged at $32 to $33 per 100 ℔.

TINPLATES.—The demand for these is fair and the market unchanged. We now quote: Charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER.—The market for ingot copper is stronger this week and the demand has improved. We quote: Ingot copper, $14 per 100 ℔. and sheet copper, $22 to $23.

BRASS.—The local trade in brass is small. The discount is 15 per cent.

PIG LEAD.—This metal is in steady demand at unchanged prices. We quote pig lead, $3.50 to $3.75 and bar, $5.

IRON PIPE.—Jobbers are experiencing a good demand for iron pipe and the market is steady. We now quote per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—A good trade in zinc spelter continues. We quote 5 to 6c. per ℔.

ZINC SHEETS.—Trade in zinc sheets keeps up well. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—A steady business is reported in solder.

ANTIMONY.—Business in antimony is still quiet. We quote $19.50 per 100 ℔.

PAINTS AND OILS.

The general paint and oil market is quiet. The prices are firmer and unchanged in all lines, excepting in white leads, ground in oil, which are completely demoralized. Trade in them is at a standstill. Raw and boiled linseed oils continue firm and the same holds true of spirits of turpentine, which is scarce with some of the jobbers. Paris green is still fairly active and the other lines are quiet. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $4.90 to $5; No. 1, $4.52½ to $4.62½; No. 2, $4.15 to $4.25; No. 3, $3.77½ to $3.87½; No. 4, $3.40 to $3.50 in packages of 25-℔. and upwards; ½c. per ℔. extra will be charged for 12½-℔. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 ℔., $5 to $5.12½; ditto, in kegs of 100 ℔, $5.50; No. 1, in casks of 560 ℔., $4; ditto, kegs of 100 ℔., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18¾c. per gal.; gasoline, ordinary, 21¼c., and engine, 22¼c. f.o.b. Toronto.

PARIS WHITE.—90c. to $1 per 100 ℔.

WHITING.—65c. per 100 ℔.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per ℔.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., $2.25; bladders, in 100-℔. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 ℔., $2.05; bladders, bulk or tins, less than 100 ℔., $2.90.

PLASTER PARIS.—New Brunswick, $1.90 per bbl.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per ℔. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per ℔. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 79c.; boiled, 82c.; 3 to 5 barrels, raw, 78c.; boiled, 81c.; 6 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 69c.; 2 to 4 bbls., 68c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a fair local trade doing in glass, and a scarcity of some sizes of double diamond is reported. Quite a number of importations are now coming in from Europe. Our quotations are as follows: Under 26 inch, $4.45; 26 to 40 in., $4.65; 41 to 50 in., [illegible]; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent.

30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Trade, generally, in old metals is improving. Ingot copper declined somewhat during the past week, but has again reacted until now it is almost at its former level. There has been practically no change in copper materials. Zinc is doing better. There is no special demand at present for rags. Our quotations are as follows: Heavy copper and wire, 10 to $10\frac{1}{4}$c. per lb.; light copper, 8 to $8\frac{1}{2}$c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to $8\frac{1}{2}$c.; light brass, 5c to $5\frac{1}{2}$c.; lead, $2\frac{1}{4}$ to $2\frac{1}{2}$c.; scrap zinc, $2\frac{1}{4}$ to $2\frac{3}{4}$c.; iron, No. 1 wrought, $11 per net ton; No. 2 wrought, $6; machinery cast scrap, $14 to $15; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6 to $6\frac{1}{2}$c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—Trade in hides continues steady and fair. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, $8\frac{1}{2}$ to 9c. per lb.

SKINS.—These are in active demand and sell readily. Shearlings and lambskins have advanced 5c. We quote as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings and lambskins, 40c.

WOOL.—A fair business is reported in wool. We quote $13\frac{1}{2}$c. for fleece and $7\frac{1}{2}$c. for unwashed.

TALLOW.—This product is in active demand. We quote $6\frac{1}{4}$ to $6\frac{3}{4}$c. per lb.

COAL.

There seem to be no signs yet of a termination of the lockout of the hard coal miners on the other side. They have failed, however, to induce the soft coal miners to join in the strike, and some people declare that the end is not far off. The mine owners claim that they are mining some coal, but so far no shipments have been received. Stocks in Toronto are getting smaller daily and the problem will be where to get a sufficient supply to last all winter should the present trouble last much longer. We quote at international bridges: Soft coal, $3 to $4.50 per ton.

PETROLEUM.

Trade in petroleum is commencing to improve with the approach of fall. We quote: Pratt's Astral, 17 to $17\frac{1}{2}$c. in bulk (barrels extra); American water white, $17\frac{1}{2}$ to 18c. in barrels; Photogene, 17 to $17\frac{1}{2}$c.; Sarnia water white, $16\frac{1}{2}$ to 17c. in barrels; Sarnia prime white, 15 to $15\frac{1}{2}$c. in barrels.

MARKET NOTES.

The discount on fine steel wire has been changed from $22\frac{1}{2}$ to 25 per cent.

The discount on copper and brass wire has been changed to $62\frac{1}{2}$ per cent.

The prices of 1 lb, $\frac{1}{2}$ lb. and $\frac{1}{4}$ lb. hanks of fine wire have been cut in half, and are now 25c. for 1 lb., 38c. for $\frac{1}{2}$ lb. and 50c. for $\frac{1}{4}$-lb.

Truth is the backbone of the courageous; falsehood is the refuge of the coward.

NOVA SCOTIA MARKETS.

Halifax, August 19, 1902.

THE trade in fall specialties in hardware is about commenced, but otherwise the trade is only fairly active. This is not unusual at this season and the volume of business done is up to the average of former years. The same healthy tone prevails in business and all dealers are looking forward to a very active fall trade. There is still some difficulty in getting orders filled by the manufacturers, on account of the scarcity of steel and iron products.

* * *

The principal change to note is with reference to horse nails manufactured by the Canada Horse Nail Company. These quotations have been slightly advanced and notice has been given that further advances may be expected unless the anthracite coal strike is settled very soon and the price of hard coal, used in the manufacture of these nails, declines to normal figures.

* * *

There is still a considerable demand for builders' hardware, and the general building boom seems to be well sustained all over the Province. There is considerable building going on locally, which is likely to continue until the winter season sets in. Prices remain firm, principally for the reason already referred to.

* * *

The linseed oil market, which has undergone numerous changes during the last few months, may still be considered speculative, though prices have declined again to within 3c. of the early spring quotations. Boiled is now quoted at 83c. in barrels, and raw at 80c. The usual 5c. extra is asked for smaller quantities. Turpentine has again become firmer, but local prices are unchanged; 75c. is quoted by the barrel.

* * *

The season's demand for cordage is practically over, and the price has declined. Manila is quoted at 15c. base; British manila is now quoted at 13c., and sisal at $12\frac{1}{2}$c. base.

* * *

There has been an ususual demand this season for wire fencing, but shipments have about ceased for the present. The dealers expect a heavy fall demand in this article. Price is, however, firm and the quotation is $3 base for fencing and $3\frac{1}{2}$ to $4\frac{1}{2}$c. for staples, the difference in price depending on the quality.

R.C.H.

PRODUCTS WANTED FOR AFRICA.

The officer commanding in the Transvaal and Orange River Colony has notified the Trade and Commerce Department at Ottawa that tenders will be received at the office of the Director of Supplies, Army Headquarters, Artillery Barracks, Pretoria, until Wednesday, October 1, 1902, for supplies of bread, groceries, forage, fuel and light, dry grass for bedding animals, and hospital supplies at the various stations throughout South Africa, for a period of nine months. The stations for which they are required are: Pretoria, Pietersburgh, Middleburgh, Barberton, Komatiespoort, Potchefstroom, Standerton, Kroonstadt, Bloemfontein, Harrismith, Mafeking, Kimberley, Cape Town, Maitland, Simonstown, De Aar, Victoria Road, Naauwpoort, Burghersdorp, Grahamstown, King Williamstown, Durban, Newcastle, Pietermaritzburg and Eshowe.

Forms of tender and conditions of contract may be had on application at the office above mentioned, either personally or in writing, and no tender will be considered unless made on the forms so obtained.

Any firms outside South Africa wishing to tender should do so through their South-African agents, who can obtain tender forms and all information on application to Director of Supplies, Pretoria.

Among the welcome visitors to The Canada Paint Co.'s offices in Montreal this week were: Mr. D. L. Wigle, of Windsor, Ont., and Mr. Fred Coy, of Coy Bros. & Southcott, St. Catharines, both well-known names in the hardware trade. Mr. Wigle is accompanied by Mrs. Wigle, and Mr. Coy by Mrs. Coy and daughter. Both gentlemen have visited Montreal before, and took the opportunity on this holiday trip to renew old acquaintances.

The Dominion Iron and Steel Co. have received an order from The Consolidated Gas Co., of New York City, for 25,000 tons of coke, and the first cargo will be sent as soon as it can be loaded by the five-masted schooner Nathaniel R. Palmer, which is now at the Intercolonial pier. This order is rather significant, coming, as it does, when the great coal strike is at its height in the United States.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week the following building permits were awarded in Toronto: Richard Ewing, two-storey roughcast addition to dwelling 255 Arthur street, for $250 ; Thos. Moor, pair semi-detached two-storey and attic brick and stone dwellings Harbord street, for $6 000 ; T. W. Murray, two-storey brick and stone residence corner King street and Dunn avenue, for $5,000 ; Eckardt Casket Co., galvanized corrugated iron hayloft 68 Esplanade street, for $175; J. Wheeler, two pairs semi-detached two-storey brick dwellings 21-27 Concord avenue, for $6,000 ; Dr. Thos. Butler, two-storey and attic brick dwelling Clinton street, north of College street, for $2,200 ; A. Goddard, two-storey wood stable 161 Howland avenue, for $200; C. L. Denison, moving a roughcast house to 14 Fisher street, for $120 ; C. B. Osler, one-storey greenhouse, brick and glass, 13 Beau street, for $2,000 ; Alfred Kennard, two-storey dwelling, roughcast brick front, Englewood avenue, for $400; G. H. Walker, pair semi-detached two-storey and attic brick dwellings 9 and 11 Sorauren avenue, near Queen street, for $3 000; J. C. Craig, four detached two-storey and attic brick and stone dwellings Campbell avenue near Wallace avenue, for $3 600; F. S. Duff, pair semi-detached two-storey brick dwellings Shaw street, near College street, for $3,000 ; F. Saunders & Son, pair semi-detached two-storey and attic stone and brick dwellings 52-4 Leonard avenue, for $3 000 ; Charles Stark, pair semi-detached 2½-storey brick residences on Spencer avenue, near King street, for $4,500 ; Samuel Rogers, wood balcony, 107 Avenue Road, for $155 ; James Horninghan, two-storey brick and roughcast addition to 131 Gerrard street east, for $500 ; T. Farr, alterations and solid brick foundations under pair stores at 803 and 805 Queen street east, for $400; Miss Lambert, brick veneer and roughcast house on Queen street east, east of Greenwood, for $1,500 ; Jas. Lumbers, frame house on Queen street east, near Woodbine avenue, for $1,500 ; John Dunn, repairs to 114 Givens street, for $100 ; S. F. Aberdeen, two detached two-storey and attic brick dwellings on 284 6 Gladstone avenue, for $3,600 ; M. B. Vanderwoort, pair semi-detached two-storey brick dwellings on 740-2 Gerrard street, for $3,200 ; G. J. Woods, two-storey brick and roughcast dwelling on 11 McGee street, for $600 ; Robert S. Unwin, pair of semi-detached two-storey and attic brick dwellings on 596-8 Bathurst street, for $4,000 ; C. B. Simpson, pair semi-detached 2½-storey brick dwellings on 71-3 University avenue, for $4,000 ; E. Fill, two-storey stone and brick residence on 285 Crawford street, for $3,000 ; Geo. W. Gowanlock, two-storey and attic stone and brick residence on Walmer Road, near Lowther avenue, for $5,000 ; John Irwin, brick foundations under dwellings 57-9 Berkeley street, for $820.

PLUMBING AND HEATING NOTES.

The annual meeting of the United Association of Journeymen Plumbers, Gas and Steamfitters of the United States and Canada began in Omaha, Neb., on August 18.

PLUMBING AND HEATING CONTRACTS.

Fiddes & Hogarth, plumbers, 122 King street east, have secured the contract for heating the new Adams' building, King street east, Toronto.

BUILDING PERMITS IN HAMILTON

Permits have been granted in Hamilton as follows : George W. Berry, for alterations and brick addition to his house, 310 North Victoria avenue, cost to be $300 ; Peter McKay, erection of a brick stable on Leeming street, for George Revell, the cost to be $300.

BUILDING OPERATIONS IN WINNIPEG.

The building business in Winnipeg continues to boom, and never before in the history of the city have so many buildings been in course of construction at one time. The permits issued recently have been of the smaller order, but the estimated cost of the buildings erected this season, or in course of erection, is creeping towards the $2,000,000 mark, and from present indications it may go much higher.

J. A. McKerchar, the grocer, will build a $15,000 store on Main street, north of Guest's fish store.

Osler, Hammond & Nanton will erect a warehouse on Albert street. The building will cost $14,000.

The business of the Royal Crown Soap Co. has increased to such an extent that the company has decided to erect an additional building to its premises to cost about $8,000.

BUILDING OPERATIONS IN SYDNEY.

FROM January 1 to July 31 over $500,000 was expended in the town of Sydney in the construction of brick and wooden buildings. On brick buildings alone the contracts amounted to about $255,000. In a list of over 125 wooden buildings there are not more than a dozen costing less than $1,000, while several cost as high as $4,000, and a few even as high as $6,000 and $7,000. The average cost would be about $2,500. In another year's time the so-called "burnt district" will have been covered with handsome brick buildings, buildings that would do credit to a town of greater pretensions than Sydney.

In mentioning the sum of $255,000 expended in the erection of brick buildings, those now in the course of construction were included, but the academy, the Royal Bank building, the new county court house and the telephone exchange are omitted. The total cost of these amounts to about $180,000. The first building of brick to be erected after the fire was that of Prowse Bros. & Crowell's, costing in the vicinity of $20,000.

Since January 1 the following have been built and completed : Cape Breton Electric Co.'s power house, $28 000 ; Dr. A. D. McGillvary's, $9 000; J. P. Conway's (two), total cost, $13,000 ; T. W. Publicover's, $10,000. The following are now in the

MONTREAL

MONTREAL, AUGUST 23, 1902.

Mr. Paint Buyer,

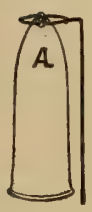
You are now in the dull season. It's a good reading time. Early this year we sent out a handsomely-illustrated catalogue. We sent it to all our customers. We sent it to many who are not our customers, and we are ready to send it to any paint man interested who will ask for it. Catalogues are sometimes glanced over hurriedly and thrown aside; but the man who studies a catalogue will know best where to buy when the time comes. Take a look over our book and see the many lines manufactured and imported —all money-makers. Let us help you get posted for Fall trade. If you haven't got our catalogue, drop us a card and we shall send it quick.

Yours truly,

A. RAMSAY & SON,
PAINT MAKERS.

OUR TRADE A MARK — AUER LIGHT MANTLES LONGEST LIFE & BRIGHTEST — OUR TRADE A MARK

A Statement of Facts.



We make the strongest mantles.
Our mantles gives the most light.
We use the purest and most costly chemicals.
We anneal our mantles with pressure gas.
Our mantles won't shrink or fray out.
Our trade mark A is on the best mantles.

We make mantles with any private mark on them, your own name if you desire.

WE MAKE

Coal Gas Mantles.	Coal Oil Mantles.
Oil Gas Mantles.	Gasolene Mantles.
High-Pressure Mantles.	Acetylene Mantles.

In single, double or triple weave.

Lowest prices on Mantles, Shades, Chimneys and Sundries.

Write us if you are interested.

course of construction, some of which will soon be completed: A. D. Ingraham, $18,000; E. Weeks, $8,000; W. W. Dillon, $15,000; Capt. John Carlin, $25,000; Dr. Kendall, $7,500; F. Falconer & Son, $13,000; J. W. Woodworth, $7,000; C. P. Moore, $20,000; W. H. Wentzwell & Co., $13,000; Angus McQuarrie, $10,000; A. Hagel, $5,000; Neil Ferguson, $15 500; A. Forbes (of concrete), $10,370.

The principal wooden buildings (private residences), that have been built within that time and costing over $3 000 are as follows: A. E. Nash, $7,000; A. H. Poole, $3 200; Kelley & Dodge, $3 000; F. Quirk, $4,000; A. H. Poole, $3,400; J. McDonald, $6,000; A. L. Rhodes, $3,500; A. H. Poole, $3 500; J. L Loarder, $4,000; Quirk Bros., $4 600; B. A. Ingraham, $4,000; John McKinnon, $3,200; John Patterson, $3,000; J. E. Ripley, $3 000; Rev. Neil McDonald, $5,000; John Morly, $3,700; E. G. Cossitt, $6,000; A. H. Poole, $3,600; Major Schurman, $3,000; F. A. Crowell, $4,800; W. Robertson, $5,100; H. N. McCallum, $3,400; R. W. McDonald, $3,000; Alex. Strang, $7,000; George Armstrong, $3,800; C. Estano, $5,000; A. H. Poole, $3,300; A. H. Poole, $3,600.

BUILDING NOTES.

Contracts have been let for a $20,000 addition to St. Joseph Hospital, London.

The Noxon Co., of Ingersoll, Ont., will erect a large building adjoining the C.P.R. station, to be used for shipping, storage and erecting purposes.

S. R. Hesson, of Stratford, will build a new store shortly. The store will be three storeys high and of red pressed brick. The ceilings will be of steel, and a number of steel beams will be used throughout the building.

Construction work on the new C.N.R. storage elevator at Fort William is being rapidly pushed ahead by Burnett & Record, the Minneapolis contractors. The elevator is to be built of tile, and is the first of this nature in Canada.

The La Corona Co., Limited, of Montreal, will spend some $50,000 in enlarging, remodelling and equipping the old Tucker school premises on Guy street, near St. Catherine. A fourth storey will be added to the present school building, and the whole will be extended back for a distance of 150 ft., connecting with Her Majesty's Cafe in the rear, and giving space for 100 first-class rooms.

"Papa," said Benny, "why are days of grace allowed on a note?"

"To avoid weeks of disgrace," replied the father.

INDUSTRIAL GOSSIP.

THE Hamilton Steel and Iron Co., which has paid its annual dividend of 6 per cent. and has transferred a substantial amount to the rest fund, has decided to double the capacity of the steel plant, and about $200 000 may be spent on this. Senator A. T. Wood has been reelected president and Mr. C. E. Doolittle vice-president. Mr. C. S. Wilcox is managing director.

A STEEL SHIPBUILDING PLANT.

James Ross, president of The Dominion Iron and Steel Co., hints that they may have a plant for the building of steel ships before very long. At present they do not manufacture the necessary plate, and should a steel shipbuilding plant be established now all that would be done would be to put the ships together; while the materials would all have to be brought from abroad.

After the rolling mills are completed the company intends to commence the erection of a plant for the manufacture of plates for steel ships. When this has been done they can consider the position of establishing a shipbuilding plant in Canada.

The directors of the company have decided to build a new steel plant, and have issued $1,910,000 stock. Further expansion of the plant at Sydney is in progress and contemplated, the blasting furnace now under way requiring a great deal of money to complete.

The entire plant, as originally intended, is about completed now. When in full operation there will be four blast furnaces, 10 open-hearth furnaces, 400 coke ovens and a blooming mill. At present some 300 tons of pig iron are being turned out by the blast furnaces every day.

INDUSTRIES AT OTTAWA.

At a meeting of the industrial committee at Ottawa, Friday, August 15, Ald. Coates, the chairman, reported that he had visited the new mica finishing works (formerly the Carbide Works, near the Canada Atlantic Railway end of Elgin street) and found they had already commenced operations with 125 men on the pay roll. Large sums of money were being spent in Ottawa in fitting up the works. They expected to employ the first year 300 and the second year 400 hands, with a pay roll of from $8,000 to $10,000 per month.

The experimental furnace for the conversion of cast iron into steel by a new process entirely different from any other, and secured by letters patent, was nearly completed. He, with Ald. Askwith and several others, had subscribed the necessary funds for the first furnace, and, if successful, it would lead to the erection of 10 or 12 more and, eventually, become an important industry in Ottawa. The furnace is located on Bridge street.

Ald. Coates said he had been in communication with a firm whose headquarters were in Pittsburg, as to the establishment of a manufacturing branch here for their special line of cigars, and they were favorably considering the matter. One of the firm was expected to arrive in the city next month. If they fixed on Ottawa as the centre they would erect works at least equal to 30,000 or 40,000 per day.

A NEW STOVE COMPANY.

Another stove manufacturing company is being formed. It is to be known as the Western Stove Company, Limited, with a capital of $50,000, and a charter is being applied for. The chief promoters of the new company are Frank J. Taylor, who has for some years been buyer for the Gurney Foundry Co., Limited, of Toronto, and J. J. Cunningham, formerly mechanical superintendent of the same company. The new company has purchased the plant of the National Iron Works, Wingham, Ont., and expect to have stoves and ranges on the market this fall.

THE LADIES LIKE THEM.

The National Cutlery Co.'s ladies' shears have been much appreciated by the fair sex for their neatness and quality. They have no soft spots, no saw edges. The patent process of tempering insures a perfect edge, which, together with a steel ride, makes them the ladies' ideal. They are full nickel-plated or enamelled, put up in separate pockets. Made in all sizes, 3 in. up to 7 in. See the cut. Ask for catalogue.

MANITOBA MARKETS.

Winnipeg, August 19, 1902.

ACTUAL business at the present time is light in jobbing circles, but all houses are busy and well satisfied in view of the continued excellent crop prospects and the outlook for heavy fall trade. In grocery and produce lines there is little if any news to report, prices remaining very steady in nearly all lines. There is not a single change of price to note this week. All lines are in good demand. Quotations are as follows :

THE PAINTERS PERFECT WHITE LEAD

is beautifully soft and fine in the grain. It mixes well with Linseed Oil, forming a creamy smooth paint of great covering power and undoubted durability. Every atom is paint — perfect paint — and there is no loss or residue of any kind. The Painters Perfect White Lead has become very popular everywhere.

THE CANADA PAINT COMPANY LIMITED

Montreal and Toronto.

A GOOD WAY TO INVEST CAPITAL.

IN a booklet entitled "Success with Small Capital" is given a large amount of information which will be found useful by all merchants. We make the following extracts :

We are going to tell you how to start a small department store.

But before we begin we want to clear your mind of the doubt that may be there as to the advisability of investing your money in an enterprise of this kind.

We firmly believe that there is no other commercial avenue open for men of small means that compares with this one in its possibilities. Many of our largest and most successful customers started in business only a few years ago with but scant capital and an unlimited supply of energy and ambition. That they have succeeded and that to-day they are selling more goods in an hour than they once sold in a week may not argue that you will succeed as they have done, but it certainly does indicate that monopoly has not yet devoured all the chances of success and that if you are willing to work you are sure to be rewarded for your labor in proportion to the energy—both physical and mental—that you expend.

Success is possible in any business. If you take a man like Andrew Carnegie, John D. Rockefeller or J. Pierpont Morgan sweeping out a country store he would own the store in a short time. Not many men are Carnegies, Rockefellers or Morgans—luckily for the rest of us. But it is certain that the effort that will earn a man a competence in any of the exclusive lines will make him independent in a department store.

The cry of the times is that a man of small capital has no chance—that the big concerns have made small businesses impossible. That may be true in some lines. It certainly is not true in merchandising.

The man with a few hundred or a few thousand dollars can do more with it than he ever could before, providing he chooses the right business and starts right.

The reason why a man with a small stock of variety goods can hold his own against concerns that have dollars where he has dimes, is simple. Every penny of his capital is in quick turning goods.

The big store has its shelves loaded down with merchandise which turns but once or twice a year, while a variety stock turns six to fifteen times in the same period. In other words, you can show as large sales with an investment of, say, $1,000, as you can with an investment of $3,000 in any other class of goods.

The variety store handles nothing but quick sellers. It ties no money up in domestics, nails, sugar, or other goods in which there is little or no profit. It omits the heavy staples of the one line stores, which take a lot of money to handle and require a lot of room.

THE WINDOW TRIMMER.

Among the many branches of the window-decorator's art, none is more apparently important than the one of sign, show-card and ticket lettering. The two combinations should go hand-in-hand. What a boon to the window-decorator with a practical knowledge of all the rudiments for the production of neat and attractive show-cards and price-tickets at his finger-ends. The finest window displays may be ruined by amateur lettering, while artistic lettering often attracts as much attention as the goods. Every window trimmer that aspires to the best-paying position in his line should procure the instruction book advertised in this issue by W. Edwards, Carleton Place, Ont., at $1 postpaid. Hundreds of decorators in all sections of the country are to day reaping the benefits. The expense is small and success is sure.

James Williamson, general merchant, Ballyduff, Ont., is advertising his business for sale.

The P. R. Cumming Manufacturing Co., Limited

CLARKSBURG and TORONTO.

Above we illustrate the manner in which the

"Cumming" Corkscrew Can Opener

(PATENTED)
is boxed for counter display.

No other Can Opener has a blade like this, and none other works so quickly, cleanly and safely. We also make the **"SPRAGUE"** style. Send for catalogue.

Opportunities for Young Men To-day.

By WILLIAM F. KING, New York.

THE need of the hour is young men who have a purpose in life and are willing to work hard to accomplish it. The trouble with most young men is that they want to come down through the roof instead of up through the basement. When I started to learn the dry goods business I swept out the store, cleaned cuspidors and washed the windows, began work at 7 a. m. and got through at 7 p.m., for which service I received very small pay, but I was learning the foundation principles of business.

The young men of to-day, when they leave school, are averse to manual labor. They consider it undignified, because they get their hands dirty and must wear overalls or old clothes while they are doing it. They want to start as superintendents, heads of departments or in equally responsible positions for which they are not fitted, from lack of experience and training.

Their hours are comparatively short, the rough work of the store is done by the porters and the cleaners, and they have ample time for luncheon. Nevertheless, they think they are overworked and are having a hard time, and are always ready to throw up their places for anything that promises them a dollar more a week than they are receiving.

I am inclined to believe that the parents are largely to blame for this condition of affairs. If the boy was taught that hard work and close application are necessary to success in life, that any honorable occupation is better than idleness, and that the world owes no man a living unless he earns it, then I am sure that there would not be so many young men who are failures in life as there are at present.

As I said in the beginning, there is need of young men who are willing to work. This is shown by the pages of want advertisements appearing in the daily papers; by the fact that the express companies find it necessary to advertise for help instead of depending upon the waiting lists, which were formerly always full of the names of applicants desiring positions.

It seems to be the ambition of many young men fo live without work, to spend their days at the racetrack and their nights in seeking amusement in the theatre and the music halls; to have someone—a hard-working father or an indulgent mother—keep them supplied with spending money. Such young men cannot succeed in life. They have no ambition, are not prepared for any kind of employment, and when thrown upon their own resources are absolutely helpless.

The absence of the old-fashioned home life has much to do with the loose habits of our youth. The clubs and social organizations take up much of their leisure time which was formerly spent in reading and in the acquisition of knowledge. Frugality and economy are unpractised virtues. The young man who received $10 a week a few years ago would save $3. To-day he spends the $10 and borrows $3 from his parents or friends.

Lack of purpose and hatred of work are responsible for the number of men between 20 and 40 who are working on pitifully small salaries. You would be surprised to see how many men there are, should you advertise, who are willing to work for $7 a week. They have failed at everything they have undertaken, and are now willing to accept anything that is offered.

There is plenty of work for the ambitious young man. The banking houses, the wholesale merchants, the great retail establishments and the manufacturers are on the lookout for bright, capable young men to whom, when they have learned the business, they are willing to pay large salaries; but large salaries can never be earned by those who watch the clock, who avoid all the hard work they can, and who take no interest in tneir occupation.

CONSTANCY.

A truthful and timely statement is made in a recent issue of Printer's Ink. It reads: "Holding on is the winning card in advertising. The bulldog, the most successful fighter of the canine family, catches hold and stays. Results are rarely immediate in any adventure or enterprise. As soon should one expect to reap in the evening a crop from the sowing of the morning as that the advertiser should think that every dollar he puts in publicity will bring results by return mail. Time is a factor in advertising and one which it is well to consider if one would escape disappointment."

How numerous are the adventurers who expect that their advertising should bring immediate returns. Constancy is perhaps more essential in advertising than anything else. He who constantly keeps hammering at his prospective customers in an unobjectionable, and in a manner calculated to leave a favorable impression, wins the trade. It has been proven beyond a doubt that the dealer, whether retailer or wholesaler, who is best and favorably known stands a much better chance than the man who makes no effort to keep his wares before the public. Advertising is not the prime factor in developing business, but it is a mighty powerful one and cannot be ignored. It is the greatest ally the salesman has. It is the greatest ally the retailer has.

One little step won't take you far,
You've got to keep on walking;
One word won't tell just what you are,
You've got to keep on talking;
One inch won't make you very tall,
You've got to keep on growing;
One small ad. won't do it all,
You've got to keep them going.

A good galvanized-iron worker knows the differ... makes of his stock, and uses the one that pays him best.

CURRENT MARKET QUOTATIONS.

Aug. 22, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Quality First Our Motto

Years ago, when Times were hard and Competition harder, we tried to meet the situation by reducing the quality of some of the goods we manufacture. Needless to say the experiment proved unsatisfactory, and we have since followed the policy of steadily improving the quality of our Building Papers and Roofing Felts. The increase in our business indicates that our customers are willing to pay reasonable prices for **FIRST-CLASS MATERIAL.**

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

GERMAN STEEL IN CANADA.

THE steamship line organized recently for the freight trade between Montreal and Rotterdam has been a success since its inception, having five steamers now plying between those two ports. The object of the service was primarily to do a carrying trade in steel between Europe and America; and with the unusual quantity of steel billets imported into Canada and the United States this year, on account of the difficulty in obtaining anything like immediate deliveries from furnaces on this side of the water, the time was indeed opportune for the establishment of such a service.

The importation of German steel, both in the form of billets and in such manufactured articles as rails, tires, axles, structural steel, etc., has grown very rapidly of late, and is at present of large proportions.

The agent for the Rotterdam-Montreal Steamship Line, Mr. Gerald Lomer, states that there is apparently no limit to the quantity of steel that can be consumed by Canada and the United States, and that consignments of German steel have been constantly increasing. Last year hundreds of thousands of tons of this steel were imported, and more recently, among the large orders filled from Germany and shipped by these steamers, was one for 25,000 tons for the Canadian Pacific Railway and 2,200 tons for the Mackenzie-Mann railroad in Cape Breton. There is no difficulty whatever in disposing of all the steel that can be imported here, says Mr. Lomer. The difficulty lies in finding a German mill with which to place orders, which has not already booked all the orders it can attend to for a long time ahead, as the German mills, though working to their full capacity, are not able to cope with the demand.

A great part of the steel imported via the Rotterdam-Montreal Line is consigned to the latter city for distribution to New York, Philadelphia, Boston and other United States cities. Thus the Canadian metropolis is becoming not only a great importing centre, but an important point of distribution for steel for North America as well. Besides the increasing quantity of German steel, there is, of course, a great deal from the British Isles also handled in Montreal. The ships of the Rotterdam Montreal Line rely almost entirely upon German steel for their cargoes on their return trips to Montreal.

BRITISH COLUMBIAN IRON.

AT the last monthly meeting of the Victoria, B.C., Board of Trade, a report was brought in by the mining committee dealing with the subject of the proposed duty on iron ore exported from the Province. The production of iron ore is at present but small. For the year ending December 31, 1901, the statistics show that only 5,746 tons were shipped, which was chiefly used for experimental purposes. A royalty placed on such a small amount of ore would not reach very large figures, and it is questionable whether the imposition might not do more harm than good. This appeared to be the opinion of the mining committee, which considered that if any duty were contemplated it should not exceed 5c. per ton.

It was pointed out that the work at present being done was of a nature entirely beneficial to the Province. The Americans who were engaged in the mining operations were virtually spending money in finding out the resources of the Province, and, should they find that the deposits of iron ore were valuable, that would be so much information gleaned by the Province at but slight expense.

Meanwhile, nothing can be made of the British Columbian iron mines until mining and smelting facilities equal to those of the east are installed. This would entail an expenditure of $5,000,000, for which the West is not yet prepared. In face of this the mining committee believe that everything possible should be done to discover the resources of the Province, and that the Government should take a deeper interest in the iron deposits.

BRITISH TRADE LOSSES.

SOME time ago the British Board of Trade authorized Sir Alfred Bateman to draw up a memorandum on trade for the past 30 years, in which not only would the conditions and needs of British trade be treated of, but a comparison with the trade of other countries be made. The result of Sir Alfred's researches has just been published in a blue book, and it depicts no very glowing picture of British commerce. Per head of population Great Britain's trade has shown a steady diminution during the 30 years, whereas her more serious competitors have all shown increases. This does not mean that the bulk of British trade has diminished, for exports alone have been augmented by 6.4 per cent., and imports still more largely, but, taken in comparison with the increased population, these amounts are not appreciable.

If beside this 6.4 per cent. increase is placed the German increase in exports of 23.1 per cent. and the still greater United States increase of 42.8 per cent., it will be evident to the merest child that Great Britain is being surely and certainly overhauled in the race for commercial supremacy. Both Germany and the United States are now devoting those energies to the promotion of foreign trade which Britain began to use years ago, and through sheer force of numbers they will inevitably equal and then surpass her. A greater degree of efficiency and improved methods of commercial and technical education may for a time give British commerce a forward impetus sufficient to counteract this result, but in the long run numbers will tell.

Fortunately Great Britain has been sinking capital in her greatest commercial venture of all—the Empire—and to-day this investment is beginning to pay dividends. The colonies, which for many years received population and capital without much return, are now to be reckoned with in many instances as commercial nations. Counting in the colonies with Great Britain there need be no fear that either population or territory will be surpassed, or, for that matter, commerce either.

At present, outside of European countries and British North America, Great Britain carries on the greater proportion of the world's trade. According to Sir Alfred Bateman, this supremacy is being threatened at several points, principally in South America and the Orient, where the United States is making rapid headway, but he believes that with the paying of more attention to the needful education of artisans and business men in England, Britain will be enabled to recover much lost ground.

AN INSULTER OF BUSINESS MEN.

JUDGE MEAGHER, of Sydney, N.S., did not add to the dignity of himself or of the judiciary when he insulted the members of the Maritime Board of Trade who had assembled at the Court House steps by calling them blackguards.

If members of the judiciary want to be considered not as other men they must act differently from other men. When they become insulting to respectable and honored citizens they must expect to be treated as any other man would be who forgot that he was a gentleman among gentlemen.

The men who had assembled at the steps of the Court House were representative of the best class of business men in the Maritime Provinces, and were there not as trespassers, but as the guests of the municipal authorities. If anyone should have treated them with courtesy it should have been a judge, whom we have been taught to look upon as the embodiment of all that is courteous and dignified.

When our idols are shattered it is only natural that we should lose faith in them, and desire to reprimand them when they offend. Judge Meagher offended, and he is entitled to the severest censure.

ANOTHER NEW BANK.

Another new bank is likely to be in existence before a great while. It is to be called the "Crown," and its prospectus is in circulation. It is understood that the promoters have met with a great deal of encouragement, a large sum of money having already been subscribed, and that by well-known capitalists. The head office of the "Crown" will be in Toronto.

This appears to be a time of development of the chartered bank system of Canada; but this is the natural concomitant of the industrial development of the country.

GRAND TRUNK STOCK.

SUCH steady progress has been made by the Grand Trunk Railway within the last few years that there is some prospect that a dividend on the third preference stock will be declared shortly. As it is, a larger distribution than ever before was made on the second preference stock, while a comparatively small balance of some £2,600 was carried forward for future needs. The smallness of this sum shows how optimistic is the English board of the continued prosperity of the road. Were it otherwise, a smaller dividend would have been declared and a greater grant to the future would have been made. But in order to distribute even a dividend of 1 per cent. on the third preference stock, it would require £71,680. Financiers in Britain feel confident that a few years will show such increased earnings that this result will be possible. Meanwhile there is but little prospect of dividends for years to come on the £22,500,000 of ordinary stock.

The result of increasing the dividend on the second preference stock has been to cause a rise of prices on both first and second stocks. The first preference, which two years ago stood at 83, has risen slowly but surely to 108, and there are many who believe it will reach 115. At 108 it is yielding 4½ per cent. on its money. The second preference stock is now at 93¾, having advanced from 44½ in 1899 and a still lower figure in preceding years. As it returns 5½ per cent. to the purchaser, it would appear to be a fairly good though somewhat risky investment.

BACK FROM THE MARITIME PROVINCES.

Mr. Emil C. Boeckh, of United Factories, Limited, Toronto, has just arrived home after a most satisfactory business trip to the Maritime Provinces. The United Factories (comprising the old-established concerns, Boeckh's Toronto factories, Bryan's London factories and Cane's Newmarket factories) are greatly to be commended for the remarkable energy they display—an energy that places them in the very front rank of the capable Canadian manufacturers who are, by superior merit, conquering the Canadian market for the Canadian producer.

AN INTERESTING TEST CASE.

HOW far a labor union may go in endeavoring to interfere with the business of a firm or company with which it may happen to have a disagreement may be decided by the Canadian courts, a test action having been taken by a manufacturing firm in Toronto. The Metallic Roofing Co. of Canada, Limited, through their solicitors, Thompson, Henderson & Bell, made application before Mr. Justice Falconbridge for an injunction to restrain Local Union No. 30, Amalgamated Sheet Workers' International Association, and certain members of that union, William Jose, Daniel McCrea, Richard Russell, S. Cox, W. C. Brake, J. S. Chapman, who are being sued on behalf of themselves and all other members of the union for damages for interference, from unlawfully interfering with the plaintiffs' business.

The cornice sheet metal workers of The Metallic Roofing Co., some 15 men, went out on strike on August 7. They claimed that an agreement had been reached between the sheet metal workers and all the firms in the city, but that The Metallic Roofing Co. refused to sign the agreement, so the men went out, and there has been no settlement made since.

In the affidavits put in by the plaintiffs they claimed that the union and the men of other unions have refused to handle any of the goods of the company and place them on other buildings, and particularly on the buildings at the Exhibition, and at the Polson's shipyard the union men refused to handle the goods of the company. The defendants are being sued individually as representing themselves and other members of the union.

The defendants deny any responsibility for the non-handling of the goods of the company. Mr. Justice Falconbridge granted an inetrim injunction,and the case will come up for argument on Tuesday next.

SHOVEL POOL FAILS.

Efforts to control the production and wholesale prices of shovels in the United States through a trust supplemented by a pool with independent manufacturers have failed. After maintaining for just a year the list prices agreed upon the arrangement has fallen through. The Ames Shovel and Tool Co. was organized in August, 1901, with $5,000,000 capital. It took in five of the largest shovel concerns in the country, namely, The Ames Shovel Works, of North Eastern, Mass.; T. Rowland's Sons, Limited, of Philadelphia; The H. M. Meyers Shovel Works, of Beaver Falls, Pa.; The Wright Shovel Co., of Anderson, Ind., and The St. Louis Shovel Works, of St. Louis, Mo. Hobart Ames is the president of the trust, which has its sales office in Boston.

An association was formed later, including the trust plants and eight other shovel concerns. John H. Parks, of New York, was the representative head of the pool, which was held together by subsidies to smaller concerns not to break prices. The association, it has been learned, has broken up, following a cut in prices of shovels of from $2.50 to $3 a dozen made by the trust on August 7. Following this, 30 days' notice, as required, was served on the members of the pool, announcing that the subsidies would cease.

PERSONAL MENTION.

Mr. O. W. Surpless, of Surpless, Dunn & Co., New York, called on the Montreal trade this week.

Mr. John A. Morton, of Chatham, Ont., was in Montreal on Saturday, August 23, on a holiday trip.

Mr. Jas. Ralston, of Dunnville, Ont., was in Montreal last week, visiting among the wholesale hardware trade.

Mr. G. T. Pepall, of M. & L. Samuel Benjamin & Co., Toronto, was in Montreal recently on business in connection with shipments ex Monteagle.

Mr. George W. Desrochers, of The Canada Hardware Co., and Mr. Lamontagne, of J. A. Denis, hardware establishment, Montreal, have just returned from a trip down the Saguenay.

Mr. Brown, of The Wadsworth, Howland Co., Chicago, manufacturers of "Jewel" paints, has been introducing that brand to the hardware trade of Montreal during the past week, and has met with much success.

Mr. F.T. Phillips, formerly in the hardware business, is now travelling for The Hunting-Weeks Co., of Watertown, N. Y., manufacturers of articles of plumbing, heating, etc. He spent a few days recently in Kingston.

In Brockville, on August 19, Miss Maud M. Holmes was married to Mr. Daniel J. Kennedy, an employe of The James Smart Manufacturing Co., manufacturers of stoves and hardware, by Rev. Dean Murray in St. Francis Xavier church.

Mr. W. Gastle, of the Frost & Wood Co., and McLaughlin Carriage Co. branch, of Hamilton, has resigned his position to accept a position as traveller for the McLaughlin Carriage Co. from Winnipeg to Vancouver. F. L. Hamilton, of Galt, will be his successor.

BUILDING IN MONTREAL.

THE present year, Building Inspector Chausse asserts, will beat all records in point of both the number and value of buildings erected. Last week no less than 30 permits were issued, which is an astonishingly large number for this advanced season.

Since August 7 the following building permits have been issued in Montreal: To the Ogilvie Milling Co., for a second-class building at 87 Mill street, three storeys, 65 x 200, cost $27,000; to the United Shoe Co., 837 Lagauchetierre street, for a second-class building, five storeys, 109 x 119, cost $32,000; to M. O'Rourke, for a one-storey house, third-class, 24 x 27, cost $50, on Breboeuf street; to Jas. W. Smith, third-class, two storeys, 13 x 20, cost $375, on Papineau avenue; to J. B. St. Louis, Rivard street, for three dwellings, each 80 x 36, second-class, cost of first two $1,000 each, and the third, $1,500; to Miss M. Boule, Famille street, third-class building, 20 x 22, cost $300; to Louis Pavreau, third-class dwelling, 22 x 21, one storey, cost $175; to Z. Jerome, Labelle street, third class dwelling, 25 x 32, cost $500; to N. Leclaire, Laval avenue, third-class dwelling, 48 x 40, three storeys, cost $3,000; to M. Gagnon, St. Denis street, two second-class dwellings, 51 x 50, three storeys, cost $4,000; to A. Lafontaine, Frontenac avenue, two third-class buildings, 44 x 37, three storeys, cost $1,750; to V. Raymond, Compte and Huntley streets, one third-class building, 34 x 30, one storey, cost $600; to E. Keravail, Labelle avenue, third-class building, size 25 x 40, cost $200; to The Montreal Stock Yards Co., Oak street, one second-class building, size 128 x 67, two storeys, cost $20,000; to The Montreal Stock Yards Co, Oak street, a second-class building, one storey, 96 x 50, cost $9,000; to The Montreal Stock Yards Co., Oak street, one second-class building, two storeys high, 144 x 88, cost $25,000; to The Montreal Stock Yards Co., Oak street, one second-class building, 96 x 50, three-storeys high, cost $16,000; to N. Lafontaine, Ontario street, third-class building, 18 x 26, one storey high, cost $600.

The master painters of St. John, N.B., held their annual picnic at Treadwell's August 19, a large party going there in busses. During the afternoon the following were the winners of events: Quoits—1, John Johnston; 2, Thomas Richardson; 3, John H. Tonge; 4, John Leah. Boat race—1, James B. Bell; 2, James Huey. Slow walking race—1, Frank Murdock. After the sports an elaborate dinner was served by host Treadwell.

TRADE CHAT.

GALT lost one of its best-known residents on August 24 by the death of Mr. James McTague. The deceased, who was 66 years of age, was born in Guelph, but had lived in Galt nearly all his life, and was prominently identified with business and municipal affairs. For many years he carried on a hardware establishment, and for 22 years was a member of the town council, and for 10 years of the county council.

Fire on August 21 did considerable damage to the foundry operated in Belleville by Marsh & Henthorn.

Collingwood Schreiber, Deputy Minister of Railways, says the Intercolonial cannot get cars enough to meet the demands of the business offering this summer. This applies to the passenger and freight departments.

The clerks in the employ of T. McAvity & Sons, dealers in pumps, 13 King street, St. John, N.B., made a call on August 13 on Charles Coster, who has been with that firm for 25 years, at his home in Carleton, and presented Mr. Coster with a handsome Morris chair.

At Loch Lomond, 10 miles from St. John, N.B., a yacht race came to a sudden termination by the overturning of a boat and the drowning of two young men—Walter Pyne, aged 22, a young man employed in T. McAvity & Sons' hardware establishment, of St. John, N. B., and Chester McClaskey, aged 24, married. Both men could swim, and one kept afloat till the moment when a steam launch reached the spot.

NEW AND UP-TO-DATE.

The Dominion Wire Manufacturing Co., Montreal, have moved their offices from the Temple Building, where they have been for a number of years, and they are now located in the magnificent new Coristine Building, corner of St. Paul and St. Nicholas streets. In their new premises they have considerably more floor space than in the Temple Building, and every facility is at hand to allow of the work progressing swiftly and without friction. Everything about the new offices is on the most improved and up-to-date plan. Among the improvements is the long distance telephone system, which has been installed throughout the offices, connecting with all the departments. They have private lines to their city warehouse and also to their works, which are situated at Dominion, near Lachine. The advantages of the long distance system are not only on the company's side, but are with customers as well, orders now receiving the promptest attention in the city and also with outside points. The Dominion Wire Manufacturing Co.'s business has been increasing in proportions annually. This year they report business better than ever.

NOT HAMPERED BY STRIKE.

By the reports that appeared in the Toronto daily newspapers of a week ago one would be led to believe that the Iron Molders' Union had completely tied up The Gurney Foundry Co., Limited, Toronto. But a representative of HARDWARE AND METAL was shown through their foundry on Thursday and found business going on as brisk as ever. Men were working in every department, and the company did not seem to be in the least hampered, as things were going on smoothly, without disturbance. The molders who went out have not returned to their work, but the company seems to be getting along quite well without them.

There are at present being added to the works a new 100-ft. chimney and two boilers of 100 horse-power each, and one 150-horse-power engine, to supply sufficient power to operate the additional machinery the company found it necessary to add to keep up to their large trade.

A STRIKING ADVERTISEMENT.

Decatur, Bull & Co., Montreal, are sending out to the wholesale trade a handsome advertisement for their new knife-cleaning machine, which has been such a success on this market. It is of cardboard, in easel form, and represents the head and shoulders of a very pretty housemaid operating one of the machines. The picture is life size and beautifully lithographed. The machine also is the natural size. This advertisement, when placed in a window or some prominent place about the store, is not only a good advertisement but an attractive ornament as well. The trade should try and secure one.

THEY CAN'T BE BEATEN.

The National Cutlery Co.'s dental shears and snips, straight or bent, light or heavy. They claim to be the largest manufacturers of dental supplies in shears and snips in America, and every pair is fully warranted. From any standpoint they are not surpassed in quality and finish, and, like all shears manufactured by The National Cutlery Co., they have the steel ride, and the patent process of tempering. They have no soft spots or feather edges. Each pair is put up in separate pocket. See the cut—ask for catalogue. Decatur, Bull & Co., Montreal, are the sole Canadian agents.

DOUBLE SEAMER.

A HARTFORD firm has placed on the market a double seamer for standing lock tin roofing. The machine, as described by The Metal Worker, consists of two clamps operated by long levers or handles. To one of these clamps is hinged a double right angular faced folding bar operated by a foot lever. To work the machine the levers are opened, the clamps placed over the standing edge with the vertical face of the folding bar to the work and then closed and held firmly. By pressing down the foot lever the tin is turned a little below a right angle. The machine is then slipped along half its length and the operation repeated, the horizontal face of the folding bar completing 8½ inches at each turn. Thus, two operations take place at each downward stroke of the foot lever. After going over the work once the gauges are raised and a second operation completes the double seam. It is pointed out by the manufacturers that the clamping arms take strong hold upon the work, preventing the machine from raising up or drawing the tin, at the same time furnishing the workman with a direct hold upon the roof and a great degree of safety.

Where it is desired to double seam a roof of very steep pitch, the leverage is such as to enable the machine to be worked by hand. It will begin and finish a seam at either end of the roof, the operator standing in an erect position. These machines are adjustable to different widths of seam and qualities of tin. All parts are made to gauge, so that a duplicate part can be furnished at any time. The makers claim that this seamer will not break the tin, will make a more even and tight joint and save the labor of five or six men, as compared with the mallet system, while it is wholly within the range of a boy's work. The weight of the machine complete is 13 lb.

THE WORLD'S COMMERCE IN 1901.

The import and export commerce of all the countries in the world amounted in 1901, according to German returns, approximately to $23,800,000,000, and was divided among the leading commercial nations as shown below in round numbers:

Country.	Value.
Great Britain	$4,165,000,000
British colonies, total	2,618,000,000
Germany	2,468,000,000
United States	*2,118,200,000
France	1,618,400,000
Holland	1,332,800,000
Austro-Hungary	856,800,000
Belgium	785,400,000
Russia and Siberia	642,600,000
Italy	571,200,000
Switzerland	380,800,000
Spain	282,400,000
China	305,000,000
Sweden	275,600,000
Argentina	281,000,000
Japan	233,000,000
Brazil	233,000,000
All other countries	4,624,340,000
Total	$23,800,600,000

*According to United States Treasury returns, $2,342,000,000.

BUSINESS CHANGES.

DIFFICULTIES. ASSIGNMENTS, COMPROMISES.

W. J. HILL, builder, etc., Deer Park, Ont., has assigned to E. R. C. Clarkson, and his creditors held a meeting on August 27.

Moise Dore, wool merchant, Montreal, is offering 10c. on the dollar.

Octave Blier, manufacturer of sashes and doors, Fraserville, Que., has assigned.

P. Gagnon, general merchant, St. Flavie Station, Que., is offering to compromise.

J. T. Therien, general merchant, St. Gregoire, Que., is offering to compromise.

J. M. Lefebvre, general merchant and hotelkeeper, Shawinigan Falls, Que., has assigned.

Sabas & Co., general merchants, St. Francois Du Lac, Que., are offering to compromise.

The creditors of McBean & Co., hardware merchants, Galt, Ont., held a meeting on August 26.

Alf. Lemieux has been appointed curator of the estate of Alf. Bouchard, sawmiller, Les Eboulements, Que.

C. H. Beauchemin is curator of A. Cote & Co., general merchants, St. Alexandre, Iberville County, Que.

S. C. Smith, general merchant, Fort Frances, Ont., has assigned to J. W. Humble, sheriff, and his creditors hold a meeting on August 30.

McGillivary & Co., manufacturers of pumps, St. Thomas, Ont., have assigned to Angus McCrimmon, and their creditors held a meeting on August 27.

PARTNERSHIPS FORMED AND DISSOLVED.

A. & N. Sigouin & Co., tinsmiths, etc., Montreal, have dissolved.

Wm. Oman & Sons, contractors, Montreal, have dissolved, and a new partnership has been registered under the same style.

SALES MADE AND PENDING.

The assets of Riordon Bros., contractors, Montreal, have been sold.

The assets of Edmond C. Leblanc, planing miller, Mattawa, Ont., have been sold.

V. Straube, dealer in sporting goods, etc., Vancouver, is advertising that he is giving up business.

James Johnson, hardware, lumber and grain merchant, Minto, Man., has sold his lumber business.

The business of The British Columbia Fish Glue and Oil Co., Limited, Vancouver, is advertised for sale by tender.

The stock of the estate of Mary Hancock, dealer in furniture and stoves, Toronto, is advertised for sale on September 3.

CHANGES.

G. W. Yuille, blacksmith, Truro, N. S., is succeeded by W. D. Wilson.

Procrastination

is the thief of time; it is also the thief of profit.

No progressive dealer should defer investigating the full merits of

The Sherwin-Williams Agency.

There's profit in it that cannot be secured by any other business connection. There's not only paint profit but also profit that is secured from the increase in general business brought about by the splendid advertising helps we give.

We are closing arrangements now with up-to-date dealers in towns where we are not already represented. If you are seeking a business connection that will make you money, write to-day for our "B-13" booklet, prices and full information. Don't put it off.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY

Desnault & Fittes, builders, Montreal, have registered.

A. D. Maguire, tanner, Aylmer, Ont., is closing up business.

J. Atkinson, stave mill, etc., Cowal, Ont., has sold out to J. B. Coates.

Jobin & Frere, general merchants, Waterloo, Que., have registered.

Fairley & Walker, general merchants, Ponoka, N.W.T., is succeeded by Fairley & Co.

Blain E. Dakin, general merchant, Sandy Cove, N.S., is succeeded by E. D. Morehouse.

The stock of J. W. Mellor, paints, etc., Greenwood, B.C., has been sold to J. Lukov.

E. Pullan, wholesale scrap iron merchant, Ottawa, has sold out to Florence & Winton.

A. W. Bailey & Co., harness and shoe merchants, Portage la Prairie, Man., are closing up.

W. T. Shatford & Co., general merchants, Vernon, B.C., are opening a branch store a Hedley City.

Chas. Hubbard, general merchant, etc., Straffordville, Ont., has sold out to Mrs. Buckborough.

A. M. Brown, general merchant, Petitcodiac, N.B., has sold his Anagauce branch to J. H. Brown.

Carse & Daly, dealers in electric supplies, etc., Victoria, B.C., have sold out to The Nesbitt Electric Co.

The stock of Aut. Fortin, general merchant, Causapscal, Que., has been sold at 65c. on the dollar to Hudon & Co., St. Octave de Rimouski, Que.

Our item that appeared in HARDWARE, of August 22, stating that Rodgers & Co., general merchants, Cannington, Ont., had sold out to John McKinstry, should have read: "Rodgers & Co., general merchants, Cannington, Ont., have sold out to McKinstry & Co."

FIRES.

Francis Witherspoon, harnessmaker, Port Arthur, Ont., has sustained loss by fire.

Marsh & Henthorn, founders and machinists, Belleville, Ont., have sustained loss by fire; insured.

DEATHS.

Leonidas Turgeon, tanner, Quebec, is dead.

Wm. F. Coupland, contractor, Montreal, is dead.

A man who had been arrested for murder, bribed an Irishman on the jury for $100 to hang out for a verdict for manslaughter. The jury was out a long time and finally returned with a verdict for manslaughter. The man went to the Irishman and thanked him and asked if he had a hard time. "Yes," said the Irishman, "a deuce of a time. The balance all wanted to acquit you."

CATALOGUES, BOOKLETS, ETC.

STATIONARY AND MARINE ENGINE CATALOGUE.

THE Gasoline Engine Co., Limited, of Toronto Junction, Ont., are presenting to their friends and patrons their new catalogue of stationary and marine engines and launches. They are offering to the public a gasoline engine, simple, compact, easy to operate, and very economical. Some very bright cuts illustrate the excellencies of the productions of this enterprising firm.

PRICE LIST OF "OXFORD" LINES.

Price List No. 59 is a complete pocket price list of the "Oxford" lines manufactured by The Gurney Foundry Co., Limited, Toronto, Winnipeg and Vancouver. An excellently compiled index and space for memoranda accompany.

FALL CAMPAIGN NUMBER.

The Chameleon, fall campaign number, August, 1902, has just been received. Many new and splendid features stamp this edition as an excellent effort containing many practical suggestions. Some excellent hints are given on what to do to make the fall campaign successful.

STARR MANUFACTURING CO.

The thirty sixth annual catalogue of The Starr Manufacturing Co., Limited, Halifax and Toronto, is a brief and neat list with descriptions, cuts and prices of skates handled by this firm. A complete line of excellent goods in several styles shows the enterprise of this up-to-date firm.

"TREASURE" CATALOGUE.

Catalogue No. 54, for 1902-3, by The D. Moore Co., Limited, of Hamilton, Ont., is an excellent volume containing many superior cuts of "Treasure" stoves and ranges. A full description and the price accompanies each article. An examination of their heating stove department readily discloses the fact that their variety is great, and their patterns and improvements are most modern and desirable. Some very useful information is given in the matter of chimney drafts, and illustrations of advertising cuts to be furnished free to customers close a really first-class catalogue.

"AT HOME" DURING EXHIBITION.

The officials, office and travelling staff of The Gurney Foundry Co., Limited, will, as heretofore, during the Industrial Exhibition, be "At Home" at the offices of the company, No. 500 King street west, Toronto, September 1 to 13, where a cordial reception will be extended to their many friends.

SIMPLE SAFE SURE STRONG

are characteristic points of excellence, that have made for the

PRESTON, ONT.

THE MARITIME BOARD OF TRADE.

The Annual Convention at Sydney—Fast Atlantic Service, Steel Shipbuilding, South-African Trade, and other Live Topics discussed by the Business Men of the Maritime Provinces.

THE passenger service of the I.C.R. on the line to Sydney was taxed to its utmost capacity to accommodate the large number of delegates who attended the eighth annual convention of The Maritime Board of Trade. Upwards of 100 delegates were in attendance and came from all parts of the Provinces. The members of the local board who kindly extended the invitation to hold this year's Convention in Sydney had no conception that the magic word "Sydney" would draw such a crowd. Every effort was made to properly accommodate the visiting delegates, but unfortunately the capacity of the hotels was entirely inadequate and several of the fine new business buildings were converted for the moment into hotels, and thus all the delegates were properly housed. An amusing incident on the arrival of the delegates was the race for rooms. The fastest teams were engaged and a furious drive up the hill commenced, and a desperate scramble to get names on the hotel registers, only to find that others had secured places in advance by use of the telegraph.

The first session of the Maritime Board of Trade opened in the County Council Chamber of the Court House at 10 a.m. on Wednesday, August 20. The total number of delegates who were reported from the various districts amounted to the goodly number of 81, which is much the largest number of any meeting of the Maritime Board of Trade since the organization meeting held eight years ago. The following is a list of the delegates :

THE DELEGATES.

Kentville—
A. E. Calkins, Pres. Board of Trade.
H. B. Webster, M.P.
Howard Harris.
M. G. DeWolfe, Ex Pres. Maritime Board.
Mayor Yould.
Robt. Harrington.
B. A. Dodge, M.P.P.
E. B. Newcombe.

Sackville—
Senator Wood.
Geo. E. Ford.

Halifax—
W. A. Black, Pres. Maritime Board.
Chas. M. Creed, Secy. Maritime Board.
Geo. S. Campbell, Pres. Halifax Board.
J. E. DeWolfe.
Capt. J. Taylor Wood.
Geo. E. Faulkner.
Andrew McKinley.
J. C. Stewart.
W. L. Kane.
J. P. Longard.
J. E. Shotford.
Fred. J. Clarke.
E. D. Adams.
O. N. Payne.
J. Scott Chisholm.
J. W. Pilcher.
F. A. Marr.
C. T. Burns.
J. W. Devere Stevens.
M. Dwyer.

Moncton—
Senator McSweeney.
C. W. Robinson.
Josiah Peters.
J. E. Masters.
D. J. Welch.

Truro—
J. M. O'Brian.
C. E. Bentley.
Dr. Bligh.

Amherst—
N. A. Rhodes.
S. A. Everett.
John A. Laws.
W. A. Filmore, Sec. Board of Trade.

St. John—
Thos. H. Summerville.
E. L. Rising.
R. G. Haley.
E. A. Scofield.
Jas. A. Seeds.
John E Wilson.
T. O. Allison, Sec. Board of Trade.
W. S. Fisher.
W. M. Jarvis.
J. N. Sutherland.

New Glasgow—
A. C. Bell, M.P.
Wm. Mackintosh, Pres. Board of Trade.
Harvey Graham.
H. D. Sutherland.
S. T. McCurdy.

Wolfville—
J. C. Hales, Sec. Board of Trade.
C. R. H. Starr.
Geo. E. DeWit, M.D.
R. E. Harris.
S. B. Benjamin.

Yarmouth—
Robert Caie.
E. K. Spinny.
Augustus Cann, Pres. Board of Trade.
G. Blake Burrill.

Windsor—
A. F. Armstrong.
J. B. Black, M.D.
W. H. Roach.
J. M. Blanchard.

Louisburg—
D. A. Morrison.
D. J. Kennelly.

Glace Bay—
Chas. McKay.

Charlottetown—
Horace Haszard.
Jas. Paton.
J. A. Messery.
J. A. Matheson.

Sydney—
Dr. McGillivray.
E. A. Mackee.
E. C. Hanrahan.

North Sydney—
W. A. Smith.
G. H. Dobson.

The chair was taken by the president, W. A. Black, of Halifax, and the vice-chairs by the vice-presidents, W. S. Fisher, St. John; and H. Haszard, Prince Edward Island. The president, in calling the meeting to order, said it was a matter for congratulation that so large a number had attended and accounted for it to a large extent by the fact that the city of Sydney had a great interest for all who were interested in the progress of Canada.

After the calling of the roll of delegates, the president introduced the mayor of Sydney, W. Crowe, who, in a few pleasant words, extended to the Convention the hearty welcome which the local members of the Board of Trade and the council and citizens of Sydney extended to the Maritime Board of Trade.

COMMITTEE ON RESOLUTIONS

The appointment of a Committee on Resolutions of one member from each board was adopted, and the following members were elected and asked to report :

Halifax, Geo. W. Campbell; St. John, Wm. Jarvis; Truro, C. E. Bentley; Yarmouth, A. Cann; New Glasgow, W. A. MacIntosh; Kentville, A. E. Calkin; Windsor, J. W. Blanchard; Charlottetown, J. A. Messery; Moncton, J. Peters; Sackville, Senator Wood; Sydney, E. C. Hanrahan; Glace Bay, Chas. McKay, Louisburg; Dr. Morris, Kings County, P. Innis; Amherst, John Laws; North Sydney, P. A. Smith; Pictou, Robt. Fraser; Wolfville, Dr. De Wit; Middleton, Geo. Armstrong.

SECRETARY-TREASURER'S REPORT.

To the President and Members of the Maritime Board of Trade.

Gentlemen,—Your secretary-treasurer begs herewith to hand you his report for the current year. After the close of the annual meeting held at Chatham on the 21st and 22nd of August last, and on receipt from the late secretary of one book and papers; also the balance of cash on hand, $69.75, I commenced preparing all the various resolutions, etc., passed at the annual meeting and forwarded them to the Dominion and Local Governments and to the members of the same where needed, as also to all the various boards of trade in the Upper and Maritime Provinces, and in many cases with good results. The correspondence connected with the same is too voluminous to read as also is the correspondence with the boards for the year. The correspondence with each board is separate and are now both on the table for the inspection of members.

Later in the year I commenced a systematic course of notices to the boards, both affiliated and unaffiliated, and have to report most satisfactory results. I found many boards which it was supposed were affiliated and indebted to the institution had never affiliated, although delegates from those boards attended the annual meetings; also that a number of affiliated boards, indebted for four years, had ceased to exist. As a result of this special canvass I have the pleasure to re-

port that ten boards have affiliated, viz.: Annapolis Royal, Moncton, Louisburg, Canning, Amherst, North Sydney, Yarmouth, Sackville, Pictou, Glace Bay. Six of which have paid their per capita tax. Four have answered they will pay at the annual meeting. I have collected all the back dues from five boards, thus, this year, commencing with a clean sheet.

I have also thoroughly ascertained the feelings of all unaffiliated boards and have reason to believe that during the ensuing year many of those boards will be on the membership.

The boards of trade in the Maritime Provinces are as follows :

Nova Scotia (24 Boards)—Amherst, Annapolis, Berwick, Bridgewater, Canning, Dartmouth, Digby, Halifax, Kentville, Kings Co., Lunenburg, Liverpool, Middleton, New Glasgow, Parrsboro', Pugwash, Pictou, Stellarton, Springhill, Truro, Windsor, Wolfville, Westville, Yarmouth.

Cape Breton (4 Boards)—Sydney, North Sydney, Louisburg, Glace Bay.

Prince Edward Island (3 Boards) — Charlottetown, Souris, Summerside.

New Brunswick (9 Boards)—Chatham, Fredericton, Moncton, Newcastle, St. John, Sussex, Sackville, St. Stephen, Woodstock.

Total Affiliated Boards 13 (Nova Scotia)—Amherst, Annapolis, Canning, Digby, Halifax, Kentville, Kings Co., New Glasgow, Pictou, Truro, Windsor, Wolfville, Yarmouth. Doubtful 5 — Berwick, Middleton, Stellarton, Westville, Parrsboro'.

Cape Breton 4—Sydney, North Sydney, Glace Bay, Louisburg.

Prince Edward Island—Charlottetown.

New Brunswick 5—Chatham, Moncton, St. John, Sackville, St. Stephen. Doubtful 2—Newcastle, Sussex.

The year now closing has been a banner one with this board with regard to its financial situation, and the receipts will nearly double those of any previous year. The various boards have taken a more live interest than ever before in the endeavor to place the Maritime Board in a first-class position amongst the deliberative commercial institutions of the Dominion.

CORRESPONDENCE.

I would beg leave to impress upon secretaries of boards the great necessity of answering correspondence promptly. When it remains unanswered the business is sure to lag. Correspondence quickly answered is the life and vitality of trade and all institutions.

PERMANENT SECRETARY.

This is a most important office and the yearly change of secretaries has been in a great measure the cause of the board's loss of vitality.

EXECUTIVE COUNCIL MEETING.

A meeting of the Executive was held at Truro on June 14. The business transacted there is contained in the minutes which will shortly be read.

In conclusion, I beg to say that during the year I have had the interests of the board fully at heart and have industrously worked for the benefit of the institution, at the same time doing all in my power to assist your worthy president, in which I had the very able assistance of our late lamented fellow-member, James A. Chipman, M. C. De Wolfe, of Kentville, and W. S. Fisher, of St. John, one of our vice-presidents, who did excellent work corresponding with many of the boards.

ACCOUNTS FOR THE YEAR

The accounts for the year are all prepared, but as several boards will pay their capita before the close of this day's meeting, they will be presented to-morrow for your approval and audit.

CHARLES M. CREED,
Secretary-Treasurer.

W. H. Roach, seconded by G. De Wolfe moved a vote of thanks to the secretary-treasurer. Mr. De Wolfe in his remarks said the meeting was the best meeting he had ever attended but one and that was the meeting of the Canadian Manufacturers' Association at Halifax. He spoke in warm terms of appreciation of the energy and work done by the secretary, and although an old man he was better than men much younger.

The president also spake feelingly of the valuable services rendered by the secretary.

In reply, Mr. Creed, the secretary, said he was not a public speaker but a

Chas. M. Creed, Halifax, the Permanent Secretary.

worker, and as reference had been made to his age, he felt as young as he used to be, and he was proud to say he had doubled the finances of the board this year.

The vote was given with loud applause.

There were no communications to the board except letters of regret from the Montreal and Toronto boards of trade; also the Manufacturers' Association, that they could not attend.

While waiting for the report of the committee, the president took the opportunity to thank the mayor and council of Sydney for their hearty welcome and for the magnificent programme provided by them for their pleasure and entertainment during their stay in Sydney.

THE PRESIDENT'S REPORT.

To the President and Members of the Maritime Board of Trade :

Gentlemen,—It affords me unfeigned pleasure to greet you at the eighth annual Convention of the Maritime Board of Trade in such a rapidly growing centre of industrial activity as Sydney. On the western portion of this continent we have become more or less accustomed to the rapid rise and continuous progress of localities previously comparatively unknown to the world at large, but the development of the flourishing city in which we are now assembled in the brief space of three years is without a parallel in either hemisphere. The important interests with which the two Sydneys are now identified have made their names familiar as household words in all the great centres of trade, and the Maritime Board of Trade may certainly regard it as a subject of congratulation that its deliberations are being held at a vantage point destined, in the very near future, to enhance the status and prestige of the Maritime Provinces of the Dominion in a marked degree.

The last annual meeting held at Chatham, under the presidency of W. S. Loggie, was well attended and full of interest even to its closing hours.

CORONATION OF EDWARD VII.

The great event of the past year has undoubtedly been the Coronation of our Monarch in the chair of St. Edward, which notable Imperial ceremony has at length taken place, shorn of some of its splendor in consequence of the King's illness, but significant still in its grandeur of the power and might of the great Empire of which we form a part. The termination of the war in South Africa added lustre to the occasion, and the eyes of all are now turned in the direction of restoring harmony in that desolated portion of King Edward's Dominions and substituting the blessings of peace for the horrors of war.

TRANSPORTATION.

A period of seven years has elapsed since the formation of the Maritime Board of Trade at Halifax. It may be of interest to take a brief retrospect of the aims and objects, the solution of which led to a concentration of efforts on the part of local boards in the three Provinces. The leading question advanced in the address which I had the honor of presenting to your notice in August, 1895, was "Transportation," and it may, with truth, be admitted that it is still the most important subject with which we have to deal. The tariff, cold storage, local assessment and arbitrary fire insurance rates were also subjects brought forward at the inception of this board. One or two of these matters have been so far regulated as to render further agitation of them needless.

The transportation question, however, is always with us and it seems probable that in those Provinces by the sea it will, at all times, be the first on our programme. A certain amount of progress has been made in railway transit facilities during those seven years, but much remains to be accomplished. While it may be beside the mark to attribute eastern railway progress to any special efforts of this board, there can be little doubt that the mere fact of the existence of such an organization has acted as a beneficial stimulus for the promotion of legitimate railway enterprise. The Maritime Provinces, in common with the other Provinces of the Dominion, right away across to the shores of the Pacific, undergo the same experience as the result of contiguity to the United States border, and it is not uncommon in some

localities to find a run to the land of our great neighbors more easy of accomplishment than a corresponding journey of the same relative length within our own limits. In the Island of Cape Breton, both internal and external rail and steamship communication have obtained a more satisfactory impetus within a recent period; the advantages resulting must prove of great ultimate benefit in modifying the disposition to seek fresh fields of endeavor and possibly diverting the stream back to our own channels in Nova Scotia, New Brunswick and Prince Edward Island.

SUBSIDIZING PARALLEL RAILWAYS.

Public attention has been drawn in the Upper Provinces of late years to the absolute necessity of calling a halt in the policy of subsidizing parallel lines of railway, but a few miles apart, in districts already amply provided for. Nothing of this kind has ever taken place in the Maritime Provinces, where, as a rule, a contrary policy has unfortunately prevailed, resulting in hampering and restricting the proper development of their resources on modern lines. A change is being gradually brought about in this vital matter, and the Ottawa authorities are beginning to recognize that the prosperity of the whole Dominion is largely interwoven with the contingency of doing justice to the east as well as to the west. Before passing from railways and in looking forward to a fast service on the Atlantic it would be, I think, desirable that this board urge on the Minister of Railways and the Government that serious consideration be given to the shortening of the Intercolonial road, reducing the grades and double-tracking where necessary.

MARITIME UNION.

The South Shore Railway of Nova Scotia has taken tangible form since our last annual meeting and the work of construction is on the eve of being vigorously started. That five of the earliest settled and most flourishing counties in the Maritime Provinces, so favorably situated (geographically) for extensive business operations, should have been obstructed for so many years from securing adequate railway facilities emphasizes the need of Maritime Union from a political point of view in the clearest manner.

IMPROVED SERVICES.

The Midland Railway, serving Hants and Colchester in Nova Scotia, has been opened since our last meeting, and it is understood that the negotiations in progress for the Musquodoboit Valley Railway eastward to Guysboro' and the Strait of Canso are nearing a satisfactory conclusion.

In the Province of New Brunswick the leading feature is the proposed transfer of the Canada Eastern Railway to the Canadian Pacific Railway and its incorporation with that company's system.

The railway conditions in Prince Edward Island show no special feature of new interest, communication by both land and sea being reasonably adequate.

Local transit by steam vessels on the Atlantic coast of the Dominion (almost wholly within the limits of the Maritime Provinces) is admitted to be on a fairly satisfactory basis, although much criticism has been directed at the substitution of the ss. Lunenburg for the ss. Prince Edward on the route between Halifax and Yarmouth.

UNSATISFACTORY ATLANTIC SERVICE.

As regards communication between the Maritime Provinces and the Motherland the unsatisfactory conditions which have obtained ever since Confederation was brought about, remain in full force. The Atlantic mail service, which, if properly conducted at the nearest points to Europe in the Maritime Provinces, might be made one of the most efficient in the four corners of the globe has gone from bad to worse, and it has come to knowledge that the credit of one of the Maritime Provinces recently ran the risk of being seriously jeopardized in consequence of the remittances for the interest on its bonds in London having been entrusted to one of the subsidiztd apologies for mail steamers that carry His Majesty's mails across the Atlantic at the same rate of speed in vogue 62 years ago, at the inception of trans-Atlantic navigation. It has long been known in the Maritime Provinces that this backward state of affairs in the important matter of mail communication with England is largely the result of the divided phase of ocean navigation during the summer months by the St. Lawrence route. It has been borne patiently by the good people of Canada down by the sea, although not without unceasing protest, for a period of well nigh 30 years, the fact being well understood that improved mail and passenger communication with the Old Country formed essential conditions of the terms of union. The deterioration of the Atlantic mail service and the spasmotic experiences of permitting cattle steamers to "drift" across the Atlantic with the mails, affords an exhibition of public indifference and resignation in sharp contrast with the complacent language in which Canadians generally indulge when conning over the lavish expenditure of Dominion funds to further other great public requirements. At the seat of Government, in the very kernel of the Dominion, it is necessary for the postmaster to warn merchants and citizens in the official Post Office Time Table that if they wish their correspondence transmitted by the National Canadian Subsidized Atlantic Mail Service, such correspondence must be "specially" addressed "Via Canadian Route," otherwise it will be transmitted by the United States. No one phase of the transportation question is of greater significance to these sea-girt Provinces than the Fast Atlantic Service, and, as usual, it will be one of the principal subjects for your consideration, and there should be no uncertain sound as to the class and speed of the service, nothing inferior to the best and fastest crossing the Atlantic should receive Government recognition; in fact, to use a familiar forcible expression, Canada should go one better! Adopt a Maritime port all the year round, then the one-fifth of the population of this fair Canada would have the speedy service to which they are entitled and the four-fifths would not suffer by the delay of one single hour but would rather be the gainers.

In connection with the transportation interests and in direct touch therewith, the item of

STEEL SHIPBUILDING

is fraught with unlimited possibilities for the Maritime Provinces, and it will doubtless appear on the list of subjects for your deliberations. The results achieved on the Clyde, the Tyne and the Mersey by means of this far-reaching industry are familiar to you all. It should be remembered, however, that the industry has been long established in those quarters and it will be well to derive our lessons from more recent developments. A considerable revival of the art of shipbuilding on the modern lines, consequent on the substitution of steam for sail, has taken place in the neighboring Republic, but Germany affords the most striking object lesson for our Maritime Province people in this regard. The following extract from the April number of The German Export Review, published simultaneously in Stuggart and London, is well worthy of thoughtful consideration:

As late as 1890 more than one-half of all the ships required by German shippers were still being built in England. Hamburg and Bremen had extended their connections to all parts of the globe, and also other German seaports prospered, but our dockyards could not keep pace with the requirements (a state of things fully discussed at the time in the book of Director Haack and Admiralty Counsellor Busley). In 1895, however, the latter was in a position to report on most substantial successes by our shipbuilders, but England still remained in the first rank with our fast steamers Lucania and Campania. The last bar was duly scaled and in 1898 the German shipbuilding industry won the laurel with the famous steamer Kaiser Wilhelm der Grosse, built by The Vulcan Company at Stettine, for the North-German Lloyds. On her first voyage she displayed in prominent letters on either side the significant words "Made in Germany," and thus distinguished she entered New York harbor. Tecklenborg's dockyard had previously carried off the palm in the sailing line with the five-masted sailing ship Potosi. M. Schichau since the nineties, with his torpedo boats, has also conquered the first place in the markets of the world.

The Maritime Provinces, and even Canada as a whole, it may be admitted, can hardly venture to enter the lists seriously with Germany, but the deductions are obvious. The Deutcheland has since converted the Kaiser Wilhelm der Grosse into a back number, and more recently still the German Emperor honored with his presence the launching of a record-breaker designed to eclipse the Deutcheland.

The subsidiary industries connected with steel shipbuilding are so numerous and varied that a well-known authority has designated the shipbuilding industry as one of the grandest within the compass of modern effort.

CONFERENCE OF COLONIAL PREMIERS.

The Conference of Colonial Premiers which has just been brought to a close in London has had under consideration a number of highly important subjects, some of which have special interest for the Maritime Board of Trade. I have already referred to the Fast Atlantic Service and the question of a direct line from the Maritime Provinces to Capetown and Australia may also come up for your deliberation. These questions were prominent at the Toronto Conference of Canadian Boards of Trade which was attended by numerous delegates from Maritime Province Boards, whose voices

and influence are frequently with us at meetings of this board. It seems impossible to doubt that these assemblages of active and energetic business men on both sides of the Atlantic are certain to produce results of permanent benefit to the commerce of the group of nations forming the British Empire.

FIRE INSURANCE RATES.

Much feeling has been aroused throughout the Provinces because of the decisions of the boards of underwriters to largely increase rates. Protests have been set up and strenuous efforts have been made to counteract this determination of underwriters without any good results.

In our business relations it is always desirable that the best of feeling exist, but I fear that in many cases, at least, this feature, once so universal, does not now prevail.

If it be true that the fire insurance business of the Maritime Provinces has been profitable to those engaged in it, then the money exacted for advanced premiums must be absorbed by losses in the western sections. We should continue our protests and agitate until more moderate rates are granted.

One new Provincial company, The Nova Scotia Fire Insurance Company, launched since our last meeting, deserves hearty support.

MARINE INSURANCE.

Marine insurance is a subject which has agitated the minds of the business people of the Maritime Provinces for years past, and I regret to say that apparently no progress has been made towards removing what was admitted even by individual underwriters on the floor of Lloyds to be not only unfair and unjust, but grossly so. There is no justification for the excessive rates of premium applicable to Maritime Province business rates, 20 to 50 per cent. in excess of those charged on United States business and in some cases in excess of those applicable to the St. Lawrence.

I will not further occupy your time with this subject, but in leaving it express the hope that this board will again protest in unmistakable language against this indefensible discrimination by underwriters.

WEST-INDIAN TRADE.

There has been during the past few years a growing interest in this branch of the trade of Canada. Farm products and manufactured goods once foreign to those Southern markets are growing in favor and things Canadian are sought after. The prejudice which has existed for years against Canadian flour is now almost wholly overcome. Facts are stubborn things and the West-Indian consumer has realized this one, namely, that a barrel of Canadian flour is superior to a barrel of American flour, costing the same money, consequently a better loaf is obtained. On a recent trip through the Islands a representative of one of Canada's milling companies sold about 25,000 barrels of flour, something that could not have been accomplished in five seasons previous to 1895.

It seems fitting that mention should be made of the energetic efforts of so influential a body as the Canadian Manufacturers' Association to bring the West-Indian markets prominently and forcibly before the beehives of Canada in sending its president and secretary to the various West-Indian Islands. This delegation was most painstaking, making inquiry into every detail of the trade, and I would commend the report which it submitted to its Association to your careful perusal. The result has been an awakening of widespread interest in these markets throughout the Dominion and the representatives of manufacturing firms are to be found on almost every West-Indian liner.

At its meeting in Halifax last week resolutions bearing still further upon West-Indian trade were unanimously passed, which should receive hearty endorsation by this board.

CANADIAN COAL IN THE WEST INDIES.

Some thousands of tons of coal have been sent from these waters to the West-Indian coaling stations, and for the first time in the history of Canada Canadian steamers are this year buying Canadian

W. A. Black, Halifax, Past President.

coal in the West Indies. The by-products of the coal treated not far from us as we sit here have also been sold there for the first time this year. I must not, however, specify any particular articles of manufacture that may find purchasers in the South, but will risk the broad statement that all and everything which is manufactured in Canada, as well as the products of our lands, can find buyers.

It is a matter for congratulation that prosperity in a marked degree prevails throughout the Maritime Provinces; in fact, over our whole Dominion.

TOURIST TRAVEL.

is supremely important to the Maritime Provinces and each and every board throughout the land should use its utmost endeavors to encourage the same.

It would be presumptuous for this board to take credit for more than lending assistance towards directing the destiny of our common country, still, whilst small, comparatively speaking, we represent varied and important interests throughout the Maritime Provinces and our influence has been felt in support of reforms and working out much of our country's benefit.

STEAMSHIP SERVICE TO SOUTH AFRICA.

I will simply mention as two important subjects upon which the board has passed judgment, the South-African Steamship Service and the Fast Line (so-called). The former would appear from reports which have reached us since penning reference to this line in the earlier part of this address to be an accomplished fact. The latter project has received an impetus which we now believe it will not lose until all difficulties have been overcome.

THE LATE J A CHIPMAN.

By the death of the late Mr. Chipman the Maritime Board of Trade is called upon to mourn the absence of one who had taken a whole-souled interest in all our proceedings ever since its foundation. He has attended, we believe, nearly every one of our annual gatherings, and his presence and invaluable counsel will be greatly missed on the present occasion. On questions of freight rates, especially in connection with flour and grain, our lamented fellow-member was an admitted authority, and a deep interest was also shown by him in transportation matters, of which he took a broad view at all times, although stoutly maintaining Maritime Province rights.

In conclusion, I congratulate you, gentlemen, upon the flourishing state of your board. Never have there been so many affiliated boards—27 in all—and in good standing, never so financially easy, never so large and enthusiastic a meeting. This prosperity is largely due to our aged (although retaining all the energy of youth), Secretary C. M. Creed, who has been untiring in his efforts on behalf of the board during the past year.

I feel that I have trespassed too long upon your time, and in closing beg to thank you for the confidence reposed in me in having elected me to the responsible position of president of the Maritime Board of Trade.

W. A. BLACK,
President.

Mr. Blanchard, Windsor, moved the adoption of the address, which was seconded by M. G. De Wolfe, and carried by a rising vote.

SUBJECTS FOR CONSIDERATION.

Peter Innis, of Kentville, reported the result of the Committee on Resolutions, and the following were adopted at the instance of M. G. De Wolfe:

1. Halifax.—"Forest Preservation."
2. St. John.—"The Development of Transportation Facilities."
3. Sydney.—"Subsidizing Steel Shipbuilding."
4. Truro and Halifax.—"Better Country Roads."
5. North Sydney, Halifax and New Glasgow.—"The Union of Canada and Newfoundland. Better Trade Relations with the British West Indies."
6. Glace Bay.—"Reopening of the harbor and the building of a public wharf.
7. Windsor.—"The Route of the South-Western Railway."
8. Yarmouth.—"The urgent necessity of

better aids to navigation on the Atlantic Seaboard."

9. Wolfville.—"Better Steamboat and Mail Service on Minas Basin."

10. Kentville.—"In what manner can the efficiency of the Maritime Board be increased?"

11. Pictou.—"Government Ownership of the Fast Atlantic Line."

12. Kings Co.—"Is not the Fast Atlantic Service an absolute necessity in the development of the Maritime Provinces?"

13. Louisburg.—"Extension of the I. C. R. to Louisburg and Glace Bay."

14. Moncton.—"The encouragement of insurance on stocks of goods by small country traders."

15. St. John.—"South-African Trade."

16. Yarmouth and Digby.—"The desirability of daily steamship communication between St. John and Digby throughout the year."

17. "Discrimination of Marine Insurance Companies against Canadian Ports."

18. "Portage."

A discussion then took place as to the advisability of having the resolutions printed after they were selected by a Committee of the Council. Several members were spoken to on the subject, but the matter was finally allowed to stand for further consideration.

FOREST PRESERVATION.

The first subject, "Forest Preservation," was then taken up and introduced by Geo. E. Faulkner, Halifax. He said when we consider the vast importance of the lumber trade and the pulpwood industry of this country, it was well for us to reflect on the value of the forests we possess. The Governments of Europe are paying close attention to this subject; so also are those of the United States and Ontario. He suggested that it was time the Legislatures of the Maritime Provinces should take up this subject, especially as Canada was so rich in its forests. He stated that while Britain had only 14 different woods and Europe, 35, the Dominion of Canada possessed no less that 121 kinds. The following resolution was introduced:

Whereas, the subject of forestry has in recent years engaged the attention of the Governments of many countries of the world, and some of the Provincial Governments of Canada have taken action looking to the preservation and care of their timber reserves,

Therefore, resolved, that in the opinion of the board the time has arrived when laws should be made for the protection of the timber limits of the Maritime Provinces, in the direction of securing as far as possible immunity from the ravages of fires, for a more careful and scientific practice as regards the cutting of lumber and also as far as may be practicable the encouragement of the replanting of forests.

J. E. De Wolfe, Halifax, seconded the resolution and said it was desirable that something should be done at once towards the preservation of our forests in the Maritime Provinces. He referred to the interest the United States were taking in this subject by sending 30 students to Germany to study the question. He thought the cut should be restricted and better fire protection given the forests. S. B. Benjamin, Wolfville and Geo. S. Campbell, Halifax, also spoke to the resolution, and it was carried unanimously.

DEVELOPMENT OF TRANSPORTATION FACILITIES.

W. S. Fisher, St. John, introduced the next subject, "The Development of our Transportation Facilities." He said there is no more important question before the people of Canada than transportation. It applied to the railway and to the steamship. With the rapid growth of the Northwest our facilities for transporting were entirely inadequate at the present time. What would it be when the country was fully developed and the crops were four times the size of the present production? He called attention to the fact that the vast expansion of shipping over United States railways and American ports was marked. While in 1897 we imported through United States ports to the value of $16,000,000, in 1901 it had increased to $21,000,000. Notwithstanding this increase of imports through United States ports, the exports of Canadian products through United States ports and over United States railways showed a still greater increase, amounting in 1897 to $16,000,000 and in 1901 to $36,000,000. It behooved Canada to take some steps to bring about a change in this condition of affairs. His resolution read:

Whereas the rapidly developing resources of Canada have rendered the transportation question one of the most important to the future prosperity of this country, and

Whereas, it is most desirable in the national interest that every effort should be made to have the import and export trade of Canada carried on over Canadian routes and through Canadian seaports, and

Whereas, to carry this out most effectively, it is necessary that our national waterways and ports be so thoroughly protected and equipped that the traffic may be carried on with the greatest possible safety and rapidity and at the least possible cost. Therefore,

Resolved, that this board expresses its approval of the action the Government have already taken to bring about this result, and the further hope that no effort will be spared to assist in placing our ports and lines of communication in a position to secure the bulk of Canadian commerce in summer and winter.

Further resolved, that a copy of this resolution be sent to each member of the Dominion Government and to each Canadian board of trade.

Senator Woods, Sackville, seconded the resolution in a thorough review of the development of transportation, both by water and land. Senator McSweeney, Moncton, also spoke on the subject and suggested that if the Canadian railways would reduce their rates to compete with the United States railways, the question of using all-Canadian routes would be settled.

Harvey Graham, New Glasgow, asked that the resolution should be more specific as it would then call attention and create discussion. He advocated the approval of greater expenditure of money by the Government to improve transportation.

J. P. Longard said he approved of the extension of the Intercolonial to the Great Lakes and would ask the Government to do so.

Other speakers who took part in the discussion were Mr. Spinny, Mr. Haszard, P.E.I.; Mr. Paton, P.E.I. It was then referred to the committee to amend.

The delegates, on adjournment for lunch, were photographed on the steps of the Court House.

BETTER COUNTRY ROADS.

C. E. Bentley, Truro, introduced the next question for consideration in the following resolution:

Whereas, the country roads of the Maritime Provinces are to a large extent in a very deplorable condition, notwithstanding the large amounts granted by the respective Governments as well as the statue labor performed on them, and

Whereas, this Maritime Board of Trade is satisfied that the present system of disbursing the large amounts voted for road purposes does not produce the best results; and,

Whereas, the aforesaid bad condition of these roads is a serious menace to the growth and prosperity of the country.

Therefore, resolved, that this Maritime Board of Trade would strongly recommend that each Province appoint a competent instructor in road-making, to instruct country or district supervisors, and to generally oversee the construction and maintenance of public roads.

Mr. Bentley, in introducing the resolution, said he considered this a better subject than subsidizing steel shipbuilding; the subject was not good roads, but better country roads. For cities and towns bad roads should be relegated to the age of primitive field culture. And how many farmers want to go back to those times? He found that next to education the largest item is the amount voted to spend on roads. In Nova Scotia, for the year 1901 the sum of $117,644.97 was voted to be spent on the roads. Add this to statue labor and the amount is enormous. It is safe to say that not less than $400,000 was spent, including statue labor, by the Province of Nova Scotia last year. The roads are the arteries of our agricultural commerce,

and are left to the tender mercy of men, who, in most cases, have no practical knowledge of road making. The Province should appoint a practical road-maker, the same as has been done in the Province of Ontario. He also said that the county councils had spent large sums of money in purchasing road-making machines, but far better work would be done if a practical road-maker was at the head of affairs.

F. O. Allison, of St. John, seconded the resolution, and said it was only too true that better roads were needed. The resolution passed by an unanimous vote.

UNION OF CANADA AND NEWFOUNDLAND.

The union of Canada and Newfoundland and better trade relations with the British West Indies was the next subject discussed by the meeting, and was ably presented by D. H. Smith, of North Sydney, who read the following resolution :

That, whereas closer trade relations with all the British colonies within the Empire is desirable, and

Whereas, the union of Newfoundland with the Dominion of Canada has long been a subject of interest in both countries, and,

Whereas, the trade between Canada, Newfoundland and the West Indies is capable of great expansion, and should be on a basis of the greatest benefit to all. It is,

Therefore resolved, that in the opinion of this board it is desirable that the Government of Canada should endeavor to establish closer relations with Newfoundland and the British West Indies, whether by Federal or commercial union.

Mr. Smith said it was a subject of vital importance to the whole of Canada. In the past year there had been carried between North Sydney and Newfoundland 20,000 people and about 15,000 tons of freight. All the products of the Maritime Provinces found a market in Newfoundland, although they met with a heavy duty. This could be overcome by a union of the colonies. Newfoundland's debt of $18,000,000 was quite heavy, but as an offset to this debt she had very rich mineral deposits. Under federation it would give to Newfoundland a free breakfast table of which Canadians were so proud. Regarding our relations with the West Indies, he suggested that we required many of their products, and already our products found a good market there. The condition of the people there presented some obstacles, but the solution was closer trade relations with Canada.

J. Devere Stevens, Halifax, seconded the resolution in an able speech, giving his personal experience on this island.

A. C. Bell, New Glasgow, also spoke to this resolution. He said they held the gateway of Canada, and there was a pressing necessity to compel Newfoundland to attach herself to Canada. "We can none of us fail to recognize the fact that Newfoundland is a necessity to Canada. Give them good terms and they would come in." The resolution carried by a unanimous vote.

James McKay, Glace Bay, proposed the following resolution, but as it was not seconded it was laid on the table :

Resolved, that the Maritime Board of Trade views with favor the decision of the Government to spend $10,000 for the placing of Glace Bay harbor in such a condition that it will be of service to the mercantile community.

ROUTE OF A RAILWAY.

"The Route of the South Western Railway," was a subject that was introduced by Dr. Black, of Windsor, who showed by map and chart the route he thought it should take. This resolution created considerable opposition from the Halifax members. The resolution read :

Resolved, that it is desirable that the route of the South Western Railway, so-called, be such that it shall be of the greatest service to the largest amount of trade and commerce of Nova Scotia proper, Cape Breton and Prince Edward Island.

Dr. Bligh, of Truro, seconded the resolution in a strong speech.

Messrs. Stevens and J. E. De Wolfe, of Halifax ; Robert Caie, of Yarmouth, and Mr. Longard, Halifax, spoke strongly against the resolution and at the suggestion of M. G. De Wolfe it was withdrawn.

In order to save time, resolutions Nos. 8 and 17 were coupled and Augustus Cann, Yarmouth, handed the board the following resolution on "The urgent necessity of better aids to navigation on the Atlantic seaboard" :

That in view of the patriotic determination of our Government to have a Canadian freight and passenger steamship service equal to the best, this board respectfully urges upon the attention of the Government the necessity for better aids to navigation upon the Atlantic seaboard and the Bay of Fundy.

Mr. Cann stated that in view of the great losses of ships on the coasts it was needed that the boards of trade agitate for better aids to navigation. While the inland lake navigation was well protected, the sea coasts needed more powerful fog signals, better pilots, closer and more frequent examinations as to the ability and disability of the pilots.

Senator Wood seconded the resolution in an able speech on the subject, and the resolution was passed unanimously.

At this stage of the proceedings the president begged leave to say that he had just heard that J. E. De Wolfe, vice-president of the Halifax Board, had been arrested by the sheriff at the instance of Justice Meagher. This created great excitement and many members left the chamber. When order was restored M. G. De Wolfe presented the following subject for discussion : "In what manner can the efficiency of the Maritime Board be increased ?" :

Whereas, the efficiency of the Maritime Board is one that appeals to the loyalty of each affiliated board of trade and each member thereof, anh whereas much difficulty is experienced by the president and secretary of the Board in getting local boards to respond to correspondence, etc., in making their arrangements for the annual meetings.

Therefore resolved, that we in session assembled do pledge ourselves to do all we can to assist in every way the overcoming of all local obstacles that tend to detract from the object and aims of the board and to facilitate the progress of business in our annual meeting.

Mr. De Wolfe urged on the members of the various boards to take a more personal and active interest in their local boards, to attend the meetings of the boards and see that the membership be kept alive by creating interest in the many important subjects that are constantly being brought to the front. Mr. De Wolfe said he was the father of many local boards that he had created, but many of them had ceased to take a proper interest in the boards, which he much regretted.

The following resolution was then introduced by H. G. Harris, of Kentville. for E. C. Hanrahan, Sydney, and seconded by H. G. Harris.

Whereas, it is desirable in order to further increase the usefulness of the Maritime Board of Trade that the organization should make arrangements with a proper trade journal to publish an official report of its annual gathering and throughout the year to be a medium for the dissemination of information and official notices of the board to its members, and,

Whereas, that in the past journals of Upper Canada have more or less been regarded as the organs of the Maritime Board and that it is desirable that the official organ should be published in the Maritime Provinces.

Therefore, resolved, that a committee be appointed to look into the question of an official organ of the board and that said committee make proper arrangements for this purpose, reporting back to the board the action taken.

Mr. Harris named J. C. Studart, of Halifax, as one of the committee, but he refused to act. The resolution was carried and referred to the incoming Executive Committee.

INSURANCE ON STOCKS IN COUNTRY STORES.

The encouragement of insurance on stocks of goods by small country traders was introduced by Mr. McSweeney and seconded by J. Messery, and was carried without discussion. The resolution read :

Whereas, many merchants in the country districts, towns and cities are not in the habit of insuring their stocks of mer-

chandise and business premises sufficiently, or not at all, and,

Whereas, it is highly important and most desirable that all merchants should keep their property well insured.

Therefore resolved, that the Maritime Board of Trade takes this opportunity of directing attention to this important matter and recommends merchants to seriously consider their position in relation to this question.

SOUTH-AFRICAN TRADE.

South-African trade was next brought up by W. H. Fisher in the following resolution :

Resolved, that the Maritime Board of Trade heartily approves of the action of the Dominion Government in establishing steamship communication with South Africa, and desires to emphasize the importance of extended intercommunication between Canada and South Africa, the West Indies and other British colonies.

The resolution was seconded and carried without discussion.

POSTAGE RATES.

W. S. Fisher, of St. John, moved a resolution in regard to postal rates, and spoke very strongly on the subject and against the new postal arrangements. The matter was also discussed by J. E. De Wolfe, Mr. McKinley, J. E. Stewart, Mr. Robinson, Moncton, and Capt. Taylor Woods. It was finally decided to defer action. The resolution read :

Whereas, the new regulations of the Post Office Department put in force July 1, 1902, whereby the postage on circulars, catalogues, books, samples and many other items under the headings of 3rd and 4th class matter, have been doubled, and have placed a serious burden upon the mercantile classes (while the tendency of such increased rates is not to augment the revenue), and for which there seems to be no justification.

Therefore, resolved, that the board memoralize the Government requesting that the former rates be restored, and,

Further resolved, that copies of this resolution be sent to every board of trade in Canada.

FRIDAY'S SESSION.

THE JUDGE MEAGHER AFFAIR.

The first business before the meeting was the report of the committee who were appointed the previous evening to investigate the Judge Meagher episode. The report read :

To the Maritime Board of Trade :

The committee appointed to inquire into the circumstances connected with the committment of J. E. De Wolfe, vice-president of the Halifax Board of Trade and delegate from that board to the Maritime Board of Trade, to the custody of the sheriff of the county of Cape Breton by Mr. Justice N. H. Meagher of the Supreme Court of Nova Scotia, have to submit the following report :

That the circumstances under which the committment of Mr. De Wolfe was made appears to have arisen from Mr. De Wolfe resenting certain language used by Judge Meagher regarding members of the Maritime Board of Trade.

That the interview between Mr. De Wolfe and Judge Meagher appears to have taken place on the steps of the county court house, rooms in which had been placed at the disposal of the board through the courtesy of the municipal authorities, or in the vicinity thereof.

That as far as the committee could ascertain Mr. De Wolfe, in the course of the interview, stated to Judge Meagher,

A HISTORICAL GROUP—The Group of Members of the Maritime Board of Trade at Sydney that offended Judge Meagher.

that he, the judge, had used disgraceful language, and that Mr. De Wolfe was therefore committed to the custody of the sheriff as aforesaid.

That upon Mr. De Wolfe expressing his regret that he had used the word disgraceful the committment was canceled.

That the committee do not feel called upon to express any opinion as to Judge Meagher's conduct or language.

All of which is respectfully submitted.

WM. JARVIS,
G. S. CAMPBELL,
HORACE HASZARD,
G. E. DE WIT.

Sydney, N.S., August 21, 1902.

The report was adopted, but several members spoke strongly in terms of disaproval of the Judge's action.

BETTER MAIL AND STEAMBOAT SERVICE.

The next subject was "Better Steamboat and Mail Service on Minas Basin." Dr. G. W. E. De Wit, who presented the resolution, spoke strongly in its favor, and the seconder, M. G. De Wolfe, ably supported him. The resolution, which read as follows, was carried unanimously:

Whereas, it is realized expedient to establish a steamship and daily mail service between the ports of Wolfville, Kingsport and Parrsboro' on the Basin of Minas.

Whereas, under existing conditions, two days are consumed while the mails are en route from Wolfville to Parrsboro' or from Parrsboro' to Wolfville, and,

Whereas, the whole of the Annapolis Valley and the western counties of the Province feel the necessity of a shorter and more direct mail service to Parrsboro' and all sections of the country east of Parrsboro', and,

Whereas, the proposed route across the Basin of Minas is 20 miles and the route now travelled by the mails from Wolfville to Parrsboro' is 200 miles, the latter route necessitating the detention of the mails over night at Halifax, and,

Whereas, the time occupied by steamship across the Basin would be one and a half hours and would bring mail matter and passengers directly in touch with the D. A. R. at Wolfville and thus avoid the delay over night at Halifax, and,

Whereas, the tourist travel has greatly increased within the past two years in the towns of Wolfville and Parrsboro', and,

Whereas, the said travel would greatly increase with a daily service and become a strong factor in the financial support of the steamship companies.

It is resolved that it is the opinion of the Maritime Board of Trade that a daily mail and passenger service between the ports of Wolfville, Kingsport and Parrsboro' would be of immense value and advantage to the western and eastern counties of the Province and to the public generally. It is

Further resolved, that the Dominion Government be asked to grant a subsidy for a daily mail service on the Basin of Minas, between the ports of Wolfville, Kingsport and Parrsboro', and that a copy of this resolution be forwarded to the Dominion Government by the secretary of the Maritime Board of Trade.

STEEL SHIPBUILDING

One of the most important subjects before the board was then taken up. This had been deferred until to-day at the request of the Sydney and Halifax boards. The subject was "The Subsidizing of Steel Shipbuilding." E. A. Mackee, of Sydney, moved the resolution, which read:

Whereas, it is most desirable that Canadian products should, as far as possible, be carried in Canadian-built ships, and,

Whereas, the establishment and operation of large shipbuilding plants in Canada would prove to be of immense advantage to the whole country, and,

Whereas, other Maritime centres have either directly or indirectly given liberal financial assistance to their merchant marine, and prospective Canadian builders are therefore seriously handicapped in competing with the old-established yards of Europe and the United States.

Therefore, resolved, that the Federal Government of Canada be asked to grant a tonnage bounty large enough to enable Canadian builders to compete in this industry and have it extended over a term of years sufficiently long to secure the permanent establishment of this industry, which is vitally important to the business interests of the country.

Mr. Mackee said every member of this board is thoroughly convinced of the fact that steel shipbuilding is of the greatest importance; also every person knows that any nation that has attained fame and supremacy in the world owes it to the building of ships. He then referred to the ancients who succeeded each other by their superiority in the building and possessing of ships. England's enviable position as a maritime power was owing to an Act of Parliament, which gave bonuses to shipbuilders. It is a matter for us in Canada to consider whether we should or should not take up this great industry. "We are here as the fairyland and we should seize the opportunity to put ourselves to the front. It would be very remiss, indeed, if we do not do so."

Geo. E. Campbell, Halifax, seconded the resolution. He endorsed the building of steel ships as one of the national industries of these Provinces. "The Local Government have granted a bonus of $100,000, but we must have yards built on a large scale; we must import skilled labor, and the Federal Government should give a bounty of so much per ton for a number of years. A united effort in this direction will result in a bounty. Every board of trade is directly interested in this question, and should pass strong resolutions this fall before the meeting of the Federal Parliament, and, if successful, and no doubt it will be, it would be on an enormous scale."

M. E. G. De Wolfe, said Mr. Campbell's remarks were the key note to the situation and they would get what they wanted if they would work together.

The resolution passed unanimously.

FAST ATLANTIC SERVICE AND MARITIME PROVINCES.

"Is not a Fast Atlantic Service an absolute necessity in the development of the Maritime Provinces?" was a subject introduced by Capt C. O. Allen, Kentville. He said that England was anxious to promote a Fast Atlantic Service and we had everything to gain and nothing to lose. A consideration of the transportation question from our grain belts shows a vast field for improvement. In one shipping season alone, out of 6,000,000 barrels of flour and 200,000,000 bushels of cereals, the greater bulk of which came from the Northwest, 5,850,000 barrels of flour and 170,000,000 bushels of wheat were carried through United States channels, while only the comparatively small quantity of 150,000 barrels of flour and 30,000,000 bushels of wheat and corn passed through the channels of Canada. It is estimated that 24,000,000 tons of freight that should have gone through Canadian ports, passed through the waterways to Buffalo, thence through the Erie canal to New York and were finally placed on the markets of the world as the product of the United States, thus keeping our own country in obscurity and building fame for our border competitors.

It was pointed out only last month by James Osborne, general superintendent of the Atlantic Division of the C.P.R., that $46,000,000 worth of our own exports were handled by other ports because of our lack of proper facilities.

An at present minor product of Ontario, the cheese export, shows that a large quantity of this article, which the consumers supposed was purely of United States manufacture, coming as it did through New York, was really Canadian which had passed over Suspension Bridge into the ports of the adjoining Republic.

Capt. Allen strongly urged the meeting to see that every influence be brought upon the legislators of the Maritime Provinces to earnestly entreat the Federal Government to carry out this Fast Atlantic Service. "Heavy subsidizing by a Government to promote a new trade is open to controversy, as particular concerns would reap the benefits and handicap outside competing lines," he continued, "Canada's present situation is vastly different, for we have the trade but not the means, and consequently our transporting is being conducted and carried through another country. There is no doubt that if the Canadian Government will assist in operating a fast line for ten years, the country will be in such a state of prosperity that the subsidies can then be withdrawn, when the trade

will offer its own inducements to carry out the requirements, and Canada will forge ahead by leaps and bounds, similar to the prosperity the border Republic enjoyed during the period between the years 1870 and 1891, when its population increased 24,000,000 in 21 years, while this vast Dominion with as great possibilities was standing virtually still.

"If we review what other nations have been doing along this line, we will find that their commercial prosperity has been built up by Government assistance.

"The Canadian blue book shows $200,000 subsidy paid to trans-Atlantic steamship companies. At the Colonial Conference held at Ottawa some years ago, it was pointed out by the Postmaster-General that this amount was inadequate and far belaw what was actually required for the rapid handling of mails. At present the merchants of Liverpool stamp on their mail matter 'via New York' on the very day that the Canadian mail boat leaves Liverpool via Moville or Rimouski, preferring to have it go by the circuitous and indirect route to Southampton, where the United States mails leave during certain days of the week, thence to New York and finally over the long-rail route to Montreal, Sydney or Halifax. Experience has proven that owing to slow Canadian mail boats and subsequent delays around the Grand Banks and Gulf of St. Lawrence, the mails will actually reach their destination with much more certainty.

"It appears unnecessary for a Government to grant a large subsidy to a fast freight line. We have been striving for a long time to secure a fast mail service, and even in trying for this why should we weaken our hand by asking too heavy a subsidy, such as would be required to carry out both the mail and freight services? The three or four boats required to complete the mail service would carry all our perishable freight. The greater bulk of our freight, which is not perishable, could go by slower and less expensive boats.

"The speed of Atlantic mail boats is increasing every year, it being only a question of the trade paying the price. Let not Canada's interests be sacrificed, but let us have a line not only as fast as any now afloat, but as fast as any now building on the stocks in Europe. The North-German Lloyd boat, now under construction, is to be a full knot faster than any at present in commission.

"The Allan line, trading up the St. Lawrence, lost eight ships in as many years, besides many other accidents, entailing loss of life and property, owing to these steamers running through a region abounding in ice, where the percentage of fog reaches the maximum, threading up a long and dangerous Gulf into the narrow and shifting channels of the river. Against this let us compare the record of the Cunard boats, plying between Liverpool and New York, where they have run an unbroken record of 62 years without losing a life, and nearly as long without the loss of a letter.

"The St. Lawrence, from its geographical position, with its long pent up channel, has had in the past so many serious accidents, which have unfortunately given a bad name to the whole Canadian waters. Only during the brief period of three months that navigation has been open in the Gulf there have been calls on the underwriters amounting to three-quarters of a million dollars.

"The Hydrographic Office at Washington has just issued charts, dated July, 1902, taking data from the past three years, 1898 to 1901, which show that during the month of July a region at about 320 miles south of Cape Race, fog exists 17.6 days during that month, when only 60 miles further south there are only 1.8 days of fog. Around this latter spot the White Star, Cunard and North-German Lloyd ships pass, and so must the fast Canadian mail boats, no matter where the terminus may be. Through a region like the former the mail boats would have to go under a greatly reduced speed."

The resolution read:

Whereas, public opinion in Canada has pronounced emphatically in favor of a fast service between Canada and the United Kingdom, equal in speed and appointment to any crossing the Atlantic;

And whereas, we are of the opinion that full advantage should be taken of the ports of the Maritime Provinces, which are hundreds of miles nearer the commercial centres of Europe than the inland ports of Canada, and especially as ocean routes can be followed to these ports which are quite as safe and shorter than those taken by the fastest ships out of New York;

Therefore resolved, that the representatives of the Maritime Board of Trade here assembled urge the Government to take immediate and definite action on this question by granting the necessary subsidy to insure the inauguration of such a service with the least possible delay;

Further resolved, that ocean routes to be followed by steamers of the line should be such as would enable them to run as nearly as possible at full speed from port to port, with the least risk of danger or detention by fog or ice;

And further resolved, that in the opinion of this Convention the terminus in Canada should be the nearest available port to Europe, where ships of such large size can come and go with safety and despatch at all seasons of the year.

The resolution was seconded by M. G. De Wolfe, of Kentville, who said he had always strongly favored a fast Atlantic service, and believed we should go about this matter with great earnestness. He referred to the late Mr. Chipman as having done a great deal in bringing this matter to the attention of the Maritime Board.

G. H. Dobson, of North Sydney, depreciated the adoption of a 20-knot service, and considered that it would be a waste of public money. "We must have the very fastest steamers afloat," he said. He also insisted that the port of Sydney must be a port of call.

G. S. Campbell, Halifax, agreed with the previous speakers. He said a great change of sentiment had taken place in Canada in regard to the fast Atlantic service, and the West were now strongly in favor of it. Nova Scotia had always been in favor of a first-class service. The time had now come to consider the details and the terminus of a fast Atlantic service. The ports available were Montreal, Quebec, Sydney, Halifax, and St. John. The questions to be considered were the speed of the ships, safety of the route, and the most available port all the year. He considered that it would be to the best interests of all for the line to call at one port all the year round.

Jas. Paton, Charlottetown, P.E.I., considered the Quebec route the back door to Canada, and thought that Halifax should be the all-year port.

H. C. V. LeVatte, Louisburg, took exception to the previous speaker's remarks, and stated that if the nearest port was selected then Louisburg was the nearest port to Europe.

Dr. De Wit: The nearest and safest port?

Mr. LeVatte: That answers for Louisburg.

Wm. Jarvis, St. John, said it was unwise and unfortunate to specify any particular port, and suggested that the selection of the port should be left with the company or companies who intend operating such a line. The question of speed was of the greatest importance, and he did not think the present subsidy sufficiently large to maintain a speed which would make the service valuable.

W. H. Fisher, St. John, said he was heartily in favor of the resolution. In his opinion it would be well if Canada adopted a 20-knot service, and afterwards make it equal if not superior to the best crossing the Atlantic. "Let us take a step at a time in trying to compete with the great people to the south of us," he said.

J. E. De Wolfe, Halifax, said: "This is a question of a slow or fast line, and I doubt if a 20-knot-service could be called a fast line. This is the point to decide. Do we want a fast line? Let us ask for it."

Senator Wood, Sackville, favored the adoption of a service equal in speed and

appointments to any crossing the Atlantic. We want the greatest route on earth. The resolution was carried unanimously.

EXTENSION OF THE I.C.R.

H. C. V. LeVatte, Louisburg, introduced the resolution for the extension of the I. C. R. to Louisburg and Glace Bay. It read :

Whereas, freight carried by the I. C. R. for points south of Sydney, connected by the Sydney and Louisburg Railway (except in carloads) is at present stored at Sydney, but reshipped on the Sydney and Louisburg cars, thus causing expense and delay, and,

Whereas, passengers travelling west by the first express train of the I.C.R. from Louisburg and all points south of Glace Bay, and by the fast express on all points south of Sydney, are compelled to remain in Sydney overnight, and,

Whereas, the mail service is very unsatisfactory on account of the said railway service,

Resolved, that this Maritime Board of Trade believes that it would be to the material interest of the people living between Sydney and Louisburg on the line of the Sydney and Louisburg Railway, comprising a large percentage of the population of Cape Breton county, and also the mercantile and travelling community at large that the I.C.R. express and freight trains should run to Louisburg over the Sydney and Louisburg Railway track, connecting as it would with the great mining districts.

Further, resolved, that a copy of this resolution be forwarded to the Minister of Railways at Ottawa.

S. E. Landry seconded this resolution, and after a short discussion it was passed.

WANT BETTER FACILITIES.

E. H. Spinny, Yarmouth, introduced the next subject, namely, "The desirability of a daily steamship communication between St. John and Digby throughout the year." He pointed out that now for only about four months in the year they have a daily service, and it was necessary that they should have a daily service all the year round. He presented the following resolution :

Whereas, the increased requirements of commerce in the south-western section of Nova Scotia, coupled with that of the Annapolis Valley, demand greater transportation facilities ; therefore,

Resolved, that the Maritime Board of Trade urge the Government to encourage such increase of steamboat service between St. John and Digby by granting such subsidies as will accomplish that object.

The resolution was seconded by J W. Blanchard, of Windsor, who said it affected the entire western portion of Nova Scotia. The resolution was passed unanimously.

THANKS TO THE MACLEAN PAPERS.

W. H. Fisher, St. John, asked permission of the chair to say a few words and asked the meeting to pass a vote of thanks to The MacLean Publishing Company for having been good enough to send down each year, at a great expense to them, a representative to report the meetings of this board, and he therefore moved that a vote of thanks be passed.

M. G. De Wolfe, Kentville, seconded the motion. He said he had the interest of the Maritime Board of Trade at heart and he regretted that the resolution which was passed yesterday had not been reconsidered, but it was brought in during a time of great excitement while most of the members were absent, and, in fact, it was "railroaded through"—you know what that means ? He said that the board highly appreciated the service rendered by "The Canadian Grocer" and "Hardware and Metal" in so freely reporting the meetings.

J. C. Stewart, Halifax, said the resolution brought in the day before was a complete surprise to him, and he promptly declined to serve on such a committee. He considered that it was a reflection on The MacLean Company's papers which should not have been made. "I strongly favored the encouragement of all trade journals publishing the proceedings, and especially those which were so widely circulated as the papers published by The MacLean Publishing Co. The resolution was passed unanimously.

The secretary's report was then read. He reported having collected the sum of $261.75, and expended $31.

It was moved that the secretary be granted $100 for his services, and Mr. Paton moved the adoption of the report, which was seconded by Mr. Dobson and carried.

FIRE INSURANCE RATES.

J. E. De Wolfe, Halifax, introduced the following resolution :

Whereas, it is reliably stated that fire insurance in the Maritime Provinces has been very profitable during the past 20 years ;

And whereas, the rates have recently been increased in many places by the tariff companies without any justification for the same ;

Therefore resolved, that we ask our members to unite in giving business to and assist in the promotion of non-tariff companies that are willing to take risks on their merits independently of any combination, and that the secretary be authorized to send a copy of this resolution to every board of trade in the Maritime Provinces.

In speaking to the motion Mr. De Wolfe said the question of insurance rates had become one that needed the consideration of this board. He then read the following resolution passed by the Bridgewater Board of Trade :

At a special meeting of the Bridgewater Board of Trade, held on Tuesday evening, the 12th inst., the following resolutions were passed :

Whereas, the Nova Scotia Board of Fire Underwriters has imposed a rating taking effect on the first day of March inst., increasing the heretofore existing rates for fire insurance more than one-third in the business district of this town ;

And whereas, the aforesaid district, subject to the increased rates, was rebuilt after the fire of January 12, 1899, in accordance with the advice and ideas of a representative of said board, who stated that if such plans were adopted the fire insurance rates would be materially reduced ;

And whereas, by incurring the expenditure of $25,000 for expropriating the water front so that no buildings could be erected thereon, thereby providing an easy and effective means of procuring water for fire protection purposes in said district, and the laying out of a cross street in said district and two others widened for fire-breaks ;

And whereas, all wooden buildings in said district were restricted to two storeys in height and were also required to be built with flat roofs ;

And whereas, a water service with a reservoir a great elevation above La Have River is to be installed this year at an expenditure of $40,000, a prime consideration in incurring such expenditure being to give greater protection from fire to said district ;

And whereas, the rate now imposed is unjust, oppressive and unfair in consideration of the facts here recited ;

Therefore resolved, that the Bridgewater Board of Trade in meeting assembled, protests strenuously against the imposition of the increased fire rates and respectfully requests the Board of Fire Underwriters to carefully consider this resolution and the facts it contains, and in view thereof to revoke the increased rates imposed on March first inst. ;

Further resolved, that copies of this resolution be sent to the Nova Scotia Board of Fire Underwriters and also to the Maritime Board of Trade, the Halifax Board of Trade, and to C. E. L. Jarvis and F. W. Butcher, insurance adjusters, requesting their co-operation, and that the local agents be requested to bring to the notice of their respective companies the injustice and inequality of the increase and the danger of loss of business thereby.

Mr. Stevens said that the merchants had been paying unduly high rates in some instances to make up for losses elsewhere, and he considered there should be some remedy for it.

G. E. Faulkner spoke on behalf of the insurance companies, and said the question of insurance was entirely a business proposition. He said the companies must charge enough to warrant them doing a safe business. It was not true that the rates were fixed so that burned districts had to pay all the losses the companies sustained in them.

W. H. Roach, Windsor, said the premiums paid by Nova Scotia amounted to $600,000 and to non-tariff companies, about $35,000. He considered the non-tariff companies should be encouraged, and as far as paying losses were concerned, he knew they always paid promptly. He called attention to the fact that dur-

ing this summer the tariff companies had raised their premiums 50 per cent.

Wm. Jarvis, St. John, said there was really a great misunderstanding in the matter. He, as an insurance man, had done everything possible to moderate the rates. He said that two of the largest companies who had done business in New Brunswick had gone out of business there on account of the unprofitable business they had done. It was the disposition of the companies to act fairly with all.

Thos. H. Summerville, St. John, opposed endorsing non-tariff companies, as the tariff companies might withdraw from the Provinces. "We want the best companies to carry our risks," he declared.

Mr. Campbell, Halifax, favored the encouragement of the non-tariff companies as much as possible in the Provinces, because there was a combine among the tariff companies to fix rates. He had no doubt fire insurance companies had made money. The resolution passed.

ATLANTIC MAIL SERVICE AND MARITIME PROVINCES.

Geo. Dobson, North Sydney, moved the following resolution :

Whereas, the usefulness of the Canadian subsidized English mail service between Montreal, Quebec and Great Britain is seriously restricted in the delivery of mails, particularly to the Maritime Provinces, by the use of Rimouski, an inland port, as the first port of call, delaying the mails to the Maritime Provinces from two to three days, and,

Whereas, improved transportation is of vital importance to the large and growing industries of these Provinces by the sea, therefore,

Resolved, that the Dominion Government be urged to give its immediate consideration to the selection and use by all Canadian subsidized mail lines plying between Montreal, Quebec and Great Britain of an Atlantic port of call that will afford these Maritime Provinces equal or better despatch for mails, etc., with the other Provinces of the Dominion.

The resolution was seconded by P. Innis and adopted.

COMPANY STORES.

W. H. Chisholm, of Glace Bay, brought up the question of company stores in the following resolution :

Whereas, it is a fact that the wages of many workmen employed by large industrial corporations in the Province of Nova Scotia are paid in merchandise through or by means of company stores, and,

Whereas, the system of paying labor in supplies, commonly known as the "truck system," instead of in the coin of the realm, is inimical to the progress of the community, checks economy, impairs the self-reliance of the workmen in business, and diminishes the purchasing power of the work of the laborer, and,

Whereas, the said system places barriers on trade, withdraws money from circulation, directly tends to the stagnation of enterprise within its immediate influence, and technically injures the commercial life of the country in general ; be it therefore,

Resolved, that the Maritime Board of Trade recommends the amendment of the present Cash Payment Act of Nova Scotia, so as to embrace the provisions of the English Act on the subject.

The resolution was seconded by D. D. Mackenzie, M.P.P., and passed unanimously.

VOTE OF THANKS TO SYDNEY BOARD.

On motion of G. S. Campbell and W. H. Fisher a vote of thanks was unanimously tendered the Sydney Board of Trade for its hospitality.

H. C. V. LeVatte responded for the county. He said : "We pride ourselves on treating our visitors well, and we regret the unfortunate occurrence of yesterday. We trust you will all come again."

Horace Haszard, Charlottetown, wished to return thanks to the citizens of Sydney and to the local board of trade on behalf of himself and Prince Edward Island delegates as well as the Convention for the reception they had received. He was glad to witness the wonderful progress that Sydney had made. "I am also bound to refer to one unfortunate incident, as I feel I have been insulted and propose to move a resolution and I feel that we should put ourselves on record that we resent the insult given our members." He moved the following resolution :

That before leaving Sydney the members of the Maritime Board of Trade wish to express their sense of the courtesy shown to them during their visit with one unfortunate exception ; that they desire to disclaim any intentional discourtesy towards a member of the judiciary of the Province, who is personally unknown to very many of them ; that they were greatly surprised at the attempt made to push through those of their numbers who were grouped on the steps of the court house building—rooms in which had been placed at their disposal, by the municipal authorities—and still more so at the language made use of on that occasion. And they desire to place on record their regret at an occurrence for which they feel that they have been in no wise to blame and their opinion that the language used towards members of the board was entirely unjustified.

P. R. Rentley, Sydney, seconded the resolution and regretted the occurrence. The Sydney Board were anxious that all should have a good time, and no doubt the unfortunate occurrence had put a damper on every one.

The resolution then passed unanimously.

NOTICE TO AMEND BY-LAWS.

G. E. Faulkner gave notice of the following resolution :

Resolved, that By-law No. 3 be repealed and the following substituted therefor :

Subjects for consideration at the annual meeting, and resolutions dealing with such subjects shall be forwarded to the secretary at least 30 days prior to date of annual meeting and the council of the board shall arrange the order in which the various subjects pcesented for consideration shall be taken up, and shall have the list of subjects, with resolutions to be offered in connection therewith, printed and distributed to the affiliated boards at least ten days before the date of the annual meeting.

NEXT PLACE OF MEETING.

Invitations to meet next year were received from Moncton, Yarmouth, Charlottetown and St. John. Charlottetown was decided on as the next place of meeting.

NOMINATING COMMITTEE.

A nominating committee to select officers for the ensuing year, composed of the following, was chosen by the chairman : M. G. De Wolfe, Wm. Jarvis, A. M. McKinley, Jas. Paton, Robt. Caie, E. C. Hanrahan, Dr. De Wit and Peter Innes.

Peter Innis, chairman, reported the following as the selection of the committee, and they were elected :

OFFICERS ELECTED.

President.—Horace Haszard, Prince Edward Island.

Vice-President (for Nova Scotia)—J. E. De Wolfe, Halifax.

Vice-President (for New Brunswick)—D. H. Walsh, Moncton.

Secretary-Treasurer.—C. M. Creed, Halifax.

Corresponding - Secretary.—E. T. Higgs, Charlottetown.

Auditor.—F. O. Allison, St. John.

J. E. DE WOLFE'S ACTION ENDORSED.

The following resolution was moved by Alexander Stephens, seconded by P. R. Rentley, and unanimously passed :

Whereas, J. E. De Wolfe, of Halifax, a delegate from the Board of Trade of that city, worthily upheld the dignity of the members of this board, in resenting gross insult offered them by Justice N. H. Meagher, and,

Whereas, Mr. De Wolfe in so doing was placed in a most unenviable position ;

Therefore resolved, that the board express its confidence in Mr. De Wolfe, and thank him for having pursued the course he did, thereby maintaining the reputation and dignity of the board.

Mr. De Wolfe, in reply to the resolution of thanks, thought the report of the committee a weak one, and certainly if no further action had been taken in the matter, he would have considered it his duty, in self-respect, to resign from the board. He was glad, however, that he still had their confidence when they selected him vice-president for Nova Scotia.

VOTE OF THANKS TO MR. BLACK.

M. G. De Wolfe moved a hearty vote of thanks to the retiring president, W. A. Black, and complimented him on the interest which had grown so large under his presidency. He referred to the meeting as being the largest held during the existence of the board.

J. E. De Wolfe, of Halifax, seconded the motion, which was carried amid loud applause.

W. A. Black, the retiring president, responded and thanked the members for the assistance they had given him and was pleased to see the interest taken in the meeting. He also spoke feelingly of the able work done by the secretary-treasurer, C. M. Creed, who had done hard work in the interests of the boards of trade.

After singing "God Save the King," the meeting adjourned sine die.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINING CLUTCH PULLEYS IN A MODERN PLANT.

THE machine tool is a turret lathe in the plant of a New York company. The tool, according to Iron Age, is especially fitted for the production of the counter-shaft pulleys sent out with their make of lathes, and these are manufactured in sufficient quantities to require the duplication of the parts in interchangeable style. The clutch pulley, which is the particular product of this machine, has several operations to be performed. For instance, the rim is faced on each edge, and the inside of the rim is turned out on a slight taper to form the frictional surface of the clutch. The face of the pulley is turned, crowned and finished. The hub is faced at the one end and the hole is bored and reamed to size. A portion of the interior surface of the rim, the arms and one-half of the hub are available for gripping or any other purpose, as the remainder of the surface is to be finished, and economy of time demands that all this be done without taking the work out of the chuck.

The designer of the tools felt the necessity of utilizing each of the unfinished parts in order that the pulley could be readily and solidly chucked. Each of the pulley arms rests against a piece projecting from the face of the chuck, and these lugs are machined on their outer ends. Other pieces locate the interior of the rim, and thus the work can be placed against the chuck and centred without delay. Three screws bear against the hub, and an equal number of hook bolts are forced into position to grip the arms of the pulley and draw them tightly against the faced projections on the chuck. These hook bolts are moved in or out by means of wedges and screws.

The cross slide has a multiple holder containing a set of half a dozen roughing tools together with two side tools for finishing the edges of the rim. These tools are held in the casting on the cross slide, and are fed in and then given a slight sidewise motion which puts the surface in good condition for the finishing chip. Each of these tools is held by its own setscrew and any of them may be readily removed for sharpening or other adjustment. The operating handles are brought to the front of the machine and the roughing tools are set in a curve to enable the work of the the finished chip to be more evenly distributed over the surface of the forming cutter.

The finishing tool is placed at the back of the carriage on the cross slide; the cutter being formed to give the shape of the crowned surface and the end of the tool cut at an angle to produce a shearing action. The cutter is tilted at a slight angle and on being pulled through by the cross feed the tool works with a steady shaving cut which speedily brings the pulley face to correct form.

MACHINERY NOTES.

A set of tinsmith's tools was delivered by H. W. Petrie, Toronto, to J. A. Mathewson, 319 Yonge street, Toronto.

Evan A. Cook, Trout Lake, Ont., has purchased a 15 in. x 7 ft. Sebastian gap lathe of H. W. Petrie, Toronto.

A 15-horse-power Haggas gasoline engine was shipped a few days ago to G. W. Peterman, of Bond Head, Ont., by H. W. Petrie, 141-5 Front street west, Toronto.

The Sims Lumber Co., Sault Ste. Marie, Ont., have installed a large horizontal tubular boiler in their plant. H. W. Petrie, Toronto, furnished the boiler with all its fittings.

Says The Kingston Times: "The expulsion of the Amalgamated Machinists of the American branch at work in the Locomotive Works, by the New York executive of the order, introduces us to another interesting phase of the strike in the institution on Ontario street. Of course, the order of expulsion does not involve their leaving the Locomotive Works; they simply lose the benefits of the organization and take the position of non-unionists. The expulsion, however, brings into view more clearly that the local strike is not now so much a struggle between the company and its ex-employes, backed up by the International Machinists' Union, as it is between the British and United States unions themselves. The strikers were, at the time of the strike, and are still, members of the United States organization. To it they paid their dues, from its officers came the order to strike, and since they went out they have been maintained by American money.

"Side by side with these men affiliated with the United States organization, worked a few men belonging to the Amalgamated Society, which is purely British in its origin and mainly so in its board of control. It has a large membership and a fund of over $3,000,000 on which it can draw for the support of its members, whereas the International Order has less than $9,000 to its credit for this purpose. These men refuse to go out on strike with their brethren of the foreign order. On the contrary, they remained at their work and are in this position to-day. Subsequently there came to their aid a number of fellow workers from over the sea who were attached to the Amalgamated Society. The latter aver that they were cognizant of the state of matters in the locomotive works when they agreed to serve the company, and that they came here with the sanction of the officers of their order in Britain, who were, presumably, seized of the situation in Kingston. The recent order of expulsion by the New York executive of the order, shows that there is such a cleavage between the International Order and the Amalgamated Society as to amount to different policies, indeed, to positive opposition."

ELECTRICAL NOTES.

DURING the week Jones & Moore, 22 Adelaide street west, have sold motors to The Wm. English Canoe Co., Peterboro'; to Robert Barron & Sons, Toronto; to W. Pearless, Arthur street, Toronto, and to The Ballard Tube and Equipment Co., Bay street, Toronto.

A partial list of firms to whom The Kay Electric Dynamo and Motor Co., Limited, have recently sold their improved motor is: Victoria Shoe Co., Ideal Plating Co., Gurney Foundry Co., Francis-Frost Paint Co., Flett, Lowndes & Co., George Keith & Son, T. Eaton Co., R. Dack & Son, Julian Sales Leather Goods Co., Reid & Brown, W. R. Phillips, Gold Medal Furniture Manufacturing Co., Kemp & Keith, Bell Piano and Organ Co., W. R. Johnston Clothing Co., Gowans, Kent & Co., glassware; A. R. Williams Machinery Co., H. W. Petrie, machinery dealer; Dominion Fence Co., Penman Manufacturing Co., Paris.

NEW ROLLER BEARING.

Jones & Moore Electric Co., 22 Adelaide street west, Toronto, will have a new roller bearing on one of their dynamos at the company's exhibition at the Toronto Industrial Fair. It operates without oil of any kind, and overcomes 90 per cent. of the friction of the ordinary bearings.

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

Three Requisites for Success in Business.

Extract from an address delivered by Daniel B. Murphy, of Burke, FitzSimons, Hone & Co., at the meeting of the Rochester Retail Grocers' Association.

WE are engaged in business for profit. There is little of the sentimental about the average business man. His self-preservation among his mercantile associates and the protection of those dependent upon him are what commend his constant and earnest attention and make bearable the routine drudgery incident to commercial life.

The discouraging fact ever confronts the struggling business man that over 90 per cent. of those who engage in mercantile pursuits fail, either directly or indirectly. Notwithstanding this disturbing feature of our business, we should keep prominently before us the truth that there is something in life's struggles besides dollars and cents. A man who is

CONFRONTED WITH INEVITABLE FAILURE,

and who sacrifices honor and integrity, for any salvage in the nature of dollars and cents, is dishonest and unworthy of confidence; while, on the contrary, the man who preserves his honor and integrity, even at great financial cost, retains in a higher degree than before the respect and admiration of his fellow men. We should be at all times manly, honorable, faithful and reliable. These qualifications are indispensable to every successful business man, and, what is more to the point, they are within the reach of all.

There are at least three essential requisites for the successful management of business. These are

CHARACTER, CAPACITY AND CAPITAL.

While all these requisites are fundamental, the greatest is character. No man can hope to permanently succeed in life's struggle whose line of action is not based upon the principles of honesty, uprightness and integrity. A merchant should be honest with himself, honest with his patrons and honest with his fellow business men.

To be honest with himself implies a full and accurate knowledge of the details of his business affairs. He should keep his books in such a manner as to enable him at any time to show definitely what his assets and liabilities are. His books should indicate daily the amout of stock on hand at cost, the amount of his book accounts at actual value and, also, the amount due his creditors. He should also have before him as a stimulus to greater effort a comparative statement of daily sales and expenses, extending over a series of years. A succesful enterprise cannot stand still. It must be progressive in order to be enduring, and every employe should share this commendable ambition of his employer.

In this connection I might say that it is very important that a merchant should have his stock fully protected by fire insurance. Insurance companies assume this risk for him at a reasonable compensation. It is their business to take risks of this kind and not the merchant's.

A merchant should also be honest with himself to the extent of appreciating fully what

A PRICELESS BOON

it is to have it known in commercial centres of the country that he is reliable and trustworthy in every transaction, that his word is synonymous with his bond, and that he is ever keenly sensitive to the necessity of preserving his good name. Without honor, integrity and manhood, a man has nothing and can have nothing. These qualities are vital to every man, whether in business or out of business, and their value cannot be estimated on a basis of dollars and cents.

Secondly, a merchant should be

HONEST WITH HIS PATRONS.

This implies that there should be on hand a well-arranged stock of merchandise, kept in neat and attractive manner. It means, also, that it is incumbent on him to give honest value, full weights and correct measurements. It means, too, that there should be absolutely no misrepresentation. Trading stamps, chromos, prizes and other subterfuges should not be employed to secure patronage. The unreasonable plaints that arise in the life of the merchant should be met with tact and diplomacy and the patron appeased if possible, but not at the cost of principle or self-respect.

A merchant should also be honest with his fellow business men. This implies that when called upon to give his experience with regard to the standing of a certain customer, the information should be candid and reliable. This brings us face to face with the most deplorable feature of mercantile life, viz., loss sustained through worthless accounts.

Mr. Murphy here gave statistics which he had gathered from commercial agencies, and which showed that the aggregate loss because of liabilities involved in failures in the United States from 1890 to 1899, inclusive, was $1,788 719,267. The average loss for each year was thus $178,871,026.70. The average was more than the total capital of the 209 State banks, the 60 trust companies and the 326 National banks in the State of New York in the year 1900. It exceeded their aggregate capital by more than $10,000,000.

GUARDING AGAINST LOSSES.

"How are we to guard against excessive losses?" continued Mr. Murphy. "This question comes home to everyone present. There is no serious question about the truth of the common expression that 'credit is too cheap,' nor about the kindred saying that 'credit is too freely granted.' Credit should always be judiciously granted, and never indiscriminately or in a haphazard manner. A man who grants credit should be a good judge of human nature, and with tact and discretion should secure proper information from the applicant for credit as to his financial and moral responsibilities, who his references are, and, also, whether he is disposed to comply in every respect with the terms of settlement submitted to him. There should be a distinct understanding as to the amount of the account, since every account should have its limit, and, also, that the obligations contracted shall be discharged at least monthly.

COURAGE TO SAY 'NO.'

"You must have courage to say 'no' to the unworthy applicant, and there are many of this class who apply for credit without having any basis whatever for such favors. You find competition sharp and the margin of profit necessarily small, and, therefore, you are not warranted in taking unreasonable financial risks. You are not warranted in taking all the possibilities of failure to pay, such as sickness, loss of situation, etc., on the part of the debtor.

RIGHTS OF DEBTORS.

"In our dealings with the debtor class, we must not forget that they have some rights that we are bound to respect. We must discriminate between the reprehensible debtor, who can pay, but will not, and the unfortunate debtor, who is well disposed, but, through circumstances, is unable to pay his honest obligations. The first are clearly without the pale of our sympathy, while the latter are worthy of considerate treatment, and should not be numbered among disreputable debtors. We must be ever on our guard against the vicious debtor, who, with fervid eloquence and brazen assurance, goes from merchant to merchant with the studied purpose of adding another name to the long list of those whom he has already shamefully and criminally defrauded."

MANITOBA MARKETS.

Winnipeg, August 26, 1902.

IT is a little difficult to say anything new along this line as business is so good in all lines and changes in prices few and far between. It is quite safe to say that every hardware jobbing house in Winnipeg has all the business it can handle with comfort. There is no better barometer of the hardware trade than the additions being made this year to the already exceptionally large warehouses of the trade. George D. Wood & Co.'s space will be increased more than one half. The J. H. Ashdown Co., Limited, have about doubled theirs and The Marshall-Wells Hardware Co., that started here the last of all the hardware houses, is also erecting a very large addition to their present warehouse, although when it was erected three years ago they expected to rent a portion of it for a time until their business should justify the occupation of the whole of it. Implement and carriage firms are also extending their premises. The Cockshutt Plow Co. has a large warehouse and showroom in course of erection on Princess street. The Fairchild Co.'s new track warehouse is nearly completed and to-day The McLaughlin Carriage Co. completed the purchase of a lot 99 x 100 feet on the corner of Princess street and Ross avenue, and on Tuesday next will call for tenders for the erection of a four-storey and basement solid brick and stone building 50 x 98 feet on same. To old-timers in Winnipeg the site of this building will be familiar as that on which the old Grand Union hotel stood for so many years. These are just a few of the evidences of growth in hardware and implement circles.

All classes of structural hardware, nails and building paper are very active. Shipments of binders and mowers are practically over, but there is great activity in threshing outfits and repairs.

The price list of last week is unchanged, although a drop in linseed oil is expected in a few days :

AN ENJOYABLE HOLIDAY.

On Saturday, August 23, the employes of The Dominion Bridge Co., Montreal, held their annual picnic at Otterburn Park. An excellent programme of races and games was provided, and the event was looked upon as one of the most successful of the year. Among the distinguished visitors present was Mr. F. D. Monk, M.P., who contributed not a little towards making the occasion an enjoyable one. Mr. E. Adler, superintendent of the works, was another who took a great interest in the proceedings. All the events were entered into with keen enjoyment, and nothing whatever occurred to mar the pleasure of the picnicers during the day.

RETURNED

Dealers, do you want to sell your Goods ?

If so, you doubtless realize that the goods must be the best of their kind in quality and workmanship. This is especially true of Paint Brushes. For nearly half a century

Boeckh's, Toronto, and Bryan's, London, Brushes

have been upon the market. They are in the very front rank as ready sellers because their manufacturers' highest and constant aim is to please both dealer and purchaser. Larger facilities in making now enable us to manufacture better goods than ever, and at lower prices, with the widest margin of profit to dealers.

—If one of our representatives has not yet called upon —you and you are in a hurry for goods, write, tele- —phone, or telegraph at our expense.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, August 29, 1902.

HARDWARE.

WHOLESALERS report themselves still very busy, though the season of fall fairs is now at hand and this will naturally tend to decrease the demand for a while. Trade in fall and winter lines is rapidly increasing. Cow ties, which are discounted at 40 per cent., stall fixtures, lanterns, halters, sleighbells, etc., are moving actively. The demand for cutlery has increased considerably and the market is quite active. Guns and ammunition are also moving well, and jobbers report business in such articles better than last year.

BARB WIRE.—There is very little doing in this wire. With the exception of an odd order or two, business, for the season is over. The price is $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—Trade is rather quiet, though all houses report some business being done at the following prices: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—This moves along about as usual with nothing special to report, and our quotations are now as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is but a very light demand for fine wire. The discount is 25 per cent. with net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—The market is still quiet. The discount on both wires is 62½ per cent.

FENCE STAPLES.—Business in staples is dull and uninteresting. Galvanized staples sell at $3.25 per 100-lb. keg and bright at $2.90, with an extra of 25c. for 25 and 50-lb. packages.

WIRE NAILS.—There is still a moderate demand for wire nails at unchanged prices. In small lots the price is $2.55 and in carlots, $2.50 f. o. b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Business is reported slightly improved this week and a fair trade is doing. Prices are unchanged at $2.37½ per keg, in carlots and $2.45 per keg in small lots.

HORSE NAILS.—There is a good demand just now. Some scarcity is reported in "Countersunks." We quote: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 60 per cent.; "New Countersunk," 67½ per cent.; "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—These are moving out well at steady prices, and we quote as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—Nothing of importance has occurred in this market. A fair trade is doing. We quote the discounts as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—The demand is practically over in this market for the season, and but little business is doing now. Quotations follow: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is no change to report in this line. A fairly good business is being done. Discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—The market continues active and steady. No quotable change is reported, and we quote the discounts as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The market for building paper is quiet and no new prices are quoted. Quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3- ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll

SCREEN WIRE CLOTH.—There is little doing in this line. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—A few orders are being received, but trade, in general, is quiet. The discounts on Canadian or English netting are: 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used. For delivery in 1903 the discounts are 60 per cent. off for 19 wire and 55 per cent. off for heavier.

HARVEST TOOLS.—There is nothing doing. The discount remains at 60 per cent.

FIREBRICKS.—These move slowly. English sell at $16 to $22 and Scotch at $17 to $22 per 1,000.

CEMENT.—There is not much demand for cement at present. We quote as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—There is a very good demand for these at present. Guns and ammunition are particularly active. Shells are discounted as follows: Empty, Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded, "Trap,"

The shelves of the paint trade of Canada must eventually become filled with **The Choice of The People—**

"Ark Brand"

The experience of our customers is that "Ark Brand" is daily becoming more popular, and, consequently, more profitable.

If we are not represented in your town drop us a card and we will make arrangements with you. Don't delay. New agencies are being established everywhere, and your town may be the next.

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

30 per cent.; American, 30 per cent. "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SNOW SHOVELS.—There is a fair deamnd for these, and business is improving. We quote: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—Trade is increasing in these as the season advances. We quote: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

METALS.

There has been no material change in the situation of metals. Locally, there has been a good demand for all lines and in all except one or two items, stocks are amply sufficient to fill orders. The foreign markets have ruled steady and no marked change is reported.

PIG IRON.—There is no change in this market. All the iron that can be produced is quickly taken up. We quote as follows: Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—Trade continues good at steady prices. Merchants' bar is now quoted at $1.95 to $2 and horseshoe iron. $2.20.

BLACK SHEETS.—A fairly good demand exists. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is active. No quotable change is reported. Prices are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—This is moving somewhat better, but trade is still rather quiet. The price is 14c.

INGOT TIN.—This is moving about as usual with nothing of special interest to report. Straits is quoted at 33½c.

PIG LEAD.—The price is $3.25. There is not much doing.

LEAD PIPE.—Some improvement is noted in the demand for lead pipe this week. Composition and waste are quoted at 8c. and ordinary, at 7c., with the discount at 37½ per cent.

IRON PIPE.—Business is fairly good in this line. Prices are unchanged. Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The market is still on the quiet side and featureless. The price quoted is $4.75 to $5.25 for charcoals and $4.25 for cokes.

CANADA PLATES.—One or two jobbers report themselves still short of 60-sheet Canada plates, but supplies are arriving by almost every vessel and all orders can easily be filled. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—But little business is doing this week. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—No improvement is noted in the market for sheet steel and trade is still quiet at the following prices: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—There has been no change in the market, which is very quiet. Quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—Trade continues quiet. The price is $7.50.

COIL CHAIN.—This moves slowly. No quotable change has occurred. Prices are: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7½c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is no change. A small amount of business is dokng at $5.85 to $6.25.

ANTIMONY.—Jobbers are quoting this at 10c. The demand is very light.

ZINC SPELTER.—The price of spelter

remains at 5c. Some jobbers report an increased demand during the past week.

SOLDER.—No new feature has developed on this market. There is a good, steady demand at the prices following: Bar solder, 18c. and wire solder, 20c.

PAINTS AND OILS.

Business in most staple lines has been fairly active since our last report and no changes in prices have been reported. In paris green there is now practically nothing doing, and prices quoted are purely nominal. White lead keeps its place at the front, and shows probably more activity than any other line. Orders have been distributed evenly, so that each manufacturer is getting his share of the trade, there being little difference in the quotations. Linseed oil continues in good demand, and although arrivals are frequent stocks have not accumulated. In turpentine, there is no change. Reports from the South give the market as a little firmer, but no advance is looked for nor is it likely that any appreciable decline will take place. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.25; No. 1, $4.87½; No. 2, $4.50; No. 3, $4.12½; No. 4, $3.75 all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

The Popular Goods

Ceilings and Walls

give the acme of satisfaction at moderate cost. They please the most æsthetic as well as practical tastes. Artistically beautiful, almost indestructible, sanitary, easily applied, and almost countless designs to select among.

There's big business in selling these goods—are you ready for it?

THE METALLIC ROOFING CO., Limited,
TORONTO, MONTREAL, WINNIPEG.

SCRAP METALS.

The market for scrap materials has been quiet and uneventful during the past week. Zinc is still reported a little scarce and the price is well maintained. Other lines are steady at unchanged prices. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6 to 6¼c. per lb.

GLASS.

Business is dull in glass. Only a few sorting orders are being received. Quotations are: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The market has strengthened somewhat and beef hides and lambskins are quoted at a higher figure. There has been a good demand. We quote: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 45 to 50c.

MARKET NOTES

Beef hides are ½c. higher all round.

Lambskins have advanced 5 to 10c.

ONTARIO MARKETS.

Toronto, August 29, 1902.

HARDWARE.

THE general hardware trade is keeping up well, but the orders are not as heavy as they were or as numerous. It seems that buyers in the country are preparing to take advantage of the low rates prevalent during the next two weeks to visit Toronto during Exhibition, and wholesale houses are looking for a large number of visitors. It would be wise for those coming to the Exhibition to prepare a list of the things they require so as to do their business without much delay.

BARB WIRE.—Trade in this line is quiet. We quote in carlots, $2.65 and in less than carlots, $2.77½ f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—Some business is doing in galvanized wire in small lots. Quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—This line is quiet and the prices are unchanged. We now quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Trade in this line is moderate. There is some stovepipe wire going out. The discount is 25 per cent.

WIRE NAILS.—There is a steady business being done in wire nails. We quote $2.50 for carlots and $2.55 for less than carlots. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A small amount of trade continues to be done in cut nails, and the prices are unchanged. We quote $2.45 per keg and $2.37½ for carlots.

HORSE NAILS.—A good deal of business continues in these on account of the manufacturers intimating higher prices. We now quote as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—The volume of trade doing is small and prices are thoroughly demoralized. There is now no associa-

tion to control prices, which, in the west, on some lines, are quite demoralized on this account. We quote the base price: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The demand for these continues to exceed the output of the manufacturers, who are still hampered by the scarcity of raw material. Quotations are as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—An active market in these lines continues without any change in prices. Our quotations are now as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for bolts and nuts is heavy and the deliveries from the factories continue light. We quote: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SCREEN DOORS AND WINDOWS.—A small trade is doing in these at unchanged prices. Our quotations are as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—A few orders are being taken for delivery next year. The price is $1.37½ per 100 ft.

SPADES AND SHOVELS.—A steady trade is doing in these. The discount continues unchanged at 40 and 5 per cent.

ROPE.—Trade in rope continues steady. Our quotations are as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—The situation is unchanged from last week. We quote: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—There is still a small sorting-up business doing in harvest tools. The discount is 60 per cent.

EAVETROUGH, ETC.—Quite a sorting-up trade in eavetrough and conductor pipe is being experienced by jobbers. We quote: Eavetrough, $3.10 per 100 square feet, for 10-inch, and conductor pipe at $4 for 3-inch, and $5.25 for 4-inch.

BUILDING PAPER.—A good business continues in this line. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

HARVEST WHIPS.—The season for these is over.

POULTRY NETTING.—This line is quiet.

SPORTING GOODS.—The general trade in sporting goods continues heavy at unchanged prices.

CEMENT.—Manufacturers of cement are crowded with an excess of orders which they are unable to fill immediately. Numerous inquiries keep coming forward, but no new contracts are being taken, as the manufacturers are now much behind in their deliveries. An inquiry was made from Pittsburg last week for 500,000 barrels, but had to be passed over by the manufacturers. Quotations now are as follows: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 upwards per barrel.

METALS.

The general metal market is in good condition and a heavy fall trade is anticipated. Prices can be said to be normal in all lines, and in English B.S. ingot copper a reduction of 50c. per 100 lb. has been made. Imported pig lead is also weaker. On the outside markets tin is weaker, copper is steady, and pig iron is at a standstill.

PIG IRON.—The market continues strong and a good trade, locally, is still doing. We quote f. o. b. furnaces: No. 1 foundry, $20.50 to $21.

STEEL BOILER PLATES.—A fair trade keeps up in steel boiler plates. We quote $1.80 for carload lots on track, Toronto.

STEEL RAILS.—Electric railway rails are quoted at $1.80 for carload lots on track, Toronto.

TOOL STEEL.—A fair amount of business continues in tool steel. The market is steady. Quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The volume of business in mild steel is fair.

SPRING STEEL.—The market continues fairly active in this line.

BOILER TUBES.—The demand for these keeps up fairly well at unchanged prices.

BAR IRON.—The local market for bar iron is quite active with a good inquiry. The United States market remains very quiet. He quote as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is no change in the trade in this line. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—The movement for fall trade is starting up and stocks are light in some cases. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—The demand for these is active, and our quotations are now as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

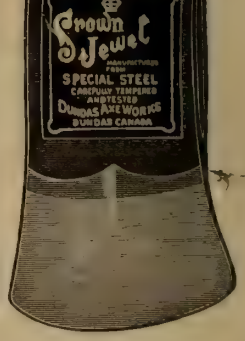
..A..
STANDARD.



The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.
Dundas Axe Works, Dundas, Ont.
W. L. Haldimand, Jr., Eastern Agent, Montreal.

TIN.—The demand is active this week, both for small and large lots. The base price is quoted at $32 to $33 per 100 lb.

TINPLATES.—These are in fair demand at unchanged prices. We quote charcoal, $4.75 to $5 per box and cokes, $4.25 per box.

COPPER.—A reduction of 50c. per 100 lb. has been made in the prices of ingot copper; sheet remains unchanged. Ingot copper is in good demand. We quote as follows: Ingot copper, $13.50 per 100 lb. and sheet copper, $22 to $23.

BRASS.—Trade in brass continues fair. The discount is 15 per cent.

PIG LEAD.—Pig lead continues in steady demand. We quote: Pig lead, $3.50 and bar, $3.75.

IRON PIPE.—Business in iron pipe is keeping up well. We now quote per 100 ft.: $\frac{1}{4}$-in., $2.40; $\frac{3}{8}$-in., $2.65; $\frac{1}{2}$-in., $2.85; $\frac{3}{4}$-in., $3.65; 1-in., $5.20; 1$\frac{1}{4}$-in., $7.35; 1$\frac{1}{2}$-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—The demand is good and stocks are light. We quote 5 to 6c. per lb.

ZINC SHEETS.—These are in fair demand. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Business in solder continues steady.

ANTIMONY.—The market for antimony is more active. We quote $19.50 per 100 lb.

PAINTS AND OILS.

The general paint and oil business seems to be more active than last week. There is some demand for raw and boiled linseed oils and spirits of turpentine, but the stocks of these articles in the hands of local jobbers seem to be light. The sales of the former have been larger than anticipated some time ago, when the jobbers were stocking up for their summer trade. A fair amount of business continues doing in dry colors and white zinc. Liquid paints are stagnant on account of the unsatisfactory condition of the white lead market, which is demoralized. There are various quotations being made by different manufacturers, which vary according to the quantity sold. A good business is reported in white leads, as dealers and consumers, generally, seem to be taking advantage of the low prices to lay in stocks. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, 4.62\frac{1}{2}$ to 4.87\frac{1}{2}$; No. 2, $4.25 to $4.50; No. 3, 3.87\frac{1}{2}$ to 4.12\frac{1}{2}$; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; $\frac{1}{2}$c. per lb. extra will be charged for 12$\frac{1}{2}$-lb. pkgs.; genuine dry white lead in casks, 5.02\frac{1}{2}$.

RED LEAD.—Genuine, in casks of 560 lb., $5 to 5.12\frac{1}{2}$; ditto, in kegs of 100 lb, $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6$\frac{1}{2}$c.

ORANGE MINERAL.—Genuine, 7$\frac{1}{4}$ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18$\frac{3}{4}$c. per gal.; gasoline, ordinary, 21$\frac{1}{4}$c., and engine, 22$\frac{1}{4}$c. f.o.b. Toronto.

CASTOR OIL.—English, in cases, 9$\frac{1}{2}$ to 10c. per lb. and 10 to 10$\frac{1}{2}$c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 79c.; boiled, 82c.; 3 to 5 barrels, raw, 78c.; boiled, 81c.; 6 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil, sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 69c.; 2 to 4 bbls., 68c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

Jobbers are busy with their importations from Europe, which are now arriving satisfactory. A large trade in glass

is anticipated this fall. Quotations are as follows: Under 26 inch, $4.45; 26 to 40 in., $4.65; 41 to 50 in., [illegible] 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Trade, generally, in old material is good and the receipts are nominal. No. 1 wrought iron has declined $2; machinery cast, $1 and old rubbers, 1c. per lb. We quote as follows: Heavy copper and wire, 10 to 10¼c. per lb.; light copper, 8 to 8½c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2¾c.; iron, No. 1 wrought, $12 per net ton; No. 2 wrought, $6; machinery cast scrap, $13 to $14; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—There is a fair demand for hides, and stocks are bought up well. The market is steady. We quote: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—Trade in skins is fair and the stocks are readily bought up. We quote: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings, and lambskins, 40c.

WOOL.—The market for this article is inactive and prices are steady. Fleece wool is quoted at 13½c. and unwashed, 7½c. per lb.

TALLOW.—There is a good demand for tallow and prices are firm. We quote 6¾ to 7c. per lb.

COAL.

The situation in hard coal remains unchanged. Stocks of the article in Toronto are becoming smaller and no deliveries are being received from the mines. We quote: Soft coal, at international bridges and Buffalo, $3 to $4.50 per ton.

PETROLEUM.

The volume of business in petroleum is increasing and prices are steady and unchanged. Our quotations are as follows: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Ingot copper has declined 50c. per 100 lb.

Lewis Brothers' western representatives will be at 87 York street, Toronto, the next two weeks to receive their friends who may be in town then.

The proprietors of The Winnipeg Linseed Oil Mills are considering a proposition to put their plant into a local joint stock company with ample capital to expand the present line of business, and if found expedient, add a paint manufactory, and as general buyers and exporters of flax seed.

INDUSTRIAL GOSSIP.

A BIG tinplate manufacturing company of Chicago is talking of coming to Hamilton to manufacture tinplate, not only for its own tin factory in prospect there, but for the tin trade of the Dominion.

The Manitoba Provincial Department of Public Works is calling for tenders for the removal of the steel bridge spans now lying in the Assiniboine River near Portage la Prairie, and also for tenders for the erection of a pile bridge over the Assiniboine River at Portage la Prairie.

Messrs. Budd, of Villinova, and J. B. Smith, of Ridgetown, arrived at North Bay lately for the purpose of starting a sawmill on the line of the new railway to the north of the town.

The Carleton Foundry Company have begun business in their new premises on Market Place, Carleton, N.B. They are well equipped and energetic and should make a good showing in their new and commodious works.

The first instalment of the plant for the manufacture of brick by The Cape Breton Silicate Brick Company, arrived at North Sydney on August 19, and the balance will follow shortly. The foundation of the building has been laid out and soon the work of construction will commence.

The Goldie, McCulloch Company, of Galt, Ont., who have been forced to extend their works, are contemplating the purchase of the Shurly & Dietrich factory buildings, which join their premises. These, in June last, were considerably damaged by fire. Should this come to pass it is expected that Shurly & Dietrich will build new factories on the property north of the C.P.R.

Figures for July production of Le Roi mine, Rossland, B.C., just received, show that in round numbers $200,000 was recovered for the month, while the profit is placed by Manager Mackenzie at $108,000. This is by far the largest sum ever realized in any single month in the history of the mine. The returns for August are expected to exceed the figures given for July. The first War Eagle-Centre Star ore shipments commenced August 21, 300 tons going out. The management promise a daily average shipment of 450 tons. Miners for both properties are advertised for August 22. The management announced they will materially increase the force and are unable to obtain the men.

NEW STEEL SHIP.

At a meeting of the new Algoma Navigation Company, formed to assume the management of the O.S.G.B. Soo Line, A. Miscampbell, M.P.P., who recently went West to look up a suitable boat to place on the line between Owen Sound and the Soo in time to handle the increased traffic in the fall, reported that none of those available possessed the required speed to make two trips a week, and call at all the intermediate ports. After considerable discussion it was decided to order a new boat at once. The construction of the vessel will be placed in the hands of The Bertram Shipbuilding Co., at Toronto, the estimated cost being about $110,000. The new steamer will be constructed entirely of steel and will be 190 feet in length by 34 feet beam. She is to have a capacity of 700 tons, with about 50 state-rooms and first-class sleeping accommodation for 110 passengers. She will be heated by steam, lighted by electricity, and modern in every respect. Her speed will be 16 miles an hour, this being necessary in order to make two trips a week between Owen Sound and the Soo via the present route.

PIPE FOUNDRY FOR GUELPH.

On August 26 the city council of Guelph held a special meeting to discuss an agreement for the manufacture of all kinds of iron pipe, similar to the products of The Page-Hersey Iron and Tube Co., of Montreal. The agreement provides that the company shall erect a pipe mill in Guelph. It is understood the building and plant will cost $120,000. The mill will be erected on a switch of the Guelph Junction, C.P.R., and all shipments will be made over that road. The company is to make 5,000 tons of iron pipe per annum, employ not less than 125 hands, and the pay-roll must not be less than $100,000 a year. Should fire destroy the mill the company agrees to rebuild it, and if by strikes or other causes over which the company has no control the output should fall short in any way one year of the stipulated quantity, the company agrees to make up the shortage in the following year. The city is asked to supply a site of ten acres, and give ten years' exemption from taxes. It will also have to give a bonus of $40,000, $15,000 of which must be paid ten days after the mill is put in successful operation, and the balance annually at the rate of $1 for every ton of pipe turned out. In no one year, however, is more than $5,000 to be paid. The Coffee property, adjoining the waterworks, on which an option price of $2,000 has been secured, is favored for the purpose.

ACETYLENE BURNERS.

ACETYLENE BURNERS — NON-CARBONizing: absolutely perfect. Sample, 30 cents. ECONOMIC BURNER CO., TORONTO. (35-2)
